Take notice that on December 9, 1991, Southern Company Service, Inc., acting on behalf of Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company, and Savannah Electric and Power Company, tendered for filing supplemental information in connection with Amendment No. 2 dated October 31, 1991 to The Southern Company System Intercompany Interchange Contract and Allocation Methodology and Periodic Rate Computation Manual ("Manual").

Southern Companies are proposing to revise the Intercompany Interchange Contract and the Manual to simplify the procedure for determining capacity purchases from and sales to the pool, as well as the methodologies used to determine the capability of various types of generating units. Southern Companies request that the amendment be allowed to become effective on January 1, 1992. The supplemental filing contains additional information regarding the revisions incorporated in Amendment No. 2.

Comment date: December 24, 1991, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary

BILLING CODE 6717-01-M

[Project No. 1333-001]

Pacific Gas and Electric Co. California; Availability of Environmental Assessment

December 11, 1991.[1]

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for new license for the existing Tule River Project, located on the Tule River and its tributaries in Tulare County, California, near the town of Porterville, and has prepared an Environmental Assessment (EA) for the project. In the EA, the Commission's staff has analyzed the existing and potential future environmental impacts of the project and has concluded that approval of the project would not constitute a major Federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, room 3104, of the Commission's offices at 941 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary

BILLING CODE 6717-01-M

[Docket No. JD92-01587T Wyoming-24]

State of Wyoming; NGPA Notice of Determination by Jurisdictional Agency Designating Tight Formations

December 12, 1991.

Take notice that on November 25, 1991, as supplemented on December 9, 1991, the Wyoming Oil and Gas Conservation Commission (Wyoming) submitted the above-referenced notice of determination pursuant to

[1] Supercedes the Commission s Notice of Availability of Environmental Assessment dated November 25, 1991.

§ 271.703(c)(3) of the Commission's regulations, that the Muddy Sand and Dakota Sand Formations within a portion of the Mary Draw Field, Campbell and Converse Counties, Wyoming, qualify as tight formations under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The notice covers all of section 26, Township 41 North, Range 72 West, Campbell and Converse Counties, Wyoming.

The notice of determination also contains Wyoming's findings that the referenced portion of the Muddy Sand and Dakota Sand Formations meet the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 10769-001 Ohio]

Alpyn Creek Development Corp.; Surrender of Preliminary Permit

December 11, 1991.

Take notice that Alpyn Creek Development Corporation, permittee for the Big Ice Creek Energy Storage Project located within the town of Ironton, Lawrence County, Ohio, has requested that its preliminary permit be terminated. The preliminary permit was issued on August 14, 1989, and would have expired on July 31, 1992.

The permittee filed the request on November 21, 1991, and the preliminary permit for Project No. 10769 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR part 4, may be filed on the next business day.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. SA92-1-000]

Coastal States Gas Transmission; Petition for Staff Adjustment Under NGPA Section 502(c)

December 11, 1991.

Take notice that on December 4, 1991, Coastal States Gas Transmission Company (Coastal) filed with the Commission, pursuant to section 502(c) of the Natural Gas Policy Act of 1978 (NGPA) and part 385 (subpart K) of the Commission's regulations, a petition for adjustment to permit Coastal to use its tariff on file with the Railroad Commission of Texas (Texas Commission) for services performed pursuant to section 311 of the NGPA. Coastal asserts that since it does not render city-gate service, the Commission should authorize an adjustment under section 502(c) of the NGPA to prevent special hardship and inequity that would otherwise result if Coastal were required to submit a § 284.123(b)(2) filing.

In support of its petition, Coastal says that it is an intrastate pipeline which operates natural gas pipeline facilities located in various counties in the State of Texas and is engaged in the transportation of gas subject to the jurisdiction of the Texas Railroad Commission. Coastal's transportation rates are subject to regulation by the Texas Commission and have been filed with the Texas Commission. Specifically, Coastal here seeks an adjustment to allow it to use an existing tariff currently on file with the Texas Commission as the fair and equitable rate for transportation services to be performed under section 311 of the NGPA on certain of its pipeline facilities located in Clay and Wichita Counties, Texas.

Any person desiring to be heard or protest this petition should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before January 2, 1992. All protests filed will be considered, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene in accordance with the Commission's rules. Copies of this petition are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 2596-002]

Rochester Gas & Electric Corp.; Filing of Application

December 11, 1991.

Take notice that on December 4, 1991, the Rochester Gas and Electric Corporation filed an application to relicense the Mt. Morris Hydroelectric Project No. 2596-002.

The Mt. Morris Project is located on the Genesee River, in Livingston County, New York. The project consists of a 21-foot-high dam, a 4.5-acre reservoir, and a powerhouse with an installed capacity of 3.881 MW. The licensee proposes to rehabilitate the existing turbine/generating units and replace the turbine runners increasing the capacity from 1.667 MW. The current operating license expires December 31, 1991.

If any resource agency, Indian tribe, or person believes that an additional scientific study should be conducted in order to form an adequate factual basis for a complete analysis of the application on its merits, a request for the study, together with justification for such request in accordance with § 4.32 of the Commission's regulations, must

VOL 56 ISS 243 DEC 18 1991 UMI

be filed no later than 60 days after the date of filing.

[Project No. 2357-003]

Wisconsin Electric Power Co.; Filing of Application

December 11, 1991.

Take notice that on October 21, 1991, the Wisconsin Electric Power Company filed an application to relicense the White Rapids Hydroelectric Project No. 2357-003.

The White Rapids Project is located on the Menominee River, in Menominee County, Michigan and Marinette, Wisconsin. The project consists of a 27-foot-high dam, a 435-acre reservoir, and a powerhouse with an installed capacity of 8.0 MW. The licensee proposes no changes in operation or new construction for the project. The current operating license expires December 31, 1991.

If any resource agency, Indian tribe, or person believes that an additional scientific study should be conducted in order to form an adequate factual basis for a complete analysis of the application on its merits, a request for the study, together with justification for such request in accordance with § 4.32 of the Commission's regulations, must be filed no later than 60 days after the date of filing.

Lois D. Cashell,

Secretary

BILLING CODE 6717-01-M

Office of Energy Research

Special Research Grant Program Notice 92-2: Pre-Service Teacher Enhancement Program; Inviting Grant Applications

AGENCY: Department of Energy.

ACTION: Notice inviting grant applications.

SUMMARY: The Office of Energy Research (ER) of the Department of Energy (DOE) announces its interest in receiving, from four-year accredited institutions of higher education, special research grant applications that will support innovative pre-service approaches to encouraging science and mathematics majors to become precollege teachers. Examples of pre-service approaches include but are not limited to: programs which emphasize transfer of research experiences to the classroom; intern programs and in-school activities which provide the potential teacher with quality experiences working under the guidance of a master teacher through college/university-school system collaboration; conferences to explore effective mechanisms to encourage science and math majors, including women, underrepresented minorities and the handicapped, to pursue careers as precollege teachers; programs to encourage high school students to pursue science and mathematics majors with the goal of entering the precollege teaching profession; programs which encourage students majoring in science and mathematics to become elementary school teachers or specialists; and college/university programs which include content specific pedagogy, utilization of faculty who exhibit best teaching strategy and current experience in the precollege classroom, and collaboration between the science/mathematics and education departments.

This program anticipates awarding funds only from FY 1992 appropriations. It is estimated that $400,000 will be available to fund 10-15 new projects with the maximum award being $40,000.

DATES: To permit timely consideration for award in Fiscal Year 1992, formal applications submitted in response to this notice should be received no later than 4:30 p.m., February 12, 1992. No electronic submissions of formal applications will be accepted.

ADDRESSES: Completed formal applications referencing Program Notice 92-2 should be forwarded to: U.S. Department of Energy, Division of Acquisition and Assistance Management, ER-64, Office of Energy Research, Washington, DC 20585. Federal Express address is: U.S. Department of Energy, Division of Acquisition and Assistance Management, ER-64, Office of Energy Research, 19901 Germantown Road, Germantown, MD 20874.

FOR FURTHER INFORMATION CONTACT: Cindy Musick, Program Manager, Office of University and Science Education Programs, ER-80, Office of Energy Research, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585 (202) 586-0987.

SUPPLEMENTARY INFORMATION: The DOE is strongly committed to increasing the number of students interested in science, mathematics and technology careers, including an increase in the number of students majoring in science, mathematics and technology who will become precollege teachers. In accordance with 10 CFR 600.7(b)(1), eligibility for awards under this notice is limited to four-year accredited institutions of higher education because students participating in this program must be prepared to teach at the pre-college level upon graduation by attaining certification through an accredited teacher education program. Collaborative efforts are encouraged and may include, but are not limited to: A significant involvement and commitment of the participating local school system(s); enterprises which utilize the scientific and technical expertise of research facilities including the DOE national laboratories and other research contractors, particularly for research experiences; and the broader educational community, including science museums/science centers. Other elements which may strengthen applications include, but are not limited to, the utilization of master mathematics/science teachers; the commitment of the institution of higher education to support this project by providing financial support through the provision of scholarships, forgivable loans or other incentives; academic credit for research or in-school experiences for the participating students; and effective on-campus programs. All applications are required to have an evaluation component which demonstrates the effectiveness of the program.

Information about the development and submission of applications, eligibility, limitations, evaluations and selection processes, and other policies and procedures are contained in the ER Special Research Grant Application Kit and Guide. The application kit and guide and copies of 10 CFR part 605 are available from the U.S. Department of Energy, Office of Energy Research, Office of University and Science Education Programs, ER-80, Washington, DC 20585. Telephone requests may be made by calling (202) 586-8949. The Catalog of Federal Domestic Assistance Number for this program is 81.049.

Subject to the availability of appropriated funds, DOE expects to make several grants in FY 1992 to meet the objectives of this program. It is anticipated that $400,000 will be the total funds available in FY 1992. The size of each grant will be limited to a maximum of $40,000.

This notice requests further that the "Detailed Description of Research Work Proposed" component of a complete grant application as established by 10 CFR part 605 should not exceed 15 double-spaced, typed pages. This description of work should include the conceptual design and how that design relates to the program objectives; the target audience(s) the project will serve and efforts planned to serve that audience; the mechanisms to be used to organize and manage the project, including the rules and responsibilities, financial and otherwise, of any partnerships; the monitoring and evaluation plan, including how those plans can be used for possible project modification; the planned outcomes and how these outcomes will be assessed and reported; and the anticipated significance of the project and how it will be confirmed.

D.D. Mayhew,

Deputy Director for Management, Office of Energy Research.

[FR Doc. 91-30196 Filed 12-17-91, 8:45 am]

BILLING CODE 6450-01-M

Special Research Grant Program Notice 92-6: Generator and Large Motor Applications of Superconductivity

AGENCY: Department of Energy (DOE).

ACTION: Notice inviting grant applications.

SUMMARY: The Office of Program Analysis, Office of Energy Research of the Department of Energy, hereby announces its interest in receiving applications for a Special Research Grant that seek support for conducting a research needs assessment in the area of superconductivity as it relates to electric power generators and large motor applications. The purpose of this activity is to identify and disseminate priority research needs for achieving high efficiency utilization of state of the art development in superconductivity with superior economic, environmental, and performance potential. This project should not focus on topics such as those requiring liquid helium for operation.

Applicants must include a description of the planned methodology that will be used in assessing long term (up to 20 years) research directions, opportunities, priorities, and degrees of difficulty in accomplishing identified research opportunities.

Applicants must enlist the aid of experts from academia and industry to identify, describe, and assess on a worldwide basis, the most promising new (i.e. beyond state of the art) developments, applications, and opportunities in science and technology to facilitate the future utilization of superconductivity for power generators and large motor applications.

APPLICATION INFORMATION: Information about submission of applications, eligibility, limitations, evaluation, selection processes, and other policies and procedures may be found in the Application and Guide for the Special Research Grant Program. The application kit and guide and copies of 10 CFR part 605 are available from Paul Maupin, Office of Program Analysis, Office of Energy Research, U.S. Department of Energy, ER-33, Washington, DC 20585. Instructions for preparation of an application are included in the application kit. Telephone requests may be made by calling (301) 903-4355 or FTS 233-4355. The Catalog of Federal Domestic Assistance number for this program is 81.049.

DATES: Formal applications submitted in response to this notice should be received by March 1, 1992.

ADDRESSES: Formal applications sent by U.S. Mail should be addressed to: U.S. Department of Energy, Office of Energy Research, Division of Acquisition and Assistance Management, ER-64, Washington DC 20585, Attn: Program Notice 92-6. The following address must be used when submitting applications by U.S. Postal Service Express, any commercial mail delivery service, or when handcarried by the applicant: U.S. Department of Energy, Office of Energy Research, Division of Acquisition and Assistance Management, ER-64/GTN, 19901 Germantown Road, Germantown, MD 20874.

SUPPLEMENTARY INFORMATION: In the United States, efforts to harness superconductivity in high power applications have been made for over 30 years. Due to economies of scale and costs the most likely first impact made by this technology in the energy field will be in the area of power generation and large motor applications. A significant effort to apply superconductivity to large scale components was already underway prior to the rapid development of the higher temperature superconductors. Despite considerable technical success with prototypes of generators and motors, the technology is not strongly pursued in this country.

In contrast, superconducting power generators are currently under development in Japan, Germany, France, and Russia albeit, utilizing the lower temperature superconductors. In Japan alone, a major financial commitment has been made for achieving the national goal of dominating superconducting generator technology (Super GM project). The reason for this commitment is obvious because, although current generators are relatively efficient, an increase in their efficiency can result in reduced fuel consumption and pollutant emissions. Application to other areas such as large motors would amplify the benefits.

To bring the U.S. up to parity with the competition requires a coordinated, multidisciplinary effort from the developmental state to the systems scale. The application of higher temperature superconductors to generators and large motors requires a detailed technical strategy. A careful review and identification of the technical obstacles to be addressed by U.S. science and engineering is of paramount importance to provide an efficient technical plan.

To address the objectives discussed above, the Office of Program Analysis of the Office of Energy Research has coordinated with the DOE Office of Conservation and Renewable Energy and is planning to award a grant for a research needs assessment for generator and large motor applications of superconductivity. The Office of Program Analysis plans to publicly disseminate the results and findings of this research needs assessment in a report. Specific information concerning requirements for the application follow.

The principal investigator of the assessment must be an individual who is competent and accomplished in

VOL 56 ISS 243 DE 18 1991 UMI

appropriate scientific and technical areas. Competence and accomplishments shall be described in the application which shall address industrial or academic experience, research publications, contributions while serving as an expert, consultant services, honors and awards, and education including advanced degrees and other academic qualifications. The principal investigator also shall be an individual with demonstrated ability to conduct research needs assessments for the utilization of superconductivity in generator and motor applications and manage individual experts and groups of experts in the timely and successful identification, analysis, distillation and documentation of scientific and technical information. These demonstrated abilities shall be documented in the application.

The applicant, in order to address adequately and competently the full scope of this endeavor and at sufficient technical depths in all major topical areas, must enlist the aid of other scientific/technical experts. The application shall provide tentative identification of all proposed experts and their present affiliation. All experts, both foreign and domestic, are to be individuals who are competent and accomplished in a scientific or technical discipline directly related to the research assessment. Technical competence and accomplishments of each expert shall be described in the application and should include the individual's experience, research publications, consultant services, contributions while serving as an expert with other groups, honors and awards, professional experience, and education including advanced degrees and other academic qualifications. The expected contribution of each expert to the assessment's objectives should be identified. The overall technical expertise of the group of experts, when combined with the technical expertise of the principal investigator, should be shown to be adequate to cover the various scientific and technical disciplines involved in the assessment.

These experts will assist the principal investigator in accomplishment of the assessment's objectives, especially in writing major sections of the required final report. They are also expected to conduct technical discussions with other experts, specialists, researchers, and research program managers in the scientific and technical areas; conduct site visits, as a panel, to laboratories and other facilities where research and development directly related to the subject area is conducted and managed; and review and evaluate recent and relevant research including scientific and technical literature.

The initial composition of a group of experts, other consultants, and any subsequent changes must be approved by the Program Manager and Contracting Officer.

Applications also should include the following: a schedule of the assessment's major activities including the tentative content of meetings of various teams of the experts, a description of anticipated site visits to publicly and privately funded facilities, a description of all conferences to be attended as a part of assessment activities, and a description of the methodology for obtaining a peer review of the assessment results.

The applicant is expected to supply the personnel, facilities, and materials necessary to accomplish the objectives of the assessment as described in this notice.

APPLICATION REVIEW AND AWARD INFORMATION: Applications will be reviewed in accordance with the Energy Research Merit Review System, published in the **Federal Register**, March 11, 1991 (56 FR 10244). Subject to the availability of appropriated FY 1992 funds, one grant award at approximately $300,000 is planned. The grant award will be for a 1-year period.

D.D. Mayhew,

Deputy Director for Management, Office of Energy Research.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-11084-2]

Solicitation for Environmental Education Grants; Correction

AGENCY: Environmetnal Protection Agency.

ACTION: Notice; correction.

SUMMARY: EPA is correcting errors in the Solicitation Notice for Environmental Education Grants that appeared in the **Federal Register** on December 10, 1991 (56 FR 64513).

FOR FURTHER INFORMATION CONTACT: Mr. George Walker, at (202) 260-4484.

SUPPLEMENTARY INFORMATION: EPA has solicited for applications for grants authorized under section 6 of the National Environmental Education Act (Pub. L. 101-619). The Solicitation Notice contained errors which are discussed briefly below and are corrected by this notice.

Michael E. O'Reilly,

Acting Director, Office of Environmental Education.

The following corrections are made in the Solicitation Notice for Environmental Education Grants published in the **Federal Register** on December 10, 1991 (56 FR 64513).

1. Page 64514, first column of the notice, which states, "Applications must be received by EPA within 60 days of the date that this solicitation notice is published in the **Federal Register**, is revised to read "Applications must be received by EPA within 90 days of the date that this notice is published in the **Federal Register.**"

2. Page 64514, first column, is changed from "A kit may be obtained by * * * calling (703) 847-3036 between 1 p.m. and 5 p.m." to "A kit may be obtained by * * * calling (703) 847-3036 between 9 a.m. and 5 p.m.".

3. On page 64513, third column, answer to Question XI which reads "Activities cannot start before funds are awarded. Start dates are currently targeted for May 1, 1992" should be changed to read "Activities cannot start before funds are awarded. Start dates are currently targeted for June 1992".

BILLING CODE 6560-50-F

FEDERAL MARITIME COMMISSION

[Docket No. 91–58]

Bank Line Limited v. Jet Set Marine, Inc.; Filing of Complaint and Assignment

Notice is given that a complaint filed by Bank Line Limited ("Complainant") against Jet Set Marine, Inc. ("Respondent") was served December 12, 1991. Complainant alleges that Respondent engaged in violations of section 10(a)(1) of the Shipping Act of 1984, 46 U.S.C. app. 1709(a)(1), by failing to remit the ocean freight, charges and fees due and payable for a shipment of one container, said to contain a speed boat, engines and accessories, between New York and Port Louis, Mauritius.

This proceeding has been assigned to Administrative Law Judge Norman D. Kline ("Presiding Officer"). Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by December 14, 1992, and the final decision of the Commission shall issued by April 13, 1993.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Independence Bancorporation, Inc.; Formation of; Acquisition by; or Merger of Bank Holding Companies; Correction

This notice corrects a previous **Federal Register** notice (FR Doc. 91-29567) published at page 64633 of the issue for Wednesday, December 11, 1991.

Under the Federal Reserve Bank of Chicago, the entry for Independence Bancorporation, Inc. is amended to read as follows:

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Independence Bancshares, Inc., Independence, Iowa; to merge with First State Bancorporation, Fredrickburg, Iowa, and thereby indirectly acquire Northeast Iowa National Bank, Sumner, Iowa.

Comments on this application must be received by December 24, 1991.

Board of Governors of the Federal Reserve System, December 12, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Summit Bancorp, Inc., et al.; Application to Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 8, 1992.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. Summit Bancorp, Inc., Akron, Ohio; to acquire Summit Interim Savings Bank, Tallmadge, Ohio pursuant to § 225.25(b)(9) of the Board's Regulation Y, which will be used to acquire the Montrose Branch, Akron, Ohio, and the Tallmadge Branch, Tallmadge, Ohio, of Union Federal Savings Bank, Indianapolis, Indiana. Applicant's subsidiary bank will acquire all of the interim thrift's assets and assume deposit liabilities pursuant to the Oakar Amendment.

Board of Governors of the Federal Reserve System, December 12, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

National Institute on Drug Abuse; Meetings

Pursuant to Public Law 92–463, notice is hereby given of a meeting on an advisory committee of the National Institute on Drug Abuse for January 1992.

The National Advisory Council on Drug Abuse will be performing review of applications for Federal assistance; therefore, portions of this meeting will be closed to the public as determined by the Administrator, ADAMHA, in accordance with 5 U.S.C. 552b(c)(6) and 5 U.S.C. app. 2 10(d).

A summary of the meeting and a roster of committee members may be obtained from: Ms. Camilla L. Holland, NIDA Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration, Parklawn Building, room 10–42, 5600 Fishers Lane, Rockville, MD 20857 (Telephone: 301/443–2755).

Substantive program information may be obtained from the contact whose name, room number, and telephone number is listed below.

Committee Name: National Advisory Council on Drug Abuse.
Meeting Date: January 15–16, 1992.
Place: National Institutes of Health, Building 31 C, Conference Room #6, 9000 Wisconsin Avenue, Bethesda, MD 20892.
Open: January 15, 9 a.m.–1 p.m., January 16, 9 a.m.–3 p.m.
Closed: January 15, 1 p.m.–5 p.m.
Contact: Ms. Sheila Harley Gardner, Room 10A–10, Parklawn Building, Telephone (301) 443–3229.

Dated: December 11, 1991.

Peggy W. Cockrill,

Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

BILLING CODE 4160-20-M

Food and Drug Administration

[Docket No. 91D–0123]

Draft Guideline for Submitting Supporting Chemistry Documentation in Radiopharmaceutical Drug Applications; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft guideline for the submission of supporting chemistry documentation radiopharmaceutical drug applications. FDA is making the draft guideline available for public comment before developing a final guideline. The draft guideline is intended to furnish drug manufacturers with guidance in submitting to FDA adequate chemistry documentation in marketing applications for radiopharmaceutical drugs.

DATES: Comments by March 18, 1992.

ADDRESSES: Submit written requests for single copies of the draft guideline to the Executive Secretariat Staff (HFD–8), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. Send two self-addressed adhesive labels to assist that office in processing your requests. Submit written comments on the draft guideline to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857. Requests and comments should be identified with the docket number found in brackets in the heading of this document. A copy of the draft guideline and received comments are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Rebecca H. Wood, Center for Drug Evaluation and Research (HFD–102), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4207.

SUPPLEMENTARY INFORMATION: FDA is announcing the availability of a draft guideline for submitting chemistry documentation in radiopharmaceutical drug applications. This draft guideline is intended to assist drug firms in preparing the chemistry section of marketing applications for radiopharmaceutical drugs under 21 CFR 314.50(d)(1).

A "radioactive drug" or "radiopharmaceutical drug" is any substance defined as a drug in section 201(g)(1) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(g)(1)) that exhibits spontaneous disintegration of unstable nuclei with the emission of nuclear particles or photons and includes any nonradioactive reagent kit or nuclide generator that is intended to be used in the preparation of any such substance. "Radioactive drugs" do not include drugs such as carbon-containing compounds or potassium-containing salts that contain trace quantities of naturally occurring radionuclides.

Radiopharmaceutical drugs are not only unique in their property of radioactivity but in other ways as well. Most radiopharmaceuticals are used as diagnostic agents and contain minute quantities, on a weight basis, of the radioactive drug substance. In addition to chemical impurities, radiopharmaceuticals may contain radioactive impurities, i.e., radionuclidic and radiochemical impurities. Such impurities may have a detrimental effect on both the utility and reliability of the drug as a diagnostic agent, and possibly on the radiation dose to the patient.

Many of the methods used in the preparation of radioactive drugs, e.g., cyclotrons, generators, and the radiolabeling of "kits," are unique to radiopharmaceuticals. Special analytical methods and equipment are needed to measure the total radioactivity of a radiopharmaceutical and the radionuclidic and radiochemical purity and impurities. Special training is required and special precautions must be used in the handling of radioactive drugs. In addition, labeling requirements for radioactive drugs are unique in many respects.

This draft guideline is intended to meet an expressed need by both the radiopharmaceutical industry and the nuclear medicine community for detailed guidance on preparing the

VOL
56
ISS
243
DE
18
1991
UMI

chemistry section of new drug applications (NDA's) for radiopharmaceuticals. The guideline describes acceptable approaches to the documentation in the NDA of the drug product and drug substance for radiopharmaceuticals. This guideline should be read in conjunction with FDA's other chemistry guidelines pertaining to marketing applications.

FDA is making this draft guideline available for public comment before issuing a final guideline. If, following the receipt of comments, the agency concludes that the draft guideline, as revised, reflects acceptable criteria for use in submitting supporting chemistry documentation in radiopharmaceutical drug applications, the guideline will be made final, and FDA will announce its availability in the **Federal Register**.

The guideline may be useful to drug manufacturers in developing the chemistry documentation section in marketing applications for radiopharmaceutical drugs. A person may follow the guideline or may choose to use alternate procedures even through they are not provided for in the guideline. If a person chooses to use alternate procedures, that person may wish to discuss the matter further with the agency to prevent expenditure of money and effort on activities that may later be determined to be unacceptable by FDA. This guideline does not bind the agency, and it does not create or confer any rights privileges, or benefits for or on any person.

Interested persons may, on or before March 18, 1992, submit written comments on the draft guideline to the Docket Management Branch (address above). FDA will consider these comments in determining whether further amendments to, or revisions of, the guideline are warranted. Two copies of any comments should be submitted, except that individuals may submit one copy.

Dated: November 19, 1991.

Michael R. Taylor,

Deputy Commissioner for Policy.

BILLING CODE 4160-01-M

Health Care Financing Administration

Hearing: Reconsideration of Disapproval of Iowa State Plan Amendment (SPA)

AGENCY: Health Care Financing Administration, HHS.

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on February 4, 1992, at 10 a.m.; room 215; New Federal Office Building; 601 East 12th Street; Kansas City, Missouri to reconsider our decision to disapprove Iowa SPA 90-76.

CLOSING DATE: Requests to participate in the hearing as a party must be received by the Docket Clerk by January 2, 1992.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, HCFA Hearing Staff, suite 110, Security Office Park, 7000 Security Blvd., Baltimore, Maryland 21207, Telephone: (410) 597-3013.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider our decision to disapprove Iowa State plan amendment (SPA) number 90-76.

Section 1116 of the Social Security Act (the Act) and 42 CFR, part 430 establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a State plan or plan amendment. The Health Care Financing Administration (HCFA) is required to publish a copy of the notice to a State Medicaid agency that informs the agency of the time and place of the hearing and the issues to be considered. If we subsequently notify the agency of additional issues that will be considered at the hearing, we will also publish that notice.

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with the requirements contained at 42 CFR 430.76(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins in accordance with the requirements contained at 42 CFR 430.76(c).

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

Iowa submitted Medicaid SPA 90-76 on December 28, 1990, seeking protection under the Deficit Reduction Act (DEFRA) moratorium for a more liberal resource policy which permits aged, blind, and disabled individuals to be eligible for Medicaid while disposing of excess resources, effective November 1985.

The issues in this matter are: (1) Whether Iowa's proposal qualified for protection under the DEFRA moratorium for a more liberal resource policy which permits aged, blind, and disabled individuals to be eligible for Medicaid while disposing of excess resources, effective November 1985; and, (2) whether the Iowa State plan could be expanded to include additional groups other than those mandated under the DEFRA moratorium.

The Secretary is prohibited from taking certain adverse actions against States for using more liberal income and resource methods than those of the cash assistance programs (Aid to Families with Dependent Children and Supplemental Security Income [SSI] for determinations of eligibility for the medically needy and limited categorically needy groups [section 2373(c) of the DEFRA of 1984]). The moratorium covers the period of October 1, 1981 through February 17, 1989. The adverse actions which the Secretary is prohibited from taking do not include disapproving SPAs. Thus, plan material for which a State seeks DEFRA moratorium protection is disapproved as being in violation of the requirements of title XIX which were in effect during the moratorium period. However, moratorium protection against adverse action by the Secretary is granted for the moratorium period.

Prior to the enactment of the DEFRA moratorium, States were not permitted to use resource methodologies which were more liberal than those of the cash assistance programs. (See section 1902(a)(10) of the Act [prior to July 1, 1988].)

In SPA 90-76, Iowa sought protection for a "bona fide effort to sell" policy. This is a policy under which individuals who have excess resources can still be eligible for Medicaid, provided they are making a good-faith effort to sell the excess resources. The SSI program has a similar policy, but under SSI it applies only to a limited number of individuals who meet the requirements for conditional eligibility. Iowa, via SPA 90-76, would apply its policy to individuals who do not meet those requirements. Thus, Iowa's policy is more liberal than SSI's, and so qualified for protection under the DEFRA moratorium.

We looked first to see if the SPA could be approved as part of the State plan with an effective date of November 1985. The proposed SPA could not be approved for retroactive inclusion in the State plan during the moratorium period. That is, section 1902(r)(2) of the Act, which would allow policies in the State plan which are more liberal than under the cash assistance programs, was made effective back to 1982. However, under the regulations at 42 CFR 430.20 and under the corresponding limits contained in the Department's appropriations authority, HCFA cannot retroactively approve a SPA expanding eligibility, coverage, or reimbursement any earlier than the beginning of the quarter in which it was submitted. Therefore, the earliest date that the proposed policy could have been included in the State plan was October 1, 1990. The State's policy was disapproved as part of the State plan during the retroactive period at issue.

We next determined whether the SPA could receive protection under the moratorium since we could not approve it as part of the State plan. Protection under the DEFRA moratorium is limited by the statute to specific eligibility groups. Specifically, the DEFRA moratorium applies only to certain optional categorically needy groups (sections 1902(a)(10)(A)(ii) (IV), (V), or (VI) of the Act), or the medically needy (section 1902(a)(10)(C)(i)(III) of the Act). Iowa did not limit its request for protection to these groups, however. Instead, the State requested DEFRA moratorium protection for all aged, blind, and disabled individuals. Because extension of protection to groups other than those specified above would be contrary to the requirements of the statute, we could not grant protection for groups other than those specified.

Although SPA 90-76 was disapproved, protection under the DEFRA moratorium was granted for those eligibility groups specified above. DEFRA moratorium protection could not be granted for the State's policy as applied to groups other than those specified.

The notice to Iowa announcing and administrative hearing to reconsider the disapproval of its SPA reads as follows:

Mr. Charles H. Palmer,
Director, Department of Human Services, Hoover State Office Building, Des Moines, Iowa 50319-0114

Dear Mr. Palmer: I am responding to your request for reconsideration of the decision to disapprove Iowa State Plan Amendment (SPA) 90-76.

Iowa submitted SPA 90-76 on December 28, 1990, seeking protection under the Deficit Reduction Act (DEFRA) moratorium for a more liberal resource policy which permits aged, blind, and disabled individuals to be eligible for Medicaid while disposing of excess resources, effective November 1985.

The issues in this matter are: (1) Whether Iowa's proposal qualified for protection under the DEFRA moratorium for a more liberal resource policy which permits aged, blind, and disabled individuals to be eligible for Medicaid while disposing of excess resources effective November 1985; and, (2) whether the Iowa State plan could be expanded to include additional groups other than those mandated under the DEFRA moratorium.

I am scheduling a hearing on your request for reconsideration to be held on February 4, 1992, at 10 a.m.; room 215; 601 East 12th Street; Kansas City, Missouri. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties. The hearing will be governed by the procedures prescribed at 42 CFR, part 430.

I am designating Mr. Stanley Krostar as the presiding officer. If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communications which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached at (410) 597-3013.

Sincerely,

Gail R. Wilensky,

Administrator.

(Section 1116 of the Social Security Act (42 U.S.C. 1316); 42 CFR 430.18).

(Catalog of Federal Domestic Assistance Program No. 13. 714, Medicaid Assistance Program).

Dated: December 12, 1991.

Gail R. Wilensky,

Administrator, Health Care Financing Administration.

BILLING CODE 4120-03-M

Public Health Service

Health Resources and Services Administration; Statements of Organization, Functions and Delegations of Authority

Part H, chapter HB (Health Resources and Services Administration) of the Statement of Organization, Functions and Delegations of Authority of the Department of Health and Human Services (47 FR 38409-24), August 31, 1982, as amended most recently at 56 FR 47965, September 23, 1991) is amended to reflect the transfer of materiel management functions from the Division of Grants and Procurement Management (HBA46), to the Division of Program Support (HBA42), within the Office of Operations and Management, Office of the Administrator, Health Resources and Services Administration.

Under HB-10, Organization and Functions, delete in its entirety the functional statements for the Division of Program Support (HBA42) and the Division of Grants and Procurement Management (HBA46) and substitute the following:

Division of Program Support (HBA42). For the Office of the Administrator, the Executive Officer: (1) Plans, directs and coordinates administrative management activities; (2) provides administrative management services including personnel, financial, materiel management, and general administrative services; (3) develops and recommends management policies, procedures, systems and practices; (4) provides liaison with the Office of Assistant Secretary for Health on financial, personnel, organization, supply, and other management concerns of the Office of the Administrator; (5) acts for the Associate Administrator for Operations and Management concerning space, parking, and communications management for the headquarters and represents him/her in matters relating to the management of the Parklawn Building complex; and (6) advises on and coordinates administration-wide policies and procedures required to implement General Services Administration and departmental regulations governing materiel management, including transportation, motor vehicle, and utilization and disposal of property.

Division of Grants and Procurement Management (HBA46). (1) Provides leadership in the planning, development, and implementation of policies and procedures for grants, contracts, and other assistance mechanisms; (2) exercises the pole responsibility within HRSA for the award and management of contracts; (3) provides advice and consultation of interpretation and application of Public Health Service and Department of Health and Human Services policies and procedures governing contracts and grants management; (4) develops and issues policy and procedural materials for the Administration's contracts and grants programs; (5) establishes standards and guides for and evaluates contracts and grants management operations throughout the Administration; (6) coordinates the Administration's positions and actions with respect to the audit of grants and contracts, and also coordinates responses to General Accounting Office audit reports and monitors the implementation of General Accounting Office recommendations; (7) provides professional accounting advice relative to the management of grants and contracts; and (8) maintains liaison directly or through the Regional Health Administrators, with grantee and contractor institutions and organizations and with the Office of the Assistant Secretary for Health and other components of the Department.

This reorganization is effective upon date of signature.

Dated: December 2, 1991.

Robert G. Harmon,

Administrator.

[FR Doc. 91-30147 Filed 12-17-91; 8:45 am]

BILLING CODE 4160-15-M

Health Resources and Services Administration; Statement of Organization, Functions and Delegations of Authority

Part H, chapter HB (Health Resources and Services Administration) of the

VOL 56 ISS 243 DE 18 1991 UMI

Statement of Organization, Functions and Delegations of Authority of the Department off Health and Human Services (47 FR 38409–24, August 31, 1982, as amended most recently at 56 FR 50131–32, October 3, 1991) is amended to reflect the abolishment of the Office of Financing Services in the Bureau of Health Care Delivery and Assistance.

Under HB–10, Organization and Functions, amend the functional statements for the Bureau of Health Care Delivery and Assistance (HBC) by deleting the functional statement for the Office of Financing Services (HBC16) in its entirety.

This deletion is effective upon date of signature.

Dated: December 9, 1991.

Robert G. Harmon,

Administrator.

BILLING CODE 4160–15–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. D–91–974; FR 3215–D–01]

Delegation of Authority Under the Fair Housing Act

AGENCY: Office of the Secretary, HUD.

ACTION: Notice of delegation of authority.

SUMMARY: In this notice the Secretary is delegating to the Executive Officer for Administrative Operations and Management, Office of the Secretary, the Secretary's authority under 24 CFR 104.930 (a) and (d) to remand, for further proceedings, an initial decision of an administrative law judge.

EFFECTIVE DATE: December 9, 1991.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Markison, Assistant General Counsel for Administrative Law, Office of the General Counsel, room 10252, Department of Housing and Urban Development, Washington, DC 20410. Telephone: (202) 708–3137 (this is not a toll-free number). The toll-free TDD number for hearing impaired persons is 1–800–543–8294.

SUPPLEMENTARY INFORMATION: Subsection 812(h) of the Fair Housing Act ("the Act"), 42 U.S.C. 3612(h), gives the Secretary of HUD 30 days to review any finding, conclusion, or order issued by an administrative law judge under subsection (g) of section 812 of the Act. The regulations implementing this authority, found at 24 CFR 104.930 (a) and (d), provide that, in connection with such review, the Secretary may affirm, modify or set aside, in whole or in part, the initial decision of the administrative law judge or remand that decision to the administrative law judge for further proceedings.

In this delegation of authority, the Secretary is delegating to the Executive Officer for Administrative Operations and Management, Office of the Secretary, the authority to remand an initial decision of an administrative law judge for further proceedings.

Accordingly, the Secretary delegates the following authority:

Section A—Authority Delegated

To the Executive Officer for Administrative Operations and Management, Office of the Secretary, the authority, under 24 CFR 104.930 (a) and (d), to remand an initial decision of an administrative law judge for further proceedings.

Section B—Authority Excepted

The authority granted in Section A of this delegation may not be redelegated.

Authority: 42 U.S.C. 3601–19; 42 U.S.C. 3535(d).

Dated: December 9, 1991.

Jack Kemp,

Secretary.

BILLING CODE 4210–32–M

Office of Administration

[Docket No. N–91–3367]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Jennifer Main, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708–0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: December 11, 1991.

John T. Murphy,

Director, Information Policy and Management Division.

Proposal: Report on Tenants Accounts Receivable.

Office: Public and Indian Housing.

Description of the Need for the Information and its Proposed Use: Under Section 6(c)(4) of the United States Housing Act of 1937, this information is used to assure sound management practices by the Public Housing Agencies (PHAs). The PHAs prepare and submit the form to the HUD Field Offices and HUD uses it to monitor the effectiveness of rent collection procedures employed by PHAs.

Form Number: HUD–52295.

Respondents: State or Local Governments and Non-Profit Institutions.

Frequency of Submission: Semi-annually and Recordkeeping.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
Information collection	3,200		2		.25		1,600
Recordkeeping	3,200		1		.05		160

Total Estimated Burden Hours: 1,760.

Status: Reinstatement.

Contact: John T. Comerford, HUD, (202) 708–1872 Jennifer Main, OMB, (202) 395–6880.

Dated: December 11, 1991.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AZ–040–01–4340–02]

Meetings for the Gila Box Advisory Committee

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given in accordance with 43 CFR part 1780, that two meetings of the Gila Box Riparian National Conservation Area (NCA) Advisory Committee will be held.

DATES: Thursday, January 9, 1992, 9:30 a.m.–4:30 p.m., and Thursday, January 23, 1992, 9:30 a.m.–4:30 p.m.

ADDRESSES: BLM Safford District Office, 425 E. 4th St., Safford, Arizona 85546.

SUPPLEMENTARY INFORMATION: The NCA Advisory Committee was established by the Arizona Desert Wilderness Act of 1990 to provide input to the Safford District on management of the Gila Box Riparian National Conservation Area (NCA). The Advisory Committee will assist with preparation of the Gila Box Interdisciplinary Activity Plan by identifying issues and concerns, and by assisting with development of the plan using the Limits of Acceptable Change (LAC) planning process.

The January 9 meeting will be used to refine opportunity classes within the National Conservation Area using the LAC process. During the second meeting on January 23, indicators and standards for each opportunity class will be developed.

Both meetings are open to the public. Interested persons may make oral statements to the Committee or may file written statements for consideration by the Committee. Anyone wishing to make an oral statement must contact the BLM Gila Area Manager at least two working days prior to the meeting.

Summary minutes of the meeting will be maintained in the Safford District Office and will be available for public inspection (during regular business hours) within 30 days after each meeting.

FOR FURTHER INFORMATION CONTACT: Meg Jensen, Gila Resource Manager, or Jonathan Collins, Outdoor Recreation Planner, 425 E. 4th St., Safford, Arizona 85546. Telephone (602) 428–4040.

Dated: December 10, 1991.

Ray A. Brady,

District Manager.

BILLING CODE 4310–32–M

[WY–920–41–5700; WYW121278]

Proposed Reinstatement of Terminated Oil and Gas Lease

Pursuant to the provisions of Public Law 97–451, 96 Stat. 2462–2466, and Regulations 43 CFR 3106.2–3(a) and (b)(1), a petition for reinstatement of oil and gas lease WYW121278 for lands in Converse County, Wyoming, was timely filed and was accomplished by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $10.00 per acre, or fraction thereof, per year and 16 2/3 percent respectively.

The lessee has paid the required $500 administrative fee and $125 to reimburse the Department for the cost of this **Federal Register** notice. The lessee has met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease WYW121278 effective September 1, 1991, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Partial Termination of Small Tract Classification No. 506, Opening of Lands; Trinity County; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This notice partially terminates Small Tract Classification No. 506 dated January 4, 1957, which classified public land for disposition pursuant to the Small Tract Act of 1938. A portion of the land classified for small tract under classification No. 506 has been found suitable for direct sale under section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713) as published in the **Federal Register** as a notice of realty action on August 15, 1991 (Vol. 56, No. 158).

EFFECTIVE DATE: January 17, 1992.

FOR FURTHER INFORMATION CONTACT: Patricia Cook, Realty Specialist, Redding Resource Area, 355 Hemsted Drive, Redding, California 96002.

1. The Bureau of Land Management Order of Classification Small Tract No. 506 is hereby terminated insofar as it affects the following described land:

Mount Diablo Meridian

T. 33 N., R. 9 W.,
Sec. 5, lots 52, 53, 56 through 61, S½NE¼, SE¼, and E½SE¼SW¼.
Sec. 8, lot 1.
The area described contains approximately 521.53 acres in Trinity County.

2. At 10 a.m. on January 17, 1992, the land described in paragraph 1 will be open to the operation of the public land laws generally, and to location and entry under the United States mining laws, subject to valid existing rights, the provisions of existing withdrawals, and classifications, and the requirements of applicable law.

Mark T. Morse,

Area Manager.

[NV-930-92-4212-14; N-55291]

Realty Action; Non-Competitive Sale of Public Lands in Clark County, NV

The following described public land in the City of North Las Vegas, Clark County, Nevada has been determined to be suitable for sale utilizing non-competitive procedures, at not less than the fair market value. Authority for the sale is section 203 of Public Law 94-579, the Federal Land Policy and Management Act of 1976 (FLPMA).

Mount Diablo Meridian, Nevada

T. 19 S., R. 61 E.,
Sec. 13, N½, NE¼SW¼, SE¼;
Sec. 14, N½;
Sec. 15;
Sec. 16;
Sec. 17;
Sec. 18, lots 5 to 20, inclusive;
Sec. 19, lots 5 to 18, inclusive;
Sec. 20;
Sec. 21, N½;
Sec. 28, N½NE¼, SW¼NE¼, E½NW¼;
Sec. 29, N½, NE¼SW¼, N½SE¼, SW¼SE¼.
T. 19 S., R. 62 E.,
Sec. 18, lots 1 to 4, inclusive, E½, E½W½;
Sec. 19, lots 1 to 4, inclusive, E½, E½W½;
Sec. 20.
Aggregating 7,534.27 acres (gross).

This parcel of land, situated in Clark County, is being offered as a direct sale to the City of North Las Vegas and is not required for any federal purposes. The sale is consistent with the Bureau's planning system. The sale of this parcel would be in the public interest.

In the event of a sale, conveyance of the available mineral interests will occur simultaneously with the sale of the land. Acceptance of a direct sale offer will constitute an application for conveyance of those mineral interests. The applicant will be required to pay a $50.00 non-returnable filing fee for conveyance of the available mineral interests.

The patent, when issued, will contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.

2. Oil, gas, sodium, and potassium.

and will be subject to:

1. An easement for streets, roads and public utilities in accordance with the transportation plan for Clark County/ the City of North Las Vegas.

2. Those rights for railroad purposes which have been granted to the Los Angeles and Salt Lake Railroad Company by Permit No. CC-0360 under the Act of March 3, 1875, 18 Stat. 482, 43 U.S.C. 934-939.

3. Those rights for road purposes which have been granted to the Corps of Engineers by Permit No. Nev-045137 under the Act of January 13, 1916, 44 LD 513.

4. Those rights for power line purposes which have been granted to Nevada Power Company by Permit No. NEV-061985 under the Act of October 21, 1976 (90 Stat. 2776; 43 U.S.C. 1761) and Nev-067348 under the Act of February 15, 1901 (31 Stat. 790; 43 U.S.C. 959).

5. Those rights for material site and road purposes which have been granted to the Nevada Department of Transportation by Permit No. N-32236 under the Act of August 27, 1958, 72 Stat. 916, 23 U.S.C. 317(A).

6. Those rights for power line purposes which have been granted to Nevada Power Company by Permit No. N-39815, N-42592 and N-49722 under the Act of October 21, 1976, 90 Stat. 2776, 43 U.S.C. 1761.

Publication of this notice in the **Federal Register** shall establish January 1, 1992 as the date the above described land will be segregated from all forms of appropriation under the public land laws, including the general mining laws. This segregation will terminate upon issuance of a patent or 270 days from the date of segregation, whichever occurs first.

Dated: December 12, 1991.

Ben F. Collins,

District Manager, Las Vegas, NV.

BILLING CODE 4310-70-M

Interim Bison Management Plan, Environmental Assessment; Yellowstone National Park, WY

AGENCY: National Park Service, Department of the Interior.

ACTION: Notice of availability of Environmental Assessment.

SUMMARY: In accordance with the National Environmental Policy Act and National Park Service (NPS) regulations, an Environmental Assessment (EA) has been prepared to analyze the environmental impacts of proposed short-term, interim management actions for the control of bison exiting Yellowstone National Park. The interim plan and EA will be in effect until the final Bison Management Plan and Environmental Impact Statement (EIS), described below, is completed. Long-term planning for bison management is the subject of an EIS process that was announced in the **Federal Register** on July 2, 1990. The short-term management actions to be evaluated will deal with the extent and involvement of the NPS in the control of bison. Control of bison is necessary to prevent the spread of the bison-carried brucella organism to domestic cattle outside the park, to reduce property damage, to increase human safety, and to further reduce entrenchment of migratory behavior of the northern bison herd. Three alternatives are considered in the EA; the no action alternative (control bison outside the park through a removal program which includes public hunting), control of bison inside the park, and control of bison outside the park (proposal).

DATES: Comments on the EA should be sent to the Superintendent, Yellowstone National Park, P.O. Box 168, Yellowstone National Park, Wyoming 82190 no later than December 30, 1991.

ADDRESSES: Copies of the EA are available from the Superintendent, Yellowstone National Park, P.O. Box 168, Yellowstone National Park, Wyoming 82190. Copies are also available for review in the Office of Public Affairs, room 155, National Park Service, Rocky Mountain Regional Office, 12795 West Alameda Parkway, Denver, Colorado 80225.

Dated: December 10, 1991.

Robert M. Baker,

Regional Director, Rocky Mountain Region, National Park Service.

INTERNATIONAL TRADE COMMISSION

[Investigations Nos. 731-TA-487, 488, 489, 490, and 494 (Final)]

Coated Groundwood Paper From Belgium, Finland, France, Germany, and the United Kingdom

Determination

On the basis of the record[1] developed in the subject investigations, the Commission determines,[2] pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)) (the act), that an industry in the United States is not materially injured or threatened with material injury, and the establishment of an industry in the United States is not materially retarded, by reason of imports from Belgium, Finland, France, Germany, and the United Kingdom of coated groundwood paper, provided for in subheadings 4810.21.00, 4810.29.00, and 4823.59.40 of the Harmonized Tariff Schedule of the United States, that have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV).

Background

The Commission instituted these investigations effective June 13, 1991, following preliminary determinations by the Department of Commerce that imports of coated groundwood paper from Belgium, Finland, France, Germany, and the United Kingdom were being sold at LTFV within the meaning of section 733(b) of the act (19 U.S.C. 1673b(b)). Notice of the institution of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of July 17, 1991 (56 FR 32588). The hearing was held in Washington, DC, on October 30, 1991, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in these investigations to the Secretary of Commerce on December 11, 1991. The views of the Commission are contained in USITC Publication 2467 (December 1991), entitled "Coated Groundwood Paper from Belgium, Finland, France, Germany, and the United Kingdom: Determination of the Commission in Investigations Nos. 731-TA-487, 488, 489, 490, and 494 (Final) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigations."

By order of the Commission.

Dated: December 12, 1991.

DEPARTMENT OF JUSTICE

City of Algoma, WI, et al.; Lodging of Consent Decree Under Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on December 6, 1991, a proposed Consent Decree in *United States* v. *City of Algoma, et al.* (Civil Action No. 91-C-1303) was lodged with the United States District Court for the Eastern District of Wisconsin. The proposed Consent Decree concerns the hazardous-waste site known as the Algoma Municipal Landfill ("Algoma") site located near Algoma, Wisconsin. The proposed Consent Decree requires the settlors, which include the City of Algoma and eight generators of hazardous substances sent to the Algoma site, to perform and finance the final remedy set forth in the Record of Decision with respect to the site issued by the U.S. Environmental Protection Agency on September 29, 1990. In addition, the settlors will reimburse the United States for a portion of its response costs associated with the Algoma site. Under the terms of the Consent Decree, the United States will recover approximately $73,000 of its past response costs.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Environmental Enforcement Section, Department of Justice, P.O Box 7611, Ben Franklin Station, Washington, D.C. 20503, and should refer to *United States* v. *City of Algoma, et al.* and D.J. reference 90-11-2-490.

The proposed Consent Decree may be examined at the office of the United States Attorney, Eastern District of Wisconsin, Milwaukee, Wisconsin, 517 East Wisconsin Avenue, Milwaukee, Wisconsin; at the Region V Office of the Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604; and at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue, NW., Washington, DC 20530 (202) 347-2072. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section Document Center, Box 1097, Washington, DC 20004. In requesting a copy, please enclose a check in the amount of $17.50 (25 cents per page

VOL 56 ISS 243 DEC 18 1991 UMI

reproduction cost) payable to the Consent Decree Library.

Barry M. Hartman,

Acting Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410-01-M

American Cyanamid, et al.; Lodging of Consent Decree Under Comprehensive Environmental Response, Liability, and Compensation Act ("CERCLA")

In accordance with Department policy, 28 CFR 50.7, and section 122(d) of CERCLA, 42 U.S.C. 9622(d), notice is hereby given that on November 27, 1991, a proposed consent decree in *United States* v. *American Cyanamid, et al.*, Civil Action No. 2:91-1185 was lodged with the United States District Court for the Southern District of West Virginia. The proposed consent decree provides that thirteen defendants will perform the work and pay EPA oversight costs for the second operable unit at the Artel Chemical Company Superfund Site, Nitro, West Virginia. The defendants are American Cyanamid Company, E.I. du Pont de Nemours & Co., Inc., Ethyl Petroleum Additives, Inc., Halliburton Services, Hollingsworth & Vose Co., Mobay Corporation, Monsanto Company, Norton International, Inc., P B & S Chemical Company, Polaroid Corporation, PPG Industries, Inc., Specialty Polymers, Inc., and Union Carbide Corporation.

A complaint against the thirteen defendants has been filed concurrently with the decree seeking performance of the second operable unit under section 106 of CERCLA, 42 U.S.C. 9606, and payment of future oversight costs under section 107 of CERCLA, 42 U.S.C. 9607.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Acting Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *American Cyanamid, et al.*, DOJ. Ref. 90-11-3-706.

The proposed consent decree may be examined at the office of the United States Attorney, Southern District of West Virginia, 500 Quarrier Street, Charleston, West Virginia 25332, and at the Region III office of the United States Environmental Protection Agency, 841 Chestnut Street, Philadelphia, Pennsylvania 19107. The decree may also be examined at the Environmental Enforcement Section Document Center, 601 Pennsylvania Ave., NW., Box 1097, Washington, DC 20004, 202-347-7829. A copy of the proposed consent decree may be obtained in person or by mail from the Document Center. In requesting a copy, please enclose a check in the amount of $13.25 (25 cents per page reproduction costs) payable to the Consent Decree Library.

Barry M. Hartman,

Acting Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410-01-M

Anderson Development Co.; Lodging of Consent Order Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with 42 U.S.C. 9622 and with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed consent order in *United States* v. *Anderson Development Company*, No. CA 91-CV-76705 DT, has been lodged with the United States District Court for the Eastern District of Michigan, on December 6, 1991. The proposed consent order concerns cleanup of the Anderson Development Company ("ADC") plant site, a hazardous waste site in southeast Adrian, Lenawee County, Michigan. The proposed consent order requires defendant to perform a cleanup at the Site and to pay certain United States Environmental Protection Agency costs.

The Department of Justice will receive for a period for thirty (30) days from the date of this publication comments relating to the proposed consent order. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to United States v. *Anderson Development Company*, D.J. Ref. 90-11-2-595.

The proposed consent order may be examined at the office of the United States Attorney for the Eastern District of Michigan, 817 Federal Building, 231 West Lafayette, Detroit, Michigan 48226, at the Office of Regional Counsel, United States Environmental Protection Agency, Region V, 111 West Jackson Street, Chicago, Illinois 60604, and at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue, NW., Box 1097, Washington, DC 20004, (202) 347-2072. A copy of the proposed Consent Decree may be obtained in person or by mail from the Document Center. In requesting a copy, please enclose a check in the amount of $58.75 (25 cents per page reproduction costs) payable to the Consent Decree Library.

Barry M. Hartman,

Acting Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410-01-M

Lodging of Consent Decree in United States v. City of Janesville, et al., Under the Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with section 122(d)(2) of the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. 96222(d)(2), and the policy of the Department of Justice, 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States* v.*City of Janesville, et al.*, Civil Action No. 91-0999, was lodged with the United States District Court for the Western District of Wisconsin on Friday, November 22, 1991. This action was brought for the cleanup of the Janesville Disposal facility ("Site"), located in Janesville, Wisconsin, and for the recovery of costs expended by the United States in connection with this Site. The Site includes two waste treatment and disposal facilities listed on the National Priorities List set forth at 40 CFR part 300, appendix B, as well as two other waste disposal facilities.

The proposed consent decree is entered into between plaintiff, the United States, and 62 entities that have been identified as potentially responsible parties ("PRPs") with respect to the Site. Under the proposed decree, a group of six "Settling Defendants" with finance and perform a remedy which the Environmental Protection Agency previously selected for this Site. The main components of the remedial action that will be implemented by Settling Defendants include: (1) Repair or enhancement of caps covering two landfills known as the "1978 Site" and "1985 Site"; (2) collection and flaring of landfill gas; (3) repair or improvement of the leachate collection system for the "1985 Site"; (4) removal of residual wastes from an area known as the "Janesville Ash Beds"; and (5) installation and operation of a groundwater extraction and treatment system. The Settling Defendants responsible for implementing the remedial action include the city of Janesville, which owns the site and operated waste treatment and disposal operations there during the active life of the Site, and five generators that are alleged to have arranged for treatment or disposal of hazardous substances at the Site.

In addition, under the proposed decree, two groups of *de minimis* PRPs would pay approximately $297,000 to the Hazardous Substances Superfund and contribute additional amounts toward the remedial work to be performed by the Settling Defendants. Payments received by the Hazardous Substances Superfund will be applied first toward reimbursement of the $220,000 of response costs previously incurred by the United States in connection with this Site. The remainder will be applied toward costs of the United States overseeing implementation of the consent decree.

The Department of Justice will receive comments relating to the proposed consent decree for a period of 30 days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530. All comments should refer to *United States* v. *City of Janesville, et al.* DJ Ref #90-11-2-478.

The proposed consent decree may be examined at the Office of the United States Attorney for the Western District of Wisconsin, 120 North Henry Street, Madison, Wisconsin 53703; the Region V Office of the U.S. Environmental Protection Agency, 111 West Jackson Street, Third Floor, Chicago, Illinois 60604; and at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue, NW., Washington, 20004 (202-347-2072). A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue, NW., Box 1097, Washington, DC 20004. In requesting a copy, please enclose a check in the amount of $73.75 (twenty-five cents per page reproduction costs) payable to the "Consent Decree Library."

John C. Cruden,

Chief, Environmental Enforcement Section.

BILLING CODE 4410-01-M

Lodging of Final Judgment by Consent Pursuant to the Safe Drinking Water Act and the Clean Water Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on December 4, 1991, a consent decree in *United States* v. *Melvin and Loreitta Manning*, Civil Action No. 3:91CV00228, was lodged with the United States District Court for the Eastern District of Virginia.

The Complaint filed by the United States on April 23, 1991, under section 1414(b) and 1414(g) of the Safe Drinking Water Act ("SDWA"), 42 U.S.C. 300g-3(b) and 300g-3(g) and section 309 (b) and (d) of the Federal Water Pollution Control Act, as amended by the Clean Water Act of 1977 and the Water Quality Act of 1987 ("CWA"), 33 U.S.C. 1319 (b) and (d), alleged violations of the National Primary Drinking Water Regulations ("NPDWRs"), 40 CFR part 141, promulgated pursuant to section 1401 of the SDWA, 42 U.S.C. 300g-1, and violations of sections 301 and 402 of the CWA, 33 U.S.C. 1311 and 1342. The United States sought civil penalties and injunctive relief pursuant to section 1414(b) of the SDWA, 42 U.S.C. 300g-3(b) and section 309 (b) and (d) of the Clean Water Act, 33 U.S.C. 1319 (b) and (d). The violations occurred at the Manning Mobile Manor in Prince George County, Virginia.

The proposed consent decree requires Melvin and Loreitta Manning (the "Mannings") to pay a civil penalty of $40,000. The Mannings are further required by the consent decree to construct and install the necessary equipment to connect the sewage treatment system to the Prince George County sewer system, and to employ a Consultant to operate and maintain the public water system at the site. The decree includes stipulated penalties for future violations of the consent decree, the SDWA and the CWA.

The Department of Justice will receive comments relating to the proposed consent decree for a period of thirty days from the date of publication of this notice. Comments should be addressed to the Acting Assistant Attorney General, Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Melvin and Loreitta Manning*, DOJ Ref. No. 90-5-1-1-3630. The proposed consent decree may be examined at the office of the United States Attorney, Eastern District of Virginia, Main Street Centre, 600 E Main Street, Richmond, Virginia 23219. Copies of the consent decree may also be examined and obtained by mail at the Environmental Enforcement Section Document Center, 601 Pennsylvania Ave., NW. Box 1097 Washington, DC 20004 (202-347-7829). When requesting a copy of the consent decree by mail, please enclose a check in the amount of $8.75 (twenty-five cents per page reproduction costs) payable to the "Consent Decree Library."

John C. Cruden,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

Antitrust Division

Semiconductor Research Corp.; National Cooperative Research Notification

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("Act"), the Semiconductor Research Corporation ("SRC"), on November 4, 1991, filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notification was filed for the purpose of maintaining the protections of the Act limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

The following companies have been added to SRC: Solid State Measurements, Inc., Pittsburgh, Pennsylvania and Arizona Packaging Software, Inc., Tuscon, Arizona as affiliate members. No other changes have been made in either the membership or planned activities of SRC.

On January 7, 1985, SRC filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on January 30, 1985, 50 FR 4281. The most recent notification of SRC membership changes published in the **Federal Register** with a then current and complete membership list was filed by SRC on October 25, 1989, and published by the Department on November 29, 1989, 54 FR 49123-24. Subsequent notifications filed on February 20, 1990, May 16, 1990, and July 18, 1990, were published on April 5, 1990 (55 FR 12750), June 13, 1990 (55 FR 23989), and August 15, 1990 (55 FR 33389-390), respectively, disclosing only membership changes. Notifications filed on September 24 and October 17, 1990, February 19, 1991, and July 22, 1991, disclosing further membership changes, were published on November 27, 1990 (55 FR 49349), March 15, 1991 (56 FR 11275), and September 12, 1991 (56 FR 46444), respectively.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

Drug Enforcement Administration

Ranzy Weston, Sr., M.D.; Denial of Application for Registration

On August 9, 1991, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Ranzy Weston, Sr., M.D. (Respondent), of Augusta, Georgia, proposing to deny his application, executed on February 22, 1990, for registration as a practitioner. The statutory basis for the Order to Show Cause was that Respondent's registration would be inconsistent with the public interest, as set forth in 21 U.S.C. 823(f).

The Order to Show Cause was served on Dr. Weston on August 16, 1991. More than thirty days have passed since the Order to Show Cause was received by Dr. Weston. The Drug Enforcement Administration has received no response from Dr. Weston or anyone purporting to represent him.

Pursuant to 21 CFR 1301.54(d), the Administrator finds that Dr. Weston has waived his opportunity for a hearing. Accordingly, under the provision of 21 CFR 1301.57, the Administrator enters his final order in this matter, based on findings of fact and conclusions of law as hereinafter set forth.

The Administrator finds that in 1987 the State of Georgia initiated an inquiry into Respondent's prescribing practices. The investigating agents warned Dr. Weston that some of his patients were drug abusers who had been prescribed narcotic cough syrups. On three occasions during the period October to December 1987, the Respondent issued prescriptions for the controlled substances Tussionex, a Schedule III narcotic, and a Schedule V narcotic, terpin hydrate with codeine to a State of Georgia undercover agent. At no time did the agent inform the Respondent that there was anything physically wrong with her, but insisted that she was fine and wanted something to relax. The Administrator finds that these prescriptions were not issued for any legitimate medical purpose.

A subsequent investigation revealed that after Respondent's DEA Certificate of Registration expired in 1978, he continued to prescribe controlled substances without authority. The DEA gave written and telephonic notice to Dr. Weston in October 1988, asserting that he had no authority to possess, prescribe or dispense controlled substances. Notwithstanding this notice, Respondent unlawfully wrote ten prescriptions for controlled substances between November 1988 and January 1989.

On October 22, 1988, the Respondent submitted an application for registration. An Order to show Cause proposing to deny the application was issued on March 3, 1989. Dr. Weston submitted a letter response in lieu of requesting a hearing. The then-Administrator of the Drug Enforcement Administration found, after examining the entire record, that Dr. Weston's registration was inconsistent with the public interest and, on June 5, 1989, denied Dr. Weston's application. See Ranzy S. Weston, Sr., M.D., Volume 54, **Federal Register**, at page 24052.

The Administrator finds that Dr. Weston has violated Federal laws relating to controlled substances in that he wrote prescriptions for controlled substances for other than legitimate medical purposes and that he knowingly used an expired DEA number to write prescriptions for controlled substances. Dr. Weston did so after receiving specific warnings concerning his prescribing practices and concerning his use of an expired registration. Dr. Weston, although given the opportunity to request a hearing or to submit a written statement, has failed to do either. Thus the facts recited above stand uncontroverted. Based on those facts, the Administrator concludes that Respondent's registration would be inconsistent with the public interest and that his application for registration must be denied.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 28 CFR 0.100(b), hereby orders that the application for registration, executed by Ranzy Weston Sr., M.D., on February 22, 1990, be, and it hereby is, denied. This order is effective December 18, 1991.

Dated: December 9, 1991.

Robert C. Bonner,

Administrator of Drug Enforcement.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Employment and Training Administration

Policy on Selection and Referral Techniques for Employment and Training Programs

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice; policy decision.

SUMMARY: This notice announces a policy decision regarding use of the General Aptitude Test Battery (GATB). GATB is an employment aptitude test used mainly by the State-administered public employment service agencies.

This notice announces a policy decision that Employment and Training Administration (ETA) contractors and grantees and programs under the National Apprenticeship Act shall terminate the use of within-group conversion scoring or other race or ethnicity-based adjustments to GATB scores in making selection and referral decisions. ETA contractors and grantees, and programs under the National Apprenticeship Act may, if they so choose, continue to use GATB and its variants, but they remain responsible for assuring that any use they make of GATB scores complies with applicable laws and regulations.

The Department of Labor (DOL or the Department) also will move forward with an aggressive research program to address the concerns identified by the National Academy of Sciences (NAS) and to develop as useful a test as possible.

Background

For several decades, the Employment Service (ES) used special adaptations of the GATB, called Specific Aptitude Test Batteries (SATBs), for selecting applicants for job referral. Developed for some 450 occupations, each SATB consists of the two to four occupationally relevant aptitudes with separate qualifying scores that were set at a level such that they would disqualify job applicants with ability levels similar to the lower third of the workers included in the SATB research samples.

During the early 1980's, the U.S. Employment Service (USES) pilot-tested a new use of the GATB for selecting applicants for job referral, called Validity Generalization (VG). The new procedure used the GATB to assess an applicant's relevant potential for occupational success in virtually any of the 12,000 jobs described in the Dictionary of Occupational Titles. Proponents of the new VG asserted that employment tests were much more generalized than previously thought, i.e., the same test was valid and could be used for more than one job in more than one location and setting. Most of the previously observed differences in a given test's ability to predict performance from one job setting to another were thought to be merely statistical artifacts caused by small sample sizes.

In 1981, USES began encouraging a few State employment service agencies (SESAs) to pilot the use of VG–GATB for all job referrals and to rank candidates according to test scores.

To avoid adverse impact when unvalidated SATBs were used, minority applicants were referred to employers in proportion to their relative numbers or ratio to non-minorities in the local office applicant pool. The same principle was built into the VG–GATB selection process through the method of within-group scoring. Within each applicant group (black, Hispanic, and others), an individual's raw job family scores are translated into percentile scores based on that group's score distribution. This resulted in the same percentage of black and Hispanic applicants receiving the same percentile score as those persons in the "other" category. By combining the percentile scores of individuals in all groups and selecting from the top of the list, applicants are referred in approximate proportion to their relative numbers or ratio within the applicant pool.

Currently, approximately 30 States use the VG–GATB system. In some States it is used in only one office, while in others it is used on a statewide basis. In no office, however, it is being used as the exclusive basis for all or even most of the referrals of workers to employers.

In 1986, questions were raised about the within-group scoring adjustment procedure. Because of the seriousness of these questions, the Department contracted for a special review of VG–GATB by the National Research Council of the National Academy of Sciences.

The NAS stated that it accepted the general thesis of validity generalization, that the results of validity studies can be generalized to many jobs not actually studied, but it urged a cautious approach of generalizing validity only to appropriately similar jobs. Based on some 750 validity studies of various jobs, the NAS found that VG–GATB is likely to be a useful predictor of job performance for a wide variety of jobs similar to those served by the Employment Service system. It characterized the relationship between GATB scores and job performance as "modest," and observed that the relationship is of about the same magnitude for GATB as for other general employment tests.

The NAS found, however, that GATB has certain technical weaknesses that should be corrected. It stressed that research was needed to develop more alternate forms of the GATB for retesting purposes and to replace forms that may have been compromised by falling into examinees' hands. Because the NAS also found the GATB tests to be too "speeded" (i.e., the tests' time limits were thought to be too short relative to the length of the tests), more research was needed to determine whether such short time limits are making it difficult for examinees to demonstrate their true potential and whether such short time limits encourage guessing as a strategy to improve one's score. The NAS also noted an unexplained drop in validities in recent years. It recommended continuing work on measures of job performance, better documentation of recent validity research, and continuing validation research to assure adequate and current occupational coverage, particularly for new and changed occupations.

The NAS concluded that VG–GATB, in its judgment, is of good enough quality and predictive power to play a significant role in Employment Service system referrals, but that it should not be the sole means of referring candidates, nor should it be used to the exclusion of other criteria such as experience and education.

In July 1990, the Department solicited comments from the public on a proposed directive containing revised policy on the use of Validity Generalization (VG) –GATB. 55 FR 30162. The comment period subsequently was reopened and extended through September 24, 1990. 55 FR 35379 (August 29, 1990).

Comments were received from 1,523 respondents. Many opposed the proposed policy that would have required the suspension of the use of the GATB for approximately two years, while the Department conducted research and made modifications to address NAS' concerns. Included among those opposing the proposal were a mix of employers, local apprenticeship councils and their parent unions, professional testing organizations, and several State employment service agencies (SESAs). These respondents felt that VG–GATB provided employers with a more productive work force while helping them to attract qualified minority workers. Respondents on behalf of special worker groups, however, were generally supportive of the proposal, as were a few SESAs. The principal professional organizations involved in testing submitted comments which opposed elimination of the GATB, and asserted that use of the test should be permitted during the research period, on the ground that there are currently no known alternatives that are as valid and economically useful as the GATB. See, for example, comments of the American Psychological Society, the American Phychological Association, and the Society for Industrial and Organizational Psychology, Inc. There was generally no opposition to the proposed GATB research.

Policy Decision

Although the comments on both sides of the issue of whether to retain the within-group scoring system raised thoughtful arguments, the passage of the Civil Rights Act of 1991 obviates the decision. Section 106 of the Act prohibits the use of any scoring system whose effect would be to "adjust the scores of, use different cutoff scores for, or otherwise alter the results of employment related tests on the basis of race, color, religion, sex or national origin." Thus, the Act requires that the use of within-group conversion scoring or other race-, color-, religion-, sex- or national origin-based adjustments to GATB scores for selection and referral by Employment and Training Administration contractors and grantees, and by programs under the National Apprenticeship Act, be terminated, effective immediately. Since the Civil Rights Act of 1991 is effective upon enactment (section 402), such entities shall immediately cease all use of the within-group scoring adjustment in test administration and scoring or for any referral or selection decisions.

The Department will undertake a vigorous program of research and attempt to improve the test, but will not prohibit use of the GATB while the research is being conducted.

There are a wide variety of circumstances and ways in which GATB scores conceivably might be used. ETA contractors and grantees, and programs under the National Apprenticeship Act may, if they so choose, continue to use GATB and its variants. But contractors, grantees, and programs under the National Apprenticeship Act are responsible for assuring that any use they make of GATB scores complies with applicable laws and regulations, including those relating to civil rights.

Should entities affected by this policy decision decide to continue to utilize GATB for selection and referral purposes, rather than solely for counseling purposes, DOL recommends that GATB scores be only one factor in the selection and referral process, with appropriate weight given to other factors (such as past job performance) as well, as suggested by the NAS report.

Based on the findings of the NAS report as to the usefulness of the test as a predictor of performance for a wide variety of jobs, the Department has decided against banning the use of GATB during the research period. The

VOL 56 ISS 243 DEC 18 1991 UMI

Department has concluded that SESAs and other users should be allowed the flexibility to assess their own circumstances and determine whether to continue using the GATB, in appropriate ways, during the interim period while research is undertaken to make improvements in the test.

The Department will conduct a multi-year research study to sharpen the ability of the GATB to predict worker performance on the job and thereby increase worker productivity through the use of better and more accurate job placement techniques. The research study is designed to assure that the GATB is a state-of-the-art assessment tool for referring workers to productive, satisfying employment. The Department's research is designed to make the GATB as accurate a predictor as can be developed with existing research techniques and to make it a fair instrument for assessing all workers' capabilities, making it a comprehensive and job-related assessment tool to meet the needs of America's changing and more competitive job market.

EFFECTIVE DATE: Employment and Training Administration grantees and contractors, and programs under the National Apprenticeship Act, shall implement this revised policy on December 18, 1991.

FOR FURTHER INFORMATION CONTACT: Robert Litman, Acting Director, U.S. Employment Service, Employment and Training Administration, Washington, DC 20210. Telephone (202) 535-0157 (this is not a toll-free number).

Signed at Washington, DC, this 13th day of December, 1991.

Roberts T. Jones,

Assistant Secretary of Labor.

BILLING CODE 4510-30-M

NATIONAL ACID PRECIPITATION ASSESSMENT PROGRAM

Mission, Goals, and Program Plan, Post 1990

AGENCY: National Acid Precipitation Assessment Program.

ACTION: Notice of Program Plan released for public comment.

SUMMARY: National Acid Precipitation Assessment Program Mission, Goals, and Program Plan, Post 1990.

The National Acid Precipitation Assessment Program (NAPAP) announces the release of its Congressionally-mandated Program Plan for a 60-day public review period.

The Acid Precipitation Act of 1980 and its re-authorization in 1990 mandates a comprehensive national program of policy-oriented research to assess the causes and consequences of acidic deposition and the effectiveness of the recently legislated acid rain controls. NAPAP is directed toward providing technical input for decision-making in the areas of energy production, natural resource management, pollution abatement, and environmental policy. The Program not only links the efforts of the federal agencies, but also coordinates them with the research and monitoring activities of the private sector, state and local governments, and fosters cooperation with the international community.

Initially mandated for ten years by Congress in 1980, NAPAP was re-authorized by title IX of the 1990 Clean Air Act Amendments. Title IV of the Amendments provides for a significant reduction in acid rain precursor emissions. The expanded mission of NAPAP under title IX includes evaluating the effectiveness of title IV. The draft Program Plan describes a coordinated approach to address the mission, goals, and approach for the reauthorized Program.

DATES: Comments must be submitted on or before February 17, 1992.

ADDRESSES: The Program Plan can be ordered free of charge from the National Acid Rain Program, 722 Jackson Place, NW., Washington, DC 20503 or call (202) 296-1002. Comments should be mailed to the same address.

FOR FURTHER INFORMATION CONTACT: Patricia M. Irving, National Acid Precipitation Assessment Program, 722 Jackson Place, NW., Washington, DC 20503, (202) 296-1002.

Patricia M. Irving,

Acting Director.

BILLING CODE 3126-01-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

Cooperative Agreement to Help Administer Applicant Evaluations

AGENCY: National Endowment for the Arts, National Foundation on the Arts and the Humanities.

ACTION: Notification of availability.

SUMMARY: The National Endowment for the Arts is requesting proposals leading to the award of a Cooperative Agreement with a qualified individual or organization to assist the Endowment's Inter-Arts Program in the administration of on-site artistic and/or administrative evaluations of grant applicants or grantees. The task includes coordinating travel arrangements for designated evaluators, disbursing funds to evaluators, maintaining records, and furnishing reports. Those interested in receiving the Solicitation package should reference Program Solicitation PS 92-02 in their written request and include two (2) self-addressed labels. Verbal requests for the Solicitation will not be honored.

DATES: Program Solicitation PS 92-02 is scheduled for release approximately January 4, 1991 with proposals due February 3, 1992.

ADDRESSES: Requests for the Solicitation should be addressed to the National Endowment for the Arts, Contracts Division, room 217, 1100 Pennsylvania Ave., NW., Washington, DC 20506.

William I. Hummel,

Director, Contracts and Procurement Division.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission (NRC) has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

1. *Type of submission, new, revision, or extension:* Revision.

2. *The title of the information collection:* 10 CFR part 70—Domestic Licensing of Special Nuclear Material.

3. *The form number if applicable:* Not applicable.

4. *How often the collection is required:* Applications for new licenses and amendments may be submitted at any time. Applications for renewal are submitted every five years. Applications for renewal for certain major fuel cycle facilities are submitted every ten years, with updates of the safety demonstration section submitted every two years. Reports are submitted as events occur. Nuclear material control and accounting information is submitted in accordance with specified instructions.

5. *Who will be required or asked to report:* Applicants for and holders of specific licenses to receive title to, own, acquire, deliver, receive, possess, use, and initially transfer special nuclear material.

6. *An estimate of the number of responses:* 1,209.

7. *An estimate of the total number of hours needed to complete the requirement or request:* An average of approximately 48 hours per response for applications and reports, plus approximately 18 hours annually per recordkeeper. The total industry burden is 61,980 hours.

8. *An indication of whether section 3504(h), Public Law 96-511 applies:* Not applicable.

9. *Abstract:* NRC regulations in 10 CFR part 70 establish procedures and criteria for the issuance of licenses to own, acquire, receive, possess, use, and initially transfer special nuclear material. The information in the applications, reports and records is used by the NRC staff to assess the adequacy of the applicant's physical plant, equipment, organization, training, experience, procedures and plans for protection of public health and safety and the common defense and security.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC.

Comments and questions may be directed by mail to the OMB reviewer: Ronald Minsk, Paperwork Reduction Project (3150-0009), Office of Information and Regulatory Affairs, NEOB-3019, Office of Management and Budget, Washington, DC 20503.

Comments may also be communicated by telephone at (202) 395-3084.

The NRC Clearance officer is Brenda Jo. Shelton, (301) 492-8132.

Dated at Bethesda, Maryland, this 6th day of December 1991.

For the Nuclear Regulatory Commission.

Gerald F. Cranford,

Designated Senior Official for Information Resources Management.

BILLING CODE 7590-01-M

Receipt of Responses to Request for Licensing Actions Regarding Reclamation Plans for Inactive Uranium Recovery Facilities

AGENCY: Nuclear Regulatory Commission.

ACTION: Receipt of proposed reclamation schedules for inactive uranium recovery facilities.

1. Description of Federal Action

The NRC is issuing this notice to provide a corrected version of a notice which appeared December 6, 1991. The correction involves the uranium mill operated by Umetco Minerals Corp. in Wyoming.

By letter dated October 22, 1991, from the Director, Uranium Recovery Field Office, Region IV, licensees with inactive uranium mills were requested to propose license amendments to define completion schedules for reclamation of their facilities. This request was made in accordance with a memorandum of understanding (MOU) between the Environmental Protection Agency (EPA) and the Nuclear Regulatory Commission (NRC) published in the **Federal Register** on October 25, 1991, (Volume 56, No. 207, pp. 55432-55435). As stipulated in the MOU, the NRC is noticing the receipt of responses to the NRC request of October 22, 1991, from the following NRC licensees:

Licensee	Facility	Docket No.	License
ARCO	Bluewater Mill	40-8903	SUA-1470
Homestake	Milan Mill	40-8903	SUA-1471
Kennecott	L-Bar Mill	40-8904	SUA-1472
Quivira	Ambrosia Lake	40-8905	SUA-1473
United Nuclear Corp.	Church Rock Mill	40-8907	SUA-1475
Utah:			
Atlas	Moab Mill	40-3453	SUA-917
Rio Algom Mining Corp.	Lisbon Mill	40-8084	SUA-1119
Wyoming:			
American Nuclear	Gas Hills	40-4492	SUA-667
Pathfinder Mines	Lucky McMill	40-3259	SUA-672
Petrotomics Company	Shirley Basin	40-6659	SUA-551
Umetco Minerals Corp.	Gas Hills	40-0299	SUA-648
Union Pacific Resources	Bear Creek Mill	40-8852	SUA-1310
Western Nuclear, Inc.	Split Rock Mill	40-1162	SUA-56

The NRC intends to review the above referenced responses, and amend the above referenced licenses to incorporate the reclamation plan milestones as appropriate for each facility. In accordance with the above referenced MOU, the NRC intent to amend each license will be noticed and a 30-day period will be provided for receipt of comments.

2. Contact

Copies of responses from the above licensees are available for inspection at the Uranium Recovery Field Office, 730 Simms, suite 100, Lakewood, Colorado, and at the Public Document Room, 2120 L Street, Washington, DC Comments or questions regarding the responses may be directed to the Director, Uranium Recovery Field Office, P.O. Box 25325, Denver, Co., 80225.

Dated at Denver, Colorado this 5th day of December, 1991.

For the Nuclear Regulatory Commission.

Ramon E. Hall,

Director, Uranium Recovery Field Office, Division of Radiation Safety and Safeguards, Region IV.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Trade Policy Staff Committee (TPSC); Generalized System of Preferences (GSP); Special GSP Review for Central and Eastern Europe; Notice of Review of Product Petitions, Public Hearings and List of Articles To Be Sent to the U.S. International Trade Commission (USITC) for Review; Opportunity for Public Comment on USITC Advice in the 1991 GSP Annual Review

AGENCY: Office of the United States Trade Representative.

SUMMARY: The purpose of this notice is (1) to announce the list of articles that will be considered for designation as eligible for duty-free treatment under the GSP in the Special GSP Review for Central and Eastern European countries; (2) to announce a revised timetable for public hearings on the articles that are being considered for GSP designation in the Special GSP Review; (3) to announce that the list of articles herein will be sent by the United States Trade Representative (USTR) to the USITC to seek advice with respect to modification of the list of eligible articles for GSP; and, (4) to announce an opportunity for public comment on the USITC advice rendered in the 1991 GSP Annual Review.

FOR FURTHER INFORMATION CONTACT: GSP Subcommittee, Office of the United States Trade Representative, 600 17th Street, NW., room 517, Washington, DC 20506. The telephone number is (202) 395–0971. Public versions of all documents are also available for review by appointment with the USTR Public Reading Room. Documents will be available in the reading room shortly after the filing deadlines. Appointments may be made from 10 a.m. to noon and 1 p.m. to 4 p.m. by calling (202) 395–6186.

SUPPLEMENTARY INFORMATION:

I. Special GSP Review

A. Background

In announcing the Trade Enhancement Initiative for Central and Eastern Europe, the President stated that "(t)he United States will provide substantially expanded market access for Central and East European countries by enhancing the Generalized System of Preferences (GSP)" (White House Press Release, July 12, 1991). The President also stated that he would give "special and expedited consideration" to the GSP benefits for the countries in that region by inviting additional GSP petitions and reviewing previously rejected product petitions. Accordingly, the TPSC initiated the Special GSP Review for Central and Eastern Europe on August 8, 1991 (56 FR 37758), and announced that certain previously denied Central and Eastern Europe petitions would be reviewed pursuant to the GSP regulations (see 15 CFR part 2007, including 15 CFR 2007.0(f)). On September 18, 1991, the TPSC extended the deadline for the submission of petitions in the Special GSP Review to October 18, 1991 FR 47266).

B. Acceptance of Petitions for Review

In the Special GSP Review, petitions were submitted to the GSP Subcommittee of the TPSC by the Governments of Czechoslovakia, Hungary, Poland and Yugoslavia seeking to have: (1) Additional articles designated as eligible for the GSP; or (2) the competitive need limits waived for specific products of a specific beneficiary country. Notice is hereby given of the acceptance for review of petitions requesting modification of the list of articles eligible to receive duty-free treatment under the GSP, as provided for in title V of the Trade Act of 1974, as amended (the 1974 Act) (19 U.S.C. 2461–2465). The TPSC is initiating the review of these petitions and the consideration of articles for designation as eligible GSP articles pursuant to the GSP regulations as set forth at 15 CFR 2007. The products that will be considered for designation as eligible GSP articles in the Special GSP Review are set forth in the Annex to this notice.

As in previous reviews, modifications of the list of articles eligible for GSP duty-free treatment in the Special GSP Review will be considered in accordance with the "graduation" policy. "Graduation" refers to the discretionary removal of a beneficiary country from the GSP program or the discretionary denial of duty-free GSP treatment to a particular product from a particular beneficiary country. Pursuant to this policy, a GSP beneficiary country could be excluded from GSP eligibility on a newly-designated article if that country is found to be sufficiently competitive with respect to that product. Therefore, product designations in the Special GSP Review may be made on a differential basis. Four criteria will be taken into account when any such graduation action is considered: The development level of individual beneficiary countries; their competitive position in the product concerned; the countries' practices relating to trade, investment and worker rights; and the overall economic interests of the United States.

C. Deferral of Decisions on Petitions From Yugoslavia

On December 6, 1991, President Bush announced the suspension of Yugoslavia from eligibility under the GSP program, effective December 24, 1991 (see 56 FR 64467). Therefore, decisions on whether to accept petitions filed by Yugoslavia in the Special GSP Review on products contained in subheadings 4107.10.00, 9401.69.60 and 9401.90.40 of the Harmonized Tariff Schedule of the United States (HTS) will be deferred until such time as Yugoslavia's status under the GSP program changes. At such time that a decision to accept Yugoslavia's petitions is announced, a schedule for public comment, including hearings, will be published.

D. Public Hearings and the Opportunity for Public Comment

The GSP Subcommittee of the TPSC invites submissions in support of or in opposition to the designation of any product listed in this notice as eligible for GSP. Information submitted in connection with this Special GSP Review must be submitted to the GSP Subcommittee at the address listed above. All such submissions should conform to the GSP regulations set forth at 15 CFR 2007. All submissions should identify the product of interest in terms of the current numbering and nomenclature of the HTS and, if possible, the assigned case number that is contained in the annex to this notice.

1. Public Hearings

Public hearings in connection with the Special GSP Review will be held on January 21–23, 1992, beginning at 9 a.m. at a location in Washington, DC to be announced. The hearings will be open to the public and a transcript of the hearings will be made available for public inspection or purchase from the reporting company. No electronic media coverage will be allowed.

Requests to present oral testimony in connection with public hearings should be accompanied by fourteen (14) copies, in English, of all written briefs or statements and should be received by the GSP Subcommittee by 5 p.m. Wednesday, January 8, 1992. All interested parties wishing to make an oral presentation at the hearings must submit the name, address, and telephone number of the witness(es) representing their organization by 5 p.m. Wednesday, January 8, 1992. Oral testimony before the GSP Subcommittee must be in English and will be limited to five-minute presentations that summarize or supplement information contained in briefs or statements submitted for the record.

2. Written Submissions

All submissions must be submitted in fourteen copies (14) in English. Interested parties that do not wish to appear at the public hearing may nonetheless submit pre-hearing briefs by 5 p.m. Wednesday, January 8, 1992. All interested parties may also submit post-hearing briefs by 5 p.m. Wednesday, February 12, 1992. Rebuttal briefs may be submitted by 5 p.m. Friday, February 28, 1992.

As part of the Special GSP Review, advice will be sought from the USITC, and an opportunity will be provided for the public to comment on nonconfidential USITC advice in March 1992. Notice of the availability of the USITC report and the timetable for comment will be published in the **Federal Register**.

3. Information Subject to Public Inspection

All submissions will be subject to public inspection by appointment with the staff of the USTR Public Reading Room, except for information granted "business confidential" status pursuant to 15 CFR 2003.6 and other qualifying information submitted in confidence pursuant to 15 CFR 2007.7. Briefs or statements must be submitted in fourteen (14) copies in English. If the document contains business confidential information, fourteen (14) copies of a nonconfidential version of the submission along with fourteen (14) copies of the confidential version must be submitted. In addition, the document containing confidential information should be clearly marked "confidential" at the top and bottom of each page of the document. The version that does not contain business confidential information (the public version) should also be clearly marked at the top and bottom of each page (either "public version" or "nonconfidential").

D. List of Articles Which May Be Considered for Designations as Eligible Articles for Purposes of the GSP or for Waiver of the Competitive Need Limit and on Which the USITC Will Be Asked to Provide Advice

On behalf of the President and in accordance with sections 503(a) and 131(a) of the 1974 Act (19 U.S.C. 2463(a) and 2151(a)), the USITC is being furnished with the list of articles published herein for the purpose of securing from the USITC its advice on the probable economic effect on U.S. industries producing like or directly competitive articles, and on consumers, of the modification of the list of articles eligible for GSP.

II. Notice of Opportunity for Public Comment on the USITC Advice Rendered in the 1991 GSP Annual Review

On August 26, 1991, USTR announced which product and country practice petitions were being accepted for further review in the 1991 GSP Annual Review (56 FR 42080). In that notice, it was noted that USTR would seek advice from the USITC on the probable economic effect of the modification of the list of articles eligible for GSP on industries producing like or directly competitive articles and on consumers.

The public version of the USITC advice will be available after December 11, 1991. The report containing the USITC advice is entitled President's List of Articles Which May Be Designated or Modified as Eligible Articles for Purposes of the U.S. Generalized System of Preferences, Report to the President on Investigation Nos. TA–131–17, 503(a)–22 and 332–312, USITC Publication 2464 (December 1991) (hereinafter USITC Publication 2646). After December 11, 1991, USITC Publication 2464 will be available from the USITC by calling the Office of the Secretary of the USITC at (202) 205–1806. USITC Publication 2464 will also available for review by appointment with the USTR Public Reading Room in Washington, DC. Appointments may be scheduled by calling (202) 395–6186.

The GSP Subcommittee of the TPSC hereby notifies interested parties of the opportunity to comment on the public version of the USITC advice. All comments must be submitted to the GSP Subcommittee in accordance with the GSP regulations and the requirements set forth in section I(D) of this notice. Comments on the USITC advice must be received by 5 p.m. Wednesday, January 22, 1992.

David A. Weiss,

Chairman, Trade Policy Staff Committee.

VOL 56 ISS 243 DEC 18 1991 UMI

Annex

Case No.	HTS Subheading 1/	Article	Petitioner Government(s) of:
		[The bracketed language in this list has been included only to clarify the scope of the numbered subheadings which are being considered, and such language is not itself intended to describe articles which are under consideration.]	
		Petitions to add products to the list of eligible articles for the Generalized System of Preferences.	
		Meat and edible meat offal, salted, in brine, dried or smoked; edible flours and meals of meat or meat offal:	
		Meat of swine:	
SCEER-1	0210.12.00	Bellies (streaky) and cuts thereof	Hungary
		Cheese and curd:	
		Other cheese:	
		Goya cheese:	
		[Made from cow's milk and not in original loaves]	
SCEER-2	0406.90.3040	Other	do.
		Dried vegetables, whole, cut, sliced, broken or in powder, but not further prepared:	
		Other vegetables; mixtures of vegetables:	
SCEER-3	0712.90.75	Tomatoes	do.
		Hop cones, fresh or dried, whether or not ground, powdered or in the form of pellets; lupulin:	
SCEER-4	1210.10.00	Hop cones, neither ground nor powdered nor in the form of pellets	Czechoslovakia
		Other prepared or preserved meat, meat offal or blood:	
		Of swine:	
		[Hams and cuts thereof; Shoulders and cuts thereof]	
		Other, including mixtures:	
		[Offal]	
		Other:	
		Not containing cereals or vegetables:	
		[Boned and cooked and packed in airtight containers]	
SCEER-5	1602.49.40	Other	Hungary
		Of bovine animals:	
		[Offal]	
		Other:	
		Not containing cereals or vegetables:	
		[Cured or pickled]	
		Other:	
		In airtight containers:	
		[Corned beef]	
SCEER-6	1602.50.20	Other	do.
		Mushrooms and truffles, prepared or preserved otherwise than by vinegar or acetic acid:	
SCEER-7	2003.10.00	Mushrooms	do.
		Fruit juices (including grape must) and vegetable juices, unfermented and not containing added spirit, whether or not containing added sugar or other sweetening matter:	
		Grape juice (including grape must):	
		Concentrated:	
		[Frozen]	
SCEER-8	2009.60.0060	Other	do.
		Wine of fresh grapes, including fortified wines; grape must other than that of heading 2009:	
SCEER-9	2204.10.00	Sparkling wine	do.

1/ Harmonized Tariff Schedule of the United States.

Annex
2 of 10

Case No.	HTS Subheading 1/	Article	Petitioner Government(s) of:
		Petitions to add products to the list of eligible articles for the Generalized System of Preferences. (con.)	
		Wine of fresh grapes, including fortified wines; grape must other than that of heading 2009 (con.):	
		Other wine; grape must with fermentation prevented or arrested by the addition of alcohol:	
		In containers holding 2 liters or less:	
		[Effervescent wine]	
		Other:	
SCEER-10	2204.21.40	Of an alcoholic strength by volume not over 14 percent vol.	Hungary
	or	or	
		Of an alcoholic strength by volume not over 14 percent vol.:	
SCEER-11	2204.21.40(pt.)	If entitled under regulations of the United States Internal Revenue Service to a type designation which includes the name "Tokay" and if so designated on the approved label	do.
		Of an alcoholic strength by volume over 14 percent vol.:	
		[If entitled under regulations of the United States Internal Revenue Service to a type designation which includes the name "Marsala" and if so designated on the approved label]	
SCEER-12	2204.21.80	Other	do.
	or	or	
SCEER-13	2204.21.80(pt.)	If entitled under regulations of the United States Internal Revenue Service to a type designation which includes the name "Tokay" and if so designated on the approved label	do.
		Undenatured ethyl alcohol of an alcoholic strength by volume of less than 80 percent vol.; spirits, liqueurs and other spirituous beverages; compound alcoholic preparations of a kind used for the manufacture of beverages:	
		Spirits obtained by distilling grape wine or grape marc (grape brandy):	
		[Pisco and singani]	
		Other:	
		In containers each holding over 4 liters:	
SCEER-14	2208.20.50	Valued not over $2.38/liter	do.
		Cyclic hydrocarbons:	
		Other:	
SCEER-15	2902.90.50(pt.)	Anthracene; and 1,4-Di(2-methylstyryl)benzene	Czechoslovakia
		Sulfonated, nitrated or nitrosated derivatives of hydrocarbons, whether or not halogenated:	
		Derivatives containing only sulfo groups, their salts and ethyl esters:	
		Other:	
		Aromatic:	
SCEER-16	2904.10.20(pt.)	2-Anthracenesulfonic acid	do.
SCEER-17	2904.10.30(pt.)	Benzenesulfonyl chloride	Poland
		Other:	
SCEER-18	2904.90.35	4,4'-Dinitrostilbene-2,2'-disulfonic acid	Czechoslovakia

1/ Harmonized Tariff Schedule of the United States.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-30063; International Series No. 352; File No. SR-CBOE-91-36]

Self-Regulatory Organizations; Filing of Proposed Rule Change by the Chicago Board Options Exchange, Inc., Relating to the Listing of Reduced Value Index Options on the Deutsche Aktien Index ("DAX")

December 11, 1991.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on October 15, 1991, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE is proposing to list and trade index options, pursuant to chapter XXIV of the Exchange's Rules, based on a reduced value of the Deutsche Aktien Index ("DAX" or "Index"). The DAX is a broad-based, capitalization-weighted index of 30 German blue-chip equities listed on the Frankfurt Stock Exchange ("FSE"). The Index options will be cash settled with a European-style exercise and have a value of one U.S. dollar for each reduced value DAX Index point.

The text of the proposed rule is available at the Office of the Secretary, CBOE, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and statutory basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to permit the CBOE to list and trade cash-settled, European-style index options based on a reduced value of the DAX. The DAX is a capitalization-weighted index comprised of 30 German blue-chip equities listed on the FSE, the fourth largest stock exchange in the world. The DAX stocks are drawn from a broad base of industries and account for 70 percent of the volume on the FSE.

2. Index Description

a. *Design.* The stocks comprising the DAX are chosen on the basis of market capitalization, trading volume and the early availability of daily opening prices. The DAX is a capitalization-weighted index, in which the capitalization of each stock is calculated based on the "listed" capital of a company. The listed capital of companies in the DAX includes both common and preferred shares, including those shares held in the corporate treasury. This represents a departure from the procedure used to calculate U.S. indexes, such as Standard & Poor's ("S&P") indexes, which are based on the number of outstanding shares of common stock only. The DAX is a "total-return" index, *i.e.*, the index price is adjusted for cash dividends paid on the component securities.

As of September 20, 1991, the 30 stocks which comprise the Index ranged in capitalization from DM 1.1. billion ($679 million) to DM 36.4 billion ($21.8 billion). The stock with the highest capitalization, "Allianz," accounts for about 11 percent of the Index, primarily due to its unusually high share price of about DM 2,023 ($1,214). The median capitalization for the DAX as of this date was DM 6.7 billion ($4.0 billion).[1] The largest 13 stocks in the DAX Index account for approximately 75 percent of the Index's capitalization of DM 335 billion ($201.1 billion). The 30 stocks included in the DAX represent approximately 60 percent of the capitalization of the German equity market.[2]

In general, the stocks with the highest capitalization are the most actively traded. Average trading volume in DAX stocks ranges from approximately 34,000 to 670,000 shares per day, with average daily trading volume for all the stocks in the Index equalling approximately 226,000 shares per day. The Index is composed of ten broad industry groupings, such as chemicals, automobile and insurance companies, among others, which reflect the industry composition of the German equity market.

b. *Calculation and Dissemination.* The DAX is calculated every minute from 10:30 a.m. to 1:30 p.m. Frankfurt time (3:30 a.m. to 6:30 a.m. Chicago time), based on last sale prices of the component stocks. The Index is calculated by the FSE and disseminated over Reuters News Service. The Index price is not disseminated until opening prices are available for at least 15 component stocks, of any size, which together constitute at least 70 percent of the capitalization of the Index. Until each underlying stock opens, the Index is calculated using each stock's previous-day closing price.

As noted above, the DAX is a capitalization-weighted index that reflects changes in the capitalization or market value of the component stocks relative to the capitalization on a base date. The base date for DAX is December 30, 1987, at which time the Index equalled 1000. The capitalization of a particular stock in the DAX is calculated by multiplying the listed capital by the price of the common stock, or the price of the preferred stock if the common stock is not listed.

Since the DAX is a total-return index, the capitalization of each stock is adjusted to reflect its dividend payment on its ex-dividend date. This adjustment is made because German companies usually pay their dividends only once per year (generally in June or July). If not adjusted, the annual dividend payment would result in a significant drop in the Index value at the time when the dividends are paid. Therefore, the dividend adjustment is calculated so that share prices reflect full dividend reinvestment. As calculated by the FSE, adjustments are made by multiplying each stock's capitalization by an adjustment factor particular to each stock price. The resulting "adjusted" capitalization for each of the 30 stocks then is summed and divided by the base date capitalization. The type of adjustment described above is also utilized when a company issues new shares for which the shareholders have preemptive rights, or when any other intra-year adjustments, such as mergers and spinoffs, occur.

The number of "listed" shares of each stock is updated annually in September. At that time, the adjustment factors, mentioned above, which reflect the dividend payments and/or intra-year adjustments are rescaled to 1. To maintain continuity in the Index when this occurs, the Index is adjusted through another calculation. For this calculation, the FSE multiplies the ratio of capitalization (current capitalization divided by base date capitalization) by the "chain index factor." The FSE employs the "chain index factor" to reflect all previous dividend and capitalization adjustments made during the year. In this manner, continuity in the DAX is maintained despite changes in the "listed" shares and rescaling of the individual adjustment factors back to 1.

Finally, the Index level at any point in time is equal to the "adjusted" ratio of the current market capitalization to the base-date capitalization, multiplied by 1000. Accordingly, the Index level equalled 1,616.07 as of the close on September 20, 1991.

c. *Maintenance.* The DAX is maintained by the FSE in conjunction with the Federation of the German Stock Exchanges (composed of 8 German stock exchanges) and the Borsen-Zeitung (an industry newspaper). "Listed" capitalization, as noted above, is updated once per year. Based on the FSE's policy, it will not alter the composition of the DAX unless a stock fails to meet certain criteria, including large market capitalization and trading volume. For instance, since mid-1989 "Feldmuhle Nobel" and "Nixdorf" were replaced in the Index as a result of failure to meet the FSE's criteria. Replacements are generally made from a list of substitute stocks. If there is no company from the same industry group, then other industry stocks may be substituted.

3. Index Options Trading

The Exchange notes that the DAX Index level is high (about 1,625) in relation to listed domestic index levels. The Exchange, therefore, proposes to base trading in its options on a fraction of the value calculated by the FSE. The Exchange anticipates that a U.S. index level of one-tenth of the DAX level would be appropriate. After dividing the DAX by 10 and rounding to the nearest $0.01, the Exchange will disseminate the reduced value of the Index to vendors through the OPRA system.

The value of one U.S. dollar will be assigned to one reduced value Index point, so that the option premium values will change in U.S. dollar terms. This method permits the option premiums to be quoted in U.S. dollars and trading accounts to be denominated in U.S. dollars. All Exchange, Options Clearing Corporation and clearing member systems will be able to accommodate trading and clearance and settlement of the options without alteration. This will facilitate the trading of DAX options by U.S. retail customers.

4. Exercise

The Exchange proposes that DAX options will have a European-style exercise and that they will not trade on the Friday preceding expiration (this corresponds to exercise and trading days of NSX index options). The proposed options will expire on the Saturday following the third Friday of the expiration month. The settlement value for exercise, which is termed the Current Index Value ("CIV"), will be calculated by the FSE based on FSE prices between 12:30 and 1:30 p.m. Frankfurt time (5:30 to 6:30 a.m. Chicago time) on the day following the last day of trading in the expiring contracts. The trading in the expiring contract month will normally cease on a Thursday at 3:15 p.m. Chicago time, unless a holiday occurs. Therefore, the CIV value for exercise of the DAX options will be determined during Friday trading at the FSE. If a stock does not trade during this interval, or if it fails to open for trading, the last available price on the stock will be used in the calculation of the Index, as is done for currently listed indexes. When expirations are moved in accordance with Exchange holidays, such as when the CBOE is closed on the Friday before expiration, the last trading day for expiring options will be Wednesday and the CIV for exercise will be calculated during the Thursday trading session on the FSE, even if it is open on Friday. If the FSE is closed on the Friday before expiration but the CBOE is not, the last trading day for expiring options will be moved up as if the CBOE had a Friday holiday.

The Exchange has designed the procedure for calculating the settlement value for its DAX options with the intent to eliminate the potential to manipulate the underlying markets in order to affect the options settlement value. The FSE calculates and disseminates its CIV for exercise based on the average Index values (excluding the 3 high and the 3 low Index value) taken at each minute in the period from 12:30 p.m. to 1:30 p.m. Frankfurt time. In other words, the CIV, upon which settlements will be based, represents the average of 55 separate prices taken over an hour period. To reflect the reduced-value Index in U.S. dollars, the Exchange's CIV will be equal to the fraction, *i.e.*, 1/10th, of the DAX CIV calculated by the FSE represented in U.S. dollars.

The Exchange feels that this method of settlement, based on an average of Index levels, severely restricts the potential to artificially support or depress the prices of component stocks in order to profit on an options position or positions. More importantly, however, the Exchange believes that the characteristics of the Index, particularly the high capitalization and turnover of DAX component stocks, should preclude manipulative activities. The following discussion provides an example of the price change in the highest capitalization stock within the Index (based on prices as of September 20, 1991 with other stock prices assumed constant) necessary to produce a $2.00 change in a 3-month, at-the-money DAX call option. In order to increase the reduced value DAX call option by about $2.00 (from $6.98 to $9.01), the full value DAX Index would have to increase by 32.43 (from 1617.07 to 1648.50). The change in total Index capitalization would increase from DM 335.1 billion to DM 341.8 billion, a change of DM 6.7 billion. This would translate into an increase in the price of Allianz of DM 373.54. Accordingly, the example illustrates that the price of the top stock in the index would have to increase by 18.5% in order to move the call price by $2.00. As can be seen, it would require a tremendous amount of influence in the underlying market to produce even a small move in the U.S. derivatives market. Further, the highest-weighted stocks in the Index are actively traded outside the FSE, in particular, on the Stock Exchange Automated Quotation System (SEAQ International) of the London Stock Exchange. Therefore, the Exchange feels that the settlement procedure it will apply to this option, coupled with the nature of the stocks in the Index, virtually forecloses any potential for manipulating the proposed DAX options.

5. Exchange Rules Applicable to Stock Index Options

The DAX option, as proposed, will be very similar to the two broad-based S&P Index options presently listed for trading, including position and exercise limits, expiration months, and index multiplier. The Exchange proposes to establish the same position limits which are used for existing stock index options, *i.e.*, 25,000 contracts on either side of the market, provided that no more than 15,000 of such contracts are in the series in the nearest expiration month. The Exchange intends to list a March quarterly cycle of expiration months, and may list two additional long-term options series with two and

[1] In comparison, the median capitalization of the S&P 500 as of September 20, 1991, was $2.2 billion.

[2] The German equity market totals approximately DM 558 billion ($335 billion).

VOL 56 ISS 243 DEC 18 1991 UMI

three years to expiration. The Exchange also has proposed to list series in 2½ point intervals.

The Exchange proposes to amend the following rules to accommodate trading of options on the DAX. Exchange Rule 24.9(c) has been modified to include this Index in the definition of European Style Exercise. Other rules pertinent to this proposed rule change have recently been approved by the Commission.[3]

6. Surveillance of Underlying Trading

The Exchange has a market surveillance agreement with the FSE, which is the largest stock exchange in Germany and the fourth largest in the world. Its membership consists of 130 commercial banks. Exchange "official brokers" determine trade prices in the underlying stocks and are required to set prices at levels that allow for the matching of the largest number of shares. Fraudulent manipulation of stock is a criminal offense in Germany, which, with the cooperation of the FSE, is investigated by the public prosecutor of the State of Hessen. In addition, special rules apply to investigations into insider trading, which rules all FSE members have voluntarily agreed to put into practice. Pursuant to its surveillance agreement, the CBOE will be able to obtain volume, price and recorded transaction times from the records of the FSE, which will provide the Exchange with a means of surveilling the trading of stocks on the FSE underlying the DAX.

7. Economic Rationale

The DAX tracks an equity market that is not currently represented in the domestic derivative markets. DAX options will provide retail and institutional investors with a means to benefit from their forecasts of German equity market performance. the Index will provide a performance measure and evaluation guide for stock portfolios with exposure to the German equity market. Additionally, DAX options could provide an effective means for hedging the risks of German stocks and provide a low cost means of altering the composition of an equity portfolio.

[3] The Commission approved a CBOE proposal to trade options on a Reduced Value FT–SE 100 Index in Securities Exchange Act Release No. 29722 (September 23, 1991), 56 FR 40807. In addition, Exchange proposals to trade options on a Reduced Value Eurotrack 100 Index and Reduced Value Eurotrack 200 Index are pending with the Commission. See Securities Exchange Act Release Nos. 29045 (April 4, 1991), 56 FR 14553 (File No. SR–CBOE–91–08) and 29043 (April 4, 1991), 56 FR 14551 (File No. SR–CBOE–91–09).

8. Basis

The Exchange believes that the proposed rule change is consistent with the requirements of the Act, and, in particular, section 6(b)(5), in that it is designed to prevent fraudulent and manipulative acts and practices, and to eliminate the potential to manipulate the underlying markets in order to affect the options' settlement value.

B. Self-Regulatory Organization's Statement on Burden on Competition

The CBOE does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by January 8, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91–30129 Filed 12–17–91; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–30068; File No. SR–CBOE–91–45]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Chicago Board Options Exchange, Inc., Relating to Corrections to Exchange Rule 30.18

December 12, 1991.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on November 20, 1991, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE proposes to amend Exchange Rule 30.18(a), entitled "General Floor Prohibitions," to make clarifying and clerical corrections. Exchange rule 30.18(a) is intended to prohibit a member from buying or selling a stock on the CBOE when the member or an affiliate has a position in an option or warrant underlying that stock.[1] As currently drafted, however, Exchange Rule 30.18(a) provides that a member or an affiliate cannot buy or sell a security on the CBOE where such member or affiliate "holds such security or has sold or granted an option or warrant on that security * * *." Therefore, as currently drafted, the Rule inappropriately applies when a member or an affiliate holds a long stock position. Accordingly, the CBOE proposes to delete the words "such security" from Exchange Rule 30.18(a) to clarify that a member or an affiliate cannot trade a security on the Exchange only when its holds or has sold or granted an option or warrant on that security.

[1] However, a member may purchase or sell the underlying stock on another exchange.

In addition, the Exchange proposes to amend paragraphs (a) and (b) of Exchange Rule 30.18 to clarify the identity of an affiliate of a member as a "person associated with such member or member organization." The text of the proposal is available at the Office of the Secretary, CBOE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

In October 1990, the Commission approved a CBOE proposal establishing listing and trading rules for stocks, rights, warrants and other securities.[2] Exchange Rule 30.18(a) is intended to prohibit a member from buying or selling an underlying stock on the Exchange when the member or an affiliate has a position in the related option. The CBOE proposes to amend Exchange rule 30.18 to make clarifying and clerical corrections. Specifically, the CBOE proposes to delete from Exchange Rule 30.18(a)(i) the words "such security" because that language indicates, incorrectly, that the rule's prohibition applies when the member has a long position in the security. As a result, amended Exchange Rule 30.18(a) clearly sets forth the CBOE's intent when proposing the rule that a member or its affiliates be prohibited from trading a security on the Exchange only when the member or its affiliate holds or has granted an option or warrant on that security.

[2] See Securities Exchange Act Release No. 28556 (October 19, 1990), 55 FR 43233 (order approving File No. SR–CBOE–90–06).

In addition, the Exchange proposes to amend paragraphs (a) and (b) of Exchange Rule 30.18 to define the affiliate of a member as a "person associated with such member or member organization." The proposed definition will conform Exchange Rule 30.18 to the definition proposed by the CBOE for Exchange Rule 1.1(qq), which defines affiliate as a "person associated with a member or associated person of a member." [3]

(2) Basis

The CBOE believes that the proposed rule change is consistent with Section 6(b) of the Act, in general, and furthers the objectives of section 6(b)(5), in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and to protect investors and the public interest.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The CBOE does not believe that the proposed rule change will impose any inappropriate burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change interprets and clarifies a stated policy practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule of the Exchange, it has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b–4 thereunder. At any time within 60 days of the filing of such proposed rule change the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by January 8, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 34–30056; File No. SR–MSE–91–12]

Self-Regulatory Organizations; Order Approving Proposed Rule Change of the Midwest Stock Exchange, Inc., Regarding the Implementation of a Modified Version of the SuperMAX System to Run Concurrently With SuperMAX During the SuperMAX Pilot Program.

December 10, 1991.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), on July 23, 1991, the Midwest Stock Exchange ("MSE") filed with the Securities and Exchange Commission ("Commission") a proposed rule change to provide a modified version of the SuperMAX system (referred to by the MSE as "Enhanced SuperMAX") to run concurrently with SuperMAX during the SuperMAX pilot program,[1] currently in effect through May 14, 1992.[2]

Notice of the proposed rule change was given in Securities Exchange Act Release No. 29616 (August 27, 1991), 56 FR 43637. The Commission received no

[1] The filing requested that the proposed rule change be granted accelerated approval. The exchange withdrew its request for accelerated approval on August 15, 1991. See letter from Daniel J. Liberti, Associate Counsel, Midwest Stock Exchange, to Kathryn Natale, Assistant Director, Division of Market Regulation, SEC, dated August 15, 1991.

[2] Securities Exchange Act Release No. 29049 (November 18, 1991).

[3] See File No. SR–CBOE–91–41.

comments on the proposal. This order grants approval of the proposed rule change.

I. Description of the Proposed Rule Change and Exchange Rationale

The proposed rule change provides for a modified version of the SuperMAX system and will expand the current SuperMAX pilot program by offering the modified version of SuperMAX during the remainder of the pilot program. The modified version of SuperMAX ("Modified SuperMAX") will operate as a separate system and will be available to MSE specialists as an addition, or as an alternative, to SuperMAX. Participation in Modified SuperMAX will be voluntary for specialists and will apply on a stock-by-stock basis for agency market orders of 1,099 shares or fewer in Dual Trading Systems issues. Modified SuperMAX will operate during the trading day from 9 a.m. CST until the close.

Unlike SuperMAX, however, which executes automatically all eligible agency market orders either at the consolidated best bid or offer ("BBO") or at a price that represents a ⅛ price improvement,[3] Modified SuperMAX will stop a market order automatically if its execution at the BBO would create either a double up tick or double down tick. If the execution at the BBO would not result in a double up tick or double down tick, then Modified SuperMAX will execute the order at the BBO. Once a Modified SuperMAX eligible order is stopped, Modified SuperMAX will execute the stopped order based upon the next sale in the primary market.

The Modified SuperMAX algorithm compares the previous last sale price to the next sale price, and considers the direction of the market as evidenced by those sale prices, to determine that price at which the stopped market order will be filled. Modified SuperMAX will execute stopped orders according to the following criteria:

For Stopped Buy Orders:

1. If the next primary market sale is less than or equal to the last previous sale, then the stopped order will be executed at the last previous sale price. If the next primary market sale represents a double down tick or zero minus tick from the last previous sale, however, then the stopped order will be filled at the last previous sale price plus ⅛.

2. If the next primary market sale is greater than the last previous sale, then the stopped order will be executed at the next primary market sale price. If the next primary market sale is inferior to the stop price, however, then the stopped order will be filled at the stopped price (*i.e.*, the offer).

For Stopped Sell Orders:

3. If the next primary market sale is greater than or equal to the last previous sale, then the stopped order will be executed at the last previous sale price. If the next primary market sale represents a double up tick or zero plus tick, however, then the stopped order will be filled at the last previous sale price minus ⅛.

4. If the next primary market sale is less than the last previous sale, then the stopped order will be executed at the next primary market sale price. If the next primary market sale is inferior to the stop price, however, then the stopped order will be filled at the stopped price (*ie.*, the bid).

Modified SuperMAX will not execute an order at the BBO if such execution would result in an out of range execution, nor will Modified SuperMAX provide a fill at a price worse than the stop price.

If a specialist chooses Modified SuperMAX, the criteria outlined above will be followed for all eligible stocks. If a specialist chooses to have Modified SuperMAX run concurrently with SuperMAX, then the size of the agency market order will determine which method of execution to be followed. An order of 599 shares or fewer will execute according to SuperMAX rules; an order of 600 shares to 1,099 shares will execute according to Modified SuperMAX rules. An order will never be subject to execution under the rules of both SuperMAX and Modified SuperMAX.

Any eligible order in a stock included in Modified SuperMAX that is manually presented at the specialist post by a floor broker also must be guaranteed an execution by the specialist pursuant to the above-listed criteria. In the unlikely event that a contra side order that would better the Modified SuperMAX execution is presented at the post, the specialist must adjust the incoming order that was executed pursuant to the Modified SuperMAX criteria.

Certain stocks, depending upon the specific trading characteristics of the issue, may not be appropriate for SuperMAX, and the MSE believes that the specialist is in the best position to determine SuperMAX eligibility. During volatile periods, individual stocks or all stocks may be removed from SuperMAX with the approval of two members of the Committee on Floor procedure.[4]

The MSE represents that Modified SuperMAX will not have any adverse impact upon MSE systems capacity. In fact, the MSE increased its systems capacity in anticipation of the addition of Modified SuperMAX to sufficiently handle any added demands on the system for processing the Modified SuperMAX algorithm.

The purpose of the rule change is to offer a version of the SuperMAX system that will encourage more MSE specialists to use SuperMAX. The MSE intends to expand the existing pilot program for SuperMAX by offering the modified version during the remainder of the SuperMAX pilot.[5] The MSE wants to begin offering Modified SuperMAX in order to evaluate both systems during the SuperMAX pilot program. During the concurrent operation of both pilot programs, specialists will be able to use Modified SuperMAX in addition, or as an alternative, to SuperMAX.

Similar to SuperMAX, Modified SuperMAX does not provide order exposure, but substitutes the algorithm described above that permits price improvement under certain circumstances. Where SuperMAX automatically executes small agency market orders at the BBO or at ⅛ price improvement from the BBO, Modified SuperMAX stops agency market orders if their execution at the BBO would result in a double up tick or double down tick, as measured against the previous last sale price in the primary market. The MSE believes that this feature of Modified SuperMAX provides a fairer and more accurate means of executing market orders than does SuperMAX because executions will be based on the current direction of the market prior to execution. While Modified SuperMAX will not automatically provide a ⅛ betterment on price, it will allow for even better price improvement if current market conditions dictate that such an improvement is warranted.[6]

The MSE believes that Modified SuperMAX fills will have a more reasonable relation to the current market in a stock than does SuperMAX. by waiting for a next sale, rather than executing based solely upon the consolidated BBO, Modified SuperMAX, in effect, requires validation of the displayed market before filling an order. The validation feature of Modified SuperMAX adds a check to a market that may be changing. The MSE believes that this enhancement will benefit customers and specialists alike because it provides a fairer and more accurate price at the time of execution.

In addition, Modified SuperMAX will continue to consider the last primary market sale, which customers look to in assessing the quality of executions on the MSE. However, by also looking to the next sale in the primary market, customers will receive the added benefit of an execution based upon consideration of two primary sales, one of which is the most current market information on that stock.

Modified SuperMAX is a result of the MSE's continuing efforts to offer customers quality fills on its trading floor. The MSE believes that it should contribute to increased order flow to the MSE, thereby making the exchange and its specialists more competitive without using disproportionate systems resources or placing undue burdens upon specialist profitability.

II. Discussion and Conclusion

The Commission has reviewed carefully the MSE's proposed rule change and concludes, for the following reasons, that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and in particular, with section 6(b)(5) of the Act.

The Commission has expressed concerns, most notably in the original SuperMAX approval order,[7] about the possible adverse effects on execution quality of a lack of order exposure. At that time, the Commission emphasized that increased order exposure may provide economic benefits to the securities markets by encouraging enhanced interactions of orders, increased opportunities for best execution of customer orders, and greater intermarket competition for order flow (and, ultimately, increased market efficiencies). The Commission also acknowledged, however, that increased order exposure may impose certain economic costs in terms of execution delay and interjection of manual processing.

The Commission concluded that although SuperMAX orders would not be exposed to the market, SuperMAX's price betterment feature might actually improve the chances that a customer's order would be executed between the bid-ask spread. While Modified SuperMAX will not automatically provide a ⅛ price betterment, it will provide some opportunity for price improvement. In this respect, we note that most automatic execution systems currently in effect, including the MSE's MAX system, provide executions at the quote only. It is hoped that Modified SuperMAX's algorithm will encourage more MSE specialists to use the SuperMAX system, so that its benefits may inure to more customers.

The Commission believes that Modified SuperMAX pricing and execution procedures are consistent with the maintenance of fair and orderly auction markets on national securities exchanges. The execution criteria of Modified SuperMAX should contribute to an orderly market because they help to reduce variations from trade to trade on low volume.

The Commission approves this system on a pilot basis only, and will consider these issues again in the event that the MSE requests permanent approval of Modified SuperMAX. Any request for permanent approval would require, of course, that the MSE submit a rule filing pursuant to rule 19b-4. To help the Commission better evaluate these issues, the MSE must submit, in connection with any request for the permanent approval of Modified SuperMAX, the following data: (1) The number of orders executed in both SuperMAX and Modified SuperMAX during the pilot programs; (2) share and dollar volume for both systems during the pilot programs; (3) a comparison of order executed under SuperMAX, MAX, and Modified SuperMAX, indicating where orders executed under one system would have received a more favorable execution under another system and where use of the last sale price would have provided a superior execution;[8] (4) The number of specialists using each system, and the number of stocks included in each; and (5) the average length of time between receipt of an order and execution under each system.

While the Commission believes that this proposal is less ideal than SuperMAX, the Commission finds that it is consistent with the requirements of section 6 of the Act and the rules and regulations thereunder applicable to a national securities exchange. In particular, the Commission finds that the proposed rule change is consistent with section 6(b)(5) of the Act, in that it is designed to promote just and equitable principles of trade, perfect the mechanisms of a free and open market, and, in general, to protect investors and the public interest.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, That the rule change be, and hereby is, approved on a pilot basis until May 14, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91-30198 Filed 12-17-91; 8:45 am]

BILLING CODE 8010-01-M

---

[3] The execution criteria for SuperMAX are as follows:

A. Both buy and sell orders in markets quoted with a minimum variation (⅛th spread) or orders that do not meet the criteria in B or C below will be executed based upon the consolidated BBO as the case may be.

B. Buy orders in markets quoted with more than ⅛th spread will be executed at a price ⅛th better than the consolidated best offer if: (a) an execution at the consolidated best offer would create a double up tick based upon the last sale in the primary market; or (b) an execution at the consolidated best offer would result in a greater than a ⅛th price change from the last sale in the primary market.

C. Sell orders in markets quoted with more than a ⅛th spread will be executed at a price ⅛th better than the consolidated best bid if: (a) an execution at the consolidated best bid would create a double down tick based upon the last sale in the primary market; or (b) an execution at the consolidated best bid would result in greater than a ⅛th price change from the last sale in the primary market.

[4] The MSE represented that stocks would only be removed from Modified SuperMAX in the rare instances when the primary market had designated a "fast market." The MSE would broadcast a message indicating that the effected stocks were off SuperMAX. Executions in those stocks would then default into the MAX system.

[5] SuperMAX has been in effect on a pilot basis since May 14, 1990 (See Securities Exchange Act Release No. 20614 (May 14, 1990), 55 FR 20680). It is in effect currently until May 14, 1992 (See Securities Exchange Act Release No. 29849 (November 18, 1991).

[6] The following example demonstrates an instance where Modified SuperMAX would provide a better execution than SuperMAX. For a customer buy order, if the previous sale were at 10¼, and the previous sale before that were at 10, and the market were currently quoted at 10 to 10⅛, Modified SuperMAX would stop the order at 10⅛. If the next sale were at 10¼, Modified SuperMAX would execute the order at 10¼. SuperMAX would have executed the same order at 10⅜.

[7] Securities Exchange Act Release No. 28014 (May 14, 1990), 55 FR 20680.

[8] An objective sampling of stocks using each system would be acceptable.

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Midwest Stock Exchange, Inc.

December 12, 1991.

The above named national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and rule 12f-1 thereunder for unlisted trading privileges in the following securities:

Intelligent Systems Corporation
Common Stock, $.01 Par Value (File No. 7-7671)

Professional Bancorp, Inc.
Common Stock, $.08 Par Value (File No. 7-7672)

Common Stock, $.10 Par Value (File No. 7–7674)
Bio Whittaker, Inc.
Common Stock, Par Value 1¢ (File No. 7–7675)
General Motors Corporation
Depositary Shares (representing ¼ share of Series B Preferred Stock, $.10 Par Value) (File No. 7–7676)
Office Depot, Inc.
Common Stock, $.01 Par Value (File No. 7–7677)
Owens-Illinois, Inc.
Common Stock, $.01 Par Value (File No. 7–7678)
Plains Resources, Inc.
Common Stock, $.10 Par Value (File No. 7–7679)
British Telecommunications, Plc
Interim American Depositary Shares (File No. 7–7680)

These securities are listed and registered on one or more other national securities exchange and is reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before January 6, 1992, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–30065; File No. SR–NASD–91–41]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change Relating to Amendments to the Examination, Specifications and Study Outline for the Investment Company and Variable Contract Products ("Series 26") Qualifications Examination

December 11, 1991.

On August 12, 1991, the National Association of Securities Dealers, Inc. ("NASD" or "Association") submitted a proposed rule change to the Securities and Exchange Commission ("SEC" or "Commission") pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and rule 19b–4 thereunder.[2] The proposal amends the NASD's Series 26 examination which tests knowledge of investment company and variable contract products by adding new questions to reflect both regulatory and business changes in this segment of the securities industry. The number of questions per test has been increased to 100 and the testing time will be two hours. In addition, the proposal amends the study outline and examination specifications for the Series 26 examination. The amendments do not result in any textual changes to the NASD By-Laws, Schedules to the By-Laws, rules, practices or procedures.

Notice of the proposed rule change together with its terms of substance was provided by the issuance of a Commission release (Securities Exchange Act Release No. 29704, September 18, 1991) and by publication in the **Federal Register** (56 FR 46597, September 25, 1991). No comments were received on the proposal. This order approves the proposed rule change.

Pursuant to section 14A(g)(3) of the Act,[3] the NASD is authorized to prescribe standards of training, experience, and competence for persons associated with NASD members. To this end, the NASD has developed examinations that it administers to establish that such persons have attained the requisite levels of knowledge and competence. The NASD periodically reviews the content of the examinations to determine whether amendments are necessary or appropriate in view of changes pertaining to the subject matter covered by the examinations. Therefore, the NASD has determined to update the Series 26 examination in light of business and regulatory changes since the examination was last revised. The NASD has indicated that the new examination and study outline will be in use beginning April 1, 1992.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, the requirements of sections 15A(g)(3) and 15A(b)(8) [4] of the Act and the rules and regulations thereunder. As previously mentioned, section 15A(g)(3) authorizes the NASD to condition the membership of any person associated with an NASD member firm if such person does not meet such standards of training, experience, and competence as are prescribed by the rules of the NASD. To this end, the proposed amendments to the Series 26 examination will assist in ensuring that associated persons are competent and knowledgeable in areas within the scope of the examination. Section 15A(b)(6), in part, requires that the rules of the NASD are designed to protect investors and the public interest. By periodically revising the contents of its qualification examinations to reflect regulatory and business changes, the NASD will help ensure that persons associated with NASD members keep abreast of regulatory changes, thus, fostering protection of investors and the public interest. The Commission believes, for the reasons stated above, that the proposed rule change satisfies these statutory requirements.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, That the above-mentioned proposed rule change be, and hereby is, approved, effective April 1, 1992.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.[5]

Margaret H. McFarland,

Deputy Director.

Self-Regulatory Organizations; Notice of Filing of Two Proposed Rule Changes by New York Stock Exchange, Inc., Relating to Its Floor Member (Series 15) Examination

December 11, 1991.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on September 10, 1991, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") two proposed rule changes relating to the Exchange's Floor Member (Series 15) Examination as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule changes from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The first proposed rule change (File No. SR–NYSE–91–28) consists of the Content Outline for the Exchange's Series 15 Examination while the second proposed rule change (File No. SR–NYSE–91–29) includes the Series 15 Examination Specifications.[1]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule changes and discussed any comments it received on the proposed rule changes. The text of these statements may be examined at the places specified in Item III below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Series 15 Examination was created in 1962 as the basic test to be administered to all Floor Members. The Series 15 Exam is a qualifications examination required pursuant to NYSE Rule 304A (Member and Allied Member Examination Requirements) and is intended to ensure that Exchange Floor Members have the basic knowledge necessary to perform their functions and responsibilities. Additional qualification examinations must be successfully completed by members prior to receiving Exchange approval to act as specialists, registered competitive market-makers, competitive traders or Floor officials.[2]

The Series 15 Exam Content Outline was revised by the Exchange in conjunction with a committee comprised of the different categories of Exchange Floor Members. In addition, the Exam Specifications detail the areas covered by the 100 question examination and break down the proportion of examination questions culled from each area.

The statutory basis for the Series 15 Examination Specifications, Content Outline and examination questions is section 6(c)(3)(B) under the Act. Under that section, the Exchange may bar a natural person from becoming a member, if such natural person does not meet such standards of training, experience and competence as are prescribed by the rules of the Exchange. Pursuant to this statutory obligation, the Exchange has developed examinations that are administered to establish that Exchange Floor Members have attained specified levels of competence and knowledge.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has neither solicited nor received written comments on the proposed rule changes.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such other period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the NYSE. All submissions should refer to File Nos. SR–NYSE–91–28 and/or 91–29 and should be submitted by January 8, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[3]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91–30200 Filed 12–17–91; 8:45 am]

BILLING CODE 8010–01–M

[1] Additionally, the proposals include the actual examination questions (see letter from Donald van Weezel, Managing Director, Regulatory Affairs, NYSE, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated September 30, 1991).

[2] For example, Compliance Supervisors, as that term is defined in NYSE Rule 342.13(b), must successfully complete the Compliance Official Qualifications (Series 14) Examination which is administered by the Exchange.

[Release No. 34–30064; File No. SR–OCC–91–09]

Self-Regulatory Organizations; the Options Clearing Corporation; Filing of Proposed Rule Change Relating to Establishing a Cross-Margining Program with the Kansas City Board of Trade Clearing Corporation

December 11, 1991.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 20, 1991, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change (SR–OCC–91–09)

[3] 17 CFR 200.30–3(a)(12) (1990).

UMI

as described in Items I, II, and III below, which items have been prepared by OCC. On October 22, and December 9, 1991, OCC amended the proposal.[1] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change will establish a cross-margining program with the Kansas City Board of Trade Clearing Corporation ("KCC").

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of and statutory basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) General Purpose

The purpose of this rule change is to establish a cross-margining program between OCC and KCC which parallels the existing cross-margining program between OCC and the Chicago Mercantile Exchange ("CME"). A detailed discussion of the OCC–CME Cross-Margining Program is set forth in File Nos. SR–OCC–89–01[2] and SR–OCC–90–01.[3] Because the OCC–KCC Cross Margining Program is virtually identical to the OCC–CME Cross Margining Program, this filing will only discuss the differences between the two programs. OCC accordingly incorporates by reference the description of the legal considerations set forth in File Nos. SR–OCC–89–01 and SR–OCC–90–01.

(2) OCC–KCC Cross-Margining Program

KCC acts as the clearing organization for futures contracts and options on futures contracts for which the Kansas City Board of Trade ("KCBT") has been designate by the CFTC as a contract market. The OCC–KCC Cross Margining Agreement ("OCC–KCC Agreement") provides for cross-margining of both proprietary accounts and non-proprietary accounts of market professionals. The eligible contracts for such cross-margining include KCC-cleared futures on the Value Line Index and OCC-cleared put and call options on the Value Line Index.

Except for the several minor differences in terms and in language, the terms of the OCC–KCC Agreement and of the other required OCC–KCC cross-margining documents are the same as the terms of the OCC–CME Amended and Restated Cross-Margining Agreement ("OCC–CME Amended Agreement") and of the other OCC–CME required cross-margining documents. The minor differences are described below.

Consistent with the requirements of the CFTC, the OCC–KCC Agreement will not permit Clearing Members to designated either the paired proprietary cross-margin accounts or the paired non-proprietary cross-margin accounts or both as cross-margin pledge accounts as contemplated in section 3 of the OCC–CME Amended Agreement. Section 3 of the OCC–KCC Agreement, therefore, is intentionally left blank, and other references to cross-margin pledge accounts are omitted from the OCC–KCC Agreement. This additionally is in accordance with the September 5, 1989, correspondence of Don L. Horwitz, General Counsel, OCC, to Jonathan Kallman, Assistant Director, Division, Commission, concerning the proprietary cross-margining program between OCC and CME (File No. SR–OCC–89–01).

Section 9 of the OCC–KCC Agreement generally requires each clearing organization to maintain, except as otherwise provided for therein, the confidentiality of all information obtained in connection with the OCC–KCC Agreement. The OCC–KCC Agreement provides that one clearing organization has the obligation to notify the other of a request for confidential information. Additionally, the OCC–CME Amended Agreement provides that one clearing organization is obligated to cooperate to a reasonable extent with the other in the event the other determines to seek a protective order against disclosing the confidential information. The OCC–KCC Agreement does not contain this additional obligation.

Section 14 of the OCC–KCC Agreement reflects the information sharing arrangements between OCC and KCC. It specifically provides that one clearing organization must notify the other in the event that such clearing organization receives information which causes it significant concerns over the financial or operation capabilities of a clearing member. The OCC–CME Amended Agreement provides that the CME will advise OCC should any of its clearing members be on its "high risk" list. KCC has informed OCC that it does not have an equivalent listing.

Section 16 of the OCC–KCC Agreement concerns the arbitration of disputes under the OCC–KCC Agreement between OCC and KCC. In contrast to the OCC–CME Amended Agreement, the location of the arbitration proceedings will alternate between Chicago and Kansas City.

Lastly, the Subordination Agreement for OCC–KCC Cross-Margining (Joint Clearing Member) and the Subordination Agreement for OCC–KCC Cross-Margining (Affiliated Clearing Members) have been revised slightly to clarify the subordination arrangements. These revisions were made as a result of discussions between the CME and CFTC in connection with the establishment of the OCC–CME Cross-Margining Program.

The proposed rule change is consistent with the purposes and requirements of section 17A of the Act because it expands the implementation of cross-margining to another significant group of market participants, further enhancing the safety of the clearing system while providing lower clearing margin costs to participants.

(B) Self-Regulatory Organization's Statement on Burden on Competition

OCC does not believe that the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were not and are not intended to be solicited with respect to the proposed rule change, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which OCC consents, the Commissions shall:

(a) By order approve such proposed rule change or,

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of OCC. All submissions should refer to File No. SR–OCC–91–09 and should be submitted by January 8, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 91–30130 Filed 12–17–91; 8:45 am]

BILLING CODE 8010–01–M

[1] In Amendment No. 1, filed October 22, 1991, OCC requested that the Commission defer consideration of the portion of the original filing pertaining to non-proprietary cross-margining until regulatory approval is obtained from the Commission and the Commodity Futures Trading Commission ("CFTC"). Letter from Jean M. Cawley, Staff Counsel, OCC, to Jerry W. Carpenter, Branch Chief, Division of Market Regulation ("Division"), Commission (October 22, 1991).

In Amendment No. 2, filed December 9, 1991, OCC stated that because OCC and KCC had agreed to implement the portions of the original filing pertaining to non-proprietary cross-margining, OCC was requesting that the Commission review all portions of the proposed rule change. Letter from Jean M. Cawley, Staff Counsel, OCC, to Jerry W. Carpenter, Branch Chief, Division, Commission (December 9, 1991).

[2] Securities Exchange Act Release No. 27296 (September 28, 1989), 54 FR 41165 (order approving OCC–CME Cross-Margining Program limited to proprietary positions).

[3] Securities Exchange Act Release No. 29991 (November 28, 1991, 56 FR 61404 (order approving on a temporary basis the expansion of the OCC–CME Cross Margining Program to include futures and options positions of certain market professionals).

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Pacific Stock Exchange, Inc.

December 12, 1991.

The above named national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and rule 12f-1 thereunder for unlisted trading privileges in the following securities:

Joy Technologies, Inc.
Class A Common Stock, $.01 Par Value (File No. 7–7668)
Shopko Stores, Inc.
Common Stock, $.01 Par Value (File No. 7–7669)
Stop & Shop Companies, Inc.
Common Stock, $.01 Par Value (File No. 7–7670)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before January 6, 1992, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

VOL 56 ISS 243 DEC 18 1991 UMI

[Rel. No. IC-18440; 811-5483]

Association Advisers Fund, Inc.; Application

December 11, 1991.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: Association Advisers Fund, Inc.

RELEVANT ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on November 13, 1991.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on January 6, 1992, and should be accompanied by proof of service on applicant, in the form of an affidavit, or for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicant, 40 Rector Street, New York, New York 10006.

FOR FURTHER INFORMATION CONTACT: Elaine M. Boggs, Staff Attorney, at (202) 272-3026, or Nancy M. Rappa, Branch Chief, at (202) 272-3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end diversified investment company that was organized as a corporation under the laws of Maryland. On February 26, 1988, applicant filed a notification of registration pursuant to the Act. A registration statement under the Securities Act of 1933 Act was filed on February 26, 1988. The registration statement was declared effective on October 3, 1988, and the initial public offering commenced on October 18, 1988.

2. From the time of commencement of its initial public offering, applicant's shares were offered solely through MetLife Securities, Inc. ("MetLife"), the distributor, as investments for members of certain professional associations and other organized groups of persons. By mid-1990, MetLife had determined that in its view, the distribution effort had not succeeded, and informed the applicant's investment adviser of its intention not to proceed further with the distribution effort. The distributor's parent, Metropolitan Life Insurance Company ("Metropolitan"), which had provided the initial seed capital and which held approximately 99% of the Funds' assets, advised applicant of its intention to redeem its shares as soon as practicable.

3. At a meeting held on June 27, 1990, applicant's board of directors determined that in view of MetLife's and Metropolitan's determinations, continued operation of the applicant would not be viable and that further offers and sales of shares should cease. It was further determined by the board that public shareholders should be advised of the events and given the opportunity to redeem their shares at net asset value. As of June 27, 1990, there were 27 shareholders in the fund, other than Metropolitan, with assets totalling approximately $192,000. In July 1990, all public shareholders of the applicant redeemed their shares, after which Metropolitan redeemed its remaining shares. A portion of Metropolitan's redemption proceeds was retained to establish a liquidating reserve ("Reserve") in the amount of $130,000. All unamortized organizational expenses in the amount of $140,802.66 were borne by Metropolitan.

4. At a meeting held on February 22, 1991, applicant's board of directors approved resolutions authorizing the applicant's liquidation and winding up of its affairs.

5. Expenses of approximately $15,000 relating to the liquidation of the applicant are to be paid from the Reserve.

6. There are no securityholders to whom distributions in complete liquidation of their interests have not been made, except as noted above. Applicant has no debts or other liabilities that remain outstanding except those associated with the winding up of its affairs. Applicant is not a party to any litigation or administrative proceeding.

7. Applicant is not now engaged, nor does it propose to engage, in any business activities other than those necessary for the winding up of its affairs.

8. Applicant intends to file articles of dissolution under Maryland law after the receipt of an order declaring that applicant is no longer an investment company.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

Kidder, Peabody Special Growth Fund, Inc.; Application

December 11, 1991.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of application for deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: Kidder, Peabody Special Growth Fund, Inc.

RELEVANT ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on November 29, 1991.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on January 6, 1992, and should be accompanied by proof of service on applicant, in the form of an affidavit, or for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, 20 Exchange Place, 8th Floor, New York, New York 10005-3250. Attention: Lawrence H. Kaplan, Esq.

FOR FURTHER INFORMATION CONTACT: Elaine M. Boggs, Staff Attorney, at (202) 272-3026, or Nancy M. Rappa, Branch Chief, at (202) 272-3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a free at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end diversified investment company that was organized as a corporation under the laws of the State of Maryland. On March 26, 1984, applicant registered under the Act and filed a registration statement pursuant to section 8(b) of the Act. A registration statement under the Securities Act of 1933 was filed and the registration statement was declared effective on July 27, 1984. The initial public offering commenced immediately thereafter.

2. At a meeting held on June 27, 1990, applicant's board of directors adopted a plan of liquidation (the "Plan"). On or about August 16, 1990, applicant mailed proxy materials to its shareholders, who approved the Plan at a special shareholders' meeting held on October 15, 1990.

3. Pursuant to the Plan, applicant converted all portfolio securities and other assets into cash proceeds. Applicant's agency portfolio transactions were placed exclusively with brokers for best price and execution, to whom applicant paid $15,876 in brokerage commissions.

4. On November 8, 1990, applicant had total assets of $13,870,520, comprising 894,087.417 shares at a net asset value of $15.51 per share. On November 13, 1990, applicant distributed substantially all of its assets to its securityholders. Each shareholder received $15.51 per share.

5. Applicant retained approximately $17,446 for payment of expenses, which will not be invested in securities. Such expenses included, but were not limited to, legal fees, accounting fees, printing costs and miscellaneous expenses. Applicant's principal underwriter, Kidder, Peabody & Co. Incorporated, paid the expenses associated with the liquidation of applicant.

6. As of the date of the application, applicant's outstanding liabilities include shareholder servicing and custody fees, auditor's fees, and various miscellaneous expenses, including Commission filing fees. Any remaining liabilities after the use of applicant's remaining assets will be borne by Kidder, Peabody Asset Management, Inc., applicant's investment adviser and administrator.

7. There are no securityholders to whom distributions in complete liquidation of their interests have not been made. Applicant is not a party to any litigation or administrative proceeding. Applicant is not now engaged, nor does it propose to engage, in any business activities other than those necessary for the winding up of its affairs.

8. Applicant intends to file Articles of Dissolution with the State of Maryland as soon as practicable.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

McKeever Investment Trust; Notice of Application

December 11, 1991.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "1940 Act").

APPLICANT: McKeever Investment Trust.

RELEVANT 1940 ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company under the 1940 Act.

FILING DATE: The application on form N-8F was filed on June 21, 1991 and an amendment was filed on September 17, 1991.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on January 6, 1991, and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, P.O. Box 1548, Medford, Oregon, 97501.

FOR FURTHER INFORMATION CONTACT: Felice R. Foundos, Staff Attorney, (202) 272-2190, or Barry D. Miller, Branch Chief, (202) 272-3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end diversified management company organized as a Massachusetts business trust (the "Trust"). Applicant filed a registration statement pursuant to section 8(b) of the 1940 Act and pursuant to the Securities Act of 1933, which registered an indefinite number of shares of common stock. The registration statement became effective on June 9, 1989.

2. Pursuant to resolutions adopted by the applicant's board of trustees on April 1, 1991 and ratified on April 22, 1991, the board determined to: (1) Give notice to shareholders of the proposed liquidation of the Trust; (2) convert the Trust's assets to cash in an orderly manner; (3) liquidate the Trust as of April 30, 1991 by distributing all of the assets of the Trust to the remaining shareholders as of such date; and (4) promptly wind up the affairs of the Trust.

3. On April 5, 1991, applicant sent a letter dated April 3, 1991 to all shareholders notifying them of the liquidation.

4. On various dates between April 8, 1991 and April 30, 1991, shareholders redeemed their shares. All redemptions were executed at net asset value per share as determined on the date of the redemption.

5. Pursuant to the liquidation, applicant's portfolio securities were liquidated at fair market value as needed to meet all redemptions by its shareholders and to convert the Trust's assets into cash to effect a final liquidating distribution. The Trust paid $26,592 in brokerage commissions in connection with the liquidation.

6. All expenses incurred by the Trust in connection with the liquidation were paid by the Trust's investment adviser, CMC Services, Inc. ("CMC"). Unamortized organizational expenses totalling $76,663 were also assumed by CMC on April 30, 1991.

7. Applicant intends to file a certificate of dissolution with the Commonwealth of Massachusetts.

8. As of the date of the application, applicant had no debts or liabilities, and was not a party to any litigation or administrative proceeding.

9. Applicant is engaged only in the business of winding up its affairs.

Study Group 5 of the U.S. Organization International Radio Consultative Committee (CCIR); Meeting

The Department of State announces that Study Group 5 of the U.S. Organization for the International Radio Consultative Committee (CCIR) will hold an open meeting January 10, 1992, in room CR-1-40, in the Engineering Center at the University of Colorado, Boulder, Colorado. The meeting will convene at 9 a.m.

Study Group 5 deals with matters relating to the propagation of radio waves and related noise phenomena in non-ionized media at and above the surface of the earth for the purpose of improving radiocommunication systems. The purpose of the meeting is to review the results of the recent Study Group 5 Working Party meetings and to develop plans for the remainder of the study cycle.

Members of the general public may attend the meeting and join in the discussions subject to instructions of the Chairman. Request for further information should be directed to Dr. John F. Cavanagh, Naval Surface Warfare Center, Dahlgren, Virginia 22448-5000, phone (703) 663-8737.

Dated: December 4, 1991.

Warren G. Richards,

Chairman, U.S. CCIR National Committee.

[Public Notice 1538]

Shipping Coordinating Committee, Subcommittee on Safety of Life at Sea, Working Group on Stability and Load Lines and on Fishing Vessel Safety; Meeting

The Working Group on Stability and Load Lines and on Fishing Vessels Safety of the Subcommittee on Safety of Life at Sea (SOLAS) will conduct an open meeting on January 6, 1992 at 1 p.m. in room 4315 at Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC.

The purpose of this Working Group meeting is to prepare for the 36th Session of the International Maritime Organization (IMO) Subcommittee on Stability and Load Lines and on Fishing Vessels Safety (SLF), which is scheduled for February 3 to 7, 1992.

Items of discussion will include the following: Improved standards for bulk carriers; review of existing ships' standards; subdivision and damage stability of dry cargo ships; New Code of Intact Stability; subdivision and damage stability standards of passenger ships; future revisions to the 1966 Load Line Convention; stability aspects of open-top container ships; safety of fishing vessels, double hull tanker stability; development of the Protocol to the 1977 Torremolinos Convention and the Work Program of SLF 36, and review of reporting requirements on Codes and Assembly resolutions related to the work of the Subcommittee.

Members of the public may attend these meetings up to the seating capacity of the room.

For further information, contact Mr. H.P. Cojeen or Mr. W.M. Hayden at (202) 267-2988; U.S. Coast Guard Headquarters (G-MTH), 2100 Second Street, SW., Washington, DC 20593-0001.

Dated: December 11, 1991.

Geoffrey Ogden, Chairman,

Shipping Coordinating Committee.

Coast Guard

[CGD 88-079]

Commercial Fishing Industry Vessel Advisory Committee; Subcommittee Meeting

AGENCY: Coast Guard, DOT.

ACTION: Notice of meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub.L. 92-463; 5 U.S.C. app.2), notice is hereby given of a meeting of the Subcommittee on the Draft Protocol to the 1977 Torremolinos Convention. The meeting will be held on January 23, 1992, at the following address: Coast Guard Vessel Traffic Service Puget Sound, 1519 Alaskan Way South, Bldg. 1, Seattle, WA 98119. The meeting is scheduled to begin at 8:30 a.m. and end at 5 p.m. Attendance is open to the public.

TOPIC: Recommendations regarding the Draft Protocol to the 1977 Torremolinos Convention: The subcommittee will review: The Torremolinos International Convention for the Safety of Fishing Vessels, 1977; the draft Protocol to the 1977 Torremolinos Convention; and the proposed changes to the regulations in the 1977 Torremolinos Convention drafted by the responsible International Maritime Organization (IMO) subcommittees. Upon review, the subcommittee will make recommendations concerning the acceptability of the technical content of the Protocol to the U.S. delegation to the IMO subcommittee on Stability and Load Lines, and on Fishing Vessel Safety (SLF).

FOR FURTHER INFORMATION CONTACT: LCDR Tim Skuby, Merchant Vessel Inspection and Documentation Division, Fishing Vessel/Offshore Activities Branch (G-MVI-4), room 1405, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593-0001, (202) 267-2307.

Dated: December 11, 1991.

D.H. Whitten,

Captain, U.S. Coast Guard, Acting Chief, Office of Marine Safety, Security and Environmental Protection.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Douglas County, Nebraska.

FOR FURTHER INFORMATION CONTACT: Mr. Philip E. Barnes, District Engineer, Federal Highway Administration, Federal Building, room 220, 100 Centennial Mall North, Lincoln, Nebraska 68508, Telephone: (402) 437-5521. Mr. Arthur Yonkey, Project Development Engineer, Nebraska Department of Roads, P.O. Box 94759, Lincoln, Nebraska 68509, Telephone: (402) 479-4795. J. Daniel Kutilek, Engineering & Planning Manager, Douglas County Engineers Office, 156th West Maple Road, Omaha, Nebraska 68116.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Nebraska Department of Roads and the Douglas County Engineers Office is preparing an environmental impact statement (EIS) for a proposal to provide

a roadway connection on a new location from 72nd Street to Irvington Road (90th Street). The described area is approximately 4.0 miles long and is located in the northwest portion of the Greater Omaha Area, in Douglas County, Nebraska. This proposal is being considered to develop a plan to provide an alternate route for Northwest Radial Highway traffic into and out of downtown Omaha, and to provide for existing and projected traffic demands in the Northwest Omaha Region.

Alternative under consideration include (1) taking no action; and (2) the construction of a four-lane roadway.

No formal scoping meeting is scheduled at this time. A public hearing will be held after the EIS has been made available for public and agency review and comment. Public notice will be given of the time and place of the public hearing.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments and questions concerning the proposed action and the EIS should be directed to the FHWA or the Nebraska Department of Roads at the addresses provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on federal programs and activities applies to this program.)

Philip E. Barnes,

District Engineer, Nebraska Division, Federal Highway Administration, Lincoln, NE.

BILLING CODE 4910-22-M

Discretionary Grants to Support Highway Safety Research

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Announcement of discretionary grants to support highway safety research.

SUMMARY: The FHWA announces a discretionary grant program to support highway safety and solicits applications from U.S. colleges and universities interested in participating in this program.

DATES: Applications shall be received on or before March 20, 1992.

ADDRESSES: Applications shall be submitted to Lise S. Lyles, Office of Contracts and Procurement (HCP-31), Federal Highway Administration, 400 Seventh Street, SW., room 4410, Washington, DC 20590; and shall reference Solicitation Number DTFH61-92-X-00001.

FOR FURTHER INFORMATION CONTACT: General administrative questions may be directed to Lise Lyles, Office of Contracts and Procurement, at (202) 366-4229. Programmatic questions relating to this discretionary grant program shall be directed to Jerry A. Reagan, Design Concepts Research Division (HSR-20), at (703) 285-2057.

SUPPLEMENTARY INFORMATION:

Background and Objectives

The FHWA Office of Research and Development is responsible for developing strategies to save lives and reduce injuries and property damage through the prevention and reduction of motor vehicle accidents. The Office of Safety and Traffic Operations Research and Development is currently conducting highway safety research in six High Priority Areas (HPA's): Advanced Traffic Control Devices, Developing Specifications for Retroreflective Devices, Information Resources, Special Highway Users, Highway Safety Design Practices and Criteria, and Improved Highway Travel for An Aging Population.

Advanced Traffic Control Devices provides research and development for traffic control operations to establish and implement safety standards, and to improve traffic control devices for safe and efficient movement of motor vehicles on streets and highways.

Developing Specifications for Retroreflective Devices provides research and development to aid traffic operations personnel in determining whether the combination of lighting, signing, delineation, and signals provide adequate visibility to meet the information needs for a specific driving environment.

Information Resources provides research and development for improved methods for gathering and using accident, geometric design, and traffic count data for highway safety analysis.

Special Highway Users provides research and development for a safe and efficient operating environment for special highway users, such as large trucks, pedestrians and bicyclists.

Highway Safety Design Practices and Criteria promotes research and development to improve highway safety through the development and use of improved geometric design standards and safer roadside hardware.

Improved Highway Travel for An Aging Population provides research and development to address the problems of highway design related to features and operations that involve direct driver interaction.

Additional information on these programs can be found in the FHWA's Research and Development Program (See Annual Progress Report: Executive Summary Fiscal Year 1990, Publication Number FHWA-RD-90-100). This publication may be obtained by contacting Lise S. Lyles at (202) 366-4229.

The Research Projects/Programs in the HPA's are defined through an elaborate and structured procedure for defining research needs. While this program addresses the most important national needs, there is a need to support other promising safety research at U.S. colleges and universities.

Transportation Research Board Special Report 229, 1990, "Safety Research for a Changing Highway Environment" pointed out the need to make "* * *, provision for unsolicited proposals; more flexible funding methods, such as cooperative agreement and grants; and encouragement of small awards to individual researchers * * *." The committee preparing the report also indicated a need to provide funding for graduate programs to train new researchers in fields of highway safety.

This grant program has two objectives: (1) Broaden existing highway safety research at U.S. colleges and universities; and (2) encourage U.S. citizens to seek advanced degrees in highway safety related areas.

FHWA Involvement

The FHWA's Design Concepts Research Division has a limited role in the grants program. The FHWA will:

1. Provide, on an as-available basis, one professional staff person to be designated as the Contracting Officer's Technical Representative to participate in the planning and management of the grant program.

2. Arrange for the review of the research on its completion.

3. Arrange for the students participating in the program to present their findings at the Turner-Fairbank Highway Research Center in McLean, Virginia, or at the Transportation Research Board meeting held each January in Washington, DC.

Period of Support

Grants will be for a one year period.

VOL 56 ISS 243 DEC 18 1991 UMI

Additional one year options to extend grants for up to two additional years, pending availability of funds, will be considered.

Eligibility Requirements

Up to four grants will be made to selected universities in amounts of up to $50,000 to enhance graduate student research in all highway related areas of traffic safety. These areas include geometric and roadside design; traffic control devices; traffic barriers; pedestrian and bicyclist safety; and human factors. Discipline necessary to conduct this research include: Civil engineering, transportation engineering, highway engineering, statistics, physics, structural mechanics, mechanical engineering, materials engineering, computer sciences, human factors, and hazardous materials.

Proposal submittals are limited to universities with current graduate course offerings and/or current research in fields related to highway safety research.

Application Procedure

Each applicant shall submit one original and five copies of its application package to: Federal Highway Administration, Office of Contracts and Procurement, 400 Seventh Street, SW., room 4410, Washington, DC 20590, Attention: Lise S. Lyles, HCP–31. Only complete application packages received on or before March 20, 1992, shall be considered.

Application Contents

The application package shall be submitted with OMB Standard Form 424 (Rev. 4–88, including 424A and 424B), with the required information filled in and the certified assurances included. While the form 424–A deals with budget information, section B identifies budget categories, the available space does not permit a level of detail which is sufficient for a meaningful evaluation of proposed costs. A supplemental sheet shall be provided which presents a detailed breakdown of the proposed costs, as well as any costs which the applicant proposes to contribute in support of this effort.

Research project statements shall include the following:

1. Background discussion of related research and rationale for doing proposed study.
2. Statement of research objective or hypotheses.
3. Description of research method including experimental design, equipment to be used, test procedures, and data analysis techniques.
4. Resources (staff and costs).

The main body of the proposal (points 1–3 above) shall be limited to a maximum of five pages. Longer proposals will be considered an indication of a lack of cost consciousness.

Application Review Process and Criteria

Initially, all applications will be reviewed to confirm that the applicant is an eligible recipient and to ensure that the application contains all the information required by the Application Contents section of this notice.

Each complete application from an eligible recipient will then be evaluated by a Technical Evaluation Committee. Grant proposals will be rated in accordance with the following criteria listed in descending order:

1. Professional vitae of proposed faculty and senior staff members, including participation in national safety committee activities and related research publications.
2. Research project statement(s).
3. Qualifications and availability of candidate graduate students, with preference for students who are U.S. citizens or permanent residents of the U.S.
4. Description of available research facilities.
5. Description of on-going safety related research projects and graduate course offering in safety related areas.
6. University administrative costs associated with the potential grant.

Terms and Conditions of the Award

1. Each Grantee shall produce a research paper suitable for publication in a national journal. Ten copies of each study research paper shall be provided to the FHWA before the oral presentation.
2. Upon invitation, papers will be presented orally by the student conducting the research at the Turner-Fairbank Highway Research Center in McLean, Virginia, or at the annual meeting of the Transportation Research Board held each January in Washington, DC. Oral presentation dates and locations will be arranged through discussions between the FHWA and student advisors.

Authority: 23 U.S.C. 315; 49 CFR 1.48.

Issued on: December 9, 1991.

T.D. Larson,

Administrator.

BILLING CODE 4910–22–M

National Highway Traffic Safety Administration

[Docket No. 91–56; Notice 1]

Receipt of Petition for Determination That Nonconforming 1986 BMW 518i Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of receipt of petition for determination that nonconforming 1986 BMW 518i passenger cars are eligible for importation.

SUMMARY: This notice announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a determination that a 1986 BMW 518i that was not originally manufactured to comply with all applicable Federal motor vehicle safety standards is eligible for importation into the United States because (1) it is substantially similar to a vehicle that was originally manufactured for importation into and sale in the United States and that was certified by its manufacturer as complying with the safety standards, and (2) it is capable of being readily modified to conform to the standards.

DATES: The closing date for comments on the petition is January 17, 1992.

ADDRESSES: Comments should refer to the docket number and notice number, and be submitted to: Docket Section, room 5109, National Highway Traffic Safety Administration, 400 Seventh St., SW., Washington, DC 20590. (Docket hours are from 9:30 a.m. to 4 p.m.)

FOR FURTHER INFORMATION CONTACT: Ted Bayler, Office of Vehicle Safety Compliance, NHTSA (202–366–5306).

SUPPLEMENTARY INFORMATION:

Background

Under section 108(c)(3)(A)(i) of the National Traffic and Motor Vehicle Safety Act (the Act), 15 U.S.C. 1397(c)(3)(A)(i), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States on and after January 31, 1990, unless NHTSA has determined that

(I) the motor vehicle is * * * substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under section 114 (of the Act), and of the same model year * * * as the model of the motor vehicle to be compared, and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards * * *."

Petitions for eligibility determinations may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA determines, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this determination in the **Federal Register**.

Champagne Imports Inc. of Lansdale, Pennsylvania (Registered Importer No. R–90–009) has petitioned NHTSA to determine whether 1986 BMW 518i passenger cars are eligible for importation into the United States. The vehicle which Champagne believes is substantially similar is the 1986 BMW 528e. Champagne has submitted information indicating that Bayerische Motoren-Werke A.G., the company that manufactured the 1986 BMW 528e, certified that vehicle as conforming to all applicable Federal motor vehicle safety standards and offered it for sale in the United States.

The petitioner noted that the agency, on its own initiative, has already made a determination of substantial similarity covering 1986 Model 528e vehicles that Bayerische Motoren-Werke A.G. did not certify and offer for sale in the United States (55 FR 47418). It contends that the 518i is substantially similar to the 528e, and "differs mainly in engine size and minor options which go with it." In accounting for the differences between the two vehicles, the petitioner observed the manufacturers such as Bayerische Motoren-Werke A.G. "generally design only a few basic body shell designs which they then equip with a multitude of engine-size and cosmetic or comfort options." The petitioner further surmised that the 518i's absence from the United States market could be attributed to "saleability considerations or legislative restrictions such as the strict emission control requirements in the United States."

Champagne submitted information with its petition intended to demonstrate that the 1986 model 518i, as originally manufactured, conforms to many Federal motor vehicle safety standards in the same manner as the 1986 model 528e that was offered for sale in the United States, or is capable of being readily modified to conform to those standards.

Specifically, the petitioner claims that the 1986 model 518i is identical to the certified 1986 model 528e with respect to compliance with Standards Nos. 102 Transmission Shift Lever Sequence * * *, 103 Defrosting and Defogging Systems, 104 Windshield Wiping and Washing Systems, 105 Hydraulic Brake Systems, 106 Brake Hoses, 107 Reflecting Surfaces, 109 New Pneumatic Tires, 113 Hood Latch Systems, 116 Brake Fluid, 124 Accelerator Control Systems, 201 Occupant Protection in Interior Impact, 202 Head Restraints, 203 Impact Protection for the Driver From the Steering Control System, 204 Steering Control Rearward Displacement, 205 Glazing Materials, 206 Door Locks and Door Retention Components, 207 Seating Systems, 209 Seat Belt Assemblies, 210 Seat Belt Assembly Anchorages, 211 Wheel Nuts, Wheel Discs and Hubcaps, 212 Windshield Retention, 216 Roof Crush Resistance, 219 Windshield Zone Intrusion, and 302 Flammability of Interior Materials.

Petitioner also contends that the vehicle is capable of being readily modified to meet the following standards, in the manner indicated:

Standard No. 101 Controls and Displays: (a) Substitution of a lens marked "Brake" for a lens with an ECE symbol on the brake failure indicator lamp; (b) installation of a seat belt warning lamp; (c) recalibration of the speedometer/odometer from kilometers to miles per hour.

Standard No. 108 Lamps, Reflective Devices and Associated Equipment: (a) Installation of U.S.-model headlamp assemblies which incorporate sealed beam headlamps and front sidemarkers; (b) installation of U.S.-model taillamp assemblies which incorporate rear sidemarkers; (d) installation of a high mounted stop lamp.

Standard No. 110 Tire Selection and Rims: Installation of a tire information placard.

Standard No. 111 Rearview Mirrors: Replacement of the passenger's outside rear view mirror, which is convex but does not bear the required warning statement.

Standard No. 114 Theft Protection: Installation of a buzzer microswitch in the steering lock assembly, and a warning buzzer.

Standard No. 115 Vehicle Identification Number: Installation of a VIN plate that can be read from outside the left windshield pillar, and a VIN reference label on the edge of the door or latch post nearest the driver.

Standard No. 118 Power Window Systems: Rewiring of the power window system so that the window transport is inoperative when the ignition is switched off.

Standard No. 208 Occupant Crash Protection: (a) Installation of either a U.S.-model seat belt in the driver's position or a belt webbing-actuated microswitch in the driver's seat belt retractor to activate the seat belt warning system; (b) installation of an ignition switch-actuated seat belt warning lamp and buzzer.

Standard No. 214 Side Door Strength: Installation of reinforcing beams.

Standard No. 301 Fuel System Integrity: Installation of a rollover valve in the fuel tank vent line between the fuel and the evaporative emissions collection canister.

Additionally, the petitioner states that the bumpers on the 1986 model 518i must be reinforced to comply with the Bumper Standard found in 49 CFR part 581.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, room 5109, 400 Seventh Street, SW., Washington, DC 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: January 17, 1992.

Authority: 15 U.S.C. 1397(c)(3)(A)(i)(II) and (C)(iii); 49 CFR 593.8; delegation of authority at 49 CFR 1.50.

Issued on December 11, 1991.

William A. Boehly,

Associate Administrator for Enforcement.

BILLING CODE 4910–59–M

[Docket No. 91–57; Notice 1]

Receipt of Petition for Determination That Nonconforming 1989 Volvo 240 Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of receipt of petition for determination that nonconforming 1989

VOL 56 ISS 243 DEC 18 1991 UMI

Volvo 240 passenger cars are eligible for importation.

SUMMARY: This notice announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a determination that a 1989 Volvo 240 that was not originally manufactured to comply with all applicable Federal motor vehicle safety standards is eligible for importation into the United States because (1) it is substantially similar to a vehicle that was originally manufactured for importation into and sale in the United States and that was certified by its manufacturer as complying with the safety standards, and (2) it is capable of being readily modified to conform to the standards.

DATES: The closing date for comments on the petition is January 17, 1992.

ADDRESSES: Comments should refer to the docket number and notice number, and be submitted to: Docket Section, room 5109, National Highway Traffic Safety Administration, 400 Seventh St., SW., Washington, DC 20590. Docket hours are from 9:30 a.m. to 4 p.m.

FOR FURTHER INFORMATION CONTACT: Ted Bayler, Office of Vehicle Safety Compliance, NHTSA (202-366-5306).

SUPPLEMENTARY INFORMATION:

Background

Under section 108(c)(3)(A)(i) of the National Traffic and Motor Vehicle Safety Act (the Act), 15 U.S.C. 1397(c)(3)(A)(i), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States on and after January 31, 1990, unless NHTSA has determined that

> (I) the motor vehicle * * * substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under section 114 [of the Act], and of the same model year . . . as the model of the motor vehicle to be compared, and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards * * *.

Petitions for eligibility determinations may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA determines, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this determination in the **Federal Register**.

Liphardt & Associates of Ronkonkoma, New York (Registered Importer No. R-90-004) has petitioned NHTSA to determine whether 1989 Volvo 240 passenger cars that were not originally manufactured to comply with all applicable Federal motor vehicle safety standards are eligible for importation into the United States. The vehicle which Liphardt believes is substantially similar is the 1989 Volvo 240 that was manufactured for importation into and sale in the United States and that was certified by its manufacturers as complying with all applicable safety standards.

Liphardt submitted information with its petition intended to demonstrate that the non-U.S. certified 1989 model 240, as originally manufactured, conforms to many Federal motor vehicle safety standards in the same manner as its counterpart that was offered for sale in the United States, or is capable of being readily modified to conform to those standards.

Specifically, the petitioner claims that the two models are identical with respect to compliance with Standards Nos. 102 Transmission Shift Lever Sequence * * *, 103 Defrosting and Defogging Systems, 104 Windshield Wiping and Washing Systems, 105 Hydraulic Brake Systems, 106 Brake Hoses, 107 Reflecting Surfaces, 109 New Pneumatic Tires, 111 Rearview Mirrors, 113 Hood Latch Systems, 116 Brake Fluid, 118 Power-Operated Window Systems, 124 Accelerator Control Systems, 201 Occupant Protection in Interior Impact, 202 Head Restraints, 203 Impact Protection for the Driver From the Steering Control System, 204 Steering Control Rearward Displacement, 205 Glazing Materials, 206 Door Locks and Door Retention Components, 207 Seating Systems, 208 Occupant Crash Protection, 209 Seat Belt Assemblies, 210 Seat Belt Assembly Anchorages, 211 Wheel Nuts, Wheel Discs and Hubcaps, 212 Windshield Mounting, 214 Side Door Strength, 216 Roof Crush Resistance, 219 Windshield Zone Intrusion, and 302 Flammability of Interior Materials.

Petitioner also contends that the vehicle is capable of being readily modified to meet the following standards, in the manner indicated:

Standard No. 101 Controls and Displays: Recalibration of the speedometer/odometer from kilometers to miles per hour.

Standard No. 108 Lamps, Reflective Devices and Associated Equipment: Installation of U.S.-model headlamp assemblies.

Standard No. 110 Tire Selection and Rims: Installation of a tire information placard.

Standard No. 114 Theft Protection: Installation of a buzzer microswitch in the steering lock assembly, and a warning buzzer.

Standard No. 115 Vehicle Identification Number: Installation of a VIN plate that can be read from outside the left windshield pillar, and a VIN reference label on the edge of the door or latch post nearest the driver.

Standard No. 301 Fuel System Integrity: Installation of a rollover valve in the fuel tank vent line between the fuel and the evaporative emissions collection canister.

Additionally, the petitioner states that energy absorbers must be added to the bumpers on the non-U.S. certified 1989 model 240 to comply with the Bumper Standard found in 49 CFR part 581.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, room 5109, 400 Seventh Street, SW., Washington, DC 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: January 17, 1992.

Authority: 15 U.S.C. 1397(c)(3)(A)(i)(II) and (C)(iii); 49 CFR 593.8; delegation of authority at 49 CFR 1.50.

Issued on December 11, 1991.

William A. Boehly,

Associate Administrator for Enforcement.

BILLING CODE 4910-59-M

UNITED STATES INFORMATION AGENCY

Democracy in Africa Program; Citizen Exchange Projects

AGENCY: United States Information Agency.

ACTION: Notice—Extension of deadline for request for proposals published November 26, 1991.

SUMMARY: The Office of Citizen Exchanges announces an extension of the deadline for submission of proposals for the program entitled "Democracy in Africa—Citizen Exchange Projects," which was announced in the **Federal Register** on November 26, 1991 (Vol. 56, No. 228, pp. 59973-59976). Program proposals must be received at the U.S. Information Agency by 5 p.m. EST on February 7, 1992. Proposals received after this deadline will not be eligible for consideration. The November 26 announcement requested proposals from public and private not-for-profit organizations for seven projects designed to contribute to mutual understanding between the U.S. and Nigeria and to support Nigerian efforts to foster the development of democracy and a market-guided economy. Please refer to the November 26 RFP and the appropriate Office of Citizen Exchanges concept papers for specific application requirements.

FOR FURTHER INFORMATION CONTACT: The Office of Citizen Exchanges (E/P), United States Information Agency, room 216, 301 4th Street, SW., Washington, DC 20547.

DATES: This action is effective from December 18, 1991, through February 7, 1992.

Dated: December 6, 1991.

Barry Fulton,

Deputy Associate Director, Bureau of Educational and Cultural Affairs.

BILLING CODE 8230-01-M

Meeting of Advisory Board for Cuba Broadcasting

The Advisory Board for Cuba Broadcasting will conduct a meeting on December 17, 1991, in the 3rd floor Conference Room, Donohoe Building, 400 6th St., SW., Washington, DC 20547. Below is the intended agenda.

Tuesday, December 17, 1991.

AGENDA

Part One—Closed to the Public

10 a.m. 1. TV Marti Technical Enhancements.

2. Radio Marti Technical Enhancements.

Part Two—Open to the Public

1 p.m. 3. Consideration of Recommendations by the President's Task Force on U.S. Government International Broadcasting.

4. U.S. Government Information Policy in a Post-Castro Cuba—The Future of Radio and TV Marti.

5. Public Testimony.

The Federal Advisory Committee Act (FACA) and implementing regulations provide flexibility regarding the requirement that agendas for Advisory Board meetings be placed in the **Federal Register** 15 days prior to a meeting. The Director has determined that a shorter time period is necessary in this instance to enable the Advisory Board for Cuba Broadcasting to immediately consider recommendations about Radio and TV Marti from the President's Task Force on U.S. Government International Broadcasting. Since public announcement of those recommendations has been uncertain until recently, specific dates for this Advisory Board meeting have been delayed.

Members of the public interested in attending the open portion of the meeting should contact James Skinner, Executive Director to the Advisory Board, as access to the building is controlled. Mr. Skinner can be reached on (202) 401-7312.

Dated: December 12, 1991.

Henry E. Catto;

Director.

Sunshine Act Meetings

Federal Register
Vol. 56, No. 243
Wednesday, December 18, 1991

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL ELECTION COMMISSION

"FEDERAL REGISTER" NUMBER: 91-29927.

PREVIOUSLY ANNOUNCED DATE AND TIME: Thursday, December 19, 1991, 10:00 a.m., Meeting Open to the Public.

The following items are added to the agenda:

Title 26 Certification Matters—
Eligibility of Lyndon H. LaRouche, Jr. to Receive Presidential Primary Matching Funds.

Bank Loan Forms, With Explanation and Justification.

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Press Officer, Telephone: (202) 219-4155.

Delores Harris,
Administrative Assistant, Office of the Secretariat.

[FR Doc. 91-30336 Filed 12-16-91; 2:26 pm]
BILLING CODE 6715-01-M

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: Notice forwarded to Federal Register on December 13, 1991.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10:00 a.m., Friday, December 20, 1991.

CHANGES IN THE MEETING: Addition of the following open item to the meeting:

Discussion Agenda: Consideration of whether to hold public meetings regarding the proposed acquisition of Security Pacific, Los Angeles, California, by Bank of America, San Francisco, California.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204.

Dated: December 16, 1991.

Jennifer J. Johnson,
Associate Secretary of the Board.

BILLING CODE 6210-01-M

FOREIGN CLAIMS SETTLEMENT COMMISSION

F.C.S.C. Meeting Notice No. 3-92—AMENDED

Notice of Meetings

Announcement in Regard to Commission Meetings and Hearings

The Foreign Claims Settlement Commission, pursuant to its regulations (45 CFR Part 504), and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice in regard to the scheduling of open meetings and oral hearings for the transaction of Commission business and other matters specified, as follows:

DATE AND TIME: Thurs., Dec. 19, 1991 at 10:30 a.m. (vice Wednesday, Dec. 18, 1991, at 10:30 a.m., as published at 56 F.R. 63757, Dec. 5, 1991).

SUBJECT MATTER: Consideration of Proposed Decisions on claims against Iran.

Subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

All meetings are held at the Foreign Claims Settlement Commission, 601 D Street, NW., Washington, DC. Requests for information, or advance notices of intention to observe a meeting, may be directed to: Administrative Officer, Foreign Claims Settlement Commission, 601 D Street, NW., Room 10000, Washington, DC 20579. Telephone: (202) 208-7727.

Dated at Washington, D.C. on December 13, 1991.

Judith H. Lock,
Administrative Officer.

NATIONAL COUNCIL ON DISABILITY

Quarterly Meeting and Forum

AGENCY: National Council on Disability.

SUMMARY: This notice sets forth the schedule and proposed agenda of the forthcoming quarterly meeting of the National Council on Disability. This notice also describes the functions of the National Council. Notice of this meeting is required under section 522(b)(10) of the "Government in Sunshine Act" (P.L. 94-409).

DATES:

Quarterly Meeting

February 24, 1992, 8:30 a.m. to 5:00 p.m.
February 25, 1992, 8:30 a.m. to 5:00 p.m.
February 26, 1992, 8:30 a.m. to 12:00 noon.

LOCATION: Imperial Palace Hotel, 3535 Las Vegas Boulevard South, Las Vegas, Nevada 89109, (800) 634-6441.

FOR FURTHER INFORMATION CONTACT: National Council on Disability, 800 Independence Avenue, SW, Suite 814, Washington, DC 20591, (202) 267-3846, TDD: (202) 267-3232.

The National Council on Disability is an independent federal agency comprised of 15 members appointed by the President of the United States and confirmed by the Senate. Established by the 95th Congress in Title IV of the Rehabilitation Act of 1973 (as amended by Public Law No. 95-602 in 1978), the National Council was initially an advisory board within the Department of Education. In 1984, however, the National Council was transformed into an independent agency by the Rehabilitation Act Amendments of 1984 (Public Law 98-221).

The National Council is charged with reviewing all laws, programs, and policies of the Federal Government affecting individuals with disabilities and making such recommendations as it deems necessary to the President, the Congress, the Secretary of the Department of Education, the Commissioner of the Rehabilitation Services Administration, and the Director of the National Institute on Disability and Rehabilitation Research (NIDRR). In addition, the National Council is mandated to provide guidance to the President's Committee on Employment of People with Disabilities.

The quarterly meeting of the National Council shall be open to the Public. The proposed agenda includes:

Report from Chairperson and Executive Committee
Update on NIDRR
Update on the implementation of the Americans with Disabilities Act
Update on ADA Watch
Update on public policy studies: education; technology; and, health insurance
Committee Meetings/Committee Reports
Unfinished Business
New Business
Announcements
Adjournment

Records shall be kept of all National Council proceedings and shall be available after the meeting for public inspection at the National Council on Disability.

Signed at Washington, DC on December 12, 1991.

Ethel D. Briggs,
Executive Director.

Colorants for Polymers

Correction

In rule document 91-20836, beginning on page 42927, in the issue of Friday, August 30, 1991, make the following corrections:

§ 176.170 [Corrected]

1. On page 42932, in the third column, in § 176.170(b)(2), in the table, under the heading "List of substances", "Calcium suflate" should read "Calcium sulfate".

§ 178.3297 [Corrected]

2. On page 42934:

a. In § 178.3297(e), in the table; in the second column, under the heading "Limitations", in item 3., "4-4'-isopropylidenediphenol-epichlorohydrin" should read "4-4'isopropylidenediphenol-epichlorohydrin".

b. In the first column, under the heading "Substances", "D&C Red No.7 and its lakes", "Kaolin-modified ...", and "7-(2*H*-Naphtho..." should be moved flush to the left margin, "Magnesium silicate (italc)" should read "Magnesium silicate (talc)" and "7-(2*H*-Naphtho[1,2-*d*]triazol-2-yl)-2-phenylcoumarin" should read "7-(2*H*-Naphtho[1,2-*d*]triazol-2-yl)-3-phenylcoumarin".

c. In the second column, in the second item 1., in the first line, "chapter4" should read "chapter".

d. In the second column, in the second item 4., "-vinly" should read "-vinyl". In the same column, four lines down from item 4., "articles" should read "article".

e. In the second column, in the fourth item 2., "§ 177.2460" should read "177.1460".

User Fees for Marine Licensing, Certification of Registry and Merchant Mariner Documentation; Reopening of Comment Period

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule; reopening of comment period.

SUMMARY: On June 20, 1991 the Coast Guard published in the **Federal Register** (56 FR 28448) a notice of proposed rulemaking to establish fees for Coast Guard services related to merchant marine licenses, certificates of registry, and merchant mariner documents. Because of requests for additional time to comment on the proposed rulemaking, the comment period is being reopened for 60 additional days.

DATES: Comments must be received on or before February 18, 1992.

ADDRESSES: Written comments may be mailed to the Executive Secretary, Marine Safety Council (G-LRA-2/3406) (CGD 91-002), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, or may be delivered to room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267-1477 for information about comments.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at room 3406, U.S. Coast Guard Headquarters.

FOR FURTHER INFORMATION CONTACT: Lieutenant J.K. Gillespie, Planning Staff (G-MP-1), Office of Marine Safety, Security and Environmental Protection, (202) 267-6923.

SUPPLEMENTARY INFORMATION:

Request for Comments

In the notice of proposed rulemaking published on June 20, 1991, the Coast Guard encouraged interested persons to participate in this proposed rulemaking by submitting written comments, including views, data, or arguments, on the proposal by August 5, 1991. Several persons requested additional time citing the reason that members of the merchant marine are often away from their home port for 30 days or more and a 45 day comment period is not sufficient time to allow for their participation. Further, the Coast Guard has determined that a 45 day comment period may have been insufficient for industry publications to notify their readers of the opportunity to comment on the proposed rule in time for them to do so.

Other persons requested additional time because of other Coast Guard user fees related to commercial vessels. Many persons in the marine industry both own and operate their vessels. Inspection and licensing fees would be the most significant portion of Coast Guard fees impacting persons owning and operating inspected vessels. To allow them opportunity to comment on the cumulative impact of the Coast Guard user fees, the Coast Guard has determined that reopening the comment period coextensive with the comment period for the notice of proposed rulemaking entitled "Direct User Fees for Inspection or Examination of U.S. and Foreign Commercial Vessels" (CGD 91-030, published elsewhere in this issue of the **Federal Register**) would be beneficial to this rulemaking. Because of these requests, and the need for more publishing lead time, the comment period is reopened for 60 additional days until February 18, 1992.

Persons submitting comments should include their name and address, identify this rulemaking (CGD 91-002) and the specific section of this proposal to which each comment applies, and give a reason for each comment. Persons wanting acknowledgment of receipt of comments should enclose a stamped, self-addressed postcard or envelope. The proposed rule may be changed in light of the comments received. All comments received before the expiration of the comment period, including those received between August 5, 1991, and the date of this notice, will be considered before final action is taken on this proposal.

Dated: December 10, 1991.

J.W. Kime,

Admiral, U.S. Coast Guard, Commandant.

RIN 2115-AD78

Direct User Fees for Inspection or Examination of U.S. and Foreign Commercial Vessels

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Omnibus Budget Reconciliation Act of 1990 requires the Coast Guard to establish user fees for Coast Guard services related to the inspection and examination of U.S. and foreign vessels and issuance of Certificates of Inspection, Certificates of Compliance, and related documents. The proposed fees are based on the way the Coast Guard presently conducts vessel inspection activities. This proposal is intended to recover costs of providing certain vessel inspection services.

DATES: Comments must be received on or before February 18, 1992.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G-LRA-2/3406) (CGD 91-030), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, or may be delivered to room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267-1477.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at room 3406, U.S. Coast Guard Headquarters.

FOR FURTHER INFORMATION CONTACT: CDR Bruce A. Russell, Chief, Plans and Analysis Branch (G-MP-1), Office of Marine Safety, Security and Environmental Protection (202) 267-6923.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their name and address, identify this rulemaking (CGD 91-030) and the specific section of this proposal to which each comment applies, and give reasons for each comment. Persons wanting acknowledgement of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of the comments.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the Marine Safety Council at the address under "**ADDRESSES.**" If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and

place to be announced by a later notice in the **Federal Register**.

Drafting Information

The principal persons involved in drafting this document are CDR Bruce A. Russell, Project Manager, LCDR C. Lahey, Assistant Project Manager, Office of Marine Safety, Security and Environmental Protection; and C.G. Green, Project Counsel, Office of Chief Counsel.

Background and Purpose

The Omnibus Budget Reconciliation Act of 1990 (the Act) amended 46 U.S.C. 2110 to remove long-standing prohibitions against imposing certain user fees. Although, prior to amendment by the Act, section 2110 did not prohibit the Coast Guard from charging fees for inspection of small passenger vessels, sailing school vessels, or foreign mobile offshore drilling units, it did prohibit fees for inspection or examination of all other U.S. and foreign vessels. The Coast Guard did not, therefore, exercise its authority to charge only those select few vessel owners among all those receiving similar Coast Guard services.

Section 2110 now requires the establishment and collection of user fees for Coast Guard services provided under subtitle II of title 46 United States Code. The Coast Guard must establish these fees in accordance with the criteria in section 9701 of title 31 United States Code (General User Fee Statute). That statute requires that the fees charged be fair, and that they be based on the cost to the government, the value of the service provided, the public policy served, and other relevant facts. The Coast Guard proposes to establish fees for inspection and examination of vessels under subtitle II of title 46. The Coast Guard also proposes to establish fees for inspection or examination of foreign mobile offshore drilling units (MODU's) under 43 U.S.C. 1356. These services are essentially the same as inspections and examinations of other foreign vessels under title 46, and it is appropriate to include fees for inspection of these vessels in this rulemaking.

Marine licensing and merchant mariner documentation, vessel documentation, commercial vessel inspections, and vessel plan review and equipment approval are program areas in subtitle II for which fees must be established. This proposal would establish user fees only for Coast Guard services relating to inspection and examination of existing commercial vessels. Fees for other Coast Guard services in subtitle II of title 46 United States Code, including inspection of new vessels for an initial Certificate of Inspection, inspections of vessels during rebuild or major modifications, factory inspections, equipment approvals, and plan review inspections will be the subject of separate rulemaking action.

Inspection fees and licensing fees are the most significant portion of Coast Guard fees impacting persons owning and operating inspected vessels. To allow additional opportunity for comment on the cumulative impact of these two proposals, the Coast Guard is reopening the comment period for CGD 91-002: User Fees for Marine Licensing, Certification of Registry and Merchant Mariner Documentation. The Notice of Reopening of the Comment Period for the Notice of Proposed Rulemaking on marine licensing user fees is published elsewhere in this issue of the **Federal Register**.

The fees proposed in this rulemaking would not be added or credited to Coast Guard appropriations. The Act provides that the proposed fees and charges "shall be deposited in the general fund of the U.S. Treasury as offsetting receipts of the department in which the Coast Guard is operating and ascribed to Coast Guard activities." This means that the fees are not added to current Coast Guard appropriations, and do not directly affect future appropriations for these programs. The Coast Guard considers this to be an advantage, since funding for these programs will be more predictable when based on firm appropriations. Furthermore, operation of the program will not be dependent on the amount collected, which will vary with the condition of the industry and the economy.

Discussion of Proposed Amendments

General Discussion of the Proposal

Section 2110 requires user fees be established for services provided by the Coast Guard under subtitle II of title 46, United States Code. To comply with this mandate, the Coast Guard proposes to amend 46 CFR part 2 to establish the following categories of user fees for Coast Guard inspections and examinations of existing U.S. and foreign commercial vessels:

For U.S. Vessels

(1) An annual inspection fee would be established for commercial vessels, covering all periodic inspections required by various statutes applicable to each category of vessel, including follow-on inspections conducted to ensure continued compliance with required certificates; and,

(a) A $500.00 cap on the annual inspection fee would be established for all non self-propelled tank barges;

(b) An optional (at the owner or operator's election) means of paying a series of annual user fee payments in advance would be provided;

(2) A fee would be established for excursion permit inspections;

(3) For inspections conducted outside the United States, an overseas inspection fee would be established, which would be in addition to the annual inspection fee described in (1) above.

For Foreign Vessels

(1) A fee would be established for the Certificate of Compliance or Letter of Compliance examination and annual tank vessel examination of tankers;

(2) Fees would be established for the Letter of Compliance examination of mobile offshore drilling units operating on the U.S. outer continental shelf;

(3) A fee would be established for control verification examinations of passenger vessels subject to the International Convention for the Safety of Life at Sea, 1974 as amended (SOLAS);

(4) Foreign vessels, operating in U.S. waters, which are not subject to SOLAS but are subject to U.S. commercial vessel safety inspection requirements would be required to pay the same fees paid for inspection services by U.S. vessels.

Section 2110 allows adjustments of fees to accommodate changes in the cost of providing services. The Coast Guard intends to review the fees annually to determine if adjustments or changes to the fees are necessary. The Coast Guard will revise these proposed fees when costs change because of inflation or deflation, there are changes in the services provided, there are improvements in the method and efficiency of providing services, or when otherwise appropriate. New statutes, such as the Oil Pollution Act of 1990, may require the Coast Guard to establish new regulations or make substantive amendments to existing regulations concerning inspections and examinations. When this occurs, the Coast Guard will propose appropriate user fees in each rulemaking.

Consistent with guidance provided by OMB Circular A-25, except where otherwise mandated by statute, the Coast Guard's goal is full cost recovery. The user fees in this proposal would recover less than full program costs. The statutorily-mandated provision in the Act limiting annual user fees for tank barges to $500 results in a cost to the

VOL 56 ISS 243 DEC 18 1991 UMI

Treasury of approximately $2.1 million annually. The proposed user fees for periodic and follow-on inspections were reduced to minimize collection costs and to avoid sizeable inequities in the fee assessment at an annual cost to the Treasury of approximately $3.03 million. As annual workload and cost data is further refined, the Coast Guard will initiate necessary program and regulatory changes to enable full cost recovery.

Section 2110 provides that the fee for a service may also include the cost of collecting the fee. The Coast Guard has not yet determined collection procedures for the proposed fees. Our preliminary estimates indicate that collection costs will be minimal. Collection costs are not included in the fees listed in the proposed regulation. The Coast Guard expects that any adjustment of the proposed fees to cover collection costs will be less than $10 per transaction.

Section 2110 also provides authority to recover "appropriate collection and enforcement costs associated with delinquent payments of the fees." The Coast Guard may employ any government agency (Federal, State, or local) or a private enterprise or business (e.g., collection agency) to recover delinquent fees or civil penalty charges. Since the Coast Guard anticipates collecting fees prior to the services being provided, delinquent payments should not occur in most cases.

Section 2110 allows exemption of certain persons from fees, "if in the public interest." While there are no specific exemptions proposed in this notice of proposed rulemaking, the Coast Guard is interested in comments on exemptions that could be in the public interest, and will consider including appropriate exemptions in the final rule. The public is invited to comment on reasons to establish "public interest" exemptions.

Discussion of Fees

Overview

The proposed fees are based on the cost of Coast Guard resources expended to conduct the inspection and examination services. These resources include inspector hours, travel, administrative support, and training, and are discussed more fully in the Regulatory Evaluation. In developing the proposed fees, the Coast Guard reviewed all specific inspection activities in 46 CFR part 2, as well as the technical requirements for inspections in 46 CFR parts 31, 71, 91, 105, 107, 108, 109, 151, 167, 175, 176, 189, and 190 and in 33 CFR parts 140, 143, 151, 155, and 157.

The inspection workload (inspector hours per inspection) for U.S. vessels and foreign vessels subject to inspection under the laws of the United States varies by type of vessel, by length of vessel within some vessel types, and by number of passengers for some passenger vessels. Based on inspection workload variations, vessels were grouped into 28 categories. With more than 15 types of inspections and 28 vessel types, the Coast Guard calculated that it could establish up to 420 different user fees for over 38,000 inspections and examinations conducted each year just on the U.S. fleet of approximately 12,000 vessels.

To reduce the number of possible inspection user fee categories, the Coast Guard identified patterns in the amount of time it takes to conduct an inspection as a function of inspection type, vessel type and size, number of passengers, and other factors. The three primary inspections, the inspection for certification, annual reinspection, and drydock examination, generally take about the same amount of time for vessels of a particular category. However, there are wide variations in the time it takes to conduct follow-on inspections due to many factors, including but not limited to: Differences in the readiness of the vessel for inspection; knowledge, training, and experience of shipyard personnel and/or the ship's crew; the vessel owner's, or operator's management and operating procedures; coordination with third party contractors; the knowledge and training of the vessel inspector; the nature and extent of repairs; and the extent of any deficiency list to be inspected or cleared. In many cases, the Coast Guard determined that there are no accurate predictors of how long a particular type of inspection would take.

The Coast Guard considered billing for follow-on inspections after the fact at an hourly rate. A requirement to pay a separate fee for each of these inspections would increase administrative work requirements for vessel repair facilities, contractors, and vessel owners to ensure proper authorization of, and application for, inspections. For example, a shipyard could have to contact the vessel owner for authorization to expend funds for inspection of each stage of a repair, modification, or deficiency correction. Development of timekeeping and billing systems for over 38,000 inspections per year would be expensive and administratively burdensome to both the Coast Guard and industry. The estimated $1.75 million annual cost for Coast Guard billing clerks would increase the user fee cost base and result in higher fees for industry. After consideration of a pay-as-you go user fee system for these vessel inspections, the Coast Guard concluded that this alternative would be unworkable.

The Coast Guard then considered establishment of an annual inspection fee for each vessel category. In evaluating this alternative, the Coast Guard determined that the expected aggregate number of hours spent inspecting a vessel in a given category each year could be computed with more accuracy than when attempting to calculate the expected value of a single inspection or type of inspection. An annual fee would eliminate approximately 26,000 fee transactions per year for follow-on and drydock inspections. An annual fee would also provide a predictable annual cost to a vessel owner or operator. The Coast Guard, therefore, considers an annual inspection fee to be the most practical alternative for primary inspections and the follow-on inspections related to them.

In structuring an annual fee which would reasonably reflect the cost basis of the inspection services provided, the Coast Guard examined several alternatives. The primary basis for determining the annual fee is an annual accrual accounting system based on the annual expected value (measured in time) of services provided. The expected value of an inspection service is simply the average time it takes to conduct an inspection multiplied by the probability of the inspection taking place. The annual accrual accounting system sums the expected values of the various inspections conducted for each type of vessel. This process is an algorithm which assumes that the average time to conduct an inspection is representative for that category of vessel; that the distribution of the inspection time about the mean is normal (i.e. not skewed); and that the average has a relatively small standard deviation. This algorithm works well for the primary periodic inspections. It does not work well for the non-periodic inspections. For many of the non-periodic inspections, the standard deviation was found to be several times the mean, rendering the measure inappropriate.

Constructing a user fee based on the full cost average that is not representative or "well-behaved" would result in fees that do not reasonably reflect the cost of the services provided. The burden of paying for services calculated at full cost would be significantly shifted from those receiving extensive services to those receiving far less service. Such a user fee would result in many shipowners requiring less inspection service subsidizing shipowners requiring much more service.

After examining several options, the Coast Guard determined that charging a reasonable percentage of the full cost average for the non-periodic inspections would create fewer inequities. Several approaches to discount the 252 average inspection times (28 vessel types and 9 inspection types) were considered, but no statistical basis simply applied was found.

The Coast Guard then weighted the option of a mixed system—an annual fee for the periodic inspections and billing at an hourly rate for the follow-on inspections—to recover the full costs. The necessary billing system to recover the additional $1.9 million is estimated to cost $1.75 million. These additional billing costs would be passed on to the industry. This option was not considered viable or reasonable.

To avoid establishing a billing system and to ameliorate the inequities, the Coast Guard found that by using 50% of the full cost of the non-periodic inspections, the algorithm would more fairly apportion the inspection costs in each inspection and vessel category.

Fees for the remaining inspections, excursion permits for passenger vessels, the additional charge for overseas inspections, and fees for examinations of foreign vessels would be paid when applying for the particular inspection or examination.

Vessels of foreign countries which are parties to the effective International Convention for the Safety of Life at Sea (SOLAS) are not inspected under U.S. inspection laws. They are examined only to the extent necessary to verify that they have complied with their own nation's laws and the requirements of various treaties. The proposed fees for these examinations are listed by type of examination. However, vessels of countries which are not parties to SOLAS are required to undergo the same inspections as U.S. vessels, and are issued the same Certificate of Inspection. Therefore, the Coast Guard proposes to charge these foreign vessels the same fees for inspection as for U.S. vessels of the same type.

Proposed Fees

Annual Inspection Fees

The Coast Guard proposes to establish a schedule of annual inspection fees for 28 categories of vessels. Payment of the annual inspection fee would establish a privilege of inspection for a specific vessel for all periodic inspections and follow-on inspections of a U.S. vessel or a foreign vessel subject to U.S. inspection laws. The privilege of inspection would extend to all inspections and examinations required for Certificates of Inspection, certificates required under international treaties, and follow-on inspections required to determine compliance with those certificates. The proposed schedule of annual inspection fees was developed using an accrual accounting system based on the annual expected value of inspection services provided.

Commercial vessels are subject to periodic inspections on quarterly, 1 year, 1.5 year, 2 year, 2.5 year, 3 year, 5 year and 10 year intervals as a function of vessel type or service, class, and route (fresh water/salt water and/or the number of months per year certain vessels are operated in fresh water). Some of these requirements date to the 1850's, while some are more recent and are defined by international treaty. Typically, Coast Guard marine inspectors visit each vessel at least once each year to issue the all-encompassing Certificate of Inspection (at a 1, 2 or 3 year interval), to conduct the annual reinspection, or to inspect the vessel's hull. Follow-on inspections to ensure that a vessel remains in compliance with its Certificate of Inspection are also conducted throughout the year. The Coast Guard conducts over 10,000 follow-on inspections annually. The purpose of these inspections vary from one vessel to the next. They typically include, but are not limited to, the following activities:

(a) Certifying that deficiencies noted in a previous inspection have been corrected;

(b) Surveying damaged ship structures, propulsion systems, or failed lifesaving, navigation, or firefighting equipment;

(c) Inspecting, testing, and approving repairs to damaged ship structures, propulsion systems, or failed lifesaving, navigation, or firefighting equipment.

There is a large range of variability in the time required to conduct many follow-on inspections, even within a particular vessel type. Because of this variability within types of follow-on inspections, and to simplify administration and collection of fees, only 50% of the expected value of follow-on inspections were included in the annual fee. This would result in a net reduction in user fee receipts, and cost to the Treasury, of $1.9 million annually.

There are several factors which determine a vessel's inspection intervals for some periodic inspections. The primary factors are whether the vessel's route is salt water or fresh, open water or protected, and how much of the year the vessel operates in each. The Coast Guard is working to simplify hull examination/dry dock requirements. When revised, the Coast Guard expects more consistent requirements overall. This would then allow for application of the accrual algorithm at full cost for many vessel categories. The Coast Guard proposes to charge all vessels for the longest hull examination/dry dock interval as an interim solution. The Coast Guard therefore proposes to charge only at the rate for the longest inspection interval for each category of vessel. This means that all vessels of a given fee category would pay the same amount as the lowest cost vessel of that type. For example, drydock inspection intervals for a small passenger vessel may vary from 1.5 years for a vessel operated exclusively in salt water, to 5 years for a vessel operated exclusively in fresh water. Selecting the longest interval, 5 years, means that the annual expected value of this service is 20% of the cost of a drydock inspection. The expected value would be 67% of the cost of the inspection for the 1.5 year interval. The Coast Guard estimates that use of the longest interval would result in a net reduction in user fees receipts and cost to the Treasury, of $950,000 annually.

Fee Limit for Tank Barges

User fees for inspections of all tank barges (U.S. and foreign) are limited by the Act to a maximum of $500 per year, including collection costs. Annual inspection fees were calculated for tank barges in various service and route categories and were all found to be in excess of $500 ($778–$1015 without collection costs included). The Coast Guard, therefore, proposes to set the annual inspection fees at the statutory limit of $500. Savings to the tank barge industry and cost to the Treasury, because of this statutorily-mandated provision, are estimated at $2.1 million annually.

Optional Prepayment of Annual User Fee

The Coast Guard proposes to establish an optional method of payment to allow a vessel owner/operator to elect to prepay the annual user fee for a period of years, from 3 years up to the design life or expected remaining life of the vessel. The Coast Guard proposes to calculate the prepaid fee by using the net present value of the expected series of annual payments to the Treasury. This means that the payment expected in each future year is

VOL 56 ISS 243 DEC 18 1991 UMI

reduced by a discount factor to an amount which, if deposited in an interest bearing account until the payment year, would equal the payment due. The interest rate would be equal to the 10-year Treasury note rate. This rate is adjusted for inflation, using the projected rate for federal pay increases (4.2%). Once the fee is paid, the privilege of inspection for the period covered by this fee could be capitalized to become part of the value of the vessel. This privilege would be transferable with the vessel to a new owner, but could not be transferred to any other vessel. For a vessel which changes service, becoming a member of a different vessel category, the fee would be recalculated. All remaining credit from the prepaid fee would be applied to establish a privilege of inspection for the vessel in the new category based on the fee for inspection of vessels in the new category. The new fee would be calculated from the date of the first Certificate of Inspection for the vessel's new category, and the ending date of the privilege of inspection already paid for would be adjusted.

As the prepayment of multiple annual user fees is optional, the owner/operator electing to prepay the annual user fee assumes the risk that the annual user fee may go down over time (due to program/statutory changes), that the vessel may not remain in service or that inflation may be less than the projected rate. The government, on the other hand, assumes the risk that the discount rate may exceed the actual rate of interest; that inspection times and other program costs may increase; and that inflation may rise above the projected rate. While the Coast Guard may adjust the time period of the privilege of inspections paid for in advance, fees will not be refunded.

Excursion Permit Fee

Vessel operators desiring to carry passengers in excess of the number listed on the vessel's Certificate of Inspection must apply for an excursion permit. The excursion permit may be issued by the Officer in Charge, Marine Inspection after inspecting the vessel to ensure that the proposed excursion would be safe. The fee for this inspection would be paid upon application for the requested service.

Overseas Inspection Fee

Approximately 40,000 hours in overseas travel time are expended annually in connection with inspection of U.S. commercial vessels. These inspections are conducted overseas at the request of the vessel owner. Owners now compensate the Coast Guard (under 46 U.S.C. 3317) only for travel expenses and per diem, but not for operating costs associated with overseas inspections. Personnel hours expended during travel, waiting time at the inspection destination for a vessel to be ready for inspection, and the cost differential of maintaining offices overseas are included among the costs of providing this service which require this additional fee.

Inspectors are assigned to overseas inspections based on a variety of factors, including experience, availability, and convenience to the Coast Guard, rather than being sent from the nearest location. This results in large variations in travel and delay time which can neither be predicted nor controlled by the inspection applicant.

The Coast Guard proposes to base charges for these overseas inspections on the fact that they are overseas, and not on the location from which the Coast Guard chooses to send an inspector. Therefore, the Coast Guard proposes to charge a flat fee for all overseas inspections, based on apportionment of the additional costs among the inspection and examination activities conducted overseas. The apportioned share for each activity is approximately equal to 50 hours travel and delay time. It is derived from current overseas inspection workload data. Reported workload time for those inspections is limited to a maximum of 8 hours per day. The workload data thus represents actual personnel costs, and does not include off duty time.

Foreign Tankship Fee

Foreign chemical tankships operating in U.S. waters are required to be examined and issued a Certificate (or Letter) of Compliance (COC). The COC is valid for two years. Annual reexaminations of chemical tankers are conducted by a marine inspector and the COC is endorsed. Foreign tankships carrying petroleum products are required to be examined annually and issued an annual Tank Vessel Examination (TVE) Letter. As the time involved to conduct each of these exams is essentially the same, we propose to charge the same user fee for these three types of examinations of foreign tankships.

Foreign Mobile Offshore Drilling Unit Fees

Foreign MODUs are inspected under the authority of the Outer Continental Shelf Lands Act, codified at 43 U.S.C. 1356. The regulation requiring a foreign MODU to obtain a Letter of Compliance is published at 33 CFR 143.210. Since other types of foreign vessels are required to pay fees for inspections and examinations, and U.S. MODUs generally must be inspected by and pay fees to foreign agencies when operating in foreign waters, the Coast Guard proposes to establish user fees for these inspection services provided to foreign MODUs. Fees for foreign MODUs would be collected under the authority of 14 U.S.C. 664 and 31 U.S.C. 9701.

These inspections are conducted under 33 CFR 143.207 and 143.210 to ensure compliance with one of the following: (a) The design and equipment standards for MODU's in 46 CFR Part 108; (b) the design and equipment standards of the documenting nation, if those regulations have been found to meet or exceed U.S. standards; or, (c) the standards issued by the International Maritime Organization.

Inspections conducted to ensure compliance with (a) above are the same inspection services provided to a U.S. MODU, and the fee charged would be the same. Inspections conducted for compliance with categories (b) and (c) above are essentially the same as the examinations for a Certificate of Compliance for other types of foreign vessels, as listed in 46 CFR 2.01–6, and a separate fee is established for these vessels, which have already been certified by another government.

Foreign Passenger Vessel Fee

Passenger vessels from foreign countries which are parties to SOLAS are inspected to verify that they have complied with the laws of the flag state and the controls imposed by the treaty. Over 95% of these foreign passenger vessel control verification examinations are straightforward, are conducted on a regular basis, and are predictable in terms of inspection time spent per examination. A single annual fee is proposed for such control verification examinations. This fixed fee would be applicable to the initial, annual, and reinspection examinations. For the remaining 5%, inspection times are as much as 40 times the mean. At this time, the Coast Guard proposes to charge these vessels the same fee as the 95% which require no significant extra effort.

Inspection of Foreign Vessels not Subject to SOLAS Operating in U.S. Waters

These vessels are inspected under the same regulations and in the same manner as U.S. vessels, and are issued the same Certificates of Inspection as U.S. vessels. User fees proposed for the inspection of these vessels are the same as those for U.S. vessels.

Collection of Fees and Penalties for Failure to Pay

The Coast Guard is presently reviewing a variety of fee collection procedures including cash payment, checks, money orders, credit cards, and electronic payment procedures. Convenience to the applicant will be an important factor in selecting the procedures to be used. Although these administrative details are not required to be subject to notice and comment, the Coast Guard invites comments on desirable features of a collection system. The Coast Guard will include the collection procedure details in the Final Rule. The Coast Guard anticipates that payment would be required before inspection services would be provided.

For failure to pay fees, a civil penalty of up to $5,000 is authorized in 46 U.S.C. 2110. That section also authorizes the Secretary of the Treasury to withhold customs clearance for vessels which fail to pay fees, when requested by the Secretary of Transportation. The Coast Guard also proposes to withhold additional inspection and certification services pending payment of any outstanding fees. The Coast Guard intends to treat checks returned due to insufficient funds as a delinquent payment and to recover appropriate collection and enforcement costs in these cases.

Cost Methodology

The Coast Guard developed fees in this proposal using information from workload analysis studies and data contained in the Coast Guard's Marine Safety Information System (MSIS) and costs of conducting vessel inspection activities at Coast Guard Marine Inspection Offices and Marine Safety Offices.

Vessel inspection user fees for this rulemaking were derived based on the proposition that the fees should generate receipts approximating the total cost of the commercial vessel inspection program, less the cost of those activities which will be the subject of separate rulemakings; activities for which the program director has determined that the imposition of fees would impose an administrative burden which would outweigh the value of the fees; inspections conducted at the sole discretion of the OCMI for enforcement purposes; and inspection costs for tank barges in excess of the statutory $500 annual inspection fee cap imposed by the Act.

The program cost includes the cost of personnel and associated infrastructure necessary to provide the inspection services. These include, but are not limited to: Office space; office equipment and supplies such as telephones, computers and copiers; special training; and other personnel-related costs. The program cost also includes a portion of the annual cost to operate MSIS and local travel costs for inspectors. Using information from a workload analysis study, hourly standard rates provided in the Coast Guard Standard Rate Instruction (COMDTINST 7310.1), and the Coast Guard Staffing Standards Manual (COMDTINST M5312.11), the Coast Guard calculated this total program cost to be approximately $25.4–$27 million, not including any cost of collecting fees. Based on the workload analysis study and this total program cost the Coast Guard calculated a basic hourly rate for inspection services of $87 per qualified inspector hour.

Each proposed fee is calculated as a function of the time the Coast Guard would reasonably expect to spend inspecting or examining a specific category of vessel during an average year, including travel time. Categories were based on vessel type. Where wide variations in inspection time were found, vessel types were subdivided by length, number of passengers, and other criteria to provide increased predictability of inspection time. The proposed fees may be rounded to the nearest $5.00 in the final rule.

This rulemaking proposes to assess approximately $21–$22 million in user fees each year. The $500 annual limit on inspection fees for tank barges, established by the Act, reduces estimated receipts by approximately $2.1 million annually. Several adjustments were introduced to simplify the fee structure, and to minimize the administrative cost to industry and the government of assessing and collecting fees. These include charging for only one-half of follow-on inspection costs, charging only the minimum amount for drydock inspections, charging the same fee for control verification examinations for all foreign passenger vessels, and elimination of fees for minor miscellaneous services. These changes reduce expected collections by $3.2 million per year.

In each instance where a decision was made not to assess a fee for a particular activity, or to assess less than the full cost of an activity, the overhead for that activity was eliminated from the program costs on which fees were based. This procedure ensures that the direct costs and overhead for these activities will not be distributed to the users of other services which are subject to user fees.

Costs for different types of mobile offshore drilling units were developed based on program manager estimates, validated against historical data. Workload data was not originally captured based on type of unit, and further data collection and analysis is required. This analysis may adjust the apportionment of fees among types of drilling units based on the number of hours required to inspect each type, but should not affect the total cost to the industry. The Coast Guard expects to incorporate any adjustments which may be indicated by this analysis in a future rulemaking.

Section by Section Analysis

33 CFR Part 143

The Coast Guard proposes to revise the authority citation for this Part to include statutes related to user fees (i.e., 14 U.S.C. 664, 31 U.S.C. 9701).

Section 143.210—The Coast Guard proposes to revise this section by adding the requirement that the user fee for inspection of a foreign mobile offshore drilling unit (MODU) be submitted with the application for a Letter of Compliance inspection.

46 CFR Part 2

The Coast Guard proposes to revise the authority citation for this Part to include statutes related to user fees (i.e., 14 U.S.C. 664, 31 U.S.C. 9701, 46 U.S.C. 2110).

Section 2.01–1—The proposed amendments to this section require payment of user fees at the time of application for services.

Section 2.01–6—The Letter of Compliance listed in 33 CFR 143.201 is added to the list of certificates issued to foreign vessels in this section. This change is editorial in nature.

Section 2.01–45—This section would be amended to add a requirement for excursion permit fees to be paid when the application for an excursion permit is submitted.

Section 2.01–60—This section would be removed and the substance of the section, dealing with procedures for overtime compensation would be placed in a new Section 2.10–11.

Subpart 2.10—This is a new subpart titled "Fees."

Section 2.10–1—This section would add definitions of vessel types on which fees are based, and definitions of other terms to be used in this part. The vessel definitions are based on other regulations or statutes.

Section 2.10–11—This section is the old § 2.01–60. References to shipping commissioners have been deleted

VOL 56 ISS 243 DEC 18 1991 UMI

because the Coast Guard no longer performs that function. Reference to 46 U.S.C. 382b was changed to 46 U.S.C. 2111 because of partial revision of title 46, United States Code. Reference to part 143 of this chapter was changed to part 9 because part 143 has been redesignated. These changes are editorial in nature.

Section 2.10–13—This section contains a summary of the statutory penalty provisions.

Section 2.10–101—An annual inspection fee is proposed for U.S. commercial vessels and those foreign vessels which are inspected under U.S. law and issued a Certificate of Inspection. The fee for each vessel is based on the expected value of inspection services in an average year for a vessel of that type, size and service. The section describes the inspection services provided under the privilege of inspection established when the fee is paid.

Section 2.10–103—This section would allow vessel owners the option of prepaying the cost of inspections covered by the annual inspection fee for a period up to the expected life of the vessel. The fee for each future year is discounted to the present value of the services to be provided in that year. The fee is discounted using the interest rate of 10% for 10-year Treasury notes, less a projected inflation rate of 4.2%. The section also proposes application procedures for vessel owners desiring to prepay fees.

Section 2.10–105—This section proposes a method of adjusting annual inspection fees when a vessel changes from one fee category to another, and provides that credit will be granted for fees already paid.

Section 2.10–106—This section proposes a fixed fee for excursion permit inspections. The fee would be required only when an excursion permit inspection must be conducted at a time other than the inspection for a Certificate of Inspection.

Section 2.10–107—Any vessel which must be inspected outside the United States, including territories and possessions of the United States would be required to pay a separate fixed fee under this section. This fee is intended to cover the personnel salary and overhead costs associated with travel to inspection sites in foreign countries and delays in transit, as well as an adjustment for the cost of operating offices overseas. The proposed fee would be in addition to travel and lodging expenses for which the Coast Guard is currently reimbursed.

Section 2.10–109—This section proposes fees for inspections of certain foreign vessels.

Section 2.10–110—This section proposes fees for inspections of foreign MODUs inspected under 33 CFR part 143.

Regulatory Evaluation

This proposal is not major under Executive Order 12291, but is significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11040; February 26, 1979). The proposed fees are a deficit reduction measure, mandated by the Omnibus Budget Reconciliation Act of 1990, (the Act) which amended 46 U.S.C. 2110 to remove long-standing prohibitions against charging fees for Coast Guard commercial vessel services.

The Act required the Coast Guard to establish fees for services provided under subtitle II of title 46 United States Code. These services include licensing and documentation of merchant marine personnel, vessel documentation, commercial vessel inspections, and vessel plan review and equipment approval. Although precise cost impacts of these fees require further study, the total cost of these user fees is expected to be less than $45 million. This rulemaking deals only with vessel inspection user fees, which are estimated at $20–$22 million. This is well below the $100 million threshold which would make this a major regulation. Nonetheless, it is significant under the Department of Transportation Regulatory Policies and Procedures because it is an important program change, and the Coast Guard has prepared a regulatory evaluation.

The draft Regulatory Evaluation is available in the docket for inspection or copying where indicated under "**ADDRESSES**." A summary of this evaluation is published as an appendix at the end of this notice of proposed rulemaking.

The evaluation compared the annual cost of the user fees to revenues generated by operating vessels. It concluded that the financial impact on the public, and individuals subject to these user fees, would be minimal.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632).

The Coast Guard expects that this regulation will not have a significant impact on a substantial number of small entities. However, the small passenger vessel industry is predominantly made up of small firms. Information on costs, revenues and profits from this industry are not generally available. The Coast Guard is convinced that it has developed a fee structure specifically for this industry which will reduce the impact on owners and operators of smaller passenger vessels. Nevertheless, some passenger vessel owners may be substantially affected by this regulation. Some of the smaller tank barge operators may also be substantially affected, despite the inspection fee limitation imposed by the Act. The Coast Guard requests information from those companies and individuals that believe they will be significantly affected by this rulemaking. Comments should include type of vessel(s), number of vessels owned or operated, size, sales, profits, season of operation, and area of operation, and should be sent to the Marine Safety Council where indicated under "**ADDRESSES**." Based on the information currently available, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This proposal contains minimal additional collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). Existing requirements, for applications for inspection are covered under Office of Management and Budget control number OMB 2115–0141. The additional requirements involve collection of funds, and of such information as is required to calculate the fee due, or to ensure proper collection. These may include account numbers for checking accounts, credit card accounts, or other financial accounts from which payment is made, and addresses, telephone numbers, or other identifying information which will permit follow-up action when an incorrect amount is submitted or a payment instrument fails to clear. A new requirement is established for those persons desiring to pay annual inspection fees for future years in advance. The applicant must send a request in writing to the Coast Guard which furnishes the following information: The vessel's official number or other identifying information, the vessel category, the number of years for which the applicant desires to prepay the annual inspection fee, and the applicant's name and return address. The burden placed on members of the public is considered to be minimal and within the scope of information collection permitted under the existing control numbers.

Federalism

The Coast Guard has analyzed this proposal in accordance with the principles and criteria contained in Executive Order 12612. Based on the information available to it at the present time, the Coast Guard is unable to determine whether the proposed rule would have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The proposal would result in payment of fees by States, State agencies, and local governments for inspection services provided to vessels owned by those entities. The impact of those fees on the agencies owning the vessels do not appear substantial based on the regulatory evaluation, which is summarized in the appendix to this notice. The Coast Guard specifically seeks public comment on the federalism implications of this rulemaking.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that, under section 2.B.2 of Commandant Instruction M16475.1B, this proposal is categorically excluded from further environmental documentation. Section 2.B.2 of that instruction excludes "administrative actions and procedural regulations and policies which clearly do not have any environmental impacts." A Categorical Exclusion Determination is available in the docket for inspection or copying where indicated under "**ADDRESSES**."

Appendix

To assist the reader in understanding the basis for the user fees proposed in this rulemaking, the Coast Guard has attached a summary of the preliminary regulatory evaluation, including the regulatory flexibility analysis, prepared for this rulemaking project. The summary is published as an Appendix to this notice of proposed rulemaking, and will not become part of the final rule. The complete preliminary regulatory evaluation is available in the rulemaking docket for inspection or copying where indicated under "**ADDRESSES**."

List of Subjects

33 CFR Part 143

Continental shelf, Fees, Marine safety, Occupational safety and health, Vessels.

46 CFR Part 2

Fees, Marine safety, Reporting and recordkeeping requirements, Vessels.

For the reasons set out in the preamble, the Coast Guard proposes to amend title 33, chapter I, subchapter N, part 143 and title 46, chapter I, subchapter A, part 2 as follows:

Title 33—[Amended]

SUBCHAPTER N—OUTER CONTINENTAL SHELF ACTIVITIES

PART 143—DESIGN AND EQUIPMENT

1. The authority citation for part 143 is revised to read as follows:

Authority: 14 U.S.C. 664; 31 U.S.C. 9701; 43 U.S.C. 1333(d)(1), 1348(c), 1356; 49 CFR 1.46.

2. Section 143.210 is amended by adding a new paragraph (c) to read as follows:

§ 143.210 Letter of compliance.

* * * * *

(c) To request a Letter of Compliance inspection, the owner of a mobile offshore drilling unit documented under the laws of a foreign nation shall submit an application for inspection of a foreign vessel (CG–986), as described in 46 CFR 2.01–1, to the Officer in Charge, Marine Inspection for the area in which the vessel expects to operate. The application must be accompanied by the inspection fee set out in 46 CFR 2.10–110.

Title 46—[Amended]

SUBCHAPTER A—PROCEDURES APPLICABLE TO THE PUBLIC

PART 2—VESSEL INSPECTIONS

3. The authority citation for part 2 is revised to read as follows:

Authority: 14 U.S.C. 664; 31 U.S.C. 9701; 33 U.S.C. 1903; 43 U.S.C. 1333; 46 U.S.C. 2110, 3306, 3703, 5115, 8105; E.O. 12234, 45 FR 58801, 3 CFR 1980 Comp., p. 277; 49 CFR 1.46; Subpart 2.45 also issued under the authority of Act Dec. 27, 1950, Ch. 1155, secs. 1, 2, 64 Stat 1120 (see 46 U.S.C. App. note prec. 1).

4. Part 2 is amended by removing § 2.01–60 from subpart 2.01 and reserving it, and adding a new subpart 2.10 to read as follows:

Subpart 2.10—Fees

Sec.
2.10–1 Definitions.
2.10–11 Overtime compensation.
2.10–13 Penalties.
2.10–101 Annual inspection fee.
2.10–103 Prepayment of annual inspection fees.
2.10–105 Changes in vessel category.
2.10–106 Excursion permit inspection fee.
2.10–107 Overseas inspection fee.
2.10–109 Fees for examinations of foreign vessels.
2.10–110 Fees for inspection of foreign mobile offshore drilling units.

5. Section 2.01–1 is amended by adding paragraph (a)(3) and revising paragraph (b) to read as follows:

§ 2.01–1 Applications for inspections.

(a) * * *

(3) Application forms must be accompanied by applicable fees required under §§ 2.10–107, 2.10–109 or 2.10–110, unless the requested inspection is covered by the annual fee and that fee has been paid. Evidence of payment of inspection fees will be endorsed on or affixed to the Certificate of Inspection, Certificate of Compliance, Letter of Compliance, or Excursion Permit when payment is verified by the Officer in Charge, Marine Inspection.

(b) *To whom submitted.* The completed form must be submitted to the Officer in Charge, Marine Inspection, in the Marine Inspection Office located in, or nearest, the port at which the inspection is to be made. When payment of all applicable fees has been verified, the applicant will be advised in writing when the inspection will be made.

* * * * * *

6. In § 2.01–6 the section heading is revised, existing paragraph (a)(2) is redesignated as paragraph (a)(2)(i) and a new paragraph (a)(2)(ii) is added to read as follows:

§ 2.01–6 Certificates of Compliance issued to foreign vessels.

(a) * * *

(2) (i) * * *

(ii) Letter of Compliance—issued to Foreign Mobile Offshore Drilling Units engaged in Outer Continental Shelf activities under 33 CFR 143.210.

* * * * * *

7. Section 2.01–45 is amended by revising paragraph (b) to read as follows:

§ 2.01–45 Excursion permit.

(a) * * *

(b) The application for an excursion permit is made by the master, owner, or agent of a vessel to the Officer in Charge, Marine Inspection, on Coast Guard Form CG–950, Application for Excursion Permit. The applicant shall include the excursion permit inspection fee required under § 2.10–6 of this part with the application. If, after inspection,

VOL 56 ISS 243 DEC 18 1991 UMI

permission is granted, it is given on Coast Guard Form CG-949, Permission to Carry Excursion Party. The permit describes the vessel, the route over which and the period during which the excursions may be made, and the safety equipment required for the additional persons indicated.

§ 201.01-60 [Removed]

8. Section 2.01-60 is removed and reserved.

9. A new subpart 2.10 is added to read as follows:

Subpart 2.10—Fees

§ 2.10-1 Definitions.

The following definitions will be used for the purpose of assessing fees under this chapter:

All other inspected vessels means an unclassified vessel or any other vessel, not listed above, which is required to be inspected under this chapter.

Drill ship MODU means a mobile offshore drilling unit with a ship shape displacement hull intended for operation in the floating condition.

Freight barge means a non-self-propelled freight vessel.

Freight ship means a self-propelled freight vessel.

Freight vessel means a vessel of more than 15 gross tons that carries freight for hire, except an oceanographic research vessel or an offshore supply vessel.

Industrial vessel means a vessel which, by reason of its special outfit, purpose, design, or function engages in certain industrial ventures. This classification includes such vessels as dredges, cable layers, derrick barges, and construction and wrecking barges, but does not include vessels which carry passengers or freight for hire, oceanographic research vessels, or vessels engaged in the fisheries.

Liquefied gas tankship means a self-propelled vessel equipped with cargo tanks primarily designed to carry liquefied or compressed gasses in bulk.

Mobile offshore drilling unit (MODU) means a vessel capable of engaging in drilling operations for the exploration or exploitation of subsea resources that is: Seagoing and 300 or more gross tons and self-propelled by machinery; seagoing and 100 or more gross tons and non-self-propelled; or more than 65 feet in length and propelled by steam.

Nautical school vessel means a vessel operated by or in connection with a nautical school or an educational institution under section 13 of the Coast Guard Authorization Act of 1986, Public Law 99-640.

Oceanographic research vessel means a vessel that is being employed only in oceanography or limnology or both, or only in oceanographic or limnological research, including marine geophysical and geological surveys, atmospheric research, and biological research.

Offshore supply vessel means a vessel that is propelled by machinery other than steam, that is of at least 15 gross tons and less than 500 gross tons, and that regularly carries goods, supplies, and equipment in support of exploration, exploitation, or production of offshore mineral or energy resources, and is not a small passenger vessel.

Passenger barge means a non-self-propelled passenger vessel, including a prison barge or a barge which carries occupied recreational vehicles.

Passenger ship means a self-propelled passenger vessel.

Passenger vessel means a vessel of at least 100 gross tons carrying at least one passenger for hire.

Sailing school vessel means a vessel of less than 500 gross tons carrying at least 6 individuals who are sailing school instructors or sailing school students, which is principally equipped for propulsion by sail, and which is owned or demise chartered, and operated by an organization which is tax exempt under 26 U.S.C. 501(c)(3), or by a State or political subdivision of a State.

Self-elevating MODU means a mobile offshore drilling unit with movable legs capable of raising its hull above the surface of the sea.

Semi-submersible MODU means a mobile offshore drilling unit with the main deck connected to an underwater hull by columns or caissons, intended for drilling operations in the floating condition.

Small passenger vessel means a vessel of less than 100 gross tons carrying more than 6 passengers and subject to inspection under Subchapter T of this chapter.

Submersible MODU means a mobile offshore drilling unit with the main deck supported over an underwater barge type displacement hull or the main deck connected to an underwater hull of footings by columns or caissons intended for drilling operation in the bottom bearing condition.

Tank barge means any tank vessel not equipped with means of propulsion.

Tank vessel means a vessel that is constructed or adapted to carry, or that carries, oil or hazardous material in bulk as cargo or cargo residue.

Tankship means any tank vessel propelled by power or sail, including an integrated tug and barge designed to operate together only in the pushing mode.

Towing vessel means a commercial vessel engaged in or intending to engage in the service of pulling, pushing or hauling alongside, or any combination of pulling, pushing or hauling alongside.

§ 2.10-11 Overtime compensation.

The owner, master, or agent of a vessel shall pay extra compensation for overtime services performed by civilian officers and civilian employees who may be required to remain on duty between the hours of 5 p.m. and 8 a.m., or on Sundays or holidays, to inspect vessels or vessel equipment, or to perform related services. Overtime compensation is authorized by 46 U.S.C. 2111, and will be computed using the method described in 46 CFR part 9.

§ 2.10-13 Penalties.

(a) A person who fails to pay a fee or charge established under this subpart is liable to the United States Government for a civil penalty of up to $5000 for each violation under 46 U.S.C. 2110.

(b) A person who fails to pay a fee established in this subpart may be required to pay all costs of collection and enforcement of those fees, in addition to any civil penalty assessed.

(c) Any vessel for which the fees established under this part are unpaid may be denied clearance of Customs required by 46 app. U.S.C. 91 and 19 CFR 4.60 and 4.61 until the fee or charge is paid or until a bond is posted for the payment.

§ 2.10-101 Annual inspection fee.

(a) Each vessel for which a Certificate of Inspection (COI) is required must pay the annual inspection fee indicated in Table 2.10-101 for that type of vessel. This annual fee is the only payment required to establish a privilege of inspection for all inspections related to compliance with or reissuance of a Certificate of Inspection. These include inspection for issuance of the COI, except as noted below, reinspections, deficiency inspections, damage surveys, inspection of repairs, hull examinations (dry dock), and other miscellaneous inspections related to the COI or the hull examination. Inspections for a permit to proceed, drydock extension, or a special MARPOL (The International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978) examination are also included in the privilege of inspection. Inspections for an initial COI for a newly constructed vessel, a rebuilt vessel, or a modification of a vessel which requires issuance of a new COI are not within the privilege of inspection, and require a separate fee.

(b) The vessel owner shall pay the annual inspection fee each year on the anniversary date of the Certificate of Inspection, or may prepay the fee for a number of years, from a minimum of three years up to the design life or expected remaining life of the vessel, using the procedures in § 2.10-103 of this subpart.

TABLE 2.10-101.—ANNUAL INSPECTION FEES FOR U.S. VESSELS AND FOREIGN VESSELS INSPECTED FOR A CERTIFICATE OF INSPECTION

Freight Vessel:	
Freight Barge	$955.00
Freight Ship	5411.00
Ready Reserve Fleet Freight Ship	4245.00
Industrial Vessel	2751.00
Mobile Offshore Drilling Unit:	
Drill ship MODU	6712.00
Submersible MODU	4698.00
Self-elevating MODU	4698.00
Semi-submersible MODU	8054.00
Offshore Supply Vessel	1470.00
Oceanographic Research Vessel	4196.00
Ocean-Going Towboat	2915.00
Tank Vessel:	
Tankship	5805.00
Ready Reserve Fleet Tankship	4723.00
Liquefied Gas Tankship	14142.00
Tank Barge	500.00
Small Passenger Vessel or Sailing School Vessel:	
54 feet or less	820.00
longer than 54 feet up to 65 feet	880.00
longer than 65 feet up to 130 feet	1095.00
longer than 130 feet up to 160 feet and less than 150 passengers	1216.00
longer than 130 feet up to 160 feet and 150 passengers or more	2585.00
longer than 160 feet	2585.00
Passenger Barge	2525.00
Passenger Ship:	
Less than 250 feet and less than 150 passengers	3600.00
Less than 250 feet and 150 passengers or more	4054.00
250 feet up to 350 feet	5333.00
longer than 350 feet up to 450 feet	6836.00
longer than 450 feet	14650.00
Nautical School Vessel	7207.00
All other inspected vessels	1032.00

§ 2.10-103 Prepayment of annual inspection fees.

(a) Vessel owners may elect to pay the annual inspection fee for a vessel in advance for a period of years not less than three years, and up to the design life or expected remaining life of the vessel. Prepayment of such fees will establish a privilege of inspection for the vessel for all inspection services covered by the annual fee for the specified number of years.

(b) When the inspection fee has been prepaid for a vessel, the privilege of inspection for that period attaches to the vessel. The privilege of inspection shall run with the vessel if the vessel is sold, and may not be transferred to any other vessel.

(c) The prepayment amount will be discounted to its net present value using the following formula:

$$PV = \sum_{t=0}^{n} \frac{R_o(1+\pi)^t}{(1+i)^t}$$

Where:

PV is the Present Value of the series of annual user fees to be prepaid (the net amount to be prepaid)

R_o is the published user fee of the vessel

i is the interest rate for 10-year Treasury notes on the day the fee is prepaid

π is the rate of inflation (4.2%—based on projected military personnel costs)

n is the total number of years to be prepaid

t is the number of years after prepayment of the fee for each annual increment (t=0, 1, 2, 3 . . . n)

(d) A vessel owner desiring to prepay the annual inspection fee for a vessel must submit a written request for prepayment, specifying the period for which prepayment is to be made, with a copy of the Application for Inspection or must certify the following information: The vessel's official number or other identifying information, the vessel category, and the applicant's name and return address. The request must be mailed to: Commandant (G-MP), U.S. Coast Guard, 2100 Second Street, SW., Washington, DC 20593-0001. The Commandant (G-MP) will then calculate the amount of the fee for the period requested and advise the applicant of payment procedures.

§ 2.10-105 Changes in vessel category.

(a) When a vessel owner desires to change the service in which the vessel operates, the fee for the new category of vessel must be submitted prior to issuance of the COI in the new service. The new fee establishes a privilege of inspection for the vessel which runs for one year from the date the COI is issued for the new category. The prorated value of the vessel's privilege of inspection remaining under the old category will be credited against the annual inspection fee for the new category.

(b) When a vessel owner desires to change the service in which the vessel operates, and annual inspection fees have been prepaid for a period of years, the Officer in Charge, Marine Inspection will notify the Commandant (G-MP) of the requested change of service. The Commandant (G-MP) will adjust the ending date of the prepaid privilege of inspection, and indicate any additional fees to be paid, prior to issuance of the COI in the new service.

§ 2.10-106 Excursion permit inspection fee.

(a) The fee for an inspection for an Excursion Permit issued under § 2.01-45 of this part is $424.00.

(b) Vessel owners desiring inspection for an Excursion Permit shall submit the fee listed in paragraph (a) of this section with the Application for Excursion Permit, Coast Guard Form CG-950 to the OCMI or designated collection agent.

§ 2.10-107 Overseas inspection fee.

In addition to any other fee required by this subpart, a fee of $4586.00 will be charged for vessels inspected outside the United States and its territories. This fee covers the cost of the inspectors' time while travelling, and is in addition to the reimbursement for travel expenses authorized under 46 U.S.C. 3317(b).

§ 2.10-109 Fees for examinations of foreign vessels.

(a) Vessels of foreign countries which are parties to the International Convention for the Safety of Life at Sea, 1974 as amended (SOLAS), will be subject to the fees listed below:

(1) Control Verification examination issued under § 2.01-6(a)(1)	$1,047.00
(2) Letter/Certification of Compliance examination for hazardous cargo vessel issued under § 2.01-6(a)(2)(i); or Tank Vessel Examination Letter issued under § 2.01-6(a)(3)	$1,102.00

(b) Foreign vessels from nations which are not parties to SOLAS will be subject to annual inspection under the laws of the United States, and will be required to pay the annual inspection fee listed in Table 2.10-101 for a vessel of that type.

§ 2.10-110 Fees for inspection of foreign mobile offshore drilling units.

(a) Foreign MODUs which are inspected for issuance of a Letter of Compliance which indicates compliance with the laws of the documenting nation, or which indicates compliance with the design and equipment standards of the International Maritime Organization for mobile offshore drilling units, must pay an inspection fee of $1831.00.

(b) Foreign MODUs which are inspected for issuance of a Letter of Compliance which indicates compliance with the design and equipment standards of 46 CFR part 108 must pay the inspection fee listed in Table 2.10-101 for a vessel of that type.

The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**

The **Federal Register,** published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the LSA (List of CFR Sections Affected) which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register;** and the cumulative **Federal Register Index.**

The **Code of Federal Regulations** (CFR) comprising approximately 196 volumes contains the annual codification of the final regulations printed in the **Federal Register.** Each of the 50 titles is updated annually.

Individual copies are separately priced. A price list of current **CFR** volumes appears both in the **Federal Register** each Monday and the monthly **LSA** (List of **CFR** Sections Affected). Price inquiries may be made to the Superintendent of Documents, or the Office of the Federal Register.

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of George Bush

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

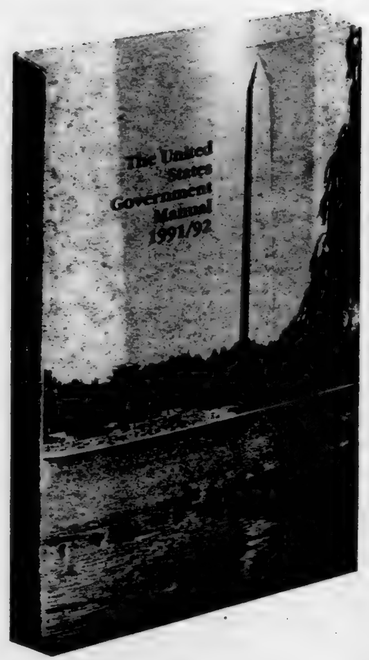
Order Now!

The United States Government Manual 1991/92



As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 56 FR 12345.

Title 3—

The President

Proclamation 6394 of December 16, 1991

Year of Thanksgiving for the Blessings of Liberty, 1991

By the President of the United States of America

A Proclamation

Thomas Jefferson once noted that the only firm basis of a nation's liberties is the "conviction in the minds of the people that these liberties are . . . the gift of God." By observing the bicentennial of our Bill of Rights as a Year of Thanksgiving for the Blessings of Liberty, we not only give honor where it is due but also reaffirm the moral and spiritual foundation on which this great Republic rests.

Our Nation's Founders were men of faith and conviction, and it was a biblically inspired view of man that led them to declare "that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness." The ratification of our Bill of Rights in December 1791 signalled their determination to uphold in law these timeless words from our Declaration of Independence.

Our Bill of Rights guarantees, among other basic liberties, freedom of speech and of the press, as well as freedom of religion and association; it recognizes the right to keep and bear arms; and it prohibits unreasonable search and seizure of a person's home, papers, or possessions. The Bill of Rights also states that no person shall be deprived of life, liberty, or property without due process of law, and it establishes fundamental rules of fairness in judicial proceedings, including the right to trial by jury. Two hundred years after its ratification, this extraordinary document is recognized around the world as the great charter of American liberty and democracy. Indeed, as James Madison predicted, the principles enshrined in our Bill of Rights have become for all peoples "fundamental maxims of free government."

Our ancestors fully recognized the value of freedom, and on September 26, 1789, just one day after they agreed on a draft Bill of Rights to be presented to the States for ratification, members of the First Congress requested that President Washington "recommend to the people of the United States a day of public thanksgiving and prayer, to be observed by acknowledging with grateful hearts the many signal favors of Almighty God." Washington, who had favored and even encouraged the observance of such a day, readily issued a proclamation calling upon all Americans to unite in thanksgiving "for the civil and religious liberty with which we are blessed . . . ."

President Washington's call for a national day of Thanksgiving came less than two decades after our Declaration of Independence—and two years before the ratification of our Bill of Rights. How much greater reason do we have now, more than 200 years later, to give thanks! The fledgling republic led by George Washington has not only endured but prospered. Today we can be thankful for the very fact that we have maintained our Constitution and Bill of Rights throughout our Nation's history and for the expansion of freedom and democratic ideals around the world. Today we are also grateful for those brave Americans, past and present, who have been willing to put themselves in harm's way to defend the lives and liberty of others.

VOL

1991
UMI

On this wonderful occasion, recalling the words of our first President, let us give thanks for the blessings of liberty, and let us strive—both as individuals and as a Nation—to remain worthy of them, always using our freedom in accordance with the will of that "great and glorious Being" who has so graciously granted and preserved it.

The Congress, by Public Law 101–570, has designated 1991 as a "Year of Thanksgiving for the Blessings of Liberty" and has authorized and requested the President to issue a proclamation in observance of this year.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby urge all Americans to join in observing 1991 as a Year of Thanksgiving for the Blessings of Liberty. Let us show through word and deed—including public and private prayer—that we are grateful for our God-given freedom and for the many other blessings that He has bestowed on us as individuals and as a Nation.

IN WITNESS WHEREOF, I have hereunto set my hand this sixteenth day of December, in the year of our Lord nineteen hundred and ninety-one, and of the Independence of the United States of America the two hundred and sixteenth.

George Bush

Rules and Regulations

Federal Register
Vol. 56, No. 244
Thursday, December 19, 1991

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 931

[Docket No. FV–91–406FR]

Establishment of Administrative Rules and Regulations for Marketing Order Covering Fresh Bartlett Pears Grown in Oregon and Washington

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule implements handler reporting requirements and communication procedures under Marketing Order No. 931. Several terms are also defined in the rules and regulations for clarity and ease of reference. This final rule is needed to help facilitate administrative operations under the order and provides for the collection and dissemination of valuable statistical information. This action was unanimously recommended by the Northwest Fresh Bartlett Pear Marketing Committee (Committee) established under M.O. 931.

EFFECTIVE DATE: December 19, 1991.

FOR FURTHER INFORMATION CONTACT: George Kelhart, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2525–S, Washington, DC 20090–6456, telephone 202–690–3919.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement and Marketing Order No. 931 [7 CFR part 931] regulating the handling of fresh Bartlett pears grown in Oregon and Washington. The Bartlett pear marketing order is effective under the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601–674], hereinafter referred to as the Act.

This final rule has been reviewed by the U.S. Department of Agriculture (Department) in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 70 handlers of fresh Bartlett pears regulated under this marketing order each season and approximately 1,900 Bartlett pear producers in Washington and Oregon. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.601] as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of these handlers and producers may be classified as small entities.

The Committee met on May 30, 1991, and unanimously recommended the establishment of administrative rules and regulations covering handler reporting requirements and procedures and communications procedures. The Committee's recommendation also included definitions of terms used in the rules and regulations.

Section 931.60(a) of the order [7 CFR 931.60(a)] provides that the Committee, with the approval of the Secretary, may require that handlers furnish reports of pears received and disposed of and such other information as may be necessary for the Committee to perform its duties under the order.

Pursuant to § 931.60(a), the Committee recommended that rules be established at § 931.120 to require each handler to transmit to the Committee a "Semi-Monthly Report on Destination of Shipments and Assessment Payments" on the first and the fifteenth day of each calendar month during the shipping season (August through January). The estimated number of respondents for this collection of information is 78, with an estimated average reporting burden of 0.75 hours per response and an estimated annual reporting burden of 760 hours. This report will include the following information: (1) The quantity of each variety of pears shipped by that handler during the preceding half month; (2) the date of each shipment; (3) the ultimate destination, by city and state, or city and country; (4) the assessment payment due; and (5) the name and address of such handler.

The Committee recommended that each handler also transmit a weekly packout report each Friday during the shipping season (August through January). The estimated number of respondents for this collection of information is 78, with an estimated average reporting burden of 0.50 hours per response and an estimated annual reporting burden of 507 hours. This report will contain the following information for each variety: (1) The projected total packout; (2) the packout to date; (3) the volume sold export (shipped/not shipped), sold domestic (shipped/not shipped) and shipped auction; (4) the packout to date in controlled atmosphere (C.A.) storage and the volume in C.A. storage which is sold; and (5) the name and address of such handler.

In addition to these reports, the Committee recommended that each handler furnish, upon request of the Committee, a pear size and grade storage report, by variety, which will include the quantity of specific grades and sizes of pears in regular and C.A. storage. The estimated number of respondents for this collection of information is 66, with an estimated average reporting burden of 0.67 hours per response and an estimated annual reporting burden of 59 hours.

These reports contain valuable harvesting, packing and shipping information necessary for the Committee to carry out its program responsibilities and for handlers to make marketing decisions. Some Committee responsibilities include the collection of program assessments from handlers based on the quantities of pears shipped and making determinations as to whether Committee representation and production area

VOL
56
ISS
244
DE
19
1991
UMI

districts accurately reflect pear production within the districts. The dissemination of the statistical information on production, packout and shipments to the industry by the Committee is essential to the sound and orderly marketing of Northwest fresh Bartlett pears.

The Committee also recommended that the following terms be defined in the rules and regulations for ease of reference and clarity:

Section 931.100 Terms—Each term used in this subpart shall have the same meaning as when used in the marketing agreement and order.

Section 931.101 Marketing agreement—"Marketing agreement" means Marketing Agreement No. 147, as amended regulating the handling of Bartlett pears grown in Oregon and Washington.

Section 931.102 Order—"Order" means Order No. 931, as amended (§§ 931.1 to 931.71), regulating the handling of Bartlett pears grown in Oregon and Washington.

Finally, the Committee recommended that an administrative rule be added addressing marketing agreement and order communications. This rule will appear at § 931.110 (7 CFR 931.110) and will specify that, generally, all reports, applications, submittals, requests, inspection certificates, and communications in connection with the marketing agreement and order shall be forwarded to the Northwest Fresh Bartlett Pear Marketing Committee at 813 SW Alder, suite 601, Portland, Oregon 97205–3182.

Based on the above, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

Two of the handler report forms (the "Semi-Monthly Report on Destination of Shipments and Assessment Payments" and the weekly packout report) that are contained in the regulations to be added were approved by the Office of Management and Budget (OMB) in 1989 and were assigned OMB No. 0581–0092. This approval is valid through March 31, 1992. The third report form (the pear size and grade storage report) has been submitted to the OMB for approval based on current information on the number of respondents and estimated burden. Handlers will not be required to complete and submit this report form until it has been approved by the OMB.

Notice of this action was published in the **Federal Register** on October 10, 1991, [56 FR 51180]. The comment period ended October 25, 1991. No comments were received.

After consideration of all available information, including the recommendations made by the committee, it is found that this action will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is found and determined that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because the requirements included in this final rule need to be implemented as soon as possible. The 1991 shipping season has already begun and no useful purpose would be served by delaying the effective date of this action.

List of Subjects in 7 CFR Part 931

Bartlett pears, Marketing agreements, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 931 is amended as follows:

Note: These sections will appear in the annual Code of Federal Regulations.

PART 931—FRESH BARTLETT PEARS GROWN IN OREGON AND WASHINGTON

1. The authority citation for 7 CFR part 931 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. A new subpart entitled "Subpart—Rules and Regulations" is added following § 931.71 to read as follows:

Subpart—Rules and Regulations

Definitions

Sec.
931.100 Terms.
931.101 Marketing agreement.
931.102 Order.

Communications

931.110 Communications.

Reports

931.120 Reports.

Definitions

§ 931.100 Terms.

Each term used in this subpart, unless otherwise defined, shall have the same meaning as when used in the marketing agreement and order.

§ 931.101 Marketing agreement.

Marketing agreement means Marketing Agreement No. 147, as amended, regulating the handling of Bartlett pears grown in Oregon and Washington.

§ 931.102 Order.

Order means Order No. 931, as amended (§§ 931.1 to 931.71), regulating the handling of Bartlett pears grown in Oregon and Washington.

Communications

§ 931.110 Communications.

Unless otherwise specifically prescribed in this subpart or in the marketing agreement and order, or unless otherwise required by the Committee, all reports, applications, submittals, requests, inspection certificates, and communications in connection with the marketing agreement or order shall be forwarded to:

Northwest Fresh Bartlett Pear Marketing Committee
813 SW Alder, suite 601
Portland, Oregon 97205–3182

Reports

§ 931.120 Reports.

(a) Each handler shall transmit to the Committee on the first and the fifteenth day of each calendar month during the shipping season the "Semi-Monthly Report on Destination of Shipments and Assessment Payments" containing the following information:

(1) The quantity of each variety of pears shipped by that handler during the preceding half month;

(2) The date of each shipment;

(3) The ultimate destination, by city and state, or city and country;

(4) The assessment payment due; and

(5) The name and address of such handler.

(b) Each handler shall transmit to the Committee each Friday during the shipping season the "Weekly Northwest Bartlett Packout Report" containing the following information for each variety:

(1) The projected total packout;

(2) The packout to date;

(3) The volume sold export (shipped/not shipped), sold domestic (shipped/not shipped) and shipped auction;

(4) The packout to date in controlled atmosphere (C.A.) storage and the volume in C.A. storage which is sold; and

(5) The name and address of such handler.

(c) Each handler shall furnish to the Committee, upon request, the "Pear Size and Grade Storage Report" containing the quantity of specific grades and sizes of pears in regular and C.A. storage by variety.

Dated: December 11, 1991.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rules.

SUMMARY: This tentative decision proposes a special III–A class and price for producer skim milk used to manufacture nonfat dry milk (NFDM) under the New England, Middle Atlantic and Pacific Northwest orders. The decision is based on industry proposals considered at a public hearing held July 30–August 1, 1991. Federal orders classify milk used to produce storable dairy products (hard cheese, butter, and NFDM) in Class III and price it at the Minnesota-Wisconsin (M–W) price. The Class III–A product price formula is provided because it will more adequately reflect the value of milk used to produce NFDM, than is reflected by the M–W price. The changes will facilitate the orderly disposition of the reserve milk supplies associated with these three markets.

The Secretary of Agriculture will determine whether producers favor issuance of the amendments on an interim basis.

DATES: Comments are due on or before January 21, 1992.

ADDRESSES: Comments (six copies) should be filed with the Hearing Clerk, room 1081, South Building, United States Department of Agriculture, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Clayton H. Plumb, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 720–6274.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of sections 556 and 557 of title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

The Regulatory Flexibility Act (5 U.S.C. 601–612), requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. The amendments will facilitate the orderly disposition of the market's reserve milk supplies.

Prior document in this proceeding:

Notice of Hearing: Issued July 16, 1991; published July 22, 1991 (56 FR 33395).

Notice is hereby given of the filing with the Hearing Clerk of this tentative decision with respect to proposed amendments to the tentative marketing agreements and the orders regulating the handling of milk in the New England and Certain Other marketing areas. This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the applicable rules of practice and procedure governing the formulating of marketing agreements and marketing orders (7 CFR part 900).

Interested parties may file written exceptions to this tentative decision with the Hearing Clerk, U.S. Department of Agriculture, Washington, DC 20250, by the 30th day after publication of this decision in the **Federal Register**. Six copies of the exceptions should be filed. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposed amendments and findings and conclusions set forth below are based on the record of a public hearing held at Alexandria, Virginia, on July 20–August 1, 1991, pursuant to a notice of hearing issued July 16, 1991 (56 FR 33395).

The material issues on the record of the hearing relate to:

1. Pricing producer milk used to manufacture butter and nonfat dry milk; and

2. The need for emergency action with respect to issue 1.

Findings and Conclusions

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. Pricing Producer Milk Used To Manufacture Butter and Nonfat Dry Milk

A special III–A class and price should be provided for producer skim milk that is used to manufacture nonfat dry milk (NFDM). Only the New England, Middle Atlantic and Pacific Northwest orders should be revised to incorporate this pricing change.

Twelve cooperative associations (Agri-Mark, Associated Milk Producers Inc. (AMPI), Atlantic Dairy Cooperative (ADC), Darigold Farms (Darigold), Dairymen's Creamery Association (DCA), Dairymen Inc. (DI), Independent Cooperative Milk Producers Association (ICMPA), Maryland and Virginia Milk Producers Association (Maryland-Virginia), Michigan Milk Producers Association (MMPA), Milk Marketing Inc., (MMI), United Dairymen of Arizona (UDA) and Wisconsin Dairies) proposed that 27 Federal milk orders be amended to provide a separate class and price for skim milk and butterfat that is used to produce butter and NFDM. Proponents requested that the amendments be provided on an emergency basis so they could be effective as soon as possible. They also proposed that the amendment be provided on a temporary basis and be subject to review at any hearing that might be held to consider revising the Minnesota-Wisconsin (M–W) price series.

Currently, with the exception of the Pacific Northwest order (Order 124), the orders involved in this proceeding classify milk used to produce storable dairy products (hard cheese, butter and NFDM) in Class III and price it at the M–W price. Order 124 provides a "snubber" product price which applies to milk in such uses wher the price

VOL 56 ISS 244 DEC 19 1991 UMI

established on the basis of such product price formula is lower than the M–W price.

In computing Class III milk prices under the New England, New York-New Jersey and Middle Atlantic orders (Orders 1, 2 and 4, respectively), seasonal adjustments are added to or subtracted from the M–W prices each month. The adjustments add to the M–W prices in the months of seasonally low milk production and high Class I demand and subtract from such prices when milk supplies are abundant and Class I needs are lower. Such plus and minus adjustments balance out annually.

Proponents offered a general statement regarding the proposal. In that statement a witness for the cooperatives contended that the M–W price, which is currently used under Federal orders to establish the value for producer milk that is used to manufacture butter and NFDM, does not properly reflect the value of the products made from such milk. In their opinion, the Class III–A product price formula they proposed, which would reflect monthly changes in market prices for butter and NFDM, would do a much better job than the M–W price in reflecting the marketplace value of milk so used.

At the hearing proponents clarified two aspects of the Class III–A proposal as it appeared in the hearing notice. First, they asked that the formula's NFDM price be the averaged price for Extra Grade NFDM for the Central States production area. They also deleted the fixed $1.22 make allowance figure for coverting 100 pounds of whole milk into butter and nonfat dry milk and proposed instead that the formula provide that the make allowance in effect under the dairy price support program when the Class III–A price is computed be used. They contended that this procedure would be more appropriate because the formula's make allowance would be automatically updated when the allowance is changed (up or down) in connection with the Secretary's duties under the support program.

As modified, the Class III–A price would be calculated by adding the amounts computed by multiplying the Chicago Mercantile Exchange Grade A butter by 4.2 and the Central States Extra Grade nonfat dry milk powder price by 8.2. From that sum the support programs' make allowance (currently $1.22) would be subtracted. The result would be the Class III–A price for producer milk used to produce butter and NFDM.

Proponents intended that the Class III–A price apply to all producer milk which is ultimately used to produce butter or NFDM. It would apply to producer milk that is separated into cream and skim milk if the cream is churned into butter and the skim milk is dried into power. Similarly, producer milk that is first condensed and ultimately dried would be classified as Class III–A milk and so priced under the cooperatives' proposal.

In support of this special class and price for milk used to make butter and NFDM, proponents argued that the M–W price, which is an average of competitive prices paid by Grade B manufacturing plants in Minnesota and Wisconsin, does not properly reflect the value of milk used to make butter and NFDM at all times. Proponents pointed out that the June 1991 M–W price was based on prices paid by 67 plants and most of those plants produced cheese. They noted that Minnesota cheese plants in 1990 accounted for 68 percent of all Grade B milk produced in the State, while such plants represented 88 percent of the manufacturing grade milk production in Wisconsin. Of the total amount of manufacturing grade milk purchased in the 2-state area during 1990, about 60 percent was bought from Wisconsin dairy farmers and 40 percent was purchased from Minnesota producers.

Conversely, proponents pointed out, less than 10 percent of the plants in the M–W survey are producing butter and NFDM. Such plants accounted for only 20 percent of the Minnesota Grade B milk and 1 percent of the Wisconsin manufacturing grade milk. Similarly, plants in Minnesota and Wisconsin produced only 9 percent of the nation's NFDM and 56 percent of the cheddar cheese.

Because of this, proponents argued that their product price formula should be used to establish the price under the orders for milk used to produce butter and NFDM. Based on the cooperatives' proposed formula, the value of milk used to produce butter and NFDM in June 1991 would have been 42 cents below the M–W price.

While butter and powder prices were fairly stable during most of 1991, cheese prices were increasing and driving up M–W prices. From March through August 1991, the M–W price increased $2.00 per hundredweight. These increases resulted primarily from higher market prices for cheese, which increased some 28 cents per pound during that same time period. A 28-cent increase in cheese prices represents a $2.80 per hundredweight increase in the price of milk. This meant that cheese prices could have supported further increases in the M–W price. The proponent cooperatives were especially concerned that the value of milk to produce butter/NFDM versus cheese would become even further misaligned in the future.

Generally, the national production of butter and NFDM has exceeded domestic consumption of these products, so the Federal government has accumulated substantial inventories of both products under the price support program. These government holdings of butter and NFDM, as well as the availability and price of California powder, effectively limit future price increases for these products, whereas no such limit exists for cheese prices.

Market prices for butter and NFDM tended to remain low relative to cheese prices through most of 1991. Butter was in a surplus situation and prices remained at or near the government support level. Prices for NFDM were held down by surplus powder production on the West Coast, where about 60 percent (37 percent in California alone) of the nation's powder is manufactured. Consequently, NFDM prices in the rest of the country increased by an amount equal to the cost of shipping powder from California, some 7 cents per pound or about 60 cents per hundredweight of milk equivalent.

In addition, the government was purchasing large quantities of butter, and as of July 12, 1991, had accumulated 565 million pounds of uncommitted butter inventories available for sale at not less than $1.06 per pound. On the other hand, the government was purchasing only small quantities of NFDM and no cheese. Uncommitted inventories of NFDM and cheese, as of July 19, 1991, totaled 285 and 33 million pounds, respectively. On May 14, 1991, the Government withdrew sales offerings for these two products.

In the event that the government offered to sell its stocks of cheese and NFDM back to the dairy industry it could have resulted in lower NFDM prices relative to cheese prices in view of the wide difference in commercial sales of these products. Total 1990 U.S. commercial disappearance of NFDM, for example, accounted for only 695 million pounds (79 percent) of the more than 877 million pounds produced. Conversely, commercial disappearance of American cheese represented 2.78 billion pounds (96 percent) of the more than 2.89 billion pounds of cheese manufactured. (Official notice is taken of Dairy Products Annual Summary for 1990.)

These marketing circumstances resulted in a substantial tilt between the M–W price (which was largely being

driven by cheese prices) and the value of milk used to produce butter and NFDM. In situations like this, cooperatives and other market suppliers attempt to channel their reserve milk supplies to the most remunerative outlets, which are cheese plants. In certain markets cooperatives have a very limited opportunity to do this either because the cheese plants are not favorably located or the nearby plants do not have sufficient capacity available. In these situations, the residual milk supplies normally end up at plants processing butter and NFDM, which are lower-valued in the marketplace relative to cheese. However, the handlers (primarily cooperatives) responsible for pooling the milk under the order must account to the pool at the cheese-driven M–W price. This reduces the manufacturing margins of butter/NFDM operators.

The manufacturing margins of butter/NFDM operators declined significantly during 1991. For January the margin was 87 cents per cwt. and in September it was minus 10 cents. Also, for the recent 12-month period of October 1990-September 1991, the processing margin averaged only 76 cents per cwt. All such margins are below the $1.22 make allowance that the government uses in connection with its price support activities. These data show that the financial situation for such operators worsened considerably during the year.

In certain markets, cooperatives limited to butter/NFDM manufacturing are marketing the major portion of the market's reserve milk supplies. When this happens, the members of these cooperatives, relative to other producers supplying the market, are actually being penalized because the returns from the manufactured dairy products at prevailing market prices are below the price level at which the association is accountable to the marketwide pool. In such cases, they are bearing an unfair share of the costs associated with disposing of the market's reserve milk supplies.

Comparisons of the net returns from milk used to make butter and powder or cheese with the M–W price indicate a much closer relationship between cheese values and the M–W price than between butter/NFDM values and the M–W price. For the 45-month period of January 1988-September 1991, the value of milk used to make cheese averaged 9 cents per hundredweight above the M–W price while the value of milk for butter/powder manufacturing averaged 31 cents per hundredweight below the M–W price. In 1988, cheese values averaged only 2 cents per hundredweight less than the M–W price whereas butter/powder milk was valued 19 cents lower. The value of milk for cheese was 18 cents above the M–W price in 1989 while butter and nonfat dry milk values were 38 cents higher. In 1990, cheese values averaged 9 cents per hundredweight above the M–W price while butter/powder values were 96 cents below that level. Similarly, for January through September 1991, the returns from cheese processing averaged 11 cents above the M–W price while the returns from milk used to produce butter/NFDM was 52 cents per hundredweight below the M–W price level. The numbers for the last two years clearly indicate why butter/powder processors are complaining.

While the returns established from product prices in the marketplace for milk used to make hard cheeses generally were higher than for milk used to produce butter and NFDM, this was not the case in each of the 45 months surveyed. For example, cheese milk reflected greater values in 27 of the 45 months and milk for butter/powder production reflected higher values in the other months. However, the annual averages mask the wide range of value differences reflected by the dairy product prices. For example, in November 1989 the value of milk for butter/powder production exceeded the value of milk for cheese processing by $1.63 per hundredweight. Just two months later in January 1990, the market prices for dairy products reflected a value of milk to make cheese that was $3.35 per hundredweight greater than the value of milk of butter/powder manufacturing.

With milk prices generally above supports during the 45-month period, there have been dramatic swings in the market prices for cheese and NFDM. Powder prices varied in each year of 1988–1991 by 20, 79, 47 and 9 cents per pound, respectively. On a fluid equivalent basis, such variations reflect annual value changes for milk used to make powder which represent $1.64, $6.48, $3.85 and $.74 per hundredweight, respectively. Also, cheese prices ranged form high to low in each such year by 21, 46, 40 and 28 cents per pound, respectively. Such veriations represent value changes during each year of $2.10, $4.60, $4.00 and $2.80 per hundredweight, respectively.

The foregoing analysis shows that cheese values generally were higher than butter/powder values. However, in some months the opposite was true. It is likely that similar fluctuations will occur in the future. The proponent cooperatives were primarily concerned with protecting their member dairy farmers in situations when they incurred losses because the proceeds from the sale of the butter and powder made from milk would not equal the amount they were charged under the order for such milk. Accordingly, they agreed to share with the market's other dairy farmers any gains associated with butter/NFDM processing operations when market values for such products exceed the Class III price in exchange for sharing their losses in any month when market values for butter and nonfat dry milk are below such price.

Powder prices increased about 20 cents per pound from September to October 1991. If the market prices for powder hold firm, increases of $1.64 per hundredweight for milk used to make butter/NFDM could be expected. If such prices advance further, it is possible that when the Class III–A price becomes effective, the price for skim milk used to make NFDM under the product price formula adopted herein could exceed the skim value of the M–W price.

The dramatic increase in powder prices during October was the result of the hot dry weather in California. Milk production dropped significantly and many dryers ceased operations because of insufficient milk supplies. Commercial buyers were having difficulty locating enough powder to cover their needs. This situation is expected to be temporary, with milk and powder production returning to normal when temperatures cool. (Official notice is taken of the weekly Market News reports issued from August 23, 1991, through November 29, 1991.)

The preceding discussion of market prices for the major Class III dairy products (butter, nonfat dry milk and cheese) shows that these prices do not always move together. The price changes do not always occur in the same month, in the same direction or with the same magnitude. It also shows that cheese prices are influenced primarily by strong demand for cheese and such changes are rapidly reflected in M–W prices because there are extensive cheese manufacturing operations in the 2-State area. However, market prices for NFDM are heavily influenced by marketing conditions in California, as proponents contended. Because of the limited amount of powder processing plants in the Midwest, changes in market prices for powder are not as quickly reflected in M–W pay prices.

It is evident from the foregoing that the market values for NFDM are not appropriately reflected by the M–W price at all times. In recognition of the

VOL

DE
19
1991
UMI

potential for such misalignment problems in the future, it is concluded that a separate class and a separate product price formula should be provided for producer skim milk which is processed into NFDM.

No such special pricing arrangement need be provided for cream which is separated from producer milk and used to manufacture butter. The issue of the appropriate value for butterfat was addressed at a national hearing held in 1990. Dairy industry representatives testified that handlers (cooperatives and pool plant operators) were incurring substantial losses in handling surplus cream. On the basis of that hearing record, the formula for computing butterfat differentials under Federal orders was revised to reflect the more realistic values of butterfat in the marketplace. The change resulted in placing more of the value of cream on the skim milk portion and less value on the butterfat contained in such cream.

The following comparative analyses show how the recent change in the formula to compute the butterfat differential has affected the order values of milk components and alleviated the financial problems facing handlers in disposing of surplus butterfat in cream. From July to August 1991, the M–W price increased 51 cents per hundredweight. Using the new formula to compute the butterfat differential, the butterfat differential went down 2 cents per pound even though the butter price was unchanged from July to August. The lower value for butterfat resulted in an increase of 58 cents per hundredweight in the skim value even though the market price for powder went down fractionally. Consequently, the order value for a 48,000-pound tanker of 40-percent cream actually decreased by $106 from July to August.

Comparatively, if we analyze the same scenario but use the prior formula to compute the butterfat differential (.115× the average wholesale selling price of Grade A 92-score butter at Chicago), an entirely different financial picture unfolds. For instance, since the butter price did not change from July to August, the butterfat differential would be the same in both months. Under the previous formula, the butterfat differential for July would have been 9 cents per pound higher than under the current formula and for August it would have been 11 cents higher. With the butterfat value virtually unchanged, most of the 51-cent increase in the M–W price from July to August would be reflected in the skim value even though the powder price decreased fractionally. If the prior formula were in effect, the order value for a 48,000-pound tanker of 40-percent cream would have increased by $225 from July to August.

The real significance of the monetary change is highlighted by comparing the order values of the 48,000-pound tanker of 40 percent cream in July and August 1991 using the new butterfat differential formula with such values using the prior formula. For instance, using the current butterfat differential, the load of cream would be valued $1,578 and $1,907 lower under the order in July and August, respectively, when compared with using the prior butterfat differential. Thus, the cream and butterfat pricing problems of handlers have been dealt with previously.

There is record evidence to reinforce this conclusion. The Darigold witness testified that the change in the butterfat differential, which became effective under Federal orders in December 1990, made the cooperative's butter operations profitable. An exhibit entered into the record shows that for January–May 1990 Darigold lost $2.3 million manufacturing butter, while in those same months of 1991 the cooperative made $2.2 million churning butter. The Darigold witness attributed the change in the cooperative's financial picture regarding its butter operations to the change in the butterfat differential and stated that he expects the favorable results to continue into the future.

The evidence on this record supports the adoption of a special class and price for skim milk used to manufacture NFDM. The special Class III–A pricing should apply, however, only in a market that meets these criteria: (1) A substantial amount of NFDM is produced; (2) there are no practical cheese outlets available for handlers to use in disposing of the market's reserve milk supplies; and (3) the lower returns from milk used to produce NFDM are not being shared equitably by all producers. For the reasons described later, it is concluded that only the New England, Middle Atlantic and Pacific Northwest markets meet these criteria.

The Class III–A skim value would be computed, by subtracting a processing allowance of 12.5 cents from the powder price and multiplying the result by 9. For Orders 1 and 4, the Extra Grade Powder Price for the Central States production area should be used. For Order 124, the Grade A powder price for the Western production area should be used. In August 1991, the skim value of Class III–A milk would have been $7.27 per hundredweight under Order 1 and $7.29 under Order 4. For Order 124, the skim value would have been $6.89 per hundredweight. This compares with a $7.89 skim value under orders that provided the M–W price as the Class III price and $7.63 under Order 124, which provided a lower butter/powder "snubber" price for Class III milk in that month.

In Orders 1 and 4, the skim values for Class III–A milk would have averaged about 19 cents per hundredweight less in 1990 and about 9 cents per hundredweight less for the first 10 months of 1991 under the new pricing formula adopted herein. For Order 124, the Class III–A skim value would have averaged about 35 cents per hundredweight less in 1990 and 18 cents per hundredweight less during January–October 1991.

The skim values for Class III–A milk under the product formulas provided for Orders 1, 4 and 124 would have averaged somewhat lower than such values for Class III milk in both 1990 and 1991. However, it is noteworthy that for Orders 1 and 4 the values would have been lower in 5 months and higher in 7 months of 1990 and lower in 4 months and higher in 8 months thus far in 1991. For Order 124, skim values under the new formula for NFDM would have been lower in 5 months and higher in 7 months of 1990 and lower in a 6 months and higher in 4 months so far in 1991.

The formula provides a factor of 9 because if 100 pounds of skim milk are dried they will yield 9 pounds of dried product. Such factor is reasonable and widely accepted by the dairy industry. The record indicates that it costs about 12.5 cents a pound to make skim milk powder. A 12.5-cent-per-pound drying cost is compatible with industry experience and also with the processing allowance formerly recognized under the support program in connection with drying whey. Such factor is now used in the computation of the Class II formula price under Federal orders.

The plant operating cost information in this record is not exhaustive. However, there is sufficient data to indicate that the $1.125 make allowance provided in the formula for drying a hundredweight of skim milk into powder is not so high that it would create an incentive for handlers to divert milk to drying plants rather than making the milk available to other plant operators processing dairy products demanded by consumers. On the other hand, it is not so low that such plants would be unable to continue functioning as outlets of last resort for distress milk which exceeds the needs of the market's handlers.

The record also indicates that the California Milk Stabilization Branch regularly collects data on operating costs for the purpose of establishing

make-allowance costs under the State's milk program. The latest survey covered plants that processed 98 percent of the nonfat dry milk processed in that area. The results of that survey indicate that for a wide range of plant volumes the weighted average per pound cost of producing NFDM was 12.87 cents. Using a yield factor of 9, a manufacturing cost of $1.16 per hundredweight of skim milk is reflected.

There was considerable opposition to the cooperatives' proposal. Many of the objections were of a general philosophical nature and opposed changes in all orders. Others specifically opposed the adoption of the proposal in a particular market or markets. Any opposing arguments raised by objectors in connection with a specific market where the new formula is provided will be addressed in the decision when marketing conditions are analyzed with respect to that order. In that regard, the marketing area situations will be reviewed in the same order in which they were presented at the hearing. The general opposing arguments will be dealt with at the end of the findings and conclusions involving the individual markets.

Orders 65 (Nebraska-Western Iowa), 68 (Upper Midwest), and 79 (Iowa) marketing areas. The hearing notice indicated that proposed amendments to the Nebraska-Western Iowa, Upper Midwest and Iowa orders would be considered at this hearing. However, shortly after the hearing opened a fax transmittal of a letter from AMPI, the proponent who requested the inclusion of the proposed changes for these three orders, was received as an exhibit into the record by the Administrative Law Judge. In that letter, AMPI withdrew its support for the Class III–A proposal as it pertains to these three orders. Since no other hearing participant supported the proposed changes for these markets, no further action is necessary.

Order 4 (Middle Atlantic) marketing area. Order 4 should be amended to provide the special Class II–A price. The ensuing findings and conclusions indicate that the criteria set forth previously to justify the need for such changes have been met in this market.

The Class III–A price formula was supported for Order 4 by the Pennmarva Dairymens Federation (which includes ADC, DI, Maryland-Virginia and Valley of Virginia cooperatives); Atlantic Processing Inc. (which includes Mount Joy, Cumberland Valley, ADC and Dairylea cooperatives); and Eastern Milk Producers Cooperative. These cooperatives supply more than 90 percent of the milk pooled under Order 4.

The Order 4 cooperatives embraced the general statement advanced on behalf of the 12 proponent cooperatives for 27 markets and testified specifically about marketing conditions in Order 4. In that regard, the proponents' witness testified that sufficient cheese capacity is not available to Order 4 handlers to dispose of all of the market's reserve milk supplies. He also contended that such handlers must rely on butter/NFDM outlets to efficiently and effectively clear the market of milk supplies which exceed the needs of processors.

He further argued that in performing this market-clearing function in many months cooperatives actually are subsidizing the market's other producers when there is an imbalance between the Class III price under the order for milk used to produce butter and NFDM and the returns the cooperatives receive from the sale of such products in the marketplace. This happens because the cooperative associations are obligated to the marketwide pool for the milk at the Class III price even though the dairy products manufactured from such milk are of lesser value. When this occurs, the market's uniform prices, which are shared by all producers, are artificially inflated by the amount by which the Class III price for the milk exceeds the market value of the products. Any such shortfalls are reflected in the form of lower reblended prices to the member producers of the processing cooperatives, the Order 4 proponents' insisted.

Since there are only two handlers processing NFDM in the Order 4 market, milk used to produce whole milk powder, which would not be a Class III–A products, is included with NFDM to establish a market total for dry milk powders. This results in three or more Order 4 handlers producing all types of dry milk powders, thus the data can be published.

Order 4 has been a 3-class market only since April 1, 1991. During the ensuring April-June quarter Order 4 handlers used 267 million pounds of milk to make all types of powder. This represented almost 17 percent of the milk receipts from producers during those three flush milk production months.

In that same April-June quarter, Order 4 handlers used more of their milk receipts to produce dry milk powers than they did to make hard cheeses. For 1990, 721 million pounds of milk were used to produce dry milk powders while only 633 million pounds of milk were used to make cheese.

There is considerable information in the record which indicates that a substantial amount of NFDM is produced by Order 4 handlers. The total production of NFDM in Order 4 is accounted for by two Pennmarva cooperatives, ADC and Maryland-Virginia. ADC operates a butter, powder and condensed milk processing plant located at Mt. Holly Springs, Pennsylvania. The Holly plant was built in 1977. Such plant has been relied upon to dispose of the market's reserve milk supplies since that time. An evaporator was added in 1984 to expand the plant's operating capacity.

In June 1991, the plant operated at 69 percent of capacity and processed 21.6 million pounds of skim milk into NFDM. This represented 45 percent of the total volume processed at the plant. Most of the plant's other milk receipts were used to produce condensed milk that was disposed of for Class II purposes. The Holly plant's operating cost in June was $1.51 per hundredweight.

In May 1991 the Holly plant operated at 89 percent of capacity and processed 34.8 million pounds of skim milk into NFDM (57 percent of the plant's total volume processed). The 61 million pounds of milk processed by the Holly plant of ADC represented 4.5 percent of the market's producer milk used for manufacturing purposes. The plant operating cost during May was $1.31 per hundredweight.

During the current ADC fiscal year (August 1, 1990 to June 30, 1991) the Holly plant processed 250 million pounds of raw milk into NFDM. The average plant operating cost for the year was $1.52 per hundredweight, utilizing 69 percent of the plant's capacity.

Maryland-Virginia operates the other butter/powder plant in Order 4. The plant is located at Laurel, Maryland. Although no operating cost information was provided for that facility, the witness for Order 4 proponents indicated that the processing operations at Laurel were comparable to those for the Holly plant of ADC. In that regard, he testified that the Laurel plant had similar operating capacity and processed a similar range of dairy products.

In view of the larger quantities of milk that are processed at butter/powder plants to clear the Order 4 market's excess supplies, it would not be feasible for the cooperatives handling such supplies to channel the milk to local cheese plants because there is not adequate cheese plant capacity available to accomplish this.

Actually, more cheese was processed by Order 4 handlers in 1962 than was so processed in 1990. (Official notice is taken of the Annual Summary of Federal

Milk Order Market Statistics for 1982.) Although 1990 cheese manufacturing by Order 4 handlers was up 10 percent from 1987, the increase was accomplished by utilizing existing capacities more fully because only one new cheese plant has been opened. That was a cream cheese facility with limited capacity which is located in Cumberland County, Pennsylvania.

Currently under Order 4 the negative impact resulting from any disparities between the regulated prices for Class III milk and the marketplace value of the butter and powder produced from such milk has fallen on the members of ADC and Maryland-Virginia because they are the only handlers involved in manufacturing these dairy products. The classification and pricing change adopted herein will better align the price and the value of milk used to produce NFDM. By pooling the value and sharing the proceeds uniformly among all of the market's producers, a more equitable solution will be provided.

As indicated, Order 4 provides seasonal adjustments, which vary from month to month, to Class III prices. These same adjustments should also apply to Class III–A prices.

Order 4 proponents asked that the uniform price for excess milk continue to be the Class III price. It seems reasonable to grant producers' wishes regarding the computation of the excess milk price.

There was only limited opposition to the proposal for Order 4. The National Farmers Organization (NFO), a national bargaining association of dairy farmers that has some milk pooled on this market, contended that the Order 4 cooperatives decided several years ago to invest their members' capital in butter/NFDM manufacturing and that they have been quite profitable as evidenced by the thirteenth checks they have paid to their members over the years. NFO argued that these proponent cooperatives should not ask other producers to take lower prices now because they made bad decisions in the past. The issue in this proceeding, however, is whether the regulated price for milk under the order reasonably reflects the value of the dairy products made from such milk.

One of the major objections raised by opponents was that this pricing change would lower pay prices to producers. Since all of the Order 4 producer milk that is used to make NFDM is processed at the plants of Pennmarva member cooperatives, most, if not all, of any reduction in Order 4 producer prices resulting from the pricing change adopted herein, will be returned to the member producers of ADC and Maryland-Virginia in the form of increased cooperative dividends or reduced processing losses which will result in higher reblended prices.

Order 1 (New England) marketing area. Order 1 should also be amended to provide the special Class III–A price. The following findings show that marketing conditions under the New England order indicate that the criteria defined previously as a basis for justifying adoption of the proposal have been met.

The cooperatives' Class III–A proposal was supported for Order 1 by four dairy farmer cooperatives supplying milk for the New England market. The Agri-Mark witness for Order 1 proponents spoke on behalf of Dairylea, Eastern and St. Albans in addition to Agri-Mark. These four cooperatives represent more than 60 percent of the producers supplying the New England market.

The Order 1 spokesman supported the general statement offered on behalf of the 12 proponent cooperatives which outlined the proposal and explained how the new class and price provisions were intended to work in the 27 orders where the changes were proposed. His testimony focused on why this change should be adopted for the New England market.

The Agri-Mark representative testified that his cooperative assumes the primary responsibility for disposing of the reserve milk supplies associated with Order 1. This is accomplished through the handler's butter/NFDM operation at West Springfield, Massachusetts, which can handle up to 60 million pounds of milk per month and has served as an outlet for the market's reserve milk supplies for more than twenty years. In 1984, the plant's operating capacity was expanded to its present level.

The witness presented information showing significant variations in the amount of milk received for processing at West Springfield. He contended that the plant's receipts of milk vary seasonally, as well as on weekends and holidays. These dramatic swings in milk receipts result in little or no butter/powder production in the late summer to as much as 40 million pounds per month or more in the winter and spring months.

Agri-Mark contended that the large fluctuations in receipts at West Springfield make it impractical for the cooperative to consider investing in a new cheese plant to supplement its cheesemaking capacity at Troy, Vermont. He testified that it would be too inefficient to build a cheese plant with sufficient capacity to handle the milk receipts at peak times while operating at low levels of capacity sometimes and having no milk to process at other times. Cheese plants in New England are unable to operate effectively with such fluctuations, the cooperative's spokesman claimed. They must rely on regular steady flows of milk to operate profitably. He testified that butter/powder plants are able to handle milk components (skim milk and butterfat) better than cheese plants because they are less affected by such variations.

The Agri-Mark witness also claimed that the large fluctuations in receipts at the West Springfield plant result in higher than normal operating costs and sizable losses for his association's members. For the July 1989–June 1990 fiscal year, Agri-Mark's manufacturing costs averaged $1.78 per hundredweight and for the July 1990–June 1991 fiscal year, they averaged $1.43 per hundredweight. Agri-Mark estimated that it will show a $4 million loss in the 1990–1991 fiscal year primarily because of its West Springfield operations.

Proponents' spokesman indicated that the cooperative does not intend to allow these losses to continue. Agri-Mark will do what it must to minimize future losses to its members. He indicated that the cooperative will not make its West Springfield plant available to manufacture the market's residual milk supplies if the order Class III price for milk exceeds the market value of the dairy products produced from such milk.

The Order 1 spokesman further contended that adoption of the proposal would not make the West Springfield operation profitable because Agri-Mark's manufacturing costs far exceed the current support program make allowance of $1.22 per hundredweight. It will, however, minimize the disparity between the order Class III price for milk used to produce butter and powder and the market value of such products.

Agri-Mark testified that disorderly marketing conditions already prevail in the New England market but are likely to deteriorate further if nothing is done. Early in 1991 Agri-Mark began paying 50 cents to $1.00 per hundredweight below the Class III price for milk it bought from outside sources for processing at West Springfield. If the milk handling losses persist, the cooperative intends more drastic action, which could involve downsizing the West Springfield operation somewhat or ultimately closing the plant entirely. If that happens, Agri-Mark testified that it would not take on new members and would aggressively seek new customers in the marketplace.

Record data indicate that 234 million pounds of milk were processed into butter and NFDM at the West Springfield facility in 1990. This represented 4.6 percent of the Order 1 producer receipts in that year and about 10.2 percent of the market's pooled milk used for manufacturing. Thus, it is obvious that the West Springfield butter/powder plant of Agri-Mark is performing a vital role in disposing of the reserve milk supplies associated with the New England market.

The record also shows that three Order 1 cooperative (Agri-Mark, Cabot and St. Albans) were making butter in 1990. Since there are at least three handlers involved in producing butter, the market's data for butter production are available. During 1990, Order 1 handlers used 43.6 million pounds of cream to produce butter. Of that total, 39.7 million pounds (or 91.3 percent) were used for butter manufacturing at Agri-Mark's West Springfield plant.

Since only Agri-Mark and St. Albans are involved in producing NFDM in the New England market, the data for nonfat dry milk are not published. However, since butter and powder production are closely related, it is not unreasonable to assume that the 194 million pounds of skim milk dried at Agri-Mark's West Springfield plant also would represent about 90 percent of the NFDM processed by Order 1 handlers. Based on that assumption, Order 1 handlers would have used about 215 million pounds of skim milk to make NFDM. Such a figure represents 4.2 percent of the Order 1 pooled receipts from dairy farmers during 1990 and 9.4 percent of the market's milk that was used for manufacturing.

Order 1 handlers used between 4 and 5 times as much milk to produce hard cheeses as they did to make butter and NFDM in 1990. Such handlers used 22 percent of their milk supplies to make cheese that year. It is evident that the market's suppliers deliver the milk to West Springfield only if the milk cannot be disposed of to plants making dairy products demanded by consumers.

Agri-Mark has a cheese plant at Troy, Vermont. Since September of 1990 the cooperative has operated the plant 7 days a week because returns from the sale of cheese were far more lucrative than from butter and powder. Agri-Mark testified that even if this proposal had been in effect last year the cooperative would have operated its Troy cheese plant 7 days a week in an attempt to move as much of its milk as possible into cheese.

While there is a significant amount of milk processed into cheese by Order 1 handlers, the more important factor is that there is really no additional cheese processing capacity available nearby to accommodate the milk supplies being manufactured at the butter/powder plants of Agri-Mark and St. Albans.

Furthermore, Kraft testified that due to its inventory position and consumer demand the handler has sold milk away from its cheese plants since April 1991. Kraft buys all the cheese manufactured at Agri-Mark's Troy plant. After the spring flush in 1991, Kraft asked Agri-Mark to cut its plant production schedule at Troy to 5 days a week even though the cooperative wanted to maintain the plant's 7-day work week. At the same time, Kraft reduced its cheese production by 25 percent at its Middlebury, Vermont, plant for the same reasons. This situation is expected to continue through this fall's shipping season. These actions are expected to further limit the amount of Order 1 milk that is processed into cheese. Most, if not all of the milk that is not accommodated at the Middlebury and Troy cheese plants will end up at West Springfield because there really is no other reasonable alternative outlet.

It is possible that the displaced Order 1 milk could be handled at New York cheese plants. However, such dispositions would involve several hundred miles of transportation costs at great expense to dairy farmers. In addition, those handlers will view the milk as distress milk and are likely to offer to buy such milk only at levels below the Class III price. In such cases, the cooperatives' net return may be better at the local butter/powder plants. Also, Kraft is a major cheese manufacturer in New York and it is possible that neither Kraft nor other cheesemakers would be willing and/or able to accommodate additional milk supplies.

The adverse impact resulting from the current disparity between the prices that handlers must account to the pool for the milk used to produce butter and nonfat dry milk and the value of the products made from such milk now falls on the producer members of Agri-Mark and St. Albans because these cooperatives are the only Order 1 handlers making such products in the New England market. Although the change adopted in this decision could lower the blend price slightly to all producers, it is not likely to alter the total money received by Order 1 dairy farmers because the cooperatives' reblended prices would be higher since their processing losses on milk used to produce NFDM would be reduced.

Order 1 provides seasonal adjustments to Class III prices. As proponents requested, the same plus minus adjustments which vary from month to month, will apply to Class III–A prices.

NFO, a bargaining association which does not operate manufacturing plants and markets some milk under Order 1, opposed adoption of the proposal for Order 1. They claimed that Agri-Mark made a bad decision in 1984 when it expanded its West Springfield plant and should not expect the market's other producers to accept lower prices now to cover its butter/powder losses. Actually, in the past the income of cooperatives producing butter and powder have been reduced any time that the Order's Class III price exceeded the market value of the dairy products in the class. In such cases, income is transferred from cooperatives manufacturing butter/NFDM from the market's reserve milk supplies to those not involved with manufacturing such dairy products. Pooling the lower or higher value of milk used to make NFDM and sharing that value among all of the market's dairy farmers will provide a more equitable solution to this problem.

Order 2 (New York-New Jersey) marketing area. The special Class III–A price should not be provided for the New York-New Jersey market. The following findings and conclusions indicate why it is not necessary to revise the classification and pricing provisions of Order 2 for producer skim milk that is used to make NFDM to preserve orderly milk marketing under that order.

The cooperatives' Class III–A proposal was supported for Order 2 by five cooperatives (Agri-Mark, ADC, Dairylea, Eastern and Upstate). These producer groups represent only about one-third of the Order 2 pool milk.

The Eastern spokesman for Order 2 proponents supported the general statement introduced on behalf of the 12 proponent cooperatives and proceeded to show why the special Class III–A price should be provided for Order 2. He testified that even though butter/NFDM manufacturing represents a minor outlet for Order 2 milk and thus would impact producer prices only incidentally, such plants serve as an important last resort outlet for the market's reserve milk supplies.

In 1990, about 6.6 billion pounds of milk received from producers was used for manufacturing purposes. Of this total, Order 2 handlers used only 129 million pounds (1.9 percent) of skim milk to manufacture NFDM. Measured in terms of the total milk pooled, NFDM processing by Order 2 handlers represented only 1.1 percent. Also, Order 2 handlers used 31 percent less

VOL

1991
UMI

milk to produce NFDM in 1990 than they did in 1987.

As Order 2 proponents testified, the market's reserve milk supplies primarily are used to produce hard cheeses. During 1990, Order 2 handlers used 3.6 billion pounds of milk to produce cheese. This represents 55 percent of the pool receipts used for manufacturing and 32 percent of the total pool milk. In addition, Order 2 handlers used 3.4 percent more milk to make cheese in 1990 than they did in 1987.

The record also indicates that because of concern about the availability of future Northeast milk supplies, two New York cheese plants recently closed. A plant at Skaneateles Junction was closed last year. Also, about two years ago Leprino Foods Company, a major cheesemaker in Order 2, closed one of its plants and expanded the capacity at its two other plants. It is unclear from the record whether these plants are currently operational. However, it appears that the limiting factor on cheese production in the New York market at the present time is the availability of milk for processing rather than the capacity at cheese plants.

In support of the proposal for Order 2, the Eastern representative contended that if the special pricing formula is adopted for Orders 1 and 4 it will be necessary to adopt the change in the New York-New Jersey market to maintain price alignment among the Federal orders in the Northeast region. It is not anticipated that the price changes resulting from the adoption of this special class and price for milk used to manufacture NFDM under Orders 1 and 4 will be of such magnitude or duration that they will interfere unduly with the price alignment situation of competing handlers in the Northeast.

It is evident from the foregoing that NFDM production is not a significant use of milk under Order 2. While it may provide an outlet of last resort for certain handlers, it is not imperative that the proposal be adopted for this market to preserve orderly marketing, and no order changes are warranted.

Order 124 (Pacific Northwest) marketing area. The special Class III–A price should be provided for the Pacific Northwest market. The ensuing findings indicate why it is necessary to revise the Order 124 classification and pricing provisions to preserve orderly milk marketing under such order. The criteria established previously as a basis for justifying this pricing change have been met in this market.

As indicated, Order 124 provides that the price for Class III milk shall be the M–W price for the month unless the butter/powder "snubber" price results in a lower price. The "snubber" price formula, which provides only a 48–cent make allowance, was the effective price for Class III milk under the Pacific Northwest order for August and September 1991. Also, it was the Class III price for 6 months in 1990.

The Class III–A price formula was supported for Order 124 by Darigold and Farmers Cooperative Creamery (FCC). These two producer groups represent about 77 percent of the milk pooled under the Pacific Northwest order. The Darigold spokesman for Order 124 proponents endorsed the general statement entered into the record on behalf of the 12 proponent cooperatives. He then testified about why this pricing change should be provided under the Pacific Northwest order.

He claimed that the current Federal order system establishes prices for milk used to produce butter and powder that have no relationship to the value of such finished products in the marketplace. Class III prices for milk are higher in some months and lower in others than the value of the butter and powder made from the milk. The witness indicated that in a market that produces as much butter and powder as is the case in Order 124, it would be more appropriate that all producers receive prices which reflect actual milk product values both when they are higher and when they are lower than the present order's Class III prices.

The witness also testified that the nation's powder markets are influenced heavily by California processors who are able to set low market prices because the California State milk order has consistently provided lower Class 4a prices for butter and NFDM, which are based on commodity market values rather than the Federal order Class III prices, which essentially are based on M–W prices.

The ability and willingness of California processors to set low powder market prices is a concern to powder processors who buy milk priced under Federal orders. Order 124 proponents testified that they are caught in the middle between the traditional Federal order concepts and the California State program. He testified that Darigold and FCC have no alternatives for processing their members' milk, so they are forced to suffer losses.

The Darigold witness testified that powder is truly a residual dairy product in that the milk must be processed whether it is or is not profitable to do so. He further contended that in some markets handlers may have the option of redirecting milk from butter-powder plants into cheese plants when the market prices tilt against powder, but in Order 124 there is very little opportunity to do this.

Order 124 proponents insisted that considering the supply and demand conditions in the West the Federal order prices for milk used to produce butter and powder have not been realistic. In their opinion, the Class III–A price formula would correct the situation where Order 124 handlers processing butter and NFDM are forced to "buy high and sell low" in many months.

Darigold's witness testified that the principal reasons for the adoption of this proposal are economic. He indicated that Darigold lost a lot of money on its butter/powder operations over the past few years. During the recent 12-month period of October 1989 through September 1990, the association lost nearly $17 million. He stated that prices for milk used to make butter and powder would have averaged 32 cents lower under proponents' formula during the last three and a half years. This would have lowered the market's blend prices about 12.8 cents per hundredweight. However, in 9 of the 42 months, the market's blend prices would have been higher.

Market data show that 57 percent of the market's 5.7 billion pounds of producer milk in 1990 was priced as Class III milk. About 30 percent of the market's Class III milk was processed into cheese (about 17 percent of all milk pooled). The remaining 70 percent of the Class III milk (40 percent of the pool's receipts) was processed into butter and powder. They also show that Order 124 handlers used 1.9 billion pounds of milk to make NFDM.

There are three milk drying plants currently operating in Order 124. Darigold operates drying plants at Chehalis and Lynden, Washington. FCC operates a powder plant at McMinnville, Oregon. During 1990, 1.745 billion pounds of milk were processed into powder at Darigold's plants at Chehalis and Lynden.

Only about 35 percent of the market's milk supply is needed by fluid operators. The remainder is disposed of by manufacturing processors. There is limited opportunity to process these large amounts of excess milk at other than the powder plants of Darigold and FCC.

Because of the large quantities of milk that are processed into NFDM by Order 124 handlers, it would not be possible for such processors to redirect this milk to cheese plants. If cheese plant capacity had been available over the last three and a half years, the Order 124 cooperatives who lost sizable amounts of money processing powder would

have taken advantage of these facilities because the order pricing was tilted in favor of cheese and against butter/powder manufacturing.

The Darigold witness testified that his cooperative has decided to build a new powder plant at Sunnyside, Washington. He indicated that this may be the first step in possibly a two-stage program which eventually could involve building a new cheese plant. The drying capability must come first because a handler must be able to dry the whey resulting from cheese processing.

In addition, the cooperative handles about 6 million pounds of milk per day at its drying plants. Only about one-third of that total could be accommodated at the new cheese plant. This would still leave Darigold with a sizable amount of milk moving to powder.

The cooperative also indicated that the cheese market in the Western region is very limited for Order 124 handlers. Because of the pricing situation under the California State order, any cheese processed by Darigold would most likely end up being sold to the government under the price support program.

Since only Darigold and FCC are producing butter and NFDM in Order 124, any adverse impact resulting from the differences between the order pricing of milk used to produce such products and the market value falls on the dairy farmer members of these two organizations. Adoption of the Class III–A formula will provide more equitable pricing under the order. It will eliminate the subsidization which takes place now in the months when Darigold and FCC are accounting to the Order 124 pool for the milk at Class III prices which are higher than they receive when the butter and NFDM are sold in the marketplace. In such cases, the money from producers who do not share in the losses associated with NFDM processing will be redistributed to the dairy farmer members whose cooperatives are involved in manufacturing powder.

Similarly, any gains that cooperatives make from processing powder in months when the market value of such product exceeds the Class III price which have not been shared in the past would now be pooled and shared with the market's other dairy farmers. Such a policy is consistent with the concept of marketwide pooling and should contribute to orderly marketing under Order 124 by facilitating the disposition of the market's reserve milk supplies.

The Order 124 proponents suggested that the Class III–A formula proposed by the 12 cooperatives be modified in two respects. First, they asked that "the price per pound of Grade A nonfat dry milk for the Western States production area" as published in Dairy Market News be used instead of "the simple average of the prices per pound of nonfat dry milk for the Central States production area". They also proposed that the order provide that the Class III–A price not exceed the Class I price in any month.

The Western area price for Grade A NFDM should be used to compute the price for the Class III–A milk under the Pacific Northwest order. In view of the extensive powder production in the West and the low price for milk used to make NFDM under the California State program, Order 124 handlers should get the benefit of the somewhat lower powder prices enjoyed by their primary competitors.

The modification proposed whereby the Class III–A price could not exceed the Class I price should not be adopted. No such limit should apply. Proponents indicated their willingness to share any gains from powder processing with other producers thus all such higher values for NFDM should be reflected in producer pay prices.

A proposal was made at the hearing to keep the butter/powder "snubber" price for the remaining Class III uses, because of competition from California's lower prices under State regulation. The remaining Class III uses are essentially butter and cheese. As indicated previously no change is warranted in the pricing of cream used to make butter, since the 1990 amendment to the butterfat differential formula appropriately aligned cream values with the market price of butter. Also, as indicated previously in this decision, the M–W basic formula price tends to reflect the value of milk used to make cheese. Accordingly, the Class III price should be the basic formula price.

Adoption of this pricing change in Order 124 was opposed by three cooperatives representing 280 dairy farmers supplying the market and by three pool distributing plants and two nonpool cheese plants. The primary concern of the opponents was that adoption of this change would lower producer pay prices at a time when dairy farmers are already low.

As indicated in earlier findings, powder market prices have strengthened lately. If that situation continues, it is possible that adoption of this Class III–A pricing change for NFDM could actually add money to the pool. On the other point made by objectors, the M–W price has advanced more than $2.00 per hundredweight since spring and further increases are expected as the dairy product prices continue to advance. These increases have boosted the income of dairy farmers considerably since the hearing.

Opponents also argued that adoption of the proposal would give butter/powder manufacturers a competitive advantage over cheesemakers in procuring milk supplies in this market because the cost for milk at butter powder plants will be reduced while the market prices they received for the products are unchanged. This change is intended to eliminate any disadvantages experienced by handlers processing NFDM by equating the market price for powder and the regulated price of the milk used to make the powder. The Order 124 prices for Class III–A milk would increase when market prices for powder advance and the total value of milk in the pool would go up. Conversely, when powder prices decrease, Class III–A prices would go down and the pool value would go down also. All such overages and shortfalls resulting from powder production would be pooled and shared by all the market's diary farmers. This procedure would eliminate any gains or losses by individual handlers producing NFDM.

Opponents also claimed that adoption of the Class III–A price will provide a guaranteed return for powder operators because with current technology powder can be made for less than $1.22 per hundredweight. All data in this record indicate operating costs in excess of this make allowance at the powder plants involved in this proceeding. It is noted that the California State order periodically computes a make allowance based on processing plant audits, which justified a recent butter/powder allowance of $1.7854 per hundredweight. Hence, the $1.125 make allowance provided herein to dry one hundred pounds of skim milk should not provide a windfall to NFDM manufacturers.

Order 135 (Southwestern Idaho-Eastern Oregon) marketing area. The special Class III–A price need not be provided for Order 135. Orderly marketing can be preserved in this area without the special class and price for producer skim milk used to make NFDM. The following findings and conclusions indicate why no action should be taken.

The Class III–A formula was supported for Order 135 by DCA, Idaho's largest dairy cooperative, which marketed 73 percent of the market's producer milk in June 1991. DCA supported the overall position of the 12 proponent cooperatives and the modification advanced by the Western cooperatives by asking that the Western region powder price be used to establish the value of milk in the product price

VOL 56 ISS 244 DE 19 1991 UMI

formula. The witness testified that the M–W price, which is the Order 135 Class III price, does not accurately reflect the value of milk used to make butter and NFDM at all times.

In support of the proposal for Order 135, DCA's spokesman cited the Order 135 marketing conditions which he believed would justify the adoption of the product price formula for such market. He testified that DCA has made a concerted effort to increase cheese production during the past five years. These shifts were made in anticipation of cheese providing a stronger and more stable market in terms of value both in light of support prices and commercial demand. Regardless of the Association's best efforts, a significant portion of the market's Class III producer milk was still processed into butter and powder during the first six months of 1991. DCA contends that butter/powder production will continue to play a significant role in disposing of the market's excess Grade A milk supplies.

The witness indicated that the proposed formula will more closely relate the order prices to the values realized from the marketplace when processors sell butter and NFDM than does the prevailing order pricing for such products. DCA's witness testified that the cooperative experienced a $4.7 million operating loss in 1990 as a direct result of low powder prices, which had to be passed on to its members in the form of lower reblended prices which were well below the order's blend prices. He also testified that DCA operates in a market with low Class I use and thus has little opportunity to gain additional revenue from other operations to cover such losses.

Darigold and FCC supported the changes proposed by DCA for Order 135. They took the position that there is a strong marketing relationship between Orders 124 and 135 and that in the future it is possible that the two markets may be merged. Because of the similarities in economic conditions and marketing problems associated with butter and NFDM, the Northwest cooperatives asked that the same price apply under both orders for milk used to make such products.

Market data for Order 135 show that milk used to produce cheese has increased substantially while considerably less milk is used in butter/power manufacturing. During the first six months of 1991, the volume of milk processed into NFDM at DCA's multi-use plant at Caldwell, Idaho, decreased about 52 percent, to about 14 million pounds per month from January–June 1990. DCA's Caldwell plant is the only Idaho plant processing NFDM.

On the other hand, Order 135 handlers processed 62 percent more cheese in 1990 than they did in 1988. This represents a big shift to cheese processing of Order 135 reserve milk supplies, which was most likely aided by the pricing tilt in favor of cheese relative to butter/powder processing during such time.

In addition to DCA's cheese plant at Caldwell there are several other cheese plants in Idaho. The cheese plants at Twin Falls, Gooding and Nampa are regularly used to dispose of the market's reserve milk supplies. The record shows that Kraft operates cheese plants at Blackfoot and Rupert. It also identifies cheese plants at Rexburg, Carey, Richfield and Idaho Falls.

The record shows that DCA receives and processes milk from 132 Grade B producers (about 7 million pounds per month) at its Caldwell cheese plant. Also, the cooperative processes about 200,000 pounds per month of Order 124 milk for Darigold. If other processing arrangements could be made for this milk, which is not pooled under Order 135, additional processing capacity would be available to accommodate reserve milk supplies associated with this market.

Furthermore, only about 15 percent of the market's milk is used for fluid purposes. In the first six months of 1991, the market's uniform prices averaged only 30 cents above the Class III price level in such months. Hence, when a wide disparity between the M–W price and the market value of butter and NFDM develops, the cooperative could elect not to pool the milk. By so doing, DCA would not be required to account to the pool for such milk at the high M–W price. The nonpool milk could be sold to one of the many cheese plants identified earlier. If market demand for cheese is driving up the M–W price, as proponents contend, cheese plants should be actually procuring milk supplies in such months and willing to pay at least the M–W price for it.

The record indicates that the Associations' fluid milk plants get first call on DCA's milk, while the remainder goes to the cheese plant. If not all of the excess milk can be handled at the cheese plant on a given day, then the rest goes to the butter/powder operation. Because the cheese plant and the butter/powder plant are located at the same site, DCA has the processing flexibility within capacity limitations to move milk from butter/powder to cheese when it is economically advantageous to do so and vice versa.

It is evident that DCA has several options to lessen any adverse financial impacts resulting from a misalignment between Class III prices and the market value of butter and nonfat dry milk. Hence, no action should be taken with respect to the Southwestern Idaho-Eastern Oregon market.

DCA asked that the same Class III pricing provisions apply under Order 135 as apply under the Pacific Northwest order. Specially, the cooperative asked that if the "snubber" provisions are retained as a Class III pricing alternative under the Pacific Northwest order, the "snubber" formula should be incorporated under Order 135. Since the "snubber" alternative is eliminated for pricing Class III milk under Order 124, the basic formula price would be the Class III price under both orders.

Order 131 (Central Arizona) marketing area. The Class III–A price should not be provided for the Central Arizona market. Orderly marketing conditions will continue to prevail under this order without providing special pricing for producer skim milk which is used to manufacture NFDM. The ensuing findings and conclusions indicate why no action should be taken with respect to this market.

The Class III–A proposal was supported for Order 131 by a witness from UDA. The proponent cooperative represents about 88 percent of the milk marketed by dairy farmers under the order.

The UDA witness advanced essentially the same arguments made by the other proponents and testified that the M–W price, which is used to price milk used to produce butter and NFDM under Order 131, should be replaced with the proposed product price formula. He claimed that market returns from the sale of these dairy products are not closely related to the M–W price level, which is heavily influenced by cheese values. The market prices for such products do not always move up or down at the same time, in the same direction, or with the same magnitude as the price changes reflected by the M–W price or the cheese market.

The UDA witness testified that the copperative sells its butter and powder at the market prices prevailing in the Western region. Such prices are heavily influenced by the prices established for milk used to produce such products under the California State program, which averaged $1.72 per hundredweight lower than the M–W prices in 1990. Because of this, UDA supported the modification proposed by the Western cooperatives whereby the powder price for the Western area would be used in the formula rather than the price for the Central States production area.

He contended that the order's current pricing situation is extremely costly to the dairy farmer members of UDA. He further claimed that when the cooperative accounts for its milk at the artificially high Class III price, it ends up subsidizing through the pool the nonmembers who represent 12 percent of this market. Such pricing, in effect, penalizes UDA members who have assumed the responsibility for disposing of the market's reserve milk supplies, the cooperative's spokesman claimed.

UDA supplies much of its milk to fluid milk plants regulated under Order 131. The cooperative maintains a processing facility for converting the market's reserve milk supplies into butter and NFDM to assure a market for all of the market's producer milk when production exceeds the needs of customers. The handler's butter/powder plant is located at Tempe, Arizona.

The UDA spokesman testified that with the exception of a cheese plant which is also located at Tempe, there are no viable alternative outlets for the market's reserve milk supplies. The nearest manufacturing plants are located in California and these plants are normally operating at capacity at the same time Order 131 handlers have excess milk.

The record shows that UDA used about 130 million pounds of milk to process NFDM at its Tempe plant during 1990. This represented about 8 percent of the market's total producer milk that year. While this was a significant portion of the market's milk in 1990, there are other factors which must be considered in determining whether special pricing of skim milk used to make NFDM is essential for this market.

First, the record indicates that Schreiber Foods, Inc., operates the only cheese plant in Arizona at Tempe. UDA negotiated a ten-year contract with such cheese plant operator about 4 or 5 years ago. The terms of the contract allow UDA to ship a fixed monthly amount of milk to the cheese plant over the length of the contract. The amount of milk the cooperative could ship to the cheese plant could be increased only if Schreiber decided to increase the plant's capacity.

The Tempe cheese plant capacity was to be increased in September 1991. The UDA spokesman could not provide specific information about the extent of the expansion at the time of the hearing. However, the expansion will give UDA additional flexibility in disposing of their reserve milk supplies in the future by providing an opportunity for the cooperative to get more of its milk into cheese when cheese processing is favorable relative to butter/NFDM manufacturing and vice-versa.

Market information shows that UDA processed only 20 percent of the powder it made during 1990 in the last half of that year. During this time of year, the market's Class I demand generally is up and milk production is seasonally lower. Also, these months are normally when the disparities are greatest between M–W prices, which are driven up by prices for cheese, and the values of milk used to make butter and NFDM. In view of the fact that in the months when such disparities are most severe, UDA's powder operations are rather limited, the resulting impact on the cooperative will be minimized.

Since nearly all of the market's producers belong to UDA and UDA operates the only NFDM plant in the market, any change to Class III–A pricing in this market would have virtually no impact on the net returns to the cooperative. Thus, there is no significant basis for adopting the amendment in this market.

Orders 5 (Carolina), 7 (Georgia), 11 (Tennessee Valley), 46 (Louisville-Lexington-Evansville), 93 (Alabama-West Florida), 94 (New Orleans-Mississippi), 96 (Greater Louisiana), 98 (Nashville), and 99 (Paducah) marketing areas. The nine Southeast orders should not be amended to incorporate the special class price for producer skim milk used to make NFDM. It is not essential to provide this pricing change for these orders to maintain orderly marketing in the region. The ensuing findings identify the reasons to support such conclusion.

DI supported the adoption of the Class III–A proposal for the Southeast orders. The DI witness endorsed the overall reasoning advanced on behalf of the 12 proponent cooperatives concerning the difference between the M–W price, which is the Class III price for milk in these markets, and the marketplace value of butter and NFDM made from such milk. He confined his testimony and evidence in support of the proposal essentially to the marketing conditions prevailing in the nine Southeast markets where his cooperative has member milk pooled.

The DI witness contended that the adoption of the Class III–A price proposed will promote orderly marketing throughout the Southeast by facilitating the disposition of the markets' reserve milk supplies. By providing for uniform returns to producers from the sales of both the high-valued Class I milk as well as the lower-valued dairy products manufactured from milk supplies that are not needed for fluid purposes, the amended orders will carry out the intent of the enabling legislation, in the cooperative's opinion.

The market data covering the production of NFDM for these markets are very limited because there are so few handlers processing this product under the Southeast orders. The information does show, however, that no NFDM was produced during 1990 by handlers regulated under the following five Southeast orders: Carolina, Tennessee Valley, Louisiana-Lexington-Evansville, Greater Louisiana and Nashville. Thus, there is no reason to provide the Class III–A price in these markets.

In each of the other four Southeast markets (Georgia, Alabama-West Florida, New Orleans-Mississippi and Paducah) involved in this proceeding and for the three Florida markets, the data are restricted because fewer than three handlers are involved in processing NFDM. Although the record identifies five plants processing nonfat dry milk in the Southeast, the primary outlets to dispose of the reserve milk supplies in this region are the DI plants at Franklinton, Louisiana; Lewisburg, Tennessee; and Louisville, Kentucky.

The receipts of milk at such plants vary widely. For instance, during the months of July-October 1990, no milk was received at any of the three DI plants. For the most part, these plants are used regularly to clear the markets' reserve milk supplies during the months of March-June when milk supplies tend to be more plentiful relative to the Class I demand.

At its three manufacturing plants, DI receives milk from a wide geographic area, including Florida. Most of the milk is regulated under the Southeast orders. Milk of four other cooperatives (Associated Dairy Farmers, Tampa Independent Dairy Farmers, Southern Milk Sales, and Gulf Coast Dairymen) is regularly processed at such plants. Occasionally, regulated milk from nonmember producers and dairy farmers located in other regions is also processed in addition to some milk that is not regulated.

Marketing conditions in the Southeast differ considerably from other regions of the country. For instance, in the South Atlantic and East South Central regions, which cover the Southeast markets, the 1990 Class I use averaged 85 and 80 percent, respectively. In the other regions of the country, Class I utilizations were as follows: North Atlantic, 47 percent; East North Central, 34 percent; West North Central, 25 percent; West South Central, 54 percent;

1991
UMI

Mountain, 44 percent; and Pacific, 36 percent.

The Southeast region is a deficit milk production area. Milk must be imported regularly from the Midwest to supply the needs of Southeast fluid milk plants in the months of July-October when milk production is seasonally lower and Class I demand is higher. Typically, these are the months when the disparities between the M–W prices and the butter/powder market values are most severe. Normally, no NFDM is processed in this region during these months.

DI used 243 million pounds of skim milk to make NFDM in the months of June 1990–May 1991. This represents less than 2 percent of the deliveries by producers under the Southeast orders during that 12-month period. Furthermore, two-thirds of the skim milk used to produce NFDM at DI's plants was accounted for during the months of February–May when the disparities between Class III prices and marketplace values for butter and powder normally are not as significant.

Handlers regulated under the Southeast orders used 306 million pounds of milk to make cheese in 1990. This represented about 2.5 percent of the deliveries by producers in such markets. However, it reflected a 52 percent increase from 1987 in cheese manufacturing by such handlers.

When DI has milk which exceeds the needs of Southeast fluid milk plants, the cooperative channels such milk to its cheese plant at Glasgow, Kentucky. Although there are numerous other cheese facilities located throughout the region, the cooperative tends to rely on its own plant to the extent possible because the other processors only pay about 8½ times the barrel cheese price, which is below the M–W price for the milk. Because most of the milk in this region is used for fluid purposes, the limiting factor on cheese production may be the availability of milk rather than the capacity available at existing plants. Hence, if a severe misalignment existed, DI possibly could limit its losses by marketing excess milk to cheese plants operated by others. Certainly, in months when demand for cheese in the Midwest is driving up the M–W price it would seem that cheese processors in the Southeast would also be willing to pay higher prices to attract milk supplies.

Also, some of the NFDM manufactured by DI is reused in higher-valued products in connection with the cooperative's other processing operations. For instance, some of the powder it makes is used to fortify the cooperative's finished products and some is used to reconstitute Class I and Class II products. The cooperative also uses NFDM to make ice cream and cottage cheese. Although the record is not specific about how much of DI's powder is reprocessed or converted into other milk products, certainly some of it is so used.

In view of marketing conditions in the Southeast, DI should be able to avoid most if not all of the adverse impacts resulting from the differences between regulated prices for milk used to make butter and powder and the returns from the sales of such products in the marketplace.

Orders 40 (Southern Michigan) and 44 (Michigan Upper Peninsula) marketing areas. The Special Class III–A price should not be provided in the two Michigan markets. Orderly marketing can be preserved in these markets without providing the special class and price for producer skim milk used to make NFDM.

The proposed changes for the Southern Michigan market were supported by a witness representing the two Michigan proponent cooperatives (MMPA and ICMPA). These cooperatives account for about 80 percent of the milk pooled under Order 40.

The MMPA spokesman endorsed the position of the 12 proponent cooperatives concerning the M–W price, which is the price for Class III milk under Order 40. In that regard, he contended that the M–W price does not always properly reflect the value of milk used to manufacture butter and NFDM. He testified specifically about why, in his opinion, this pricing change should be provided in the Southern Michigan market and cited the marketing conditions which he believed would justify the adoption of the Class III–A price formula in Order 40.

The Order 40 proponent cooperatives operate four butter/powder plants located in Michigan. These are the only butter/powder operations in the State. Three of the plants located at Adrian, Constantine and Ovid, are operated by MMPA while the ICMPA butter/powder facility is located at Kalamazoo. These plants function on a standby basis to dispose of any reserve milk supplies associated with the Southern Michigan market.

Proponents' witness stated that there has been a considerable reduction in the volume of producer milk accounted for in butter and NFDM in this market because a new cheese plant has opened in that area. However, there are still occasions when not all of the cooperatives' milk can be directed to cheese plants and these residual supplies end up at the butter/powder plants of MMPA and ICMPA.

Market data for Order 40 show that milk used by such handlers to produce cheese in 1982 represented 12 percent of the market's producer milk and in 1990 such processing accounted for 31 percent of the pooled deliveries by dairy farmers. Conversely, milk used to make NFDM by such handlers represented 23 percent of producer milk in 1982 compared with less than 4 percent in 1990. This indicates a dramatic shift to cheese processing and away from NFDM production by Order 40 handlers.

The record indicates that 107 million pounds of cream was used to produce butter and 184 million pounds of skim milk was used to make NFDM. Such data do not reflect true butter/powder operations where such products are being made from producer milk because, if that were the case, the ratio of the pounds of skim milk used to produce NFDM would be about 10 times greater than the pounds of cream used to produce butter. This compares with less than a 2 to 1 ratio for the Order 40 market in 1990.

This seems to indicate that a large portion of the butter processed by Order 40 handlers most likely was represented by cream transfers from fluid plants supplied by the cooperatives. It likely is explained by the difference between the average butterfat test of producer milk and the distributing plant handlers' Class I finished products. As indicated, the cream and butterfat problems of handlers were corrected when the uniform butterfat differential was adopted for Federal orders on the basis of a national hearing in 1990.

There are three substantial cheese operations in Michigan. Kraft operates a plant at Pinconning and Leprino operates plants at Allendale and Remus. MMPA has negotiated annual contracts with these two large national cheese companies. Under the terms of the contracts, MMPA furnishes minimum volumes of milk, which vary from month to month, to the cheese plants. In setting these minimum supply requirements, the cooperative attempts to recognize its seasonal milk production patterns and Class I demands. If on a given day, MMPA has extra milk, which is above the agreed-upon minimums, it may try to sell the additional milk to Kraft and/or Leprino. However, the cheese plant operators are under no obligation to buy such milk.

Normally, M–W prices tend to be most seriously misaligned with the market values for butter and NFDM when milk supplies trend seasonally lower (July–November). In such months, cheese plants bid up milk prices to assure sufficient supplies in response to the strong consumer demand for cheese. In view of these marketing circumstances, the Michigan cheese plants should be anxious to buy any extra milk of the cooperatives. Also, during these months far less milk was used to produce butter and nonfat dry milk by Order 40 handlers in 1990. For instance, only about one-third of the milk used to produce butter and powder was accounted for in such months.

The previous findings indicate that the cooperatives' problems associated with the use of cream to make butter were ameliorated with the butterfat differential change. The NFDM processing does not appear to be of such magnitude that the special pricing formula is warranted and no action is taken with respect to Order 40.

The Michigan Upper Peninsula order was included in the list of markets involved in this processing. When the MMPA witness finished testifying about marketing conditions in the Southern Michigan market, he stated that his cooperative did not intend to offer any evidence to support the change for Order 44. He also indicated that since Order 44 provides individual handler pooling, no purpose would be served by including this type of pricing provision in that order and no action is taken.

Orders 33 (Ohio Valley), 36 (Eastern Ohio-Western Pennsylvania) and 49 (Indiana) marketing areas. No pricing changes for milk used to produce NFDM should be made in the three Ohio-Indiana orders on the basis of this hearing record.

A witness from MMI testified in support of the Class III–A proposal for these three markets on behalf of MMI and the Hoosier Milk Marketing Agency (Hoosier), which is comprised of MMI and AMPI. MMI represents about 70 percent of the milk pooled on Order 33 and 40 percent of the Order 36 producer milk deliveries. Hoosier represents a majority of the Order 49 milk.

The MMI witness for the proponent cooperatives supported the general statement on the Class III–A price formula presented on behalf of the 12 proponent cooperatives and contended that for the same reasons the special pricing should be provided in the three Ohio-Indiana markets where MMI and Hoosier market milk. He argued that butter/powder processing represents the final usage of milk. He testified that the proposed pricing change is needed to assure an order price for milk used to make butter and NFDM which represents the value of the products made from such milk.

In support of the special price for milk used to make butter and NFDM, the witness for proponents testified that the M–W price, which is the price for Class III milk under these three orders, is not a good indicator of a market-clearing price. In proponents' opinion, the proposed product price formula would more properly reflect the price with such function. He testified that the production of cheese depends on the amount demanded by consumers while the production of butter and NFDM depends on the amount of milk that is not needed for fluid purposes or to make dairy products demanded by consumers.

MMI operates two butter/powder plants in connection with its supply function for these three markets. The plant at Orville, Ohio, is an Order 36 pool plant while the Goshen, Indiana, plant is not pooled. The cooperative receives milk at Goshen that is primarily associated with Order 49 but also receives producer milk that is diverted from Order 33 distributing plants.

To justify this pricing change in these three markets, MMI presented a table showing the receipts of milk at its Goshen and Orville Plants. There were wide fluctuations in the amount of milk received at such plants. Such receipts varied seasonally as well as on weekends and holidays.

While the table presented a detailed daily breakdown of the receipts at such plants, there was no information provided by proponents regarding how the milk received at such plants was utilized. In the absence of such specific use data, the total market information numbers must be relied upon to demonstrate the amount of skim milk used to make NFDM in these three markets.

Market data indicate that the amount of NFDM processed by handlers regulated under the three orders was not extensive. Order 33 handlers used no skim milk to make NFDM in 1990.

Record information shows that Indiana handlers used about 26 million pounds of milk and cream to produce butter and NFDM during 1990. Since Order 49 handlers used 24 million pounds of cream to produce butter, only 2 million pounds of skim milk could have been used to make NFDM.

The market data for Order 36 show that 132 million pounds of milk and cream were used to produce butter and NFDM during 1990. The butterfat content of the milk used to manufacture these two products averaged about 16 percent. They also show that 77 million pounds of skim milk were used to produce NFDM and 55 million pounds of cream were used to make butter. This is a ratio of less than 2 to 1. In a butter/powder operation where such products are being made from producer milk, the ratio would be almost 10 pounds of skim milk to each pound of cream.

The butterfat content of the market's producer milk in 1990 averaged 3.68 percent, while the butterfat content of the market's fluid milk products averaged 2.14 percent. The foregoing analysis indicates that Order 36 handlers processing butter in many instances were receiving separated cream (and no skim) that exceeded the fluid milk needs of distributing plants.

For the most part, there has been a decrease in NFDM processing coupled with an increase in cheese production in these three markets. In 1982, cheese processing by Order 33 handlers represented 5 percent of producer milk and NFDM processing reflected 19 percent of such milk deliveries. In 1990, cheese production accounted for 7 percent of producer milk and NFDM was zero. In 1982, cheese processing by Order 36 handlers represented 19 percent of producer milk and NFDM production accounted for 9 percent. In 1990, cheese production represented 35 percent while NFDM accounted for only 2 percent.

While 1990 cheese production by Order 49 handlers was lower than in 1982, NFDM processing is rather limited because the Indiana market is a deficit milk production area. For instance, Indiana is included in the East North Central region. While the region's average Class I utilization for 1990 was 33.9 percent, Order 49 averaged 60.2 percent. The Indiana Class I use that year was higher for each of the other seven markets except one included in that region. The Class I use percentages ranged from a low of 16 percent for the Chicago Regional market to 70 percent for the Louisville-Lexington-Evansville market. In the months when milk supplies are seasonally lower, milk from outside sources must be imported to fulfill the Class I demand of Indiana distributing plants. Consequently, there is normally very little milk which needs to be processed into the residual dairy products of butter and NFDM.

In addition to its two butter/powder plants, MMI operates a cheese plant at New Wilmington, Pennsylvania, and a Class II operation consisting primarily of condensed and condensed blends at New Bremen, Ohio. These plants are also available to dispose of the reserve milk supplies associated with these three markets. At the time of the hearing, even though cheese prices were more favorable than butter/powder prices, these plants were operating at only 70 to 80 percent of capacity. The

1991
UMI

availability of such plants to process the reserve supplies of these three markets gives MMI the flexibility of shifting its excess milk supplies around among the plants in its system and thereby benefit from any gains it can achieve by so doing. Although transportation could be a limiting factor in maximizing the benefits it realizes from redirecting its supplies, the opportunity to do this certainly presents an advantage to the cooperative.

One additional change in marketing conditions relating to these three markets must not be overlooked. Beatrice Foods Company owned and operated the County Line Cheese plant located at Auburn, Indiana. In connection with the cheese plant, Beatrice was operating a reload facility located nearby at Shipshewana that qualified as a pool supply plant. Both plants are located in northeastern Indiana and they are about 50 miles east of Goshen and 150 miles north of Indianapolis. The supply plant was purchased recently by Hoosier. MMI hopes to become the marketing agent on the 15 to 18 million pounds of milk per month received at the supply plant in addition to the Grade B shippers associated with the cheese plant.

As a part of the purchase agreement, Hoosier agreed to close the cheese plant and not use the plant to manufacture any dairy product for three years. The sale terms agreed to by AMPI and MMI seem to indicate that the cooperatives have no concern about the capacity available to make cheese versus butter/powder in this 3-market area. In view of the foregoing, no action is taken in the three Ohio-Indiana markets.

Orders 97 (Memphis), 108 (Southwest Plains), 108 (Central Arkansas), 120 (Lubbock-Plainview, Texas), 126 (Texas), 132 (Texas Panhandle) and 138 (Rio Grande Valley) marketing areas. The special Class III–A price should not be provided for the 7 Southwest markets on the basis of this record. Orderly marketing can be preserved under these orders without providing this pricing change for skim milk that is used to make NFDM.

A witness from AMPI's Southern Region testified in support of this pricing change for the 7 Southwest markets. Such cooperative represents a majority of the milk pooled on each of these markets with the exception of the Southwest Plains market. In Southwest Plains, AMPI shares the market with Mid-America Dairymen, Inc. (Mid-Am), and these two cooperatives represent a majority of the milk on that market.

The AMPI witness endorsed the product price formula submitted on behalf of the 12 proponent cooperatives that requested the hearing. He testified that the pricing change should be made in the Southwest orders generally for the same reasons it was proposed for the other markets; i.e., to establish order prices for milk used to make butter and NFDM which more appropriately reflect the market value of such products.

In support of the proposal for the Southwest markets, AMPI presented data which showed the estimated impact of this proposal on the uniform prices under such orders. AMPI relied exclusively on this information to demonstrate the need to change the pricing for milk used to make butter and NFDM.

The Southern Region of AMPI operates in these 7 Southwest markets in much the same way that DI operates in the two Southeast regions. In disposing of its reserve milk supplies associated with these markets, AMPI operates five cheese plants in the region. They are located at Mountain View and Mansfield, Missouri; Hillsboro, Kansas, and Muenster and Stephenville, Texas. AMPI operates three butter/NFDM plants to serve such purposes. They are located at El Paso, Texas; and Oklahoma City and Tulsa, Oklahoma. In Sulphur Springs, Texas, AMPI operates a large specialty milk plant which produces butter, butter blends and condensed products plus a small amount of NFDM. During the months of heavy seasonal milk production the last two years, the cooperative used the dryers at the Stephenville, and Muenster cheese plants to make NFDM.

AMPI provides no information regarding the receipts and/or utilization of milk at such plants. The only information concerning receipts and utilization of milk in the record is the product totals for each market. Much of that data is not published because less than three handlers are involved.

Record data show that no NFDM was processed by handlers regulated under the Memphis order (Order 97), which provides for individual handler pooling. This type of pooling arrangement would not allow AMPI or any other handler to share with all of the market's dairy farmers any losses associated with manufacturing NFDM. Thus, no purpose would be served by making such a pricing change in Order 97 and no action is taken with respect to that market.

The notice for this proceeding indicated that proposed amendments to the Lubbock-Plainview, Texas order (Order 120), the Texas Panhandle order (Order 132) and the Rio Grande Valley order (Order 138) would be considered at the hearing. Effective December 1, 1991, these three orders were merged into a new single order which was designated as the "New Mexico-West Texas" marketing area. (Official notice is taken of the Department's final decision issued on August 14, 1991 (56 FR 42240) for such merged markets.

A paragraph from that decision is quoted herein because it provides appropriate insights into marketing conditions under the merged order as they relate to the pricing changes proposed herein.

"Associated Milk Producers, Inc. (AMPI) proposed the marketing area merger and expansion that is adopted herein. AMPI operates a manufacturing plant at El Paso that is pooled under Order 138 and represents virtually all of the dairy farmers who would be producers under the merged order. AMPI also supplies all of the plants operating in the area that would be regulated under the merged order."

Since AMPI represents almost all of the milk pooled under the merged order, the cooperative would be unable to share its gains or losses from processing NFDM with other dairy farmers. No purpose would be served by providing the special Class III–A pricing for milk used to make NFDM in such cases. No action is needed for the merged market.

Additionally, information in the record shows that about 164 million pounds of milk was disposed of at butter/powder plants during 1990 under the three individual orders which were merged on December 1, 1991. It also shows that AMPI hopes to open a new cheese plant at Roswell, New Mexico, by May 1, 1992. That plant is expected to be able to process about 50 million pounds of milk per month or 600 million pounds per year. This additional capacity to make cheese in the Southwest should give AMPI the necessary flexibility to move its milk supplies between cheese and butter/powder manufacturing when market prices favor one over the other.

Similarly, AMPI producers supply all of the milk priced under the Central Arkansas order (Order 108). No NFDM was processed by Order 108 handlers in 1990. For the reasons previously indicated, no action is taken in 5 of the 7 Southwest markets which were noticed for hearing and are either totally supplied by AMPI or so nearly so that the benefits accruing to the proponent cooperative would be insignificant if the proposed pricing change were adopted.

Three cooperative associations provide milk for the Texas market. AMPI represents about 70 percent of the milk pooled under that order. Mid-Am and Southern Milk Sales, Inc. (SMS) have producers whose milk is pooled : n the Texas market also. These two

producer groups did not take a position on the Class III–A proposal for the Texas market.

Market data show that Order 126 handlers used 131 million pounds of skim milk to make NFDM during 1990. This represented only about 2 percent of the market's producer milk deliveries in that year. They also show that Order 126 handlers used 9 times more milk to make cheese than they did to make NFDM.

Also, over the past few years Texas handlers have shifted their milk manufacturing operations from NFDM to cheese. For instance, in 1982 NFDM processing by Texas handlers represented almost 5 percent of producer milk compared with 2 percent in 1990. On the other hand, cheese manufacturing by Texas handlers represented 13 percent of the market's producer deliveries in 1982 compared with 20 percent in 1990.

Information in the record shows that during 1990 about 557 million pounds of milk and cream were disposed of by Texas handlers to make butter and powder or transferred or diverted to plants processing such products. Since Texas handlers only accounted for about 173 million pounds of that manufacturing, a significant portion of the Texas market's reserve milk supplies was processed by other than Texas handlers. Although the record is not specific in this regard, a considerable portion of that milk most likely was processed at the Oklahoma butter/powder plants of AMPI. The cooperative was planning to replace one of its Oklahoma plants with a new butter/powder facility at Winsboro, Texas, to eliminate hauling its excess milk supplies out of Texas in the future. Such new plant will be able to process about 50 million pounds of milk per month. This plant was expected to be operational by the end of 1991.

As previously indicated, AMPI expects to open a new cheese facility in Roswell, New Mexico, by May of 1992. This plant also has a 50-million pound per-month capacity. When these two new AMPI plants are operational, it will give the cooperative 100 million pounds of additional manufacturing capacity each month. The butter/powder plant is located in east Texas and the cheese plant will be located in eastern New Mexico. These new facilities will give AMPI considerably more flexibility in directing its regional milk supplies to cheese plants when the pricing is tilted in favor of cheese and to butter/powder plants when the pricing favors butter/NFDM processing.

Also, the current Texas order provides a credit for handlers to move milk to distant manufacturing plants for processing. Thus, when order pricing favors cheese over butter/powder processing Texas handlers are able to recoup at least part of the transportation costs to haul the excess milk to a cheese plant. It appears that AMPI and other handlers have adequate opportunity to minimize any adverse impacts resulting from the disparities between M–W prices and market values for butter and powder in connection with the Texas market.

AMPI represents about 40 percent of the milk pooled under the Southwest Plains order. The market's other cooperative, Mid-Am, which supplies more milk than AMPI for Order 106, took no position on the Class III–A proposal for this market. The two associations supply more than three-fourths of the market's milk and operate under a common marketing agreement whereby the cooperatives function in concert in supplying the milk needs of handlers regulated under the Southwest Plains order.

During 1990, Order 106 handlers used 38 percent more milk to make cheese than they did in 1987. Cheese production by such handlers has increased almost seven times since 1982. In that year, such processing represented 12 percent of producer deliveries compared with 31 percent for 1990.

As previously indicated, AMPI operates two cheese plants in Southwest Missouri. One is located at Mansfield and the other is located at Mountain View. Mid-Am also operates two cheese plants in that area. One is situated at Monett and the other is located at Mount Vernon.

The major milk production area for the Southwest Plains market is in Southwest Missouri. During 1988 more than 39 percent of the milk pooled under Order 106 originated in that area. (Official notice is taken of Sources of Milk for Federal Order Markets by State and County Issued in May 1990 by USDA–AMS.) The production area surrounds the four cheese plants operated by AMPI and Mid-Am. Milk used by Order 106 handlers to make cheese has been increasing each year and there is nothing in this record to indicate that there is insufficient capacity for this trend to continue in the future.

There are three drying plants in the Order 106 marketing area. AMPI has two drying plants in Oklahoma at Oklahoma City and Tulsa and Mid-Am has a plant at Springfield, Missouri. Since the individual market data for skim milk powder are restricted for Order 106, because less than three handlers are involved in such processing, the best record data available for analyzing marketing conditions are the processing numbers for the West South Central region which includes most of the orders that AMPI proposed to be amended. Since a considerable portion of the excess milk associated with these markets is transferred and/or diverted to manufacturing plants that are regulated under other orders, use of the monthly regional numbers will avoid the possibility of counting the milk as used to produce twice (the order from which the milk was transferred or diverted as well as in the order where the milk was actually processed).

The Southwest region is similar to the Southeast in that a considerable portion of the area's milk supplies is used to meet the fluid needs of distributing plants. Other than for the two Southeast regions, the West South Central area had the next highest Class I use during 1990 at 57 percent. This compares with the following Class I uses in the other regions; North Atlantic, 49 percent; Mountain, 47 percent; Pacific, 38 percent; East North Central, 35 percent; and West North Central, 25 percent.

On a regional basis, during 1990 Southwest order handlers used only 3 percent of their producer milk to make NFDM whereas they used 21 percent of such deliveries to make cheese. In some months, almost no milk was used by Southwest handlers to make NFDM. Such processing was especially light in the months of August-November. As indicated in prior findings, these are the months when the disparity between M–W prices and market values for butter/powder are normally greatest.

Based on the foregoing marketing circumstances in the Southwest, it is difficult to conclude that AMPI's NFDM processing in the future will cause the cooperative severe economic problems. Accordingly, no action is taken in these 7 markets.

Chicago Regional (Order 30) marketing area. The special Class III–A price should not be provided for the Chicago market. The reasons for such conclusion are set forth in the following findings.

The pricing change advanced by the 12 proponent cooperatives for 27 Federal order markets was supported by Wisconsin Dairies for the Chicago market. The proponent cooperative represents only about 10 percent of the dairy farmers and the milk pooled under Order 30.

The proposed amendments for the Chicago order were opposed by five cooperative associations. They were Mid-America Dairymen Inc.; National

1991
UMI

Farmers Organization; Alto Dairy Cooperative; Swiss Valley Farms; and Farmers Union Milk Marketing Cooperative, Inc. Hence, the Class III–A proposal lacks widespread support among producers supplying the Chicago market.

In support of the Class III–A proposal, the witness from Wisconsin Dairies testified that the estimated impact on the Order 30 blend prices resulting from the proposed amendments generally are overstated. He claimed that this happens because of the procedure used by the market administrator to establish the classification of milk which is transferred or diverted from the cooperative's pool supply plants to nonpool plants. At the time handlers file their reports of receipts and utilization in connection with the computation of uniform prices, the classification of such milk is unknown. Since the nonpool plants are not required to file reports, the market administrator must rely on percentages developed on the basis of an audit conducted to verify the classified use of pooled milk at such plants in an earlier month.

To support this conclusion, the witness for the proponent cooperative compared the actual amounts of NFDM produced at its plants at Reedsburg and Sauk City, Wisconsin, with the amounts resulting from use of the percentages. In 1990, about 49 percent of the skim milk reported to have been used to make NFDM at the handler's Reedsburg plant was actually so used. At Sauk City only about 41 percent of the milk reported as used to make NFDM was so disposed of for such purposes. For the first six months of 1991, the percentages were 32 and 27 percent, respectively.

For the most part, the opposing cooperatives objected to the adoption of the proposed pricing formula under any order. However, Mid-Am specifically testified in opposition to the change for the Chicago market. Mid-Am's witness stated that there is a difference in returns from butter/powder sales versus the M–W price. He claimed that this disparity is not new. The same situation existed in the early 70's. In response to that signal, Mid-Am invested large amounts of its members' money converting its butter/powder manufacturing operations to cheese. He contended that it would be unfair to ask Mid-Am's producers to take lower blend prices now after the cooperative spent its money to convert its manufacturing operations to cheese.

The Mid-Am witness testified that there is sufficient cheese capacity available to accommodate the Order 30 reserve milk supplies that are used to produce butter and NFDM. To demonstrate this fact, the witness introduced an exhibit comparing the unused cheese plant capacity in Wisconsin with the amount of Order 30 milk used to make butter/NFDM. He estimated that there was almost six times as much capacity available at Wisconsin cheese plants in 1990 as there was Order 30 milk used to make butter/powder.

As Mid-Am and the other opponents contended, Chicago handlers rely heavily on cheese processing to dispose of the market's reserve milk supplies. Order 30 handlers used 33 times as much milk to produce cheese as they did to make NFDM during 1990. For example, Order 30 handlers used what amounted to 75 percent of the market's producer milk to make cheese whereas only 2 percent of such deliveries were represented by NFDM processing. Similarly, for the fiscal year ended March 31, 1991, Wisconsin Dairies used about 78 percent of its pooled milk to make cheese and less than 4 percent to produce NFDM.

In 1982, cheese processing by Order 30 handlers reflected 65 percent of milk deliveries by dairy farmers and NFDM processing represented 6 percent. In 1990, Order 30 handlers used 54 percent more milk to make cheese than they did in 1982. On the other hand, they used 44 percent less milk in 1990 than they did in 1982 to make NFDM. These numbers indicate that in the last 10 years there has been a dramatic shift from NFDM processing by Order 30 handlers to cheese production.

Class I use by Order 30 handlers averaged only 16 percent in 1990. Thus, there is not much difference between the order's blend prices and the M–W price, which is the market's Class III price. For example, the market's blend prices averaged only about 53 cents higher than the M–W for 1990. In the outlying areas where proponent cooperative has its supply plants at Reedsburg and Sauk City, Wisconsin, the difference between the blend price at those plant locations and the M–W price is less than the minus location adjustment applicable at such plants in some months. In such cases, the cooperative could elect not to pool the plant, which the handler did for its Reedsburg plant in June 1990. This procedure gives Wisconsin Dairies an opportunity to avoid accounting to the pool for Class III milk at the cheese-driven M–W price and receiving lower returns from the marketplace from the sales of the butter and NFDM made from such milk.

Additional Opposing Arguments. At the hearing, Kraft contended that during 1991 Agri-Mark took contradictory positions on the matter of pricing milk used to make butter and powder. At a New York State hearing in May 1991, Agri-Mark supported a proposal to increase the price of milk used to make such products and now was asking the Secretary to lower the price of milk to make butter/NFDM under Federal Orders 1 and 2, counsel argued.

Agri-Mark responded to these accusations by testifying that the main objective of the New York State proposal on behalf of 20,000 dairy farmers was to raise fluid milk prices statewide. The cooperative's representative stated that Agri-Mark attempted to exempt milk used to make surplus dairy products from the price increase but was not successful. Rather than jeopardize the entire proposal, Agri-Mark agreed to higher prices for milk used to make butter and powder which is not sold to the government. The record testimony on this matter suggests that the primary thrust of the New York State proposal concerned price increases for Class I milk. This hearing involves the pricing of milk which is excess to the needs of handlers. The cooperative's position is understandable in view of the circumstances.

Dietrich's Milk Products, Inc., opposed the proposal to establish a special class and price for nonfat dry milk because whole milk powder would not be classified and priced similarly. A witness for the proprietary handler contended that all types of dried milk products should be classified and priced alike. The handler's witness testified that in the past whole milk powder and nonfat dry milk have been consistently classified and priced the same under Federal orders. Changing that relationship by pricing whole milk powder at the M–W price level while pricing nonfat dry milk on the basis of a product formula will seriously disadvantage manufacturers such as Dietrich who process whole milk powder, he claimed.

In an attempt to maintain the two dry milk products in the same class and subject to the same price, at the hearing Dietrich asked that the cooperatives' proposal be modified to include whole milk powder in the new Class III–A. Such modification was ruled to be outside the scope of the hearing by the Administrative Law Judge. Since Dietrich did not file a brief in this proceeding no further action on this issue is needed in this decision.

As indicated, there was considerable opposition to the adoption of this proposal for any market. Many of the arguments raised by the opposition were recognized as a basis for limiting the applicability of the Class III–A price formula adopted herein.

The two most prevalent objections to the proposal, which were aired by most all of the opponents, were: Adoption of the proposal would lower blend prices; and the disparity between order prices for Class III milk and the value of the butter/powder made from such milk is not a new situation. The matter of the impact on producer pay prices was addressed in the three markets where the modified Class III–A price will apply.

The contention of opponents that these disparities have existed in the past is true. However, it is the magnitude of the fluctuations in the product prices in recent years which requires immediate remedial action. The decision highlights the wide range of market prices for powder and cheese during the past four years. Such fluctuations were not prevalent in prior years.

Another comment raised by opponents claimed that since butter, NFDM and cheese are marketed nationally, the milk used to make such products should be in the same class and priced uniformly. This decision finds that the net returns from the sales of butter and powder differ significantly from the returns from sales of cheese. If the returns from the sales of these three major Class III dairy products were in reasonable balance in terms of value, then pricing of Class III milk could remain uniformly priced. Forcing cooperatives performing market-clearing functions to account to the pool at the cheese-driven M–W price for milk they are using to manufacture butter and powder, places the dairy farmer organizations in dire economic situations in some months. In markets where handlers are engaged in extensive powder manufacturing to clear the markets' excess milk supplies and there is little or no opportunity for such persons to divert such milk to cheese, the orders must be amended to recognize the value of milk used to produce nonfat dry milk both when it is higher and when it is lower than the Class III price.

Opponents also argued that this hearing should not have been called because the subject matter of this proceeding should be part of a larger issue which has become known as the "Reform of the Minnesota-Wisconsin Price Series". The entire issue of surplus milk pricing under Federal orders may be further explored next year at the national hearing. However, in view of the wide disparities in the net returns from butter-powder versus cheese, affected handlers should not be expected to wait for corrective action until the completion of a hearing, which has not been scheduled.

Several opponents argued that it is inappropriate to consider changes in Department policy on an emergency basis. Such argument is contrary to the Department's rules of practice and procedure, which clearly recognize the need for emergency rulemaking methods.

Cheesemakers argued that they are facing the same situations as butter/powder manufacturers. This contention cannot be substantiated from the information in this record. The decision estimates the net returns from cheese and butter/powder processing and compares such returns with M–W prices during the last four years. The data show that cheese values have exceeded M–W prices while butter/powder values generally have been below such prices. They also indicate that the disparity has been severe for butter/powder processors in the last two years.

Opponents claimed that the losses from butter/powder processing experienced by the proponent cooperatives represent costs that are associated with balancing the fluid market. They contended that the cooperatives should recover such shortfalls by increasing service charges on fluid milk plants. This proposal was not advanced by proponents as a method to recover the cost of balancing the fluid market but rather as a pricing problem under the orders. This decision relates the order price for milk used to make NFDM with the prices paid for such product in the marketplace. This is accomplished by establishing the Class III–A price directly from the market price for NFDM.

Opponents also argued that the losses claimed by proponents were overstated because revenues from closely related operations at the butter/powder plants were not considered. Several interested parties contended that gains from the following sources: Service charges collected from fluid handlers; by-product cream sales; and condensed operations; should be included in the cooperative's overall profit and loss picture. They insisted that the Secretary should analyze a handler's entire operation (offset any gains against any losses) in determining whether such person had incurred a loss. The change adopted herein is not being made because of the overall financial position of the proponent cooperatives. It is made because the order price for milk is not adequately reflecting the value of the products made from such milk. Even those who opposed the proposal conceptually agreed with that objective.

Several hearing participants argued that adoption of this proposal would damage the market for condensed milk because the manufacturers of Class II products (soft dairy products such as ice cream, etc.) are likely to substitute dry ingredients for condensed milk if this change is made. A very important consideration of soft dairy products manufacturers is maintaining the quality of their products. This is usually accomplished by developing standard product formulas. Once established, processors are reluctant to change the formula or the ingredients used to manufacture such products. The formula provided herein for NFDM will not assure processors of order prices for NFDM which are below the Class II milk price. Rather, it ties the order prices for NFDM directly to the marketplace values of such product. They will move up and down together. The product formula is not expected to provide pricing advantages for NFDM, relative to Class II milk prices of such magnitude or duration that they will encourage handlers to shift to dry ingredients in making Class II products.

Implementation of the Amendments. For the purpose of implementing these amendments, the market administrator will continue to follow the current provisions of the orders to classify producer milk. In addition, the market administrator shall determine the quantity of such producer milk to be priced in Class III–A by prorating receipts from various sources to Class III–A use on the basis of the quantity of receipts of bulk fluid milk products allocated to Class III use at the plant.

2. The Need for Emergency Action With Respect to Issue 1

The hearing notice indicated that evidence would be taken at the hearing to determine whether emergency marketing conditions exist to such an extent that omission of a recommended decision and the opportunity to file exceptions thereto under the rules of practice and procedure is warranted.

All of the proponents asked that this matter be dealt with expeditiously by the Department. They wanted the amendments resulting from the hearing to be completed as soon as possible.

On the other hand, the opponents considered this issue to be too important to be dealt with on an emergency basis, without the opportunity to comment on the Department's findings and conclusions.

The procedure followed herein whereby a tentative decision is being issued accommodates the wishes of both the proponents and the opponents

VOL

of the proposal. This method will enable the amendments to become effective on an interim basis if they are favored by producers supplying the three markets. In addition, it provides an opportunity for interested parties to file their comments regarding the Department's findings and conclusions before a final decision is issued.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth supplement those that were made when each of the aforesaid orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

The following findings are hereby made with respect to each of the aforesaid interim marketing agreements and orders:

(a) The interim marketing agreements and the orders, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the interim marketing agreements and the orders, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The interim marketing agreements and the orders, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Interim Marketing Agreement and Interim Order Amending the Orders

Annexed hereto and made a part hereof are two documents, an Interim Marketing Agreement regulating the handling of milk, and an Interim Order amending the orders regulating the handling of milk in the aforesaid marketing areas, which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire tentative decision and the interim order and the interim marketing agreement annexed hereto be published in the **Federal Register.**

Determination of Producer Approval and Representative Period

September 1991 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the orders, as amended and as hereby proposed to be amended, regulating the handling of milk in the New England, Middle Atlantic and Pacific Northwest marketing areas is approved or favored by producers, as defined under the terms of each of the orders (as amended and as hereby proposed to be amended), who during such representative period were engaged in the production of milk for sale within the aforesaid marketing areas.

List of Subjects in 7 CFR Parts 1001, 1004, 1124

Milk.

Signed at Washington, DC, on: December 10, 1991.

Jo Ann R. Smith,

Assistant Secretary, Marketing and Inspection Services.

Interim Order Amending the Orders Regulating the Handling of Milk in Certain Specified Marketing Areas

This interim order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when the orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) Findings. A public hearing was held upon certain proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the aforesaid marketing areas. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the applicable rules of practice and procedure (7 CFR part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said orders as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the aforesaid marketing areas; and the minimum prices specified in the orders as hereby amended are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said orders as hereby amended regulate the handling of milk in the same manner as, and are applicable only to persons in the respective classes of industrial or commercial activity specified in, marketing agreements upon which a hearing has been held.

Order Relative to Handling

It is therefore ordered that on and after the effective date hereof, the handling of milk in the New England, Middle Atlantic and Pacific Northwest marketing areas shall be in conformity to and in compliance with the terms and conditions of the order, as amended, and as hereby amended, as follows:

The authority citation for 7 CFR parts 1001, 1004 and 1124 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

PART 1001—MILK IN THE NEW ENGLAND MARKETING AREA

1. Section 1001.40 is amended by revising paragraph (c)(1)(iii) and adding a new paragraph (d) to read as follows:

§ 1001.40 Classes of utilization.

* * * * *

(c) * * *

(1) * * *

(iii) Any milk product in dry form, except nonfat dry milk.

* * * * *

(d) *Class III–A milk.* Class III–A milk shall be all skim milk and butterfat used to produce nonfat dry milk.

2. Section 1001.43 is amended by adding a new paragraph (f) to read as follows:

§ 1001.43 General classification rules.

* * * * *

(f) Class III–A milk shall be allocated in combination with Class III milk and the quantity of producer milk eligible to be priced in Class III–A shall be determined by prorating receipts from pool sources to Class III–A use on the basis of the quantity of total receipts of bulk fluid milk products allocated to Class III milk at the plant.

3. Section 1001.50 is amended by adding a new paragraph (d) to read as follows:

§ 1001.50 Class prices.

* * * * *

(d) *Class III–A price.* The Class III–A price for the month shall be the average Central States Extra Grade nonfat dry milk price for the month, as reported by the Department, less 12.5 cents, times 9, plus the butterfat differential times 35 and rounded to the nearest cent, and subject to the adjustment set forth in paragraph (c) of this section for the applicable month.

4. Section 1001.54 is revised to read as follows:

§ 1001.54 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class III and Class III–A prices for the preceding month, and on or before the 15th day of each month the Class II price for the following month computed pursuant to § 1001.50(b).

PART 1004—MILK IN MIDDLE ATLANTIC MARKETING AREA

1. Section 1004.40 is amended by revising paragraph (c)(1)(iii) and adding a new paragraph (d) to read as follows:

§ 1004.40 Classes of utilization.

* * * * *

(c) * * *

(1) * * *

(iii) Any milk product in dry form, except nonfat dry milk.

* * * * *

(d) *Class III–A milk.* Class III–A milk shall be all skim milk and butterfat used to produce nonfat dry milk.

2. Section 1004.43 is amended by adding a new paragraph (d) to read as follows:

§ 1004.43 General classification rules.

* * * * *

(d) Class III–A milk shall be allocated in combination with Class III milk and the quantity of producer milk eligible to be priced in Class III–A shall be determined by prorating receipts from pool sources to Class III–A use on the basis of the quantity of total receipts of bulk fluid milk products allocated to Class III use at the plant.

3. Section 1004.50 is amended by revising the section heading and by adding a new paragraph (g) to read as follows:

§ 1004.50 Class and component prices.

* * * * *

(g) *Class III–A price.* The Class III–A price for the month shall be the average Central States Extra Grade nonfat dry milk price for the month, as reported by the Department, less 12.5 cents, times 9, plus the butterfat differential value per hundredweight of 3.5 percent milk and rounded to the nearest cent, and subject to the adjustments set forth in paragraph (c) of this section for the applicable month.

4. Section 1004.53 is amended by revising paragraph (a)(2) to read as follows:

§ 1004.53 Announcement of class prices and component prices.

* * * * *

(a) * * *

(2) The Class III and Class III–A prices for the preceding month; and

* * * * *

5. Section 1004.60 is amended by adding a new paragraph (k) to read as follows:

§ 1004.60 Handler's value of milk for computing uniform prices.

* * * * *

(k) Effective January 1, 1992, for producer milk in Class III–A, add or subtract as appropriate an amount per hundredweight that the Class III–A price is more or less, respectively, than the Class III price.

6. Amended § 1004.71(b)(2) by changing the reference "§ 1004.62" to "§ 1004.61".

PART 1124—MILK IN THE PACIFIC NORTHWEST MARKETING AREA

1. Section 1124.40 is amended by revising paragraph (c)(1)(iii) and adding a new paragraph (d) to read as follows:

§ 1124.40 Classes of utilization.

* * * * *

(c) * * *

(1) * * *

(iii) Any milk product in dry form, except nonfat dry milk.

(d) *Class III–A milk.* Class III–A milk shall be all skim milk and butterfat used to produce nonfat dry milk.

2. Section 1124.43 is amended by adding a new paragraph (e) to read as follows:

§ 1124.43 General classification rules.

* * * * *

(e) Class III–A milk shall be allocated in combination with Class III milk and the quantity of producer milk eligible to be priced in Class III–A shall be determined by prorating receipts from pool sources to Class III–A use on the basis of the quantity of total receipts of bulk fluid milk products allocated to Class III use at the plant.

3. Section 1124.50 is amended by revising paragraph (c) and adding a new paragraph (d) to read as follows:

§ 1124.50 Class prices.

* * * * *

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

(d) *Class III–A price.* The Class III–A price for the month shall be the average Western Grade A nonfat dry milk price for the month, as reported by the Department, less 12.5 cents, times 9, plus the butterfat differential times 35 and rounded to the nearest cent.

4. Section 1124.53 is revised to read as follows:

§ 1124.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month, the Class III and Class III–A prices for the preceding month, and on or before the 15th day of each month the Class II price for the following month computed pursuant to § 1124.50(b).

Interim Marketing Agreement Regulating the Handling of Milk in Certain Marketing Areas

The parties hereto, in order to effectuate the declared policy of the Act, and in accordance with the rules of practice and procedure effective thereunder (7 CFR part 900), desire to enter into this marketing agreement and do hereby agree that the provisions referred to in paragraph I hereof as augmented by the provisions specified in paragraph II hereof, shall be and are the provisions of this marketing agreement as if set out in full herein.

I. The findings and determinations, order relative to handling, and the provisions of §§ [1] to , all

[1] First and last sections of orders.

VOL
56
ISS
244

inclusive, of the order regulating the handling of milk in the New England and certain other marketing areas (7 CFR part [2]) which is annexed hereto; and

II. The following provisions:

§ [3] Record of milk handled and authorization to correct typographical errors.

(a) Record of milk handled. The undersigned certifies that he handled during the month of September 1991, hundredweight of milk covered by this marketing agreement.

(b) Authorization to correct typographical errors. The undersigned hereby authorizes the Director, or Acting Director, Dairy Division, Agricultural Marketing Service, to correct any typographical errors which may have been made in this marketing agreement.

§ [3] Effective date. This marketing agreement shall become effective upon the execution of a counterpart hereof by the Secretary in accordance with § 900.14(a) of the aforesaid rules of practice and procedure.

In Witness Whereof, The contracting handlers, acting under the provisions of the Act, for the purposes and subject to the limitations herein contained and not otherwise, have hereunto set their respective hands and seals.

7 CFR Part 1139
[DA-91-019]

Milk in the Great Basin Marketing Area; Revision of Allowable Diversion Limitation Percentages for Cooperative Association Handlers

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Revision of rule.

SUMMARY: This action increases the allowable percentage of a cooperative association's milk supply that may be moved directly from farms to manufacturing plants. This change was requested by Magic Valley Quality Milk Producers, Inc. (MVQMP), a cooperative that represents some producers supplying milk for the Great Basin marketing area. As a result of this action, milk regularly associated with the Great Basin order may be pooled without MVQMP having to incur uneconomic costs for hauling and handling the milk.

EFFECTIVE DATE: December 19, 1991.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, USDA/AMS/Division, Order Formulation Branch, room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, 202-720-4829.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Notice of Proposed Revision of Allowable Diversion Limitation Percentages for Cooperative Association Handlers: Issued November 5, 1991; published November 8, 1991 (56 FR 57298).

The Regulatory Flexibility Act (5 U.S.C. 601-612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. Such action will lessen the regulatory impact of the order on certain milk handlers and will tend to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under the criteria contained therein.

This revision is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and the provisions of § 1139.13(d)(4) of the Great Basin order.

Notice of proposed rulemaking was published in the **Federal Register** (56 FR 57298) concerning the proposed revision of allowable diversion limitation percentages for cooperative association handlers. The public was afforded the opportunity to comment on the proposed notice by submitting written data, views, and arguments by November 23, 1991.

Statement of Consideration

Magic Valley Quality Milk Producers, Inc (MVQMP), requested that the percentages of milk that may be diverted by a cooperative association pursuant to § 1139.13(d)(2) of the Great Basin order be increased. Presently, a cooperative association may divert 60 percent of its milk supply in April through August and 50 percent in other months. MVQMP requested that these percentages be increased to 70 percent for April through August and 60 percent in the remaining months.

Within the Great Basin order, § 1139.13(d)(4) provides that the Director may increase or decrease the diversion limitations by up to 10 percentage points if necessary to obtain needed shipments or to prevent uneconomic shipments. The diversion allowances for handlers other than cooperative associations were relaxed under this provision on June 1, 1989.

One letter in opposition to the proposed revision of diversion limitations was received from Western Dairymen Cooperative, Inc. (WDCI). WDCI opposed the proposal on the basis that approval of the request would enable MCQMP to increase both the quantity of producer milk and the quantity of Class III utilization under the Great Basin order. WDCI asserts that the resulting reduction in the uniform price will cause economic distress for its membership. WDCI further maintains that the proposed revision is not necessary to obtain needed supplies or to prevent uneconomic shipments. No other views were received concerning the proposal.

MVQMP is a qualified cooperative association. Until recently, it operated a pool manufacturing plant, which allowed the cooperative to pool all or nearly all of its milk. MVQMP no longer operates the plant, and the diversion limits are not adequate to allow continued pooling of the milk that previously was pooled.

In response to the opposition by WDCI, if the change adversely affects the uniform price, it is because MVQMP has been unable to pool some of its milk for only a few months. If all or most of MVQMP's milk had been pooled in those months, as it was in prior months, then any impact on the uniform price would likely be minimal.

WDCI's letter further states that the milk of MVQMP is not needed to provide an adequate supply of milk for the market, noting that Class I utilization of producer milk for a recent month was only 44.5 percent.

Whether MVQMP's milk was needed or not, the Order in the past has accommodated pooling the milk. The only circumstance that has changed, so far as we can ascertain, is that the cooperative ceased operation of a pool manufacturing plant. Thus, the only other means available for MVQMP to pool the milk would be to first ship it to a pool plant and then transfer it to a nonpool plant for manufacturing. It is a safe assumption, we believe, that to pool the milk in this manner would involve costs incurred solely to maintain pool status. Given the history of pool status for the milk involved, such costs surely would result from uneconomic shipments and handling of milk. Moreover, whether MVQMP's milk moves directly from the farm to a nonpool plant or from the farm to a pool plant and is then transferred to a nonpool plant will have little effect on the uniform price, because the milk would be Class III in any case.

After reviewing all the information available, we can find no basis to conclude that MVQMP will pool any more milk than what had previously been associated with the Great Basin order.

Therefore good cause exists for increasing the percentages of milk that may be diverted by a cooperative association in this market. This will prevent the uneconomic shipments of milk for the purpose of fulfilling current limitation.

After consideration of all relevant material, including the proposal set forth in the aforesaid notice, and other available information, it is hereby found and determined that the diversion limitation percentage set forth in § 1139.13(d)(2) should be increased from the present 60 percent in the months of April through August and 50 percent in other months, to 70 percent in the months of April through August and 60 percent in other months.

It is hereby found and determined that 30 days' notice of the effective date hereof is impractical, unnecessary, and contrary to the public interest in that:

(a) This revision is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area;

(b) This revision does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of the proposed revision was given interested parties and they were afforded opportunity to file written data, views, or arguments concerning this revision. One letter in opposition was filed.

Therefore, good cause exists for making this revision effective upon publication of this notice in the **Federal Register**.

List of Subjects in 7 CFR Part 1139

Milk marketing orders.

It is therefore ordered, that part 1139 of title 7 of the CFR is amended as follows:

PART 1139—MILK IN THE GREAT BASIN MARKETING AREA

1. The authority for 7 CFR part 1139 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended (7 U.S.C. 601-674).

§ 1139.13 [Amended]

2. In § 1139.13(d)(2), the second sentence is amended by revising the words "60 percent in the months of April through August and 50 percent in other months" to read "70 percent in the months of April through August and 60 percent in other months".

Signed at Washington, DC, on: December 12, 1991.

Richard M. McKee,
Acting Director, Dairy Division.

BILLING CODE 3410-02-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 101

Administration

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: The Small Business Administration (SBA) is hereby amending its delegation of authority to grant general loan approval authority to various field offices for the purpose of simplication and clarification, for direct and guaranteed business loans, for loans to State and Local Development Companies, for guaranties of section 503 or section 504 debentures issued by certified development companies, and for guaranteeing sureties against a portion of the losses resulting from the breach of bid, payment, or performance bonds on contracts. The amendment further provides that the SBA, through notice to the public published in the **Federal Register**, will increase, decrease, or establish the authority of individual SBA field employees on a case by case basis.

EFFECTIVE DATE: This rule is effective December 19, 1991.

FOR FURTHER INFORMATION CONTACT: Charles R. Hertzberg, Assistant Administrator for Financial Assistance, (202) 205-6490.

SUPPLEMENTARY INFORMATION: SBA sets forth the delegation of authority, in 13 CFR 101.3-2, for direct and guaranty business loan approval, for the approval of loans to State and Local Development Companies, for the approval of guaranties of section 503 or section 504 debentures issued by certified development companies, and for approval of guaranties of sureties against a portion of the losses resulting from the breach of bid, payment, or performance bonds on contracts by officials in SBA regional, district, or branch offices. SBA is amending this delegation of authority for the purpose of simplication and clarification.

This action delineates the standard delegation of direct and immediate participation business loan approval authority by SBA officials, under section 7(a) of the Small Business Act (15 U.S.C. 636(a)), except loans made pursuant to section 7(a)(13), at $350,000 for a Regional Administrator, Deputy Regional Administrator, Assistant Regional Administrator/Finance & Investment (F&I), District Director, Deputy District Director, Assistant District Director/F&I, and Chief, Financing, District Office (D/O). The standard delegation of authority for a Supervisory Loan Specialist, Financing, D/O and Branch Manager is set at $250,000. In this final rule, SBA reserves the right to publish, by notice in the **Federal Register**, the level of direct or immediate participation loan approval authority for SBA employees in regional, district, or branch offices, based on their education, training, or experience.

The same procedure is used in this final rule to state the delegation of 7(a) guaranty loan approval authority of SBA officers in the regional, district, and branch offices. The standard delegation of guaranty loan approval authority for a Regional Administrator, Deputy Regional Administrator, Assistant Regional Administrator/F&I, District Director, Deputy District Director, Assistant District Director/F&I, and Chief, Financing, D/O is $750,000. The standard delegation of loan approval authority for a Supervisory Loan Specialist, Financing, D/O and Branch Manager is $250,000. SBA reserves the right to publish, by notice in the **Federal Register**, the level of 7(a) guaranty loan approval authority for SBA employees in regional, district, or branch offices, based on their education, training, or experience.

The above described procedure will be used for amending the delegation of authority for SBA's share of projects to be undertaken by State and Local Development Companies, as well. A Regional Administrator, under this final rule, has unlimited loan approval authority for loans to State Development Companies. The standard delegation of loan approval authority, for loans to State Development Companies, for a Deputy Regional Administrator, Assistant Regional Administrator/F&I,

VOL
56

1991
UMI

District Director, Deputy District Director, Assistant District Director for F&I, and Chief, Financing, D/O is $750,000. SBA reserves the right to publish, by notice in the **Federal Register**, the level of loan approval authority, for loans to State Development Companies, for individual SBA employees in regional, district, or branch offices based on their education, training, or experience.

Under this final rule, the standard delegation of loan approval authority for a Regional Administrator, with regard to loans to Local Development Companies, is $1,000,000, with unlimited project cost. The standard delegation of loan approval authority, for loans to Local Development Companies, for an Assistant Regional Administrator/F&I, District Director, Deputy District Director, and Assistant District Director/F&I is $1,000,000, with a project cost not to exceed $2,500,000. The standard delegation of loan approval authority, for loans to Local Development Companies, for a Branch Manager is $750,000, with a project cost not to exceed $2,500,000. The standard delegation of loan approval authority, for loans to Local Development Companies, for a Chief, Financing, D/O is $1,000,000, with a project cost not to exceed $1,000,000. SBA reserves the right to publish, by notice in the **Federal Register**, the level of loan approval authority, for loans to Local Development Companies, for SBA employees in regional, district, or branch offices, based on their education, training or experience.

The procedure delineated above will also be used to amend the delegation of authority for SBA officials in regional, district, or branch offices to approve or decline guarantees of section 503 or section 504 debentures issued by certified development companies. The standard delegation of approval authority for a Regional Administrator, for guarantees of section 503 or section 504 debentures issued by certified development companies, is $1,000,000, with unlimited project cost. The standard delegation of approval authority, for guarantees of section 503 or section 504 of debentures issued by certified development companies, for an Assistant Regional Administrator/F&I, District Director, Deputy District Director, Assistant District Director/F&I is $1,000,000, with a project cost not to exceed $3,000,000. The standard delegation of approval authority for a Branch Manager, with regard to guarantees of section 503 or section 504 debentures issued by certified development companies, is $750,000, with a project cost not to exceed $3,000,000. The standard delegation of approval authority for a Chief, Financing, D/O, for guaranties of section 503 or section 504 debentures issued by certified development companies, is $750,000, with a project cost not to exceed $1,500,000. The standard delegation of approval authority for an Assistant Branch Manager/F&I, for guaranties of section 503 or 504 debentures issued by certified development companies, is $600,000, with a project cost not to exceed $1,500,000. In this final rule, SBA reserves the right to publish, by notice in the **Federal Register**, the level of guaranty approval authority in this area for SBA employees in regional, district, or branch offices, based on their education, training, or experience.

The same procedure will be used to establish the delegation of authority for SBA employees in regional, district, or branch offices to guarantee sureties against a portion of the losses resulting from the breach of bid, payment, or performance bonds on contracts. The standard delegation of authority for a Regional Administrator and a Deputy Regional Administrator, to guarantee sureties against a portion of the losses resulting from the breach of bid, payment, or performance bonds on contracts, is $1,250,000. The standard delegation, to guarantee sureties against a portion of the losses resulting from the breach of bid, payment, or performance bonds on contracts, for a Senior Surety Bond Guarantee Specialist and a Surety Bond Officer is $500,000. SBA reserves the right to publish, by notice in the **Federal Register**, the level of guaranty approval authority in this area for SBA employees in regional, district, or branch offices, based on their education, training, or experience.

Because this final rule governs matters of agency organization, management and personnel and makes no substantive change to the current regulation, SBA is not required to determine if these changes constitute a major rule for purposes of Executive Order 12291, to determine if they have a significant economic impact on a substantial number of small entities pursuant to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), or to do a Federalism assessment pursuant to Executive Order 12612. Finally, SBA certifies that these changes will not impose an annual recordkeeping or reporting requirement on 10 or more persons under the Paperwork Reduction Act (44 U.S.C. ch. 35).

SBA is publishing this regulation governing agency organization, procedure and practice as a final rule without opportunity for public comment pursuant to 5 U.S.C. 553(b)(A).

List of Subjects in 13 CFR Part 101

Administrative practice and procedure, Authority delegations (Government Agencies), Investigations, Organization and functions (Government Agencies), Reporting and recordkeeping requirements.

For the reasons set out in the preamble, part 101 of title 13, Code of Federal Regulations is amended as follows:

PART 101—ADMINISTRATION

1. The authority citation for part 101 continues to read as follows:

Authority: Secs. 4 and 5, Pub. L. 85–536, 72 Stat. 384 and 385 (15 U.S.C. 633 and 634, as amended); sec. 308, Pub. L. 85–699, 72 Stat. 694 (15 U.S.C. 687, as amended); sec. 5(b)(11), Pub. 93–386 (Aug. 23, 1974); and 5 U.S.C. 552.

2. Section 101.3–2 is amended by revising parts I and III to read as follows:

§ 101.3–2 Delegations of authority to conduct program activities in field offices.

* * * * *

Part I—Financing Program

Section A—Loan Approval Authority

1. Business Loans (Small Business Act) (SBAct).

a. To approve or decline direct and immediate participation section 7(a) business loans (except loans made pursuant to section 7(a)(13)) not exceeding the following amounts (SBA share):

	Approval ($)	Decline ($)
(1) Regional Administrator	350,000	350,000
(2) Deputy Regional Administrator	350,000	350,000
(3) Assistant Regional Administrator/F&I	350,000	350,000
(4) District Director	350,000	350,000
(5) Deputy District Director	350,000	350,000
(6) Assistant District Director	350,000	350,000
(7) Chief, Financing, D/O	350,000	350,000
(8) Supervisory Loan Specialist, Financing, D/O	250,000	350,000
(9) Branch Manager	250,000	350,000

SBA may, as it deems appropriate, increase, decrease, or set the level of authority of an individual SBA employee of a regional, district, or branch office, based on education, training, or experience, by publishing a notice, in the **Federal Register**, of any such delegation.

b. *Guaranty loans.* 7(a) business loans (except loans made pursuant to sections 7(a)(12), 7(a)(13), and 7(a)(16)):

	Approve ($)	Decline ($)
(1) Regional Administrator	750,000	750,000
(2) Deputy Regional Administrator	750,000	750,000
(3) Assistant Regional Administrator/ F&I	750,000	750,000
(4) District Director	750,000	750,000
(5) Deputy District Director	750,000	750,000
(6) Assistant District Director/ F&I	750,000	750,000
(7) Chief, Financing Division, D/O	750,000	750,000
(8) Supervisory Loan Specialist, Financing Division, D/O	250,000	750,000
(9) Branch Manager	250,000	750,000

All the listed officials with approval of decline authority of $750,000 shall have the authority to approve or decline pollution control loans up to and including $1,000,000 made under section 7(a)(12) and international trade loans up to and including $1,250,000 made under section 7(a)(16).

SBA may, as it deems appropriate, increase, decrease, or set the level of authority of an individual SBA employee of a regional, district, or branch office, based on education, training, or experience, by publishing a notice, in the **Federal Register**, of any such delegation.

Section B—Other Financing Authority

For all types of loans contained in Section A above, (except loans made pursuant to section 7(a)(13)):

1. Loan Participation Agreements. To enter into individual and blanket loan participation agreements with bank lenders and savings and loan associations:

a. Regional Administrator.
b. Deputy Regional Administrator.
c. Assistant Regional Administrator/F&I.
d. District Director.
e. Deputy District Director.
f. Assistant District Director for F&I.
g. Chief, Financing, D/O.
h. Supervisory Loan Specialist, Financing, D/O.
i. Branch Manager.

SBA may, as it deems appropriate, by published notice in the **Federal Register**, grant to or remove from any individual SBA employee in a regional, district, or branch office, based on education, training, or experience, the authority to enter into individual and blanket loan participation agreements with bank lenders and savings and loan associations.

2. To cancel, reinstate, modify, and amend authorizations:

a. Regional Administrator.
b. Deputy Regional Administrator.
c. Assistant Regional Administrator/F&I.
d. District Director.
e. Deputy District Director.
f. Assistant District Director for F&I.
g. Chief, Financing, D/O (on fully disbursed loans).
h. Supervisory Loan Specialist, Financing, D/O (on fully undisbursed loans).
i. Branch Manager.

SBA may, as it deems appropriate, by published notice in the **Federal Register**, grant to or remove from any individual SBA employee in a regional, district, or branch office, based on education, training, or experience, the authority to cancel, reinstate, modify, and amend authorizations.

3. Disbursement Period Extension. To extend disbursement periods:

a. Without limitations:
(1) Regional Administrator.
(2) Deputy Regional Administrator.
(3) Assistant Regional Administrator/F&I.
(4) District Director.
(5) Deputy District Director.
(6) Assistant District Director for F&I.
(7) Chief, Financing, D/O (on fully disbursed loans).
(8) Branch Manager.

b. For a cumulative total not to exceed six (6) months:
(1) Supervisory Loan Specialist, Financing, D/O (on fully undisbursed loans).

SBA may, as it deems appropriate, by a notice published in the **Federal Register**, grant to or remove from any individual SBA employee in a regional, district, or branch office, based on education, training, or experience, the authority to extend disbursement periods.

4. Service Charges: To approve service charges by participating lenders not to exceed two (2) percent per annum on the outstanding principal balance of construction loans and loans involving accounts receivable and inventory financing:

a. Regional Administrator.
b. Deputy Regional Administrator.
c. Assistant Regional Administrator/F&I.
d. District Director.
e. Deputy District Director.
f. Assistant District Director for F&I.
g. Chief, Financing, D/O (on fully undisbused loans).
h. Supervisory Loan Specialist, D/O (on fully undisbursed loans).

SBA may, as it deems appropriate, by published notice in the **Federal Register**, grant to or remove from any individual SBA employee in a regional, district, or branch office, based on education, training, or experience, the authority to approve service charges by participating lenders, according to the above paragraph.

Section C—Section 7(a)(13) Loan Approval Authority

1. Loans to a State Development Company (Small Business Investment Act) (SBI Act). To approve or decline loans to a state development company not exceeding the following amounts (SBA share):

	Dollars
a. Regional Administrator	(1)
b. Deputy Regional Administrator	(1)
With concurrence in at least one prior recommendation:	
c. Assistant Regional Administrator/F&I	750,000
d. District Director	750,000
e. Deputy District Director for F&I	750,000
f. Assistant District Director for F&I	750,000
g. Chief, Financing, D/O	750,000

[1] Unlimited.

SBA may, as it deems appropriate, increase, decrease, or set the level of authority to approve or decline loans to state development companies for any individual SBA employee in a regional, district, or branch office, based on education, training, or experience, by published notice in the **Federal Register**.

2. Loans to a Local Development Company (SBI Act). To approve or decline loans to a local development company not exceeding the following amounts (SBA share) for each small business concern being assisted, within the project cost limitations shown below:

Note: Project cost applies to the cumulative SBA assistance to a small business concern and its affiliates and not to the additional assistance on which the action is being taken.

	Dollars
a. Unlimited project cost:	
(1) Regional Administrator	1,000,000
b. Overall project cost not exceeding $2,500,000:	
(2) Assistant Regional Administrator/F&I	1,000,000
(3) District Director	1,000,000
(4) Deputy District Director	1,000,000
(5) Assistant District Director/F&I	1,000,000
(6) Chief, Financing, D/O	1,000,000
(7) Branch Manager	750,000

SBA may, as it deems appropriate, increase, decrease, or set the level of authority to approve or decline loans to local development companies for any individual SBA employee of a regional, district, or branch office, based on

education, training, or experience, by published notice in the **Federal Register**.

* * * * *

Part III—Other Financial and Guaranty Programs

Section A—Section 503/504 Debenture Guaranty Approval Authority (Small Business Investment Act)

1. Section 503/504 Certified Development Company Debenture Guaranty Approval Authority (SBI Act). To approve or decline guaranties of section 503 or section 504 debentures issued by certified development companies not exceeding the following amount (SBA share) for each small business being assisted, within the project cost limitations shown below:

Note: Project cost, as used in this part, means the sum of all financial assistance to the small business concern and its affiliates for the construction project under consideration, not just that portion on which the 503/504 debenture guaranty action is being taken.

	Dollars
a. Unlimited project cost:	
(1) Regional Administrator	Unlimited
b. Overall project cost not exceeding $3,000,000:	
(2) ARA/F&I	1,000,000
(3) District Director	1,000,000
(4) Deputy District Director	1,000,000
(5) ADA/F&I	1,000,000
(6) Branch Managers	750,000
c. Overall project cost not exceeding $1,500,000:	
(7) Chief, Financing, D/O	750,000
(8) Assistant Branch Managers/F&I	500,000

SBA may, as it deems appropriate, increase, decrease, or set the level of authority to approve or decline guaranties of section 503 or section 504 debentures issued by certified development companies for any individual SBA employee in a regional, district, or branch office, based on education, training, or experience, by published notice in the **Federal Register**.

Section B—Other 503 Authority

1. Participation Agreements. To decline to enter into participation agreements with lenders:
a. Regional Administrator.
b. Deputy Regional Administrator.
c. Assistant Regional Administrator/F&I.
d. District Director.
e. Deputy District Director.
f. Assistant District Director/F&I.

2. Loan Authorizations.
a. To execute written loan authorizations:
(1) Regional Administrator.
(2) Deputy Regional Administrator.
(3) Assistant Regional Administrator/F&I.
(4) District Director.
(5) Deputy District Director.
(6) Assistant District Director/F&I.
(7) Chief, Financing, D/O.
(8) Branch Managers.
(9) Assistant Branch Managers/F&I.

SBA may, as it deems appropriate, grant to or remove from any SBA employee in a regional, district, or branch office, based upon education, training, or experience, the authority to execute written loan authorizations, by notice published in the **Federal Register**.

b. To cancel, reinstate, modify, and amend authorizations:
(1) Regional Administrator.
(2) Deputy Regional Administrator.
(3) Assistant Regional Administrator/F&I.
(4) District Director.
(5) Deputy District Director.
(6) Assistant District Director/F&I.
(7) Chief, Financing, D/O (before initial disbursement).
(8) Branch Managers.
(9) Assistant Branch Managers/F&I.

SBA may, as it deems appropriate, grant to or remove from any individual SBA employee in a regional, district, or branch office, based upon education, training, or experience, the authority to cancel, reinstate, modify, and amend authorizations, by published notice in the **Federal Register**.

3. Disbursement Period Extensions. To extend disbursement periods:
a. Regional Administrator.
b. Deputy Regional Administrator.
c. Assistant Regional Administrator/F&I.
d. District Director.
e. Deputy District Director.
f. Assistant District Director/F&I.
g. Chief, CED, D/O (on wholly undisbursed loans).
h. Chief, Financing, D/O (on wholly undisbursed loans).
i. Branch Managers.
j. Assistant Branch Managers/F&I.

SBA may, as it deems appropriate, by published notice in the **Federal Register**, grant to or remove from any individual SBA employee in a regional, district, or branch office, based upon education, training, or experience, the authority to extend disbursement periods.

Section C—Surety Guaranty

1. To guarantee sureties against a portion of the losses resulting from the breach of bid, payment, or performance bonds on contracts, not to exceed the following amounts:

	($)
a. Regional Administrator	1,250,000
b. Deputy Regional Administrator	1,250,000
c. Senior Surety Bond Guarantee Specialist	500,000
d. Surety Bond Officer	500,000

SBA may, as it deems appropriate, grant to or remove from any individual SBA employee in a regional, district, or branch office, based on education, training, or experience, the authority to guarantee sureties against a portion of the losses resulting from the breach of bid, payment, or performance bonds on contracts, by notice published in the **Federal Register**.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-CE-26-AD; Amdt. 39-8125; AD 92-01-02]

Airworthiness Directives; Fairchild Aircraft SA226 and SA227 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to Fairchild Aircraft SA226 and SA227 series airplanes. This action requires a modification to the parking brake system and recurring inspections of certain landing gear brake system components. Wheel brake system malfunctions have occurred on several of the affected airplanes where regular brake system maintenance had been performed. The actions specified by this AD are intended to prevent wheel brake system malfunctions that could result in a fire in the brake area or possible airplane collision during landing.

DATES: Effective January 16, 1992. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 16, 1992.

ADDRESSES: Fairchild Aircraft Service Bulletin (SB) No. 227-32-017 and SB No. 226-32-049, both dated November 14, 1984, and B.F. Goodrich Service Letter (SL) No. 1498, dated October 26, 1989, that are discussed in this AD may be obtained from the Fairchild Aircraft Corporation, P.O. Box 790490, San Antonio, Texas 78279-0490 and B.F. Goodrich Aircraft Wheels and Brakes, P.O. Box 340, Troy, Ohio 45373. This information may also be examined at the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Werner Koch, Aerospace Engineer, Fort Worth Airplane Certification Office, Fort Worth, Texas 76193-0150; Telephone (817) 624-5163.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD that is applicable to certain Fairchild SA226 and SA227 series airplanes was published in the **Federal Register** on May 24, 1991 (56 FR 23817). The action proposed a modification to the parking brake system and recurring inspections of certain landing gear brake system components in accordance with the instructions and criteria in Fairchild Service Bulletin (SB) No. 227-32-017 or Fairchild SB No. 226-32-049, both dated November 14, 1984, whichever is applicable, and B.F. Goodrich Service Letter No. 1498, dated October 26, 1989. .

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the four comments received.

One of the commenters feels that aviation safety would be enhanced by the implementation of the actions of the proposed AD.

Two of the four commenters state that the FAA's determination of 1 hour to perform the proposed AD is underestimated. The manufacturer (Fairchild) estimates that it would realistically take 6 hours to complete the proposed action. The FAA concurs and has rewritten the cost information paragraph in the preamble of the AD accordingly. The actual AD remains unchanged based on this comment.

Three of the four commenters feel that the 50-hour time-in-service (TIS) compliance time to modify the parking brake system is unrealistic and will inadvertently ground a number of the affected airplanes because of the utilization rates of the fleet. For example, an owner may operate 10 of the affected airplanes with an average daily utilization rate of 7 hours TIS a day. Using the revised cost information specified above and the example presented, the operator could bring only 7 of the 10 airplanes in compliance with the proposed AD if he found a maintenance shop that worked seven days a week. In this scenario, three of the airplanes would be grounded until compliance was obtained. The FAA concurs that the compliance time is unrealistic and has determined that 90 calendar days would allow all owners to modify the parking brake without inadvertently grounding their airplanes while still maintaining the same level of safety. The AD has been rewritten accordingly.

Two of the four commenters state that neither the initial nor the repetitive inspections for brake wear on airplanes that are equipped with B.F. Goodrich brakes, part number 2-1203-3, should be covered by this AD action because it would be covered through an operators continuous airworthiness maintenance program. The FAA does not concur and has determined that the inspections are necessary because of the unique design and characteristics of the Goodrich brake assembly. It is common for the brake lining to warp inward or upward toward the brake rotor at the leading and training edges relative to the direction of the rotation of the rotor. This warping is the result of the force caused by the pistons on both ends of the carriers during braking. Warping induces wear at the forward and aft ends of the brake lining pads that is not easily detected through regulator maintenance procedures. As the forward and aft edges of the lining wear very thin, the piston insulators do not emerge straight from the piston cylinders. When the brakes are released, the pistons, which have become cocked in the cylinders, will not relax back into the cylinders and dragging or locked brake condition occurs. In order to avoid this situation, strict adherence to B.F. Goodrich Service Letter (SL) No. 1498, dated October 26, 1989, must be followed. B.F. Goodrich SL No. 1498 identifies specific measurement locations and amplitudes that are not covered through general maintenance. The FAA has determined that the initial inspection can be relieved from 50 hours TIS to 100 hours TIS and the repetitive inspection interval can be relieved from 200 hours TIS to 250 hours TIS to allow maximum flexibility for the operators to accomplish these inspections at other regularly scheduled inspections. The FAA has determined that the same level of aviation safety will be obtained by this change. The AD has been rewritten accordingly.

After reviewing all available information and careful consideration of the comments described above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for the changes described above as a result of the comments and minor editorial corrections. These minor changes and corrections will not change the intended meaning of the AD nor add any additional burden upon the public than was already proposed.

It is estimated that 330 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 6 hours per airplane to accomplish the required action, and that the average labor rate is approximately $55 an hour. Parts cost approximately $500 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $273,900.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1), is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

VOL 56 ISS 244 DEC 19 1991 UMI

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

92-01-02 **Fairchild Aircraft** (formerly Swearingen): Amendment 39-8125; Docket No. 91-CE-28-AD.

Applicability: Model SA226-T airplanes (Serial numbers (S/N) T201 through T275, and T277 through T291), Model SA226-T(B) airplanes (S/N T(B)276, and T(B)292 through T(B)417), Model SA226-AT airplanes (S/N AT001 through AT074), Model SA226-TC airplanes (S/N TC201 through TC419), Model SA227-TT airplanes (S/N TT421 through TT555), Model SA227-AT airplanes (S/N AT423 through AT599), and Model SA227-AC airplanes (S/N AC406, AC415, AC416, and AC420 through AC599), certificated in any category.

Compliance: Required as indicated, unless already accomplished.

To prevent brake system malfunctions that could result in a fire in the brake area or possible airplane collision during landing, accomplish the following:

(a) Within the next 90 calendar days after the effective date of this AD, modify the parking brake system in accordance with the instructions in Fairchild Aircraft Service Bulletin (SB) No. 227-32-017 and SB No. 226-32-049, both dated November 14, 1984, as applicable.

(b) On airplanes equipped with B.F. Goodrich brakes, part number 2-1203-3, within the next 100 hours TIS after the effective date of this AD, and thereafter at intervals not to exceed 250 hours TIS, inspect and conduct measurements in accordance with the instructions in B.F. Goodrich Service Letter No. 1498, dated October 26, 1989. If wear measure exceeds the maximum allowed in accordance with the criteria in B.F. Goodrich Service Letter No. 1498, dated October 26, 1989, prior to further flight, overhaul or replace the brakes in accordance with the instructions in the applicable maintenance manual.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the initial or repetitive compliance times that provides an equivalent level of safety may be approved by the Manager, Fort Worth Airplane Certification Office, Fort Worth, Texas 76193-0150. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Fort Worth Airplane Certification Office.

(e) The inspections and modifications required by this AD shall be in accordance with Fairchild Aircraft Service Bulletin (SB) No. 227-32-017 and SB No. 226-32-049, both dated November 14, 1984, and B.F. Goodrich Service Letter (SL) No. 1498, dated October 26, 1989. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Fairchild Aircraft Corporation, P.O. Box 790490, San Antonio, Texas 78279-0490 and B.F. Goodrich Aircraft Wheels and Brakes, P.O. Box 340, Troy, Ohio 45373. Copies may be inspected at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 1100 L Street, NW., room 8401, Washington, DC.

(f) This amendment (39-8125) becomes effective on January 16, 1992.

Issued in Kansas City, Missouri, on December 12, 1991.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 91-AEA-14]

Revocation of Transition Area; Stone Harbor, NJ

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; correction.

SUMMARY: This action corrects an error in the final rule describing the base of the Stone Harbor, NJ, Transition Area which is being revoked. The final rule was published in the **Federal Register** on October 23, 1991 (56 FR 54784), Airspace Docket No. 91-AEA-14.

EFFECTIVE DATE: 0901 U.T.C. December 19, 1991.

FOR FURTHER INFORMATION CONTACT: Mr. Curtis L. Brewington, Airspace Specialist, System Management Branch, AEA-530, F.A.A. Eastern Region, Fitzgerald Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553-0857.

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 91-25546, Airspace Docket No. 91-AEA-14, published on October 23, 1991 (56 FR 54784), revoked the 700 foot Transition Area at Stone Harbor, NJ. An error was discovered in the base of the airspace being revoked. This action corrects that error.

Correction to Final Rule

Accordingly, pursuant to the authority delegated to me, the base of the transition area being revoked at Stone Harbor, NJ, as published in the **Federal Register** on October 23, 1991 (Federal Register Document 91-25546; page 54784, columns 2 and 3), is corrected as follows: Replace all occurrences of "700 foot Transition Area" with "1,200 foot Transition Area".

Issued in Jamaica, New York, on November 5, 1991.

Gary W. Tucker,

Manager, Air Traffic Division.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-NM-129-AD; Amdt. 39-8114; AD 91-26-03]

Airworthiness Directives; Airbus Industrie Model A300, A310, and A300-600 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Airbus Industrie Model A300, A310, and A300-600 series airplanes, which requires a one-time visual inspection of BF Goodrich slides and slide raft lanyard assemblies, and replacement of release pin lanyards, if necessary. This amendment is prompted by recent reports of breakage of a release pin lanyard, an unauthorized modification of a release pin assembly, and incorrect installation of release pins. The actions specified in this AD are intended to prevent non-deployment of the emergency evacuation slides and/or slide rafts during an emergency evacuation.

DATES: Effective January 27, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 27, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Greg Holt, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2140; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an

airworthiness directive (AD) that is applicable to certain Airbus Industrie Model A300, A310, and A300-600 series airplanes, was published in the **Federal Register** on July 22, 1991 (56 FR 33396). That action proposed to require a one-time visual inspection of BF Goodrich slides and slide raft lanyard assemblies, and replacement of release pin lanyards, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Both commenters supported the proposal.

The manufacturer, Airbus Industrie, in its comments to the proposal, clarified that the incident involving the incorrect installation of release pins, which was addressed in the preamble to the proposal, had occurred during maintenance.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 113 airplanes of U.S. registry will be affected by this AD, that it will take approximately 1 work hour per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $6,215.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

91-26-03. **Airbus Industrie:** Amendment 39-8114. Docket No. 91-NM-129-AD.

Applicability: Model A300, A310, and A300-600 series airplanes equipped with BF Goodrich emergency evacuation slides and/or slide rafts, certificated in any category.

Compliance: Required as indicated, unless previously accomplished. To prevent non-deployment of the emergency evacuation slides and/or slide rafts during an emergency evacuation, accomplish the following:

(a) Within 120 days after the effective date of this AD, accomplish the following in accordance with Airbus Service Bulletins A300-25-434 (for Model A300 series airplanes), A300-25-6028 (for Model A300-600 series airplanes), and A310-25-2054 (for Model A310 series airplanes), all dated October 22, 1990, as applicable:

Note: These service bulletins reference BF Goodrich Service Bulletin 25-230, dated July 20, 1990, for additional instructions.

(1) Perform a visual inspection of release pin lanyard assemblies for release pins in the early configuration, unauthorized modifications, and incorrect installation and operation. Prior to further flight, replace release pin lanyards in the early configuration, unauthorized modifications, or incorrectly installed or damaged release pin lanyards, if found.

(2) Perform a visual inspection of lanyard cables for evidence of fraying. If frayed lanyards are found, replace the lanyards prior to further flight.

(b) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

(d) The inspections and replacements required by this AD shall be done in accordance with Airbus Service Bulletins A300-25-434 (for Model A300 series airplanes), A300-25-6028 (for Model A300-600 series airplanes), and A310-25-2054 (for Model A310 series airplanes), all dated October 22, 1990. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(e) This amendment (39-8114), AD 91-26-03, becomes effective January 27, 1992.

Issued in Renton, Washington, on December 2, 1991.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 91-NM-243-AD; Amendment 39-8117; AD 91-26-06]

Airworthiness Directives; Airbus Industrie Model A320 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to Airbus Industrie Model A320 series airplanes. This action requires replacement of a certain relay, which cuts off the power supply to the SEC 2 computer and one of the motors for the trimmable horizontal stabilizer (THS) if a discrepancy exists between the commanded trim position and the position calculated by the SEC 2 computer. This amendment is prompted by an incident in which the relay froze in the energized position. The actions specified in this AD are intended to prevent reduced controllability of the airplane due to freezing of the relay in the energized state which, when coupled with an erroneous command from the SEC 2 computer, could result in a runaway of the THS.

DATES: Effective January 3, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 3, 1992.

VOL
56

Comments for inclusion in the Rules Docket must be received on or before February 18, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 91-NM-243-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

The service information referenced in this AD may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Greg Holt, Aerospace Engineer, Standardization Branch, ANM-113; FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2140; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION: The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority of France, recently notified the FAA that an unsafe condition may exist on certain Airbus Industrie Model A320 series airplanes. The French DGAC advises that, on a Model A320 series airplane, relay 36 CE 3 froze in the energized position. When both ELAC 1 and ELAC 2 computers are deactivated from the pitch mode, this relay energizes the SEC 2 computer in the pitch mode and supplies power to motor 3 of the trimmable horizontal stabilizer (THS). If a discrepancy exists between the commanded trim position and the position calculated by the SEC 2 computer, the SEC 2 computer deenergizes relay 36 CE 3 and cuts off the power supply to motor 3 of the THS. Should the relay 36 CE 3 freeze in the energized position, the power supply could no longer be cut off which could subsequently result in a runaway stabilizer. This condition, if not corrected, could result in reduced controllability of the airplane due to freezing of relay 36 CE 3 in the energized state which, when coupled with an erroneous command from the SEC 2 computer, could result in the disconnection of ELAC 1 and ELAC 2 computers and a runaway of the THS.

Airbus Industrie has issued All Operator Telex (AOT) 27-03, Revision 3, dated June 12, 1991, which describes procedures for the replacement of relay 36 CE 2, which cuts off the power supply to motor 3 of the THS. The procedures described relate only to airplanes through manufacturer's serial number 109; the manufacturer has installed a redesigned electrical control for motor 3 of the THS that precludes uncommanded trim movements on airplanes with manufacturer's serial numbers 110 and subsequent. The French DGAC has classified this AOT as mandatory and has issued French Airworthiness Directive 91-119-017(B)R1 in order to assure the airworthiness of these airplanes in France.

This airplane model is manufactured in France and type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to a bilateral airworthiness agreement, the French DGAC has kept the FAA totally informed of the above situation. The FAA has examined the findings of the French DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since the unsafe condition described is likely to exist or develop on other airplanes of the same type design registered in the United States, this AD is being issued to prevent loss of controllability of the airplane due to freezing of relay 36 CE 3 in the energized state which, when coupled with an erroneous command from the SEC 2 computer, could result in the disconnection of ELAC 1 and ELAC 2 computers and a runaway of the THS. This AD requires the replacement of relay 36 CE 3, which cuts off the power supply to motor 3 of the THS. The required actions are to be accomplished in accordance with the All Operator Telex previously described.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES.** All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 91-NM-243-AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

91-26-06. **Airbus Industrie:** Amendment 39-8117. Docket 91-NM-243-AD.

Applicability: Model A320 series airplanes through manufacturer's serial number 109 on which Modification 21659 (specified in Airbus Industrie Service Bulletin A320-27-1012, Revision 2, dated September 23, 1991) has not been accomplished, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced controllability of the airplane, due to freezing of relay 36 CE 3 in the energized state which, when coupled with an erroneous command from the SEC 2 computer could result in the disconnection of ELAC 1 and ELAC 2 computers and a runaway of the trimmable horizontal stabilizer (THS), accomplish the following:

(a) Install a new STP1 relay (P/N D00030021001000) having a date code newer than or equal to 88/41 A, in accordance with Airbus Industrie All Operator Telex 27-03, Revision 3, dated June 12, 1991, at the applicable time indicated in subparagraph (a)(1), (a)(2), or (a)(3) of this AD.

(1) For airplanes that have accumulated more than 1,400 landings since retrofitted with SEC part number (P/N) B372ABM0606/B372BAM0404: Within 200 landings after the effective date of this AD.

(2) For airplanes that have accumulated at least 800 landings but not more than 1,400 landings since retrofitted with SEC P/N B372ABM0606/B372BAM0404: Prior to the accumulation of 1,600 total landings since retrofitted with SEC P/N B372ABM0606/B372BAM0404.

(3) For airplanes that have accumulated less than 800 landings since retrofitted with SEC P/N B372ABM0606/B372BAM0404: Within 800 landings after the effective date of this AD.

(b) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113. The request shall be forwarded through an FAA Principal Avionics Inspector, who may concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The installation required by this AD shall be done in accordance with Airbus Industrie All Operator Telex 27-03, Revision 3, dated June 12, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(e) This amendment (39-8117), AD 91-26-06, becomes effective January 3, 1992.

Issued in Renton, Washington, on December 3, 1991.

Jim Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-NM-140-AD; Amendment 39-8115; AD 91-26-04]

Airworthiness Directives; British Aerospace Model ATP Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain British Aerospace Model ATP series airplanes, which requires an initial modification and repetitive applications of corrosion inhibitor to the nose landing gear (NLG) main fitting, and an eventual final modification of the NLG. This amendment is prompted by recent reports of corrosion found on the NLG main fitting, under the steering cuff upper bearing bush. The actions specified by this AD are intended to prevent reduced structural integrity of the NLG.

DATES: Effective January 27, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 27, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041-0414. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. William Schroeder, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2148; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain British Aerospace Model ATP series airplanes, was published in the **Federal Register** on August 30, 1991 (56 FR 42964). That action proposed to require an initial modification and repetitive applications of corrosion inhibitor to the nose landing gear (NLG) main fitting, and an eventual final modification of the NLG.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supported the rule.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 6 airplanes of U.S. registry will be affected by this AD, that it will take approximately 8 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $2,640.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will

VOL 56 ISS 244 DEC 19 1991 UMI

not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

91-26-04. British Aerospace: Amendment 39-8115. Docket No. 91-NM-140-AD.

Applicability: Model ATP series airplanes, equipped with nose landing gear (NLG) part number 201049001 or 201278001/002, pre Dowty Aerospace Gloucester modification (c)AC11432 standard, certificated in any category.

Compliance: Required as indicated, unless previously accomplished.

To prevent reduced structural integrity of the NLG, accomplish the following:

(a) Within 60 days after the effective date of this AD, modify the NLG, treat the main fitting of the NLG with corrosion inhibitor, and externally seal the cover sub-assembly in accordance with British Aerospace Service Bulletin ATP-32-33, dated March 1, 1991.

Note: The British Aerospace Service Bulletin references Dowty Aerospace Gloucester Service Bulletin 200-32-143, dated February 20, 1991.

(b) Repeat the application of corrosion inhibitor at intervals not to exceed 6 months from the previous application, in accordance with British Aerospace Service Bulletin ATP-32-33, dated March 1, 1991.

(c) Install Dowty Aerospace Gloucester modification (c)AC11432 on all pre-modification (c)AC11432 NLG's in accordance with British Aerospace Service Bulletin ATP-32-33, dated March 1, 1991, at the later of the times specified in subparagraphs (c)(1) and (c)(2), below:

(1) Prior to the accumulation of 6,000 landings on the NLG since new, or within 3 years from the first flight on the NLG, whichever occurs first; or

(2) Within 12 months after the effective date of this AD.

Note: The British Aerospace Service Bulletin references Dowty Aerospace Gloucester Service Bulletin 200-32-144, dated February 20, 1991, which describes modification (c)AC11432.

(d) Installation of Dowty Aerospace Gloucester modification (c)AC11432 constitutes terminating action for the repetitive applications of corrosion inhibitor required by paragraphs (a) and (b) of this AD.

(e) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Standardization Branch.

(f) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

(g) The modifications and application of corrosion inhibitor required by this AD shall be done in accordance with British Aerospace Service Bulletin ATP-32-33, dated March 1, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041-0414. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(h) This amendment (39-8115), AD 91-26-04, becomes effective January 27, 1992.

Issued in Renton, Washington, on December 2, 1991.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR PART 71

[Airspace Docket No. 91-AGL-7]

Transition Area Establishment; Cook Municipal Airport, Cook, MN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this action is to establish the Cook, MN, transition area to accommodate a new nondirectional radio beacon (NDB) Runway 31 Standard Instrument Approach Procedure (SIAP) to Cook Municipal Airport. The SIAP is predicated on a non-federal NDB located on the airport. This action lowers the base of controlled airspace from 1200 to 700 feet above the surface in the vicinity of Cook Municipal Airport. Concurrent with the SIAP publication, the operating status of the airport will change from Visual Flight Rules (VFR) to Instrument Flight Rules (IFR). The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument conditions from other aircraft operating under visual weather conditions in controlled airspace.

EFFECTIVE DATE: 0901 UTC, March 5, 1992.

FOR FURTHER INFORMATION CONTACT: Douglas F. Powers, Air Traffic Division, System Management Branch, AGL-530, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018; telephone (312) 694-7568.

SUPPLEMENTARY INFORMATION:

History

On Friday, August 16, 1991, the Federal Aviation Administration (FAA) proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish a transition area near Cook Municipal Airport, Cook, MN (56 FR 40814).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6G dated September 4, 1990.

The Rule

This amendment to part 71 of the Federal Aviation Regulations establishes a transition area near Cook, MN. The transition area is being established to accommodate a new NDB runway 31 SIAP to Cook Municipal Airport, Cook, MN. The SIAP is predicated on a non-federal NDB located on the airport. This action lowers the base of controlled airspace from 1200 to 700 feet above the surface in the vicinity of Cook Municipal Airport. Concurrent with the SIAP publication, the operating status of the airport will change from VFR to IFR.

The development of a new SIAP requires that the FAA establish the designated airspace to ensure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700-foot controlled airspace.

Aeronautical maps and charts will reflect the defined area which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 71 of the Federal Aviation Regulations (14 CFR part 71) is amended as follows:

PART 71—[AMENDED]

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Cook, MN [New]

That airspace extending upward from 700 feet above the surface within a 8.5 mile radius of Cook Municipal Airport (lat. 47°49'30" N., long. 92°41'30" W.), Cook, MN.

Issued in Des Plaines, Illinois on November 22, 1991.

Teddy W. Burcham,

Manager, Air Traffic Division.

14 CFR Part 71

[Airspace Docket No. 91-AGL-6]

Transition Area Establishment; Belle Fourche, SD

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this action is to establish the Belle Fourche, SD, transition area to accommodate a new Nondirectional Radio Beacon (NDB) runway 32 Standard Instrument Approach Procedure (SIAP) to Belle Fourche Municipal Airport. The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument conditions from other aircraft operating under visual weather conditions in controlled airspace.

EFFECTIVE DATE: 0901 UTC, March 5, 1992.

FOR FURTHER INFORMATION CONTACT: Douglas F. Powers, Air Traffic Division, System Management Branch, AGL-530, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018; telephone (312) 694-7568.

SUPPLEMENTARY INFORMATION:

History

On Thursday, September 26, 1991, the Federal Aviation Administration (FAA) proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish a transition area airspace near Belle Fourche, SD (56 FR 48768).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6G dated September 4, 1990.

The Rule

This amendment to part 71 of the Federal Aviation Regulations establishes a transition area airspace near Belle Fourche, SD, to accommodate a new NDB runway 32 SIAP to Belle Fourche Municipal Airport. The SIAP is predicated on a non-federal NDB located on the airport. This action lowers the base of controlled airspace to 1200 and 700 feet above the surface within the vicinity of Belle Fourche Municipal Airport. Concurrent with the SIAP publication, the operating status of the airport will change from Visual Flight Rules (VFR) to Instrument Flight Rules (IFR).

The development of a SIAP requires that the FAA establish the designated airspace to ensure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700-foot controlled airspace.

Aeronautical maps and charts will reflect the defined area which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 71 of the Federal Aviation Regulations (14 CFR part 71) is amended as follows:

PART 71—[AMENDED]

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. App. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Belle Fourche, SD [New]

That airspace extending upward from 700 feet above the surface within a 9.5 mile radius of Belle Fourche Municipal Airport (lat. 44°44'28" N., long. 103°51'40" W.) and that airspace extending upward from 1,200 feet above the surface within a 13 mile radius of Belle Fourche Municipal Airport; excluding the portion which overlies the Spearfish, SD, 700 foot transition area and the portion which overlies the Rapid City, SD, 1,200 foot transition area.

Issued in Des Plaines, Illinois on November 22, 1991.

Teddy W. Burcham,

Manager, Air Traffic Division.

[FR Doc. 91-30268 Filed 12-18-91; 8:45 am]

BILLING CODE 4910-13-M

VOL 56 ISS 244 DEC 19 1991 UMI

14 CFR Part 97

[Docket No. 26708; Amdt. No. 1470]

Standard Instrument Approach Procedures: Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference-approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, US Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description on each SIAP is contained in the appropriate FAA Form 8260 and the National Flight Data Center (FDC)/Permanent (P) Notices to Airmen (NOTAM) which are incorporated by reference in the amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction of charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The Provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

The Rule

This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes SIAPs. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained in the content of the following FDC/P NOTAM for each SIAP. The SIAP information in some previously designated FDC/Temporary (FDC/T) NOTAMs is of such duration as to be permanent. With conversion to FDC/P NOTAMs, the respective FDC/T NOTAMs have been cancelled.

The FDC/P NOTAMs for the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these chart changes to SIAPs by FDC/P NOTAMs, the TERPs criteria were applied to only these specific conditions existing at the affected airports.

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. All SIAP amendments in this rule have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for all these SIAP amendments requires making them effective in less than 30 days.

Further, the SIAPs contained in this amendment are based on the criteria contained in the US Standard for Terminal Instrument Approach Procedures (TERPs). Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making these SIAPs effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (Air), Standard instrument approaches, Weather.

Issued in Washington, DC on December 6, 1991.

Thomas C. Accardi,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. App. 1348, 1354(a), 1421 and 1510; 49 U.S.C. 106(g) (revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

[Order No. 530; Docket No. 21222–1208]

RIN 0625–AA04

Foreign-Trade Zones in the United States; Correction

AGENCY: Foreign-Trade Zones Board, Commerce.

ACTION: Correction to final regulations.

SUMMARY: This document contains corrections to the final regulations, which were published Tuesday, October 8, 1991 (56 FR 50790). The regulations related to the authorization and regulation of foreign-trade zones and zone activity in the United States.

EFFECTIVE DATE: November 7, 1991.

FOR FURTHER INFORMATION CONTACT: John J. Da Ponte, Jr., Executive Secretary, Foreign-Trade Zones Board, room 3716, U.S. Department of Commerce, Pennsylvania Avenue and 14th Street NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

The final regulations that are the subject of these corrections, are comprehensive and constitute a complete revision, replacing the present version of 15 CFR part 400.

Need for Correction

As published, the final regulations contain errors which may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication on October 8, 1991 of the final regulations, which were the subject of FR Doc. 91–24130, is corrected as follows.

§ 400.28 [Corrected]

1. On page 50804, in the third column, in § 400.28, paragraph (a)(8), line three, the number "7" is corrected to read "17".

2. On page 50804, in the third column, in § 400.28, paragraph (a)(8), line seventeen, the number "7" is corrected to read "17".

Dated: December 13, 1991.

Dennis Puccinelli,

Acting Executive Secretary.

BILLING CODE 3510–DS–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 510

Animal Drugs, Feeds, and Related Products; Change of Sponsor Name and Address

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect a change of sponsor name and address from Biomed Laboratories to Med-Pharmex, Inc., Biomed Laboratories, 325 East Arrow Hwy., suite 502, San Dimas, CA 91773.

EFFECTIVE DATE: December 19, 1991.

FOR FURTHER INFORMATION CONTACT: Benjamin Puyot, Center for Veterinary Medicine (HFV–130), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–295–8646.

SUPPLEMENTARY INFORMATION: Biomed Laboratories, 438 West Arrow Hwy., Unit 30, San Dimas, CA 91773, has advised FDA of a change of sponsor name and address from Biomed Laboratories to Med-Pharmex, Inc., Biomed Laboratories, 325 East Arrow Hwy., suite 502, San Dimas, CA 91773. The agency is amending the regulations in 21 CFR 510.600 (c)(1) and (c)(2) to reflect this change.

List of Subjects in 21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 510 is amended as follows:

PART 510—NEW ANIMAL DRUGS

1. The authority citation for 21 CFR part 510 continues to read as follows:

Authority: Secs. 201, 301, 501, 502, 503, 512, 701, 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 331, 351, 352, 353, 360b, 371, 376).

VOL 56 ISS 244 DEC 19 1991 UMI

2. Section 510.600 is amended in the table in paragraph (c)(1) by removing the entry for "Biomed Laboratories," and by alphabetically adding a new entry "Med-Pharmex, Inc., Biomed Laboratories," and in the table in paragraph (c)(2) in the entry for "051259" by revising the sponsor name and address to read as follows:

§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.

* * * * *

(c) * * *

(1) * * *

Firm name and address	Drug labeler code
* * * * *	
Med-Pharmex, Inc., Biomed laboratories, 325 East Arrow Hwy., suite 502, San Dimas, CA 91773	051259

BILLING CODE 4160-01-M

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 223

Sale and Disposal of National Forest System Timber; Log Export and Substitution Restriction Exceptions

AGENCY: Forest Service, USDA.

ACTION: Final rule.

SUMMARY: On August 20, 1990, the President signed into law the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620 *et seq.*) ("Act"). The Act directs the Secretary of Agriculture to prescribe new regulations to implement this Act on National Forest System Lands. The provisions in this rulemaking concern NFS lands west of the 100th meridian in the contiguous 48 states. This rulemaking implements certain provisions of the Act. This rule continues the existing reporting procedures applicable to timber sale contracts awarded prior to August 20, 1990; amends existing rules for sourcing area disapproval and review procedures; and establishes application procedures for persons applying for a share of the limited amount of unprocessed timber originating from National Forest System lands in the State of Washington that is exempted from the prohibition against indirect substitution.

EFFECTIVE DATE: This rule is effective December 19, 1991.

FOR FURTHER INFORMATION CONTACT: Ronald D. Lewis, Timber Management Staff, Forest Service, USDA, P.O. Box 96090, Washington, DC 20090-6090. (202) 475-3755.

SUPPLEMENTARY INFORMATION:

Background

The Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620 *et seq.*) ("Act") was enacted on August 20, 1990. The Department published an interim rule on November 20, 1990 (55 FR 48572) to implement portions of the Act required to be implemented before notice and comment could occur. The interim rule outlined the sourcing area application and approval procedures, detailed the certification procedures for non-manufacturers, sourcing area applicants, and persons with historic export quotas, extended the current surplus species determinations until new determinations can be made, and included definitions pertaining to the provisions in the interim rule. The interim rule asked for comments. The comment period for the interim rule closed on December 20, 1990. On January 29, 1991, the Department published two proposed rules, a comprehensive rule (56 FR 3354) and a rule of more limited scope to implement provisions required to be implemented before the statutory deadline for the comprehensive rule (56 FR 3375). The comment period for the comprehensive rule closed March 15, 1991. The final comprehensive rule will include all regulations published pertaining to the Act.

The comment period for the rule that is more limited in scope closed on February 28, 1991. This rulemaking finalizes the proposed rule of limited scope. This rulemaking:

1. Continues the timber export and substitution reporting procedures required under contracts awarded prior to August 20, 1990;

2. Establishes revised procedures for the disapproval of sourcing area applications and the review of sourcing areas; and

3. Establishes procedures for a person who exports private timber to acquire a limited amount of unprocessed timber originating from National Forest System lands within the State of Washington.

Comments received on the proposed rule of limited scope (56 FR 3375) have been given full consideration. Comments received on the interim rule pertinent to the subjects in this rule were also given full consideration. The Department has made changes to the rule, as proposed, as a result of some of the comments.

Eleven comments were received on the proposed rule and four comments were received on the interim rule that pertain to this proposed rule. Twelve comments were from timber purchasers or timber industry representatives, one comment was from an individual, and two comments were from public interest groups. All responses came from the West—ten from Washington, three from Idaho, and two from Montana.

The following summarizes the relevant comments and suggestions received and the Department's response to these in the final rule.

Comments and Responses by Section of the Proposed Rule

Section 223.48 Restrictions on Export and Substitution of Unprocessed Timber

The proposed rule proposed to amend paragraph (a) of § 223.48 to clarify that contracts awarded prior to August 20, 1990, the date of enactment, remain subject to the timber export and substitution rules at subpart D of part 223. The timber export and substitution reporting procedures required under these contracts remained the same, but paragraphs (a)–(c) were proposed to be redesignated. The proposed rule proposed to add a new paragraph (b) to direct that all contracts awarded on or after August 20, 1990, include a provision making such contracts subject to the new Act. The proposed rule also proposed to add a new paragraph (c) regarding the OMB clearance number for the information collection requirement contained in the rule.

Comment. One respondent expressed concern that contracts awarded prior to August 20, 1990, may incur additional reporting requirements over and above those required by the provisions of these contracts. This respondent suggested that those contract holders be compensated if additional reporting requirements are imposed by this rule. Another respondent stated that the rules in § 223.48 are redundant in that they are already required in all existing contracts.

Response. Contracts awarded prior to August 20, 1990, will continue to be subject only to the annual reporting requirements of the rules under subpart D, pursuant to section 497 of the Act. Section 223.48 of the proposed rule simply repeated the present reporting and recordkeeping requirements of prior contracts and proposed a new paragraph (b) to clarify that contracts awarded on or after August 20, 1990, shall be subject to the reporting and recordkeeping requirements of the new Act, pursuant to section 494 of the Act. Revised § 223.48 of the proposed rule was specifically written to maintain the distinction between contracts awarded prior to enactment of this Act and those awarded on or after enactment.

Comment. Two respondents stated that the regulations (both interim and proposed) provide that all contracts awarded on or after August 20, 1990, are subject to the Act, yet the Act provides that the old substitution rules govern until the regulations regarding substitution are finalized.

Response. Section 494 of the Act states that, unless otherwise stated, the Act is effective upon enactment. Subsection (a)(2)(A) of section 490 of the Act provides, with regard to direct substitution, that contracts entered into on or after August 20, 1990, but before the regulations implementing the Act are issued, are governed by the substitution rules in effect before the new regulations are issued (36 CFR part 223, subpart D). Subsection (b)(2)(D) of section 490 states, with regard to indirect substitution, that contracts entered into for timber from NFS lands in Washington State are governed by the substitution rules in effect before the new regulations are issued. Read together, sections 494 and 490 clearly indicate that the Act's provisions apply to contracts entered into on or after August 20, 1990, except with regard to the substitution provisions; with regard to direct substitution, contracts entered into between August 20, 1990, and the date that final regulations are issued are governed by the substitution rules in effect prior to issuance of the new regulations. Likewise, with regard to indirect substitution, contracts for timber on NFS lands in Washington State that are entered into between August 20, 1990, and the date that final regulations are issued are governed by the substitution rules in effect prior to issuance of the new regulations.

Comment. One respondent commented that timber sale contracts should be governed by rules which applied at the auction date, rather than the award date, because bidders presumably are familiar with and rely on rules in effect on the auction date. The respondent also stated that inequities might occur if new rules are adopted between the bid and award dates, particularly where there is a significant delay between the auction and award, or where new rules contain significant departures from prior rules.

Response. As noted above, subsection (a)(2)(A) of section 490 of the Act states that the old rules governing substitution apply to "a contract entered into between the purchaser and the Secretary" before the date final rules regarding substitution are issued. Subsection (b)(2)(D) of section 490 states that the old rules governing substitution apply to a "a contract entered into between the purchaser and the Secretary" concerning the Forest Service timber purchased in Washington State before the date that final rules regarding indirect substitution are issued. A bid is not a "contract entered into between a purchaser and the Secretary." Rather, a bid is an offer by the purchaser, which may be accepted or rejected by the Secretary. A contract is "entered into" when the Secretary accepts the bid in the award letter. Therefore, in accordance with the statutory language, the award date remains the date on which the new rules regarding substitution apply. For example, if a purchaser bid on a timber sale prior to August 20, 1990, but was not awarded the sale until after that date, the sale would be governed by the rules in effect after August 20, 1990.

Having considered the comments, the Department is adopting § 223.48 as proposed.

Section 223.191 Sourcing Area Disapproval and Review Procedures

General comments. Section 490(c) of the Act provides a limited exemption from the prohibitions against substitution for owners or operators of manufacturing facilities. If a person has a sourcing area approved by the Secretary, it is possible to purchase Federal timber from within the sourcing area and export private timber originating from outside of the sourcing area without violating the prohibitions against substitution. The procedures for submitting sourcing area applications are outlined in § 223.190 of the interim rule, published November 20, 1990 (55 FR 48579). Section 223.191 of the interim rule outlined the disapproval and review procedures (55 FR 48580). The proposed rule proposed to amend § 223.191 of the interim rule to provide more detail in the disapproval and review process for sourcing areas (56 FR 3376).

Comment: One respondent stated that there is confusion as to what constitutes a sourcing area. The respondent suggested that no sourcing area applications be acted upon until after the final rule is published and that the period for comment be extended until a clear meaning is published in a public notice.

Response. The definition of a sourcing area is found in § 490(c) of the Act. Section 223.190 of the interim rule (55 FR 48579) provided additional guidance with regard to the definition of a sourcing area. The Department believes that these provisions adequately address what constitutes a sourcing area.

Comment: One respondent expressed some confusion over the options available to an applicant whose applications has been disapproved. This respondent asked that these options be more clearly stated.

Response. The proposed rule provided an applicant whose sourcing area has been disapproved for failure to meet the geographically and economically separate test with the following phase out options: (1) Cease purchasing Federal timber from within the area disapproved within 15 months of the disapproval notice, as provided in the Act, and continue private log exporting from west of the 100th meridian; or (2) cease exporting private timber from within the sourcing area that would have been approved and continue purchasing Federal timber from within the area that was disapproved, subject to the 125 percent volume limitations provided by the Act during the first 15 months following the disapproval decision. An applicant whose sourcing area is disapproved, who chooses the second option, may begin purchasing Federal timber within the area when the choice is documented by a signed certification as described in paragraph (a)(2)(i).

In the final rule, paragraphs (a) and (b) of § 223.191 of the proposed rule have been consolidated into paragraphs (a) (1) and (2) and edited slightly to clarify these options. Paragraphs (a) (1) and (2) have been modified slightly from that in § 223.191 in the proposed rule to clarify the requirements for the phase-out of private timber exporting. Paragraph (a)(2)(i) is discussed later under "Certifications." Paragraphs (c) (1) and (2) of § 223.191 of the proposed rule have been redesignated as paragraphs (b)(1) (i) and (ii).

The interim rule (55 FR 48572), published November 20, 1990, and the proposed rule addressed in general the disposition of disapproved applications

VOL 56 ISS 244 DEC 19 1991 UMI

for sourcing areas that are submitted after December 20, 1990, or the disapproval upon review of previously disapproved applications. It is clear that section 490(c) of the Act is intended to provide for a reasonable transition period for persons purchasing unprocessed timber originating from Federal lands and also exporting unprocessed timber originating from private lands to modify their business practices to conform with the Act. Several statutory procedures tied to specific dates support this conclusion. Section 490(c) of the Act states that the prohibition against substitution shall not apply within a sourcing area approved by the Secretary if either a person has not exported unprocessed private timber from within the sourcing area in the previous 24 months or the 24-month requirement is waived by the Secretary based on certification by the person that export from within the area would cease by February 20, 1991. Section 490(c)(1) requires that the certification be submitted by November 20, 1990. The Act also states that the general prohibition against direct substitution during the application process does not apply to a person submitting an application within one month after the Secretary prescribed the procedures, or, by December 20, 1990. In other words, the exemptions from the prohibition against substitution apply only to initial applicants.

The choice for disapproved applicants provided in § 490(c)(4), either to export private timber and phase out of Federal timber purchasing, or to purchase Federal timber and phase out of exporting private timber from within the sourcing area that the Secretary would approve, flows from the initial exemptions from substitution. Because the exemptions from substitution do not apply to future applicants, neither would the phase-out process. With regard to the phase out of purchasing Federal timber, future applicants would not be exempted from the general prohibition against direct substitution, and so they would be in violation of the prohibition against substitution if phased out were granted. With regard to the phase out of exporting private timber within the area that would have been approved, not only would applicants not be exempted from the general prohibition against direct substitution, but also they could not receive a waiver from the prohibition against exporting in the sourcing area in the previous 24 months. These applicants would be in violation of both the general substitution provision and the provision prohibiting export within the sourcing area in the previous 24 months if a phase out period were granted. To allow either phase-out option to continue after the initial application period would contradict the express language of the Act to prohibit substitution. Phase-out options also will not be available to persons requesting review of a disapproved sourcing area. Providing a phase out in this instance also contradicts the intent of the Act and could result in a person attempting to extend the 15-month phase-out period by requesting a review of the disapproval. Accordingly, a new paragraph (a)(3) has been added to § 223.191 of the final rule to reflect this clarification. Future applicants or applicants for a sourcing area review will not be provided with an area that would have been approved by the Secretary. The determination of an area that would have been approved is included in the phase-out process in section 490(c)(4)(B) of the Act. Since the phase-out process does not apply to future applicants for a sourcing area or applicants requesting a review of a sourcing area, as explained previously, neither does the determination to the area that would have been approved.

Comment. One respondent asked that the rule clearly state that the deciding official must present the applicant with a map showing the area that would have been approved.

Response. The Department agrees. A new paragraph (c) has been added to § 223.191 of the final rule which states that the area determined by the deciding official which would have been approved shall be drawn on a map and presented to the applicant by the deciding official with the notice of disapproval of the area requested in the application.

Certifications. Subsection (c)(4) of section 490 of the Act permits a person whose sourcing area application has been disapproved, to phase out purchases of unprocessed Federal timber. Subsection (c)(4) also provides procedures for avoiding such purchasing phase-out if a person certifies that he/she will cease exporting private timber originating from within the sourcing area that would have been approved by the Secretary. Accordingly, the applicant has 90 days after receipt of the disapproved application to submit the certificate to cease exporting private timber in order to avoid the required phase-out of Federal timber purchases, pursuant to subsection (c)(4) of section 490 of the Act. The format for the certificate was presented in the proposed rule. In addition, paragraphs (b) (2) and (3) of § 223.191 of the proposed rule proposed to amend § 223.191 of subpart F, published in the interim rule on November 20, 1990 (55 FR 48572), to provide a detailed process for submission of the certificate. These paragraphs have been redesignated as (a)(2) (ii) and (iii) in the final rule.

Comment. Several respondents commented that the certification language should be modified to reflect that the individual signing the certification on behalf of a corporation is doing so in the capacity as an officer or agent of that corporation, not in a personal capacity. In addition, several respondents commented that a corporation's chief executive officer (CEO) should not necessarily be required to sign the certification, since the CEO may have limited detailed knowledge concerning the operation's acquisition and disposition of unprocessed timber. These respondents suggested that an officer or agent of the corporation delegated such authority be permitted to sign the certification on behalf of the corporation, within his or her official capacity.

Response. The certification language does not mean that the corporate officer signing the certification may be held personally liable for violations of the certification. The corporate officer, signing in his or her corporate capacity, would be held liable in that capacity and in accordance with the applicable laws and regulations governing liability of corporate officers.

The certificate must be signed by someone with authority to bind the corporation. Rather than consider a variety of delegations of authority, the Department prefers to have the signature of the official with clear authority to bind the corporation, the CEO. The Department believes that the assurance and administrative convenience of requiring the CEO's signature outweigh the possible inconvenience of obtaining that signature. This requirement is similar to the requirement in 36 CFR 223.171(b)(6) (1990), issued pursuant to the Federal Timber Contract Payment Modification Act (16 U.S.C. 618) (also known as the "Buy Out Act"), with which participating timber purchasers complied. In that regulation, the CEO was required to sign a statement for a corporation certifying to the accuracy of information submitted. The signatory may not have personal knowledge of the information to which he or she is certifying. The signatory must ascertain, however, that the information is true, complete, and accurate to the best of his or her knowledge and belief. The Department has added a statement to the certification to paragraph (a)(2)(i)

(A) and (B) of § 223.191 of the final rule to reflect this clarification.

The certification has been revised to include the agreement to maintain records of all transactions involving acquisition and disposal of unprocessed logs from both private and Federal lands within the area involved in the certification, for 3 years and to make such records available for inspection upon the request of the Regional Forester, or other official to whom such authority has been delegated. The proposed rule provided for this agreement in paragraph (b)(4) of § 223.191 which will not be retained in the final rule.

The certification also has been revised to provide specific notice that the signatory is signing under penalty of perjury pursuant to the False Statements Act (18 U.S.C. 1001).

Comment. Several respondents questioned the priority of disapproved applicants being able to both purchase Federal timber and export private timber from the same area during the phase-out process.

Response. Section 490(c) of the Act specifically provides for a person to purchase Federal timber and to export private timber simultaneously during a transition period. Paragraph (c)(2) provides for an exemption from substitution for initial applicants until the Secretary approves or disapproves the application. Paragraph (c)(4)(B) provides a 15-month period to cease export of unprocessed timber originating from private lands from the geographic area determined by the Secretary for which the application would have been approved. Section 223.191(a) of the final rule provides for this phase-out process.

Comment. One respondent asked how the certification to cease exporting from within the sourcing area in six months (in return for the waiver of the 24-month prohibition against exporting) squares with the certification for disapproved applicants to cease exporting from within the sourcing area that would have been approved in 15 months.

Response. The statutory language and Congressional intent to prevent substitution indicate that the certification to cease exporting from within the sourcing area applies both when the sourcing area is approved and when the applicant whose sourcing area is disapproved participates in the phase-out process.

Section 490(c)(1) of the Act requires the applicant to cease exporting unprocessed private timber originating from private lands "within the sourcing area" for not less than three years in order to be exempt from the 24-month prohibition against exporting from within the sourcing area. This language most likely refers to the sourcing area requested, since the Act requires the certificate to have been submitted before the sourcing areas were adjudicated. If the sourcing area requested is also approved, the certificate becomes redundant because exporting of private timber originating from within an approved sourcing area is prohibited by 490(c)(1)(B) of the Act. The certificate is also inconsistent with the intent of the Act after the sourcing area is approved, since the certificate lasts for three years, whereas a sourcing area (and the attendant prohibition against exporting from within it) may be valid for up to five years before a review.

Paragraph (b)(2) of § 223.191 clarifies that the prohibition against exporting private timber originating from the approved sourcing area shall be in effect as long as the sourcing area remains approved.

The certificate to cease exporting from within the requested sourcing area also applies to a requested sourcing area that is disapproved and whose applicant is participating in either phase-out process. If the certificate did not apply during the phase-out process, the applicant could export private timber and purchase Federal timber that originates from the same area (the requested sourcing area). Congressional intent expressed throughout the Act is to prohibit a person from purchasing Federal timber and exporting private timber from within the same area. Therefore, the prior certification remains in full force and effect through the 15-month phase-out process described in paragraphs (a) and (b) of § 223.191. In the final rule, paragraph (d) has been added to § 223.191 to clarify this point.

If an applicant whose sourcing area is disapproved chooses to phase out of Federal timber purchasing, pursuant to Section 490(c)(4)(A) of the Act, the person may submit a reques' to rescind the certificate after the 15-month phase-out period elapses. The certificate is necessary during the 15-month period in order to comply with Congressional intent to prevent substitution. After the 15 month phase-out period, the applicant will no longer be purchasing Federal timber within the requested sourcing area.

If an applicant chooses to phase out of exporting, pursuant to Section 490(c)(4)(B) of the Act, the certificate applies as written. The certification for disapproved applicants who choose to phase out of exporting requires a phase-out of exporting in 15 months in the area that would have been approved. Often this area will include all or a portion of the sourcing area requested in the application. Rules of statutory construction require that each part of the statute be given meaning. When the certifications are read together, the three-year prohibition against exporting, which begins six months after enactment, applies to the sourcing area requested in the application. Further, the certificate is necessary during the 15-month period in order to prevent purchasing of Federal timber and exporting of private timber from within the same area (the requested sourcing area). The certification concerning the phase-out of exporting in the area that would have been approved applies to the sourcing area that would have been approved, excluding the area requested in the application. Therefore, the certifications and the phase-out process are retained in the final rule.

Sourcing areas that would have been approved. It became apparent during the analysis of the comments received that several respondents were unclear as to the status of the area that would have been approved if the disapproved applicant elected to phase-out of exporting from that area.

Section 490(c)(4) of the Act provides for a person whose application has been disapproved to phase out of exporting from the area that would have been approved and to continue purchasing Federal timber from the area requested in the application, subject to stated volume limitations, during the export phase-out period.

The Act is silent regarding the fate of the sourcing areas that would have been approved after the phase-out period. The Department intends to give meaning to the Act's requirement that the Secretary determine which area would have been approved and to the phase-out provisions of Section 490(c)(4). In deciding to choose the export phase-out option, the applicant has chosen to accept the area that the deciding official stated would have been approved as the person's approved sourcing area. If an applicant whose sourcing area is disapproved does not wish to accept the Secretary's sourcing area that would have been approved and does not phase out of Federal timber purchases, the applicant is in the same position as someone who did not apply for a sourcing area.

The certification to cease exporting in the sourcing area requested will not be approved in this instance. Therefore, in the final rule, paragraph (a)(2)(iv) has been added to § 223.191, stating that when an applicant whose sourcing area has been disapproved submits the certificate to cease exporting within the

VOL 56 ISS 244 DEC 19 1991 UMI

sourcing area in the 15-month phaseout period, the sourcing area that would have been approved becomes an approved sourcing area. Upon certification, the person may begin purchasing Federal timber within the approved sourcing area.

The prohibition against exporting private timber originating from within the area shall be in full force and effect until the area is disapproved through the review process set forth in paragraph (e) of this section.

Disapproval Process

Comment. Several respondents questioned whether the phase out of exporting private timber in the disapproval process (§ 223.191(b) of the proposed rule) applies to someone who has not exported from the area that would have been approved by the Secretary. One of the respondents also asked whether such a person could reapply for a sourcing area that would have been approved if the export phase-out period is inapplicable.

Response. Section 490(c)(4)(B) of the Act provides for a phase out of exporting of unprocessed private timber, "from the geographic area determined by the Secretary for which the application would have been approved." Therefore, the phase out of exporting from the area that the Secretary would have approved does not apply to persons who have not exported from that area.

However, persons who have purchased Federal timber west of the 100th meridian in the 48 contiguous states, but have not exported from the area that would have been approved by the Secretary will be allowed to have the sourcing area that the Secretary would have approved.

Section 490 of the Act is clear that a person who has exported unprocessed timber originating from private lands west of the 100th meridian in the contiguous 48 states must have a sourcing area approved by the Secretary in order to purchase timber originating from Federal lands west of the 100th meridian in the contiguous 48 states. Paragraph (a) of section 490 exempts only sourcing areas from the prohibition against direct substitution. Paragraph (b) prohibits the indirect purchase of Federal timber by persons who are prohibited from purchasing Federal timber directly.

Section 490(c)(4), through the phase out of exporting within the sourcing area, provides a transition for persons who have been exporting private timber and purchasing Federal timber west of the 100th meridian in the contiguous 48 states, as discussed previously. Within this phase out provision is the provision regarding the Secretary's determination of the sourcing area that would have been approved. Since the sourcing area applicants who have been exporting outside of a sourcing area must have a sourcing area to continue purchasing Federal timber, it would be inconsistent to deny such applicants a sourcing area that would have been approved in this transition period.

Section 490(c)(4)(B) also requires persons who have exported from within the sourcing area that would have been approved by the Secretary to sign a certification to cease exporting from within that area. It would not be appropriate for persons who have not exported from that area to sign the certificate, since exporting from that area has not occurred.

Section 223.191(a)(2)(i) has been rewritten in the final rule to provide a process whereby an applicant may continue to purchase unprocessed timber originating from Federal lands within the disapproved sourcing area by certifying that he or she will cease exporting unprocessed timber from private lands located within the area that would have been approved (§ 223.191(a)(2)(i)(A) in the final rule); or by certifying that he or she accepts the area that the Secretary would have approved as his or her sourcing area (§ 223.191(a)(2)(i)(B) in the final rule).

Comment. One respondent objected to the requirement that applicants whose applications are disapproved must maintain records of all transactions of both Federal and private timber for three years following receipt of the disapproval notice. The respondent stated that the Act does not have such a requirement, and that this requirement creates unnecessary paperwork.

Response. The maintenance of acquisition and disposition records is necessary for the Department to fulfill its responsibilities to implement and enforce the Act with regard to National Forest System lands. Timber is traded over a several-year period. Time is also needed to track the timber when monitoring for compliance. Given the amount of time that may accrue while timber is traded and being monitored, the Department requested and was granted the maximum amount of time for requiring recordkeeping. The Act provides for the Secretary to draft such regulations as may be necessary to implement the Act. In the final rule, proposed paragraph (b)(4) of § 223.191 has been added to the certification statement in § 223.191(a)(2)(i)(A), maintaining this recordkeeping requirement for those applicants who have been disapproved and choose one of the phase-out options. For those disapproved applicants who do not choose one of the phase-out options, the maintenance of records requirement does not apply.

Review of sourcing areas. Subsection 490(c)(5) of the Act requires that review of approved sourcing areas will occur not less often than every 5 years. Section 223.191(d) of the proposed rule outlined the procedures for review of approved sourcing areas. These proposed procedures for review provided that a tentative date for review would be included in the approval notice. The proposed rule stated that 60 days prior to the tentative review date, the Regional Forester would notify the person of the pending review. The proposed rule also stated that the person must request the review in writing to the Regional Forester not less than 30 days prior to the tentative review date. If the person did not request a review of the sourcing area in accordance with the procedures proposed in § 223.191(d), the sourcing area would terminate on the review date. In addition, the proposed rule stated that the Department would reserve the right to schedule a review at any time during the 5-year period, with 60 days notice.

Comment. Some respondents objected to the termination of an approved sourcing area if the person failed to request a review within 30 days of the tentative review date listed in the approval notice. Several respondents stated that the sourcing area should remain in effect until a review determined otherwise.

Response. The Department agrees with the comments and has eliminated the automatic sourcing area termination provision in the final rule. Paragraph (d) of § 223.191 of the proposed rule has been redesignated as paragraph (e) in the final rule and revised to eliminate the requirement that purchasers must request a review within 30 days of the tentative review date. The purpose of this procedure was to eliminate review of a sourcing area no longer being used without resorting to a formalized review process. The Department has instituted an informal process before the formal review, which is discussed later in this document, so there is no longer any reason for the automatic termination. The final rule provides that sourcing areas being reviewed will continue in full force and effect pending the final review determination.

Comment. One respondent recommended that the Forest Service simply publish notice of the sourcing areas coming up for review and invite comments from persons (including the applicant) who believe that the existing sourcing area should be reapproved, modified, or revoked. Several respondents asked about the timeframe for the review and about the criteria that would be used.

Response. In the final rule, a new paragraph (e)(1) has been added to § 223.191 establishing an informal review procedure that will help expedite review decisions while keeping the public informed of the status of a particular sourcing area.

Subsection 490(c)(5) of the Act requires a review of sourcing areas "in accordance with the procedures prescribed in this title." The relevant procedures in the title are the sourcing area procedures. These procedures envision a formal decision, made "on the record and after an opportunity for a hearing." A formal adjudicatory process normally requires a case or controversy that is ripe for review. If there is no change in the sourcing area, or no disagreement among the parties regarding changes to be made, there is no case or controversy. Therefore, the Forest Service will utilize an informal process unless the parties cannot reach a consensus.

The informal system adopted in § 223.191(e)(1) requires the Regional Forester or other such reviewing official to notify parties of the review date by publication in newspapers of general circulation within the sourcing area. The Forest Service shall review the sourcing area record and provide comment to the reviewing official within the 30-day period following publication of the notice of review. All interested parties may review the sourcing area record and comment within the 30-day period. For 10 working days after the review period, any person submitting comments and the person holding the sourcing area may review the comments. If there is disagreement among those who comment regarding the proper sourcing area, the Forest Service will hold a meeting convenient to the parties that all interested parties may attend. If there is still no agreement among the parties as to the proper sourcing area, then a formal adjudicatory process will occur, in accordance with 5 U.S.C. 554 of the Administrative Procedure Act. Upon institution of a formal adjudicatory process, all written comments submitted in the 30 day period for comments shall become part of the administrative record.

Comment. One respondent said that for long-term planning, the review at less than five years should be for good cause only.

Response. The Act places no restriction on the Department as to when the review will occur; it simply requires a review at least every five years. Likewise, the Act places no standard, such as "good cause," on the occurrence of a review. To assure that sourcing areas accurately reflect purchasing patterns, pursuant to the Act, the Department needs the flexibility to review sourcing areas at any time due to changed circumstances. A new paragraph (e)(3) has been added to § 223.191 in the final rule to clarify that the Department may review a sourcing area at any time prior to the tentative review date at the request of the Forest Service or the person holding the sourcing area. This provision was included as a part of paragraph (d) of § 223.191 in the proposed rule.

Comment. One respondent stated that there should be a presumption in favor of the earlier decision regarding a sourcing area.

Response. There is nothing in the Act regarding a presumption that the current sourcing area remains in effect; in fact, since the Act requires the sourcing area review procedures to be in accordance with the procedures in the Act that were utilized in the initial determination, the statutory language indicates that the review is a *de novo* review (i.e., the review would be conducted as if no prior proceedings has been conducted and evidence in addition to the existing record would be allowed). Therefore, the Department will treat the sourcing area review as a *de novo* review in which all of the elements of a sourcing area must be established.

Comment. Several respondents asked if disapproved sourcing area applications would also be reviewed.

Response. The Act provides only for review of approved sourcing areas pursuant to section 490(c)(5). Paragraph (5) refers to paragraph (3), entitled, Grant of Approval, which discusses the factors used by the Secretary in approving sourcing areas. Therefore, the review will involve all approved sourcing areas and those areas that would have been approved that become approved sourcing areas through the applicant's certification to cease exporting from within that area or certification accepting the area that would have been approved as their sourcing area.

Paragraph (e) of § 223.191 in the proposed rule stated that the reporting and recordkeeping procedures constitute information collection requirements as defined in 5 CFR part 1320 and that the requirements have been approved by the Office of Management and Budget. This information has been redesignated as paragraph (f) and included in the final rule without change. This is a structural change to improve clarity.

Section 223.203 Indirect Substitution Exception for National Forest System Timber From the State of Washington

Section 490 of the Act places limitations on the direct and indirect substitution of unprocessed Federal timber for unprocessed timber exported from private lands. Subsection (b)(2) of section 490 of the Act provides for a limited exception to the prohibition against indirect substitution for unprocessed timber originating from National Forest System lands in the State of Washington. Section 490(b)(2)(i) and (ii) of the Act provide that such limit shall equal:

(i) The amount of such timber acquired by such person, based on the higher of the applicant's actual timber purchasing receipts or the appropriate Federal Agency's records, during fiscal years 1988, 1989, and 1990, divided by three; or

(ii) 15 million board feet, whichever is less, except that such limit shall not exceed such person's proportionate share of 50 million board feet.

Proposed procedures for implementing section 490(b)(2) were set forth in paragraph (b) of 223.203 of the proposed rule, which addressed procedures for applying for a proportionate share of the 50 million board feet purchase limit. These procedures stated that any person who exceeds his/her share of these purchase rights, in any fiscal year, will be in violation of the substitution prohibitions of the Act.

Comments. One respondent objected to the language in the proposed rule that provided for annual renewal of the limited indirect substitution exception for National Forest System timber originating from within Washington State. This respondent stated that the Act and the Congressional Conference Committee Report are silent concerning the application of the limit, and, therefore, the Act must be interpreted to provide a one-time opportunity to phase out of indirect substitution, and not an annual, indirect substitution quota.

Response. Subsection (b)(2) of section 490 of the Act does not specifically address this issue. Therefore, in accordance with the rules of statutory construction, the Department reviewed the language in this provision of the Act to determine Congressional intent. The trading rights indicate an annual, rather than a one-time apportionment. Subsection (b)(2)(C) of section 490 of the

VOL 56 ISS 244 DEC 19 1991 UMI

Act permits any person holding a portion of this limited exception to "sell, trade, or otherwise exchange with any other person" such limited rights, "except that such rights may not be sold, traded, or otherwise exchanged to persons already in possession of such rights obtained under subparagraph (A)." There would be no reason to provide for transfer of rights if they were a one-time opportunity. Thus, a one-time apportionment in the rule would render this trading provision nearly meaningless and of little value because of the small amount of timber volume involved. The general intent of the Act to grant persons trading rights for their proportionate shares of this exception supports the Department's interpretation that this is an annual exception. Therefore, the final rule retains this provision in the certification in 223.203.

Comment. Several timber purchasers commented that some of the specific data required to be submitted in the application for a proportionate share of these limited rights was either irrelevant or not readily available, would be very difficult to reconstruct, and would constitute an unreasonable paperwork burden because records of this type were not required to be kept under the prior rules in the detail being requested. For example, the respondents stated that from whom the Federal timber was acquired is unnecessary information and that it may be difficult to determine from which National Forest within Washington State that timber originated after the fact. These respondents maintained that much of their Federal timber purchases consisted of acquiring specific species and/or grades of logs in large batches or sorts intermixed with State and private logs and not accounted for separately by origin. One respondent suggested that because of the difficulty of reconstructing such records of origin, the applicants should be required to simply certify that, based on available records, it appears that they purchased at least the volumes so specified. Some of these respondents also asked that acquisition records be presented by calendar year instead of by fiscal year, as most businesses maintain their records by calendar year.

Response. The Department agrees with these respondents and has modified the information requested in the final rule to be used in determining proportionate shares of the limited rights. The Department believes that such modification will be adequate to meet the statutory requirements. Accordingly, the information requirements of paragraph (b)(5)(ii) of § 223.203 of the proposed rule will not be adopted in the final rule.

Subsection 490(b)(2)(i) of the Act requires that the Department establish a limited amount of unprocessed timber originating from National Forest System lands from within Washington State which equals the amount of such timber acquired by that person based on the higher of "actual timber purchase receipts" or government records. The Department will determine the applicant's proportionment based on government records. The final rule provides that a person may review the purchase records of the Forest Service prior to the deadline for submission of applications for the exemption. Applicants may voluntarily submit actual timber purchasing receipts if they believe that the actual purchase receipts will result in a higher amount than would result from using government records. The determination will then be based on the purchase receipts, if provided, or government records, whichever is higher. The Department agrees that the reconstruction of purchase records may be difficult. Accordingly, the Department will provide in the final rule that a person's actual timber receipts may be in the form of a certification by a certified public accountant that the records of the person reflect that the specified volumes are accurate. The volumes to report are harvest volumes, except where sales are still open. In the case of open sales, the volumes to report are advertised volumes.

In the final rule, paragraph (b)(5) of § 223.203 of the proposed rule has been redesignated as paragraph (b)(3) and revised to reflect these changes.

A new paragraph (b)(5) has been added to § 223.203 in the final rule, stating that purchasers may voluntarily submit, through verification by a certified public accountant, a summary of total volume and average volume for each of the three fiscal years (1988, 1989 and 1990). Paragraph (b)(5)(i)(C) has been added to provide for the certificate that the certified public accountant must sign to attest to the accuracy of the records reviewed. Paragraph (b)(5)(ii)(D) has been added to state that the accountant's certification must be notarized, must be on company letterhead, and must accompany the applicant's application. The certification in paragraph (b)(3)(ii) of § 223.203 must accompany the application regardless of the use of a certified public accountant to verify the records.

Subsection 490(b)(2)(i) of the Act specifically asks for the amount of timber "during fiscal years 1988, 1989, and 1990." Accordingly, the Department must retain the use of "fiscal year" in the final rule.

Comment. Two respondents questioned the need to provide "substantial evidence" that the prohibition against indirect substitution applies to them as a qualification for a proportionate share of this limited exception. These respondents felt that it should be sufficient for a company to certify that it has indirectly substituted within the three years by having exported timber originating from private lands located west of the 100th meridian in the 48 contiguous States and acquired timber originating from National Forest System lands within Washington State during the same period.

Response. After review of the Act, the Department has concluded that such substantial evidence is not necessary. Accordingly, § 223.203(b)(4) of the proposed rule is not adopted in the final rule. In lieu of substantial evidence, language has been added to the certification accompanying the application (§ 223.203(b)(3)(ii)) that requires an applicant to certify that the prohibition against substitution contained in section 490(b) of the Act applies to such applicant, and that the applicant has purchased NFS timber during fiscal years 1988, 1989 and/or 1990. The certification language also has been reviewed to provide for retaining records of all transactions involving the acquisition of unprocessed timber from Federal lands within the area and to make such records available for inspection upon request by appropriate officials. Further, the certification has been revised to provide specific notice to the signatory that false, incomplete, or incorrect certifications may subject the signatory to the penalty of perjury pursuant to the False Statements Act (18 U.S.C. 1001).

Comment. One respondent stated that the confidentiality of information submitted in an application should be determined in accordance with the Freedom of Information Act.

Response. All requests for information submitted pursuant to the Forest Resources Conservation and Shortage Relief Act of 1990, will be handled according to the Freedom of Information Act, as amended (5 U.S.C. 552), with full consideration of available exemptions from disclosure. The Freedom of Information Act is specific in describing the types of information exempt from public disclosure. Applicants need to be aware that some of the information submitted may be available to the public upon request. The language regarding the confidentiality of the application in paragraph (b)(5) of § 223.203 of the proposed rule has been removed. Any public disclosure of the information provided in an application shall be governed by the provisions of the Freedom of Information Act, the Department's implementing regulations at 7 CFR 1.11, and Executive Order 12600 (June 23, 1987).

Comment. Several respondents voiced concerns on proposed §223.203, similar to those expressed on § 223.191, over the wording of the certification relating to personal liability of corporate officers and the requirement that it be signed only by the chief executive officer of the corporation.

Response. As noted in response to the comment concerning the certification required in § 223.191(a)(2)(i), corporate officers signing in a corporate capacity would be held liable in that capacity and in accordance with all other applicable laws or regulations governing liability of corporate officers. The signatory may not have personal knowledge of the information to which he or she is certifying. The signatory must ascertain, however, that the information is true, complete, and accurate to the best of his or her knowledge and belief. The Department has added a statement to the certification in paragraph (b)(3)(ii) of § 223.203 of the final rule to reflect this clarification. In addition, as at § 223.191(a)(2)(i), the certification language has been revised to provide specific notice of the possibility of the penalty of perjury under the False Statements Act (18 U.S.C. 1001).

Further, the provision of § 223.203(b)(5)(iv) of the proposed rule has been included as a part of the specific certification language in § 223.203(b)(3)(ii) that must be provided by the signatory.

Comment. One respondent urged the Agency to proceed rapidly to receive applications for indirect substitution of proportional shares not to exceed 50 million board feet, if the statutory deadline for limiting indirect substitution is to be met.

Response. Paragraph (b)(6) of § 223.203 of the proposed rule stated that there would be a 20-day period following publication of the final rule in the **Federal Register** for submitting applications. This requirement has been redesignated as § 223.203(b)(4), in the final rule. The Department believes that the 20-day period is the minimum amount of time needed to complete and submit an application. The Department will apportion the 50 million board feet of timber as soon as possible after receipt of the applications.

Comment. One respondent requested that the language of the proposed rule be revised to clarify that a person acquiring rights under this section from a person selling such rights need not submit an application to the Forest Service to acquire these rights.

Response. Subsection 490(b)(2)(C) of the Act requires that a person acquiring these rights may not already be in possession of such rights. Further, the Conference Report (page 252) states that the 15 million board feet limit applies to the acquiring party. The Department does not intend to require prospective purchasers of these rights to apply to the Forest Service for permission prior to making the acquisition. However, the Forest Service must be informed of such transactions in order to monitor compliance with the Act.

Pargaraph (b)(3) of § 223.203 of the proposed rule addressed the issue of acquiring this right. This paragraph has been redesignated in the final rule as § 223.203(c) and revised to include the following provision to address this issue: "Any person selling, trading, or exchanging any or all of the rights obtained under this rule shall advise the Regional Forester of the amount being traded and the name(s) of the person(s) acquiring such rights."

In the final rule, paragraph (c) of § 223.203 of the proposed rule has been redesignated as paragraph (d).

Comment. One respondent suggested the Forest Service maintain a cumulative record for each person holding a portion of this indirect substitution exception to assure that the person does not exceed the allotted shares and to notify the person when the remaining unused shares drop below 100 thousand board feet.

Response. The Department declines to adopt this suggestion. The responsibility to comply with provisions of this Act, including this limited indirect substitution exception, lies with the person holding such exception. The role of the Forest Service is to monitor compliance through the information provided and through regular field surveillance. The Department intends to monitor the transfer of such limited share rights for compliance with the Act.

Comment. One respondent asked whether the Forest Service intended to simply approve or disapprove applications, or whether the Forest Service would approve allocations of the exception which may be different from the amount requested.

Response. The Forest Service intends to apportion the 50 million board feet exception in relation to the amounts supported by the data provided in the applications and the agency's own records. No revision of the proposed rule is needed to address this comment.

General Comments

Comment. One respondent commented that no export of unprocessed timber originating from National Forest System lands within the State of Washington should be allowed.

Response. Except for the provision permitting the exporting of unprocessed Federal timber found to be surplus to domestic processing needs, the Act prohibits such exporting. No revision of the proposed rule is necessary to respond to this comment.

Comment. One respondent commented that the Department should undertake an Environmental Impact Statement to disclose the impact of log exports on forests and forest-dependent communities.

The respondent stated that, "[p]art of the growing demand for National Forest timber results from large corporations that export private timber and then compete against smaller mills for public timber." The respondent's example of this demand is a company competing for public timber on the Colville National Forest. The respondent further stated that timber demand is a factor in the allowable sale quantity in the Forest Service's Land and Resource Management Plan for the Colville National Forest. The respondent recommended that log exports be curtailed or the exporters forego the ability to export logs and purchase timber from NFS lands.

Response. With regard to the comment about increased competition, the intent of the National Environmental Policy Act (NEPA) is to require an analysis of the physical environment *Metropolitan Edison Co.* v. *People Aganist Nuclear Energy*, 460 U.S. 766, 772 (1983). The National Environmental Policy Act requires no particularized assessment of non-environmental factors *Public Utilities Commission of the State of California* v. *Federal Energy Regulatory Commission*, 900 F.2d 269, 282 (DC Cir. 1990), *citing* NEPA section 102, 42 U.S.C. 4332 "(requiring the agency to consider a variety of environmental, not economic factors)."

With regard to the comment about allowable sale quantity, even if these regulations affected public timber demand, projections for demand would be accounted for through long term monitoring and evaluation done as a part of Forest Plans. Further, the decision to sell timber and the assessment of the impacts of such decisions are made through Forest Plans

VOL
56

DEC
19
1991
UMI

and project decisions, not in these regulations.

As noted later in this document, based on an environmental assessment, there is a Finding of No Significant Impact on the quality of the human environment, individually or cumulatively, as a result of these regulations. The environmental assessment is available as a separate document.

Comment. In relation to the regulatory impact of the rule, two respondents commented that the proposed rule imposes significant new requirements on small business timber sale purchasers and other entities.

Response. The proposed rule in and of itself does not impose significant new requirements. The Act establishes these requirements, and this rule is simply implementing the provisions of the Act. The Department has sought to minimize the impact wherever possible in the rules as evidenced by several changes made based on the comments received.

Summary

Having fully considered the comments received on the proposed rule, the Department is adopting a final rule, with the modifications previously described in response to the comments in the preceding paragraphs. This rule supercedes certain provisions of the interim rule published in the **Federal Register** on November 20, 1990, and supplements those sections still in effect.

This rule is effective upon publication. Rulemakings are exempt from the rulemaking procedures of the Administrative Procedures Act in certain circumstances, including matters relating to agency management public property, or contracts (5 U.S.C. 553(a)(2)). The Department did not waive this exemption with regard to the effective date of a rulemaking (36 FR 13894 (July 24, 1971)). This rulemaking relates to agency management, public property and contracts, and therefore is exempt from the 30-day delay between publication of a rule and its effective date. Further, a delayed effective date is not required if a rule is a substantive rule which grants or recognizes an exemption (5 U.S.C. 553(d)(1)). This rule provides certain exemptions from the restrictions on substitution, and therefore may be effective immediately. In addition, a delayed effective date is not required if good cause is found and published with the rule (5 U.S.C. 553(d)(3)). Good cause exists to make this rulemaking effective upon publication due to the many deadlines in the statute requiring monitoring and enforcement.

Environmental Impact

Based on both experience and environmental analysis, this final rule will have no significant effect on the quality of the human environment, individually or cumulatively, and the Forest Service has made a Finding of No Significant Impact (40 CFR 1508.27). This rule only establishes certain administrative procedures to limit the persons qualified to purchase unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States. It does not affect the amount of timber to be sold, where the sales will be located, when they will be operated, the contract period, the contract size, resource protection requirements, or any aspect of on-the-ground contract performance. This rule does not alter the requirement that each timber sale must be analyzed and documented in compliance with the National Environmental Policy Act and its implementing regulations. Copies of the Environmental Assessment and Finding of No Significant Impact may be obtained by writing or calling the person or office listed earlier in this document under **FOR FURTHER INFORMATION CONTACT.**

Controlling Paperwork Burdens on the Public

The application and reporting procedures in §§ 223.48, 223.191, and 223.203 of this rule contain new recordkeeping and reporting requirements as defined in 5 CFR part 1320 and, therefore, impose additional paperwork burdens on the affected public. The Office of Management and Budget (OMB) has approved these requirements for use through March 31, 1994, and assigned them Control Numbers 0596–0021 and 0596–0115.

Regulatory Impact

This rule has been reviewed under USDA procedures and Executive Order 12291. It has been determined that this is not a major rule. The rule will not have an annual effect of $100 million or more on the economy, substantially increase prices, costs for consumers, individual industries, Federal, State or local governments, or geographic regions. Furthermore, the rule will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This rule will not limit the amount of National Forest System timber to be offered for sale, restrict competition, or reduce market demand for such timber.

This rule has been considered in light of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), and it has been determined that the action will not have a significant economic impact on a substantial number of small entities. Economic impacts associated with implementation of this rule result directly from the Forest Resources Conservation and Shortage Relief Act and not from the rule itself. The rule imposes no additional requirements on small business timber sale purchasers or other small entities beyond that required by the Forest Resources Conservation and Shortage Relief Act of 1990.

This rule also has been analyzed in accordance with the principles and criteria contained in Executive Order 12630 and it has been determined that the rule does not pose the risk of a taking of constitutionally-protected private property.

List of Subjects in 36 CFR Part 223

Exports, Government contracts, National Forests, Reporting and recordkeeping requirements, and Timber sales.

Therefore, for the reasons set forth in the preamble, part 223 of Chapter II of title 36 of the Code of Federal Regulations is amended as follows:

PART 223—SALE AND DISPOSAL OF NATIONAL FOREST SYSTEM TIMBER

1. The authority citation for part 223 is revised to read as follows:

Authority: 90 Stat. 2958, 16 U.S.C. 472a; 98 Stat. 2213, 16 U.S.C. 618, 104 stat. 714–726, 16 U.S.C. 620–620h, unless otherwise noted.

Subpart B—Timber Sale Contracts [Amended]

2. Revise § 223.48 to read as follows:

§ 223.48 Restrictions on export and substitution of unprocessed timber.

(a) Contracts for the sale of unprocessed timber from National Forest System lands located west of the 100th meridian in the contiguous 48 States and Alaska, awarded before August 20, 1990, shall include provisions implementing the Secretary's timber export and substitution regulations at subpart D of this part in effect prior to that data. Such contracts shall also require purchasers to:

(1) Submit annually, until all unprocessed timber is accounted for, a certified report on the disposition of any unprocessed timber harvested from the sale including a description of unprocessed timber which is sold,

exchanged or otherwise disposed of to another person and a description of the relationship with the other person;

(2) Submit annually, until all unprocessed timber from the sale is accounted for, a certified report on the sale of any unprocessed timber from private lands in the tributary area which is exported or sold for export; and

(3) Maintain records of all such transactions involving unprocessed timber and to make such records available for inspection and verification by the Forest Service for up to three (3) years after the sale is terminated.

(b) Contracts for the sale of unprocessed timber from National Forest System lands located west of the 100th meridian in the contiguous 48 States, awarded on or after August 20, 1990, shall include provisions implementing the requirements of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620 *et seq.*).

(c) The reporting and recordkeeping procedures in this section constitute information collection requirements as defined in 5 CFR part 1320. These requirements have been approved by the Office of Management and Budget and assigned clearance number 0596–0021.

Subpart F—The Forest Resources Conservation and Shortage Relief Act of 1990 Program [Amended]

3. Revise § 223.191 and add a new § 223.203 to read as follows:

§ 223.191 Sourcing area disapproval and review procedures.

(a) Notwithstanding any other provision of law, an applicant whose sourcing area application was submitted by December 20, 1990, and is disapproved may either phase out of purchasing Federal timber or phase out of exporting unprocessed timber originating from private lands within the sourcing area that would have been approved, as follows:

(1) *Phase-out of Federal timber purchasing.* The applicant may purchase, in the 9-month period after receiving the application disapproval, unprocessed timber originating from Federal lands in the disapproved sourcing area, in an amount not to exceed 75 percent of the annual average of such person's purchases of unprocessed Federal timber in such area during the 5 full fiscal years immediately prior to the date of submission of the application. In the 6-month period immediately following the 9-month period, such person may purchase not more than 25 percent of such annual average, after which time the prohibitions against direct substitution, set forth in § 223.189 of this subpart, shall apply; or

(2) *Phase-out of private timber exporting.* The applicant may continue to purchase unprocessed timber originating from Federal lands within the disapproved sourcing area without being subject to the phase-out of Federal timber purchasing procedures described in paragraph (a) of this section, if the following requirements are met:

(i) The applicant certifies to the Regional Forester or the approving official to whom such authority has been delegated, within 90 days after receiving the disapproval decision, as follows:

(A) An applicant that has exported unprocessed timber originating from private lands from the geographic area that would have been approved will provide a signed certification that reads as follows:

"I have engaged in the exporting of unprocessed private timber originating from private lands located within the geographic area the approving official would have approved as a sourcing area for my manufacturing facility. I desire to continue purchasing unprocessed Federal timber from within such area. I hereby certify that I will cease all exporting of unprocessed timber from private lands located within the area that would have been approved by [the applicant shall insert date 15 months from date of receipt of the disapproval decision]. I agree to retain records of all transactions involving acquisition and disposition of unprocessed timber from both private and Federal lands within the area involved in the certification, for a period of three (3) years beginning on the date of receipt of the disapproval notification, and to make such records available for inspection upon the request of the Regional Forester, or other official to whom such authority has been delegated. I make this certification with full knowledge and understanding of the requirements of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) (Act) and do fully understand that failure to cease such exporting as certified will be a violation of the Act and may subject me to the penalties and remedies for such violation. Further, I fully understand that such violation may subject me to the penalty of perjury pursuant to the False Statements Act (18 U.S.C. 1001). I certify that the information in this certificate is true, complete, and accurate to the best of my knowledge and belief.";

or,

(B) An applicant who has not exported unprocessed timber originating from private lands from the geographic area that the Secretary would have approved will provide a signed certification that reads as follows:

"I have not exported timber originating from private lands within both the sourcing area that the Secretary would have approved and the disapproved sourcing area in the past 24 months, pursuant to the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*), and I am accepting the area that the Secretary would have approved as my sourcing area. I certify that the information in this certificate is true, complete, and accurate to the best of my knowledge and belief."

(ii) Each certification statement set forth in paragraph (a)(2)(i) of this section must be signed by the person making such certification or, in the case of a corporation, by its chief executive officer; must be on company letterhead; and must be notarized.

(iii) The person signing such certification set forth in paragraph (a)(2)(i)(A) must provide to the Regional Forester the annual volume of timber exported by that person during the five (5) full fiscal years immediately preceding submission of the application, originating from private lands in the geographic area for which the application would have been approved.

(iv) When the applicant submits the certificate, the area the Secretary would have approved, as shown on the sourcing area map provided by the Secretary, because an approved sourcing area. If the certificate is not submitted, the sourcing area that would have been approved does not become an approved sourcing area.

(3) The phase-out of Federal timber purchasing and the phase-out of private timber exporting procedures provided by paragraphs (a)(1) and (a)(2) do not apply to persons submitting sourcing area applications after December 20, 1990, or to persons requesting review of disapproved sourcing areas.

(b) *Limits on purchases and exports.* (1) During the 15-month period following disapproval of a sourcing area, a person who elects to phase-out of private timber exporting as described in paragraph (a)(2) of this section, may not:

(i) Purchase more than 125 percent of the person's annual average purchases of unprocessed timber originating from Federal lands within the person's disapproved sourcing area during the five (5) full fiscal years immediately prior to submission of the application; and,

(ii) Export unprocessed timber originating from private lands in the geographic area determined by the approving official for which the application would have been approved, in amounts that exceed 125 percent of the annual average of that person's exports of unprocessed timber from such private land during the five (5) full years

VOL 56 ISS 244 DEC 19 1991 UMI

immediately prior to submission of the application.

(2) At the conclusion of the 15-month export phase-out period, the prohibition against exporting private timber originating from within the area shall be in full force and effect as long as the sourcing area remains approved, pursuant to subpart F of part 223.

(c) *Presentation of map to applicant whose sourcing area is disapproved.* The area determined by the deciding official that would have been approved shall be drawn on a map and presented to the applicant by the deciding official with the notice of disapproval of the application.

(d) *Effect of prior certification to cease exporting.* An applicant's previous certification to cease exporting beginning February 20, 1991, for a period of three (3) years from within the disapproved sourcing area pursuant to paragraphs (f) and (g) in § 223.189 of this subpart shall remain in full force and effect for persons with approved and disapproved sourcing areas.

(e) *Review process and frequency.* (1) Approved sourcing areas shall be reviewed not less often than every five (5) years. A tentative date for a review shall be included in the deciding official's determination or stated in writing by the Regional Forester following the determination. At least 60 days prior to the tentative review date, the Regional Forester or other such reviewing official shall notify the person holding the sourcing area of the pending review, publish notice of such review in newspapers of general circulation within the sourcing area, and invite comments, to be received no later than 30 days from date of notice, from all interested persons, including the person holding the sourcing area. For 10 working days following the comment period, any person submitting a written comment and the person with the sourcing area may review the comments. If there is disagreement among the persons who submitted written comments regarding the proper sourcing area, the reviewing official shall convene an informal meeting convenient to the persons that all interested persons may attend. If an agreement cannot be reached among the persons, formal administrative adjudication shall occur. The deciding official shall, on the record and after opportunity for a hearing, approve or disapprove the sourcing area being reviewed.

(2) Disapproved sourcing areas shall be reviewed using the process described in paragraph (e)(1) of this section upon resubmission of an application, provided the applicant has accepted the area the Secretary would have approved as a sourcing area pursuant to paragraph (a)(2) of this section.

(3) The Department reserves the right to schedule a review, at the request of the Forest Service or the person holding the sourcing area, at any time prior to the scheduled tentative review date, with 60 days notice.

(4) Sourcing areas being reviewed shall continue in full force and effect pending the final review determination.

(f) *Reporting and recordkeeping procedures.* The reporting and recordkeeping procedures in this section constitute information collection requirements as defined in 5 CFR part 1320. These requirements have been approved by the Office of Management and Budget and assigned clearance number 0596–0115.

§ 223.203 Indirect substitution exception for National Forest System timber from within Washington State.

(a) *Indirect substitution restrictions.* No person may purchase from any other person unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States if such person would be prohibited from purchasing such timber directly from a department or agency of the United States, pursuant to § 490(b) of the Forest Resources Conservation and Shortage Relief Act of 1990.

(b) *Indirect substitution exception for National Forest System timber from within Washington State.* A limited amount of unprocessed National Forest System timber originating from within Washington State may be acquired by a person otherwise covered by the prohibition against indirect substitution, pursuant to section 490(b) of the Act.

(1) The amount of such unprocessed timber shall be limited to whichever is less:

(i) The higher of the applicant's actual purchase receipts for unprocessed timber originating from National Forest System lands within Washington State or the Department's records, during fiscal years 1988, 1989, and 1990, divided by 3; or

(ii) 15 million board feet.

(2) Such limit shall not exceed such person's proportionate share of 50 million board feet; and

(3) To obtain a share of the 50 million board feet exempted from the prohibition against indirect substitution in § 490(b) of the Act, a person must submit an application. Applications shall include at least the following:

(i) The amount of volume exception being requested, in thousand board feet (MFB);

(ii) A signed certification that reads as follows:

"I certify that, except for an approved share of unprocessed Federal timber, in accordance with 36 CFR 223.203, the prohibition contained in section 490(b) of the Act (16 U.S.C. 620b) applies to me. I have exported unprocessed timber originating from private lands from west of the 100th meridian in the 48 contiguous States and have acquired unprocessed timber from National Forest System lands located within Washington State in 1988, 1989 and/or 1990. I certify that the information provided in support of this application is a true, accurate, current and complete statement, to the best of my knowledge and belief. I agree to retain records of all transactions involving the acquisition and disposition of unprocessed timber from Federal lands within the area involved in this application for a period of 3 years beginning on the date the application is approved, and to make such records available for inspection upon the request of the Regional Forester or other official to whom such authority has been delegated. I make this certification with full knowledge and understanding of the requirements of the Act and do fully understand that if this application is approved, the amount of exception granted under this approval may not be exceeded in any one fiscal year, and do fully understand that if such exception is exceeded I will be in violation of the Act (16 U.S.C. 620 *et seq.*), and I may be subject to the penalties and remedies provided for such violation. Further, I do fully understand that such violation may subject me to the penalty of perjury pursuant to the False Statements Act (18 U.S.C. 1001).";

and

(iii) The application listed under this section must be signed by the person making such application or, in the case of a corporation, by its chief executive officer. The application must be on the company's letterhead and must be notarized.

(4) The application made under this section must be mailed to the Regional Forester in Portland, Oregon, no later than January 8, 1992. The applicant will be notified of the approving official's decision by letter. If approved, the amount of the exception will become effective upon publication in the **Federal Register**.

(5) Prospective applicants may review Department records upon request prior to the deadline for submitting applications. An applicant may voluntarily submit information documenting the amount of purchases of unprocessed timber originating from National Forest System lands within Washington State. The Department will then determine which amount is higher, verified by either the Department's records or the applicant's records. The Department will then determine the applicant's portion of the 50 million board feet by determining the lesser of the amount verified by the records or 15 million board feet. The applicant may submit the information documenting the amount of purchases in the following manner:

(i) Actual receipts for purchasing unprocessed timber from National Forest System lands within Washington State; or

(ii) A statement by a certified public accountant of:

(A) A summary by fiscal year for 1988, 1989 and 1990 of the applicant's acquisitions of timber originating from NFS lands in the State of Washington, listing total volume for each of the three fiscal years; and

(B) The average volume for the three fiscal years. The volumes to be reported are the harvest volumes, except in the case of open sales. Advertised volumes must be reported for open sales.

(C) The certified public accountant must certify to the following:

"I certify that under the penalties and remedies provided in § 492 of the Act (16 U.S.C. 620d) and the penalty of perjury provided in the False Statements Act (18 U.S.C. 1001) that the information provided in support of this application is, to the best of my knowledge and belief, a true, accurate, current, and complete statement of [applicant's company's name] National Forest System timber acquisitions originating from within the State of Washington for fiscal years 1988, 1989 and/or 1990."

(D) The certified public accountant's statement and certification must be on the accountant's company letterhead, must be notarized, and must accompany the applicant's application.

(c) The purchase limit right obtained under this rule may be sold, traded, or otherwise exchanged with any other person subject to the following conditions:

(1) Such rights may not be sold, traded, or otherwise exchanged to persons already in possession of such rights;

(2) Any person selling, trading, or exchanging any or all of the rights obtained under this rule shall advise the Regional Forester of the amount being traded and the name(s) of the person(s) acquiring such rights within 15 days of the transaction; and

(3) No person may have or acquire more than 15 million board feet in one fiscal year.

(d) The application procedures in this section constitute information collection requirements a defined in 5 CFR part 1320. These requirements have been approved by the Office of Management and Budget and assigned clearance number 0596–0115.

Dated: September 30, 1991.

James R. Moseley,

Assistant Secretary, Natural Resources and Environment.

BILLING CODE 3410–11–M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900–AE42

Finality of Decisions

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) has amended its adjudication regulations on finality of decisions. The intended effect of the amendment is to define the point at which VA decisions become final and binding.

EFFECTIVE DATE: January 21, 1992.

FOR FURTHER INFORMATION CONTACT: John Bissett, Jr., Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233–3005.

SUPPLEMENTARY INFORMATION: VA published a proposal to amend 38 CFR 3.104(a) and 3.105(a) in the **Federal Register** of July 10, 1990 (55 FR 28234–5). Interested persons were invited to submit written comments, suggestions or objections on or before August 9, 1990. Comments were received from the American Legion, the National Veterans Legal Services Project on behalf of Vietnam Veterans of America, Inc., and a private individual.

One commenter noted that the proposed rule indicated decisions would be binding on all "VA offices", whereas the current rule specifies "VA field offices". He noted there was no explanation for dropping the word "field" from the new rule. The word was inadvertently omitted when the proposed rule was published and has been restored in the final regulation.

Another commenter felt that the regulations should require VA to fully advise the claimant of the decision as well as his or her due process rights, and a third suggested that the proposed regulation violates the provisions of 38 U.S.C. 5104 (formerly 3004) by implying that by granting a claim VA is absolved of its duty to send the claimant written notice. That commenter suggested that the phrase "or when such decision results in payment of monetary benefits" be deleted.

Section 115 of the Veterans' Benefits Amendments of 1989, Public Law 101–237, 103 STAT. 2062 (1989) added section 5104 to title 38, United States Code. That new section requires VA to provide notice to a claimant of any decision affecting provision of benefits; it further establishes certain requirements regarding the content of the notice. VA regulations at 38 CFR 3.103(f) require that VA notices contain certain elements, including notice of procedural and appellate rights. We believe that those provisions adequately address the concerns the commenters raised regarding the content of VA notices. The current rulemaking cannot, nor is it intended to, relieve VA of its statutory and regulatory obligations to advise claimants of its decisions.

The purpose of the current rulemaking is to establish by regulation the point at which a decision becomes final and binding upon all VA field offices. That point is reached when VA issues written notification on any issues for which it is required that VA provide notice to the claimant in accordance with 38 U.S.C. 5104. Once VA issues such notice, the decision may be changed only upon a showing of clear and unmistakeable error upon review by duly constituted appellate authorities.

Upon further consideration, VA believes that the language in the proposed rule concerning the content of the notification is unnecessary and that it could mislead anyone attempting to determine the point at which a VA decision is final and binding. Consequently, we have amended the rule by deleting any reference to the content of the written notice as well as the phrase "or when such decision results in payment of monetary benefits." We have substituted language which focuses on the moment that a VA decision becomes final rather than the content of the notice.

One commenter, noting that under VA regulations "sending" notification is synonymous with "receiving" it, and that the period during which the claimant must perfect a claim or challenge an adverse decision begins on the date that notice is sent, expressed concern that without some provision for mitigating circumstances related to delayed receipt or non-receipt of the notification, this regulation could be restrictively applied. VA does not concur with that assessment. The rules regarding time limits, extension of time limits and the computation of time limits are found at 38 CFR 3.109 and 3.110. We believe that amendments to those

VOL

1991
UMI

regulations published in the Federal Register of April 11, 1990, pages 13522–9, provide adequate remedies and protection for the rights of claimants in the event that notification of a VA decision is not received or receipt is delayed.

The same commenter, concerned over the position taken by VA's General Counsel on an appeal filed with the United States Court of Veterans Appeals (COVA), asked whether sending notification of a decision to the claimant's representative constitutes notification to the claimant.

A claimant must file an appeal of a decision by the Board of Veterans Appeals (BVA) with COVA within 120 days of the BVA decision being appealed (38 U.S.C. 7266(a) (formerly 4066(a))). In the COVA case cited (No. 90–316), BVA mailed notice of an adverse decision to the veteran at a previous address, and at the same time mailed a copy to his representative. Several weeks later, the BVA decision was mailed to the veteran's correct address. The veteran filed an appeal with COVA more than 120 days after the notice was mailed to his old address, but within 120 days of the date it had been mailed to his correct address. VA's General Counsel moved to dismiss the appeal on the grounds that the Court lacked jurisdiction because the appeal was not timely filed. COVA, noting that 38 U.S.C. 7104(e) (formerly 4004(e)) requires BVA to "mail a copy of its written decision to the claimant and the claimant's authorized representative (if any) at the last known address" of each, ruled that the appeal was timely filed and dismissed General Counsel's motion. Since there is a similar statutory requirement at 38 U.S.C. 5104(a) concerning notice of VA decisions, sending notice of a VA decision to a claimant's representative does not constitute notice to the claimant.

It appears that the commenter's concern arise from what he perceives to be an uncompromising position adopted by VA in that court proceeding. VA would point out, however, that proceedings before VA and before a court are fundamentally different in concept. VA's procedures for handling benefit claims are, by tradition and regulation, non-adversarial; proceedings before any court are by nature and design adversarial. VA arguments presented in the COVA case cited addressed the issue of COVA's jurisdiction in a specific case based on the unique circumstances in that individual claim. Those arguments should not be construed as representing in any manner a position VA would adopt toward benefit claims in the nonadversarial environment of claims processing.

VA appreciates the comments and suggestions submitted in response to the proposed rule, which is now adopted with the amendments noted above.

The Secretary hereby certifies that this regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. The reason for this certification is that this amendment would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), this amendment is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulatory, the Secretary has determined that this regulatory amendment is non-major for the following reasons:

(1) It will not have an annual effect on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program numbers are 64.100, 64.101, 64.104, 64.105, 64.106, 64.109, 64.110.

Administrative practice and procedure, Claims, Handicapped, Health care, Pension, Veterans.

Approved: November 13, 1991.

Edward J. Derwinski,

Secretary of Veterans Affairs.

For the reasons set forth in the preamble, 38 CFR part 3 is amended as follows:

PART 3—ADJUDICATION

1. The authority citation for part 3, subpart A is revised to read as follows:

Authority: 72 Stat. 1114; 38 U.S.C. 501(a), unless otherwise noted.

2. In § 3.104, paragraph (a) is revised to read as follows:

§ 3.104 Finality of decisions.

(a) A decision of a duly constituted rating agency or other agency of original jurisdiction shall be final and binding on all field offices of the Department of Veterans Affairs as to conclusions based on the evidence on file at the time VA issues written notification in accordance with 38 U.S.C. 3004. A final and binding agency decision shall not be subject to revision on the same factual basis except by duly constituted appellate authorities or except as provided in § 3.105 of this part.

* * * * *

3. In § 3.105, the first sentence of paragraph (a) is revised to read as follows:

§ 3.105 Revisions of decisions.

(a) *Error.* Previous determinations which are final and binding, including decisions of service connection, degree of disability, age, marriage, relationship, service, dependency, line of duty, and other issues, will be accepted as correct in the absence of clear and unmistakable error. * * *

RIN 2900–AF25

Exclusions From Income

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) has amended its adjudication regulations concerning exclusions from countable income under the Improved Pension Program. This change is necessary because current regulations inappropriately exclude payments from a specific federal program from countable income for VA purposes. The intended effect of this change is to correct that error.

EFFECTIVE DATE: This amendment is effective January 21, 1992.

FOR FURTHER INFORMATION CONTACT: John Bisset, Jr., Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233–3005.

SUPPLEMENTARY INFORMATION: VA published a proposal to amend 38 CFR 3.272(k) in the Federal Register of May 31, 1991 (56 FR 24764–5). Interested persons were invited to submit written comments, suggestions or objections on or before July 1, 1991. As no comments were received, the proposed amendment is adopted without change.

The Secretary hereby certifies that this regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. The reason for this certification is that this amendment would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), this amendment is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that this regulatory amendment is non-major for the following reasons:

(1) It will not have an annual effect on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program numbers are 64.104 and 64.105.

38 CFR Part 3

RIN 2900–AF05

Adjudication; Pension, Compensation, and Dependency and Indemnity Compensation Renouncement

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs has amended its adjudication regulations to establish a specific effective date of discontinuance when compensation, pension, or dependency and indemnity compensation benefits are renounced. This amendment is necessary because variations in workload between regional offices caused some claims to be processed less expeditiously than others, resulting, under the previous rules referring to termination as of date of last payment, in different termination dates. The intended effect of this amendment is to establish a uniform termination date when monetary benefits are renounced.

EFFECTIVE DATE: This amendment is effective January 21, 1992.

FOR FURTHER INFORMATION CONTACT: John Bisset, Jr., Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233–3005.

SUPPLEMENTARY INFORMATION: VA published a proposal to amend 38 CFR 3.500(q) in the Federal Register of June 25, 1991 (56 FR 28849). Interested persons were invited to submit written comments, suggestions or objections on or before July 25, 1991. As no comments were received, the proposed amendment is adopted with a minor technical amendment.

The Secretary hereby certifies that this regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. The reason for this certification is that this amendment would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), this amendment is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that this regulatory amendment is non-major for the following reasons:

(1) It will not have an annual effect on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program numbers are 64.104, 64.105, 64.109 and 64.110.

RIN 2900–AF42

Active Military Service Certified Under Section 401 of Public Law 95–202

AGENCY: Department of Veterans Affairs.

ACTION: Final regulation.

SUMMARY: The Department of Veterans Affairs (VA) has amended its regulations concerning persons who are included as having served on active duty. The need for this action results from recent decisions of the Secretary of the Air Force that the World War II service of members of the following two groups constitutes active military service in the Armed Forces of the United States for purposes of all laws administered by VA: "Civilian Crewmen of United States Coast and Geodetic Survey Vessels Who Performed Their Service in Areas of Immediate Military Hazard While Conducting Cooperative Operations with and for the United States Armed Forces Within a Time Frame of December 7, 1941, to August 15, 1945" and the "Honorably Discharged Members of the American

1991
UMI

Volunteer Group (Flying Tigers) Who Served During the Period December 7, 1941 to July 18, 1942". The effect of this action is to confer veteran status for VA benefit purposes on former members of these groups who were discharged under honorable conditions.

DATES: The effective dates are April 8, 1991, for § 3.7(x)(20) and May 3, 1991, for § 3.7(x)(21), the respective dates on which the Secretary of the Air Force determined that such service constitutes active duty.

FOR FURTHER INFORMATION CONTACT: Steven Thornberry, Consultant, Regulations Staff (211B), Compensation and Pension Service, Veterans Benefits Administration, 810 Vermont Avenue, NW., Washington, DC 20420, telephone (202) 233–3005.

SUPPLEMENTARY INFORMATION: Section 401 of Public Law 95–202 authorized the Secretary of Defense to determine whether the service of members of civilian or contractual groups shall be considered active duty for the purposes of all laws administered by VA.

A notice of certification of the following group by the Secretary of the Air Force appeared in the **Federal Register** of May 20, 1991, page 23054: Civilian Crewmen of United States Coast and Geodetic Survey Vessels Who Performed Their Service in Areas of Immediate Military Hazard While Conducting Cooperative Operations with and for the United States Armed Forces Within a Time Frame of December 7, 1941, to August 15, 1945.

A notice of certification of the following group by the Secretary of the Air Force appeared in the **Federal Register** of June 6, 1991, page 26072: Honorably Discharged Members of the American Volunteer Group [Flying Tigers] Who Served During the Period December 7, 1941 to July 18, 1942.

VA is issuing a final rule to amend the provisions of 38 CFR 3.7(x). This change is necessary to expand the regulatory provisions in accordance with the April 8, 1991, and May 3, 1991, determinations of the Secretary of the Air Force, which are binding on VA. Because this amendment does not constitute a substantive change, publication as a proposal for public notice and comment is unnecessary.

Since a notice of proposed rulemaking is unnecessary and will not be published, this amendment is not a "rule" as defined in and made subject to the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. This amendment will not directly affect any small entity.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that this regulatory amendment is non-major for the following reasons:

(1) It will not have an annual effect on the economy of $100 million or more;

(2) It will not cause a major increase in costs or prices;

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

There is no affected Catalog of Federal Domestic Assistance program number.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

Approved: November 18, 1991.

Edward J. Derwinski,

Secretary of Veterans Affairs.

For the reasons set forth in the preamble, 38 CFR part 3 is amended as follows:

PART 3—ADJUDICATION

1. The authority citation for part 3, subpart A continues to read as follows:

Authority: 72 Stat. 1114; 38 U.S.C. 501(a).

2. In § 3.7, paragraphs (x) (20) and (21) are added and the authority citation at the end of § 3.7(x) is revised to read as follows:

§ 3.7 Persons included.

* * * * *

(x) *Active military service certified as such under section 401 of Pub. L. 95–202.*

* * *

(20) Civilian Crewmen of United States Coast and Geodetic Survey Vessels Who Performed Their Service in Areas of Immediate Military Hazard While Conducting Cooperative Operations with and for the United States Armed Forces Within a Time Frame of December 7, 1941, to August 15, 1945.

(21) Honorably Discharged Members of the American Volunteer Group (Flying Tigers) Who Served During the Period December 7, 1941 to July 18, 1942.

(Authority: Pub. L. 95–202, Sec. 401)

BILLING CODE 8320–01–M

38 CFR Part 3

RIN 2900–AE92

Reduction Because of Hospitalization

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) has amended its adjudication regulations on reductions of pensions of certain veterans receiving institutional care. These amendments are based on recently enacted legislation and further consideration of previous legislation. The intended effect of these amendments is to minimize pension reductions when VA provides institutional care.

EFFECTIVE DATE: The amendments that pertain to Improved Pension rates for certain veterans receiving institutional care are effective February 1, 1990, the date provided by legislation. The amendments pertaining to veterans receiving Section 306 pension who are institutionalized are effective January 21, 1992.

FOR FURTHER INFORMATION CONTACT: John Bisset, Jr., Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233–3005.

SUPPLEMENTARY INFORMATION: VA published a proposal to amend 38 CFR 3.454 and 3.551 in the **Federal Register** of February 25, 1991 (56 FR 7630–2). Interested persons were invited to submit written comments, suggestions or objections on or before March 27, 1991. As no comments were received, the proposed amendments are adopted with only minor technical changes. Additionally, 38 CFR 3.501(i), concerning the effective dates for reductions based on institutional care, is amended to provide effective dates for reduction upon readmission, and to conform with the newly adopted amendments to 38 CFR 3.551.

Since the publication of the proposed regulation, section 101 of Veterans' Benefits Programs Improvement Act of 1991, Public Law 102–86, amended 38 U.S.C. 5503 (formerly 3203) to provide for reduction of improved pension to $90 rather than $60 monthly for veterans without dependents effective the first of the month following readmission to a domiciliary or nursing home by VA or at VA expense when the readmission is within six months of a period during which there was a required reduction. This technical amendment to section 111 of the Veterans' Benefits Amendments of 1989, Public Law 101–237, is effective the same date as that legislation, February 1, 1990 (See 56 FR 7630–2). The proposed change to § 3.551(e)(2) has been amended to implement this new statutory provision. Because this amendment implements a statutory change, publication as a proposal for public notice and comment is unnecessary.

The Secretary hereby certifies that these regulatory amendments will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. The reason for this certification is that these amendments would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), these amendments are exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that these regulatory amendments are non-major for the following reasons:

(1) They will not have an annual effect on the economy of $100 million or more.

(2) They will not cause a major increase in costs or prices.

(3) They will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program number is 64.104.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pension, Veterans.

Approved: November 13, 1991.

Edward J. Derwinski,

Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 3 is amended as set forth below:

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, and Dependency and Indemnity Compensation

1. The authority citation for part 3, subpart A, is revised to read as follows:

Authority: 72 Stat. 1114; 38 U.S.C. 501(a), unless otherwise noted.

2. In § 3.501, paragraphs (i)(3) and (4) are redesignated as paragraphs (6) and (7) respectively, new paragraphs (3), (4) and (5) are added, and paragraphs (1) and (2) are revised to read as follows:

§ 3.501 Veterans.

* * * * *

(i) *Hospitalization.* (1) *Section 3.551(b).* Last day of the sixth calendar month following admission if veteran without dependents.

(2) *Section 3.551(c).* (i) Last day of the second calendar month following admission to domiciliary care if veteran without spouse or child or, though married, is receiving pension at the rate provided for a veteran without dependents. (ii) Last day of the third calendar month following admission for hospital or nursing home care if veteran without spouse or child or, though married, is receiving pension at the rate provided for a veteran without dependents. (iii) Upon readmission to hospital, domiciliary, or nursing home care within 6 months of a period for which pension was reduced under § 3.551(c)(1), the last day of the month of such readmission.

(3) *Section 3.552(b)* Upon readmission to hospital care within 6 months of a period of hospital care for which pension was affected by the provisions of § 3.552(b)(1) and (2) or § 3.552(k) and discharge or release was against medical advice or was the result of disciplinary action, the day preceding the date of such readmission.

(4) *Section 3.551(d)* (i) Last day of the second calendar month following admission to domiciliary care if veteran without spouse or child or, though married, is receiving pension at the rate for a veteran without dependents. (ii) Last day of the third calendar month following admission for hospitalization or nursing home care if veteran without spouse or child or, though married, is receiving pension at the rate for a veteran without dependents.

(iii) Upon readmission to hospital, domiciliary, or nursing home care within 6 months of a period for which pension was reduced under § 3.551(d)(1) or (2), the last day of the month of such readmission.

(5) *Section 3.551(e)* (i) Last day of the third calendar month following admission to domiciliary or nursing home care if veteran without spouse or child or, though married, is receiving pension at the rate for a veteran without dependents. (ii) Upon readmission to domiciliary or nursing home care within 6 months of a period of domiciliary or nursing home care for which pension was reduced under § 3.551(e)(1), the last day of the month of such readmission.

* * * * *

3. In § 3.551 the heading of paragraph (b) is revised, the existing text in paragraph (b) is designated as paragraph (b)(1), and new paragraphs (b)(2) and (b)(3) are added to read as follows:

§ 3.551 Reduction because of hospitalization.

* * * * *

(b) *Old-law pension.* * * *

(2) *Readmission following regular discharge.* Where a veteran has been given an approved discharge or release, readmission the next day to the same or any other VA institution begins a new period of hospitalization, unless the veteran was released for purposes of admission to another VA institution.

(3) *Readmission following irregular discharge.* When a veteran whose award is subject to reduction under this paragraph has been discharged or released from a VA institution against medical advice or as a result of disciplinary action, reentry within 6 months from the date of previous admission constitutes a continuation of that period of hospitalization and the award will not be reduced prior to the first day of the seventh calendar month following the month of original admission, exclusive of authorized absences. Reentry 6 months or more after such discharge or release shall be considered a new admission.

* * * * *

4. In § 3.551 paragraphs (d), (f), and (g) are redesignated as (f), (g), and (h), respectively, a new paragraph (d) is added, paragraph (e) is revised, and the introductory text of redesignated paragraph (h)(1) is revised to read as follows:

§ 3.551 Reduction because of hospitalization.

* * * * *

(d) *Improved pension prior to February 1, 1990.* (1) Where any veteran having neither spouse nor child, or any veteran who is married or has a child and is receiving pension as a veteran without dependents, is being furnished domiciliary care by VA, no pension in excess of $60 monthly shall be paid to or for the veteran for any period after the end of the second full calendar month following the month of admission for such care. (38 U.S.C. 3203(a))

(2) Where any veteran having neither spouse nor child, or any veteran who is married or has a child and is receiving pension as a veteran without dependents, is furnished hospital or

VOL 56 ISS 244 DEC 19 1991 UMI

nursing home care by VA, no pension in excess of $60 monthly shall be paid to or for the veteran for any period after the end of the third full calendar month following the month of admission for such care. (38 U.S.C. 3203(a))

(3) No pension in excess of $60 monthly shall be paid to or for a veteran having neither spouse nor child, or to a veteran who is married or has a child and is receiving pension as a veteran without dependents, for any period after the month in which the veteran is readmitted within 6 months of a period of care for which pension was reduced under paragraph (d)(1) or (2) of this section. (38 U.S.C. 3203(a))

(4) Where improved pension is being paid to a married veteran at the rate prescribed by 38 U.S.C. 521(b) all or any part of the rate payable under 38 U.S.C. 521(c) may be apportioned for a spouse as provided in § 3.454(b). (38 U.S.C. 3203(a))

(5) The provisions of paragraphs (d)(1), (2), and (3) of this section are not applicable to any veteran who has a child, but is receiving pension as a veteran without a dependent because it is reasonable that some part of the child's estate be consumed for the child's maintenance under 38 U.S.C. 522(b).

(6) For the purpose of paragraphs (d)(1), (2), and (3) of this section, if a veteran is furnished hospital or nursing home care by VA and then is transferred to VA-furnished domiciliary care, the period of hospital or nursing home care shall be considered as domiciliary care. Similarly, if a veteran is furnished domiciliary care by VA and then is transferred to VA-furnished hospital or nursing home care, the period of domiciliary care shall be considered hospital or nursing home care.

(e) *Improved pension after January 31, 1990.* (1) Where any veteran having neither spouse nor child, or any veteran who is married or has a child and is receiving pension as a veteran without dependents, is furnished domiciliary or nursing home care by VA, no pension in excess of $90 monthly shall be paid to or for the veteran for any period after the end of the third full calendar month following the month of admission for such care.

(Authority: 38 U.S.C. 3203(a))

(2) No pension in excess of $90 monthly shall be paid to a veteran having neither spouse nor child, or to a veteran who is married or has a child and is receiving pension as a veteran without dependents, for any period after the month in which the veteran is readmitted within six months of a period of domiciliary or nursing home care for which pension was reduced under paragraph (e)(1) of this section.

(3) Where improved pension is being paid to a married veteran at the rate prescribed by 38 U.S.C. 521(b) all or any part of the rate payable under 38 U.S.C. 521(c) may be apportioned for a spouse as provided in § 3.454(b).

(Authority: 38 U.S.C. 3203(a))

(4) For the purposes of paragraph (e)(1) of this section, if a veteran is furnished hospital care by VA and then is transferred to VA-furnished nursing home or domiciliary care, the period of hospital care shall not be considered as nursing home or domiciliary care. Transfers from VA-furnished nursing home or domiciliary care to VA-furnished hospital care then back to nursing home or domiciliary care shall be considered as continuous nursing home or domiciliary care provided the period of hospitalization does not exceed six months. Similarly, if a veteran is transferred from domiciliary or nursing home to a VA hospital and dies while so hospitalized, the entire period of VA care shall be considered as domiciliary or nursing home care. Nursing home or domiciliary care shall be considered as terminated effective the date of transfer to a VA hospital if the veteran is completely discharged from VA care following the period of hospitalization or if the period of hospitalization exceeds six months.

(5) Effective February 1, 1990, reductions of improved pension based on admissions or readmissions to VA hospitals or any hospital at VA expense shall no longer be made except when required under the provisions of 38 CFR 3.552.

(6) The provisions of paragraphs (e)(1) and (2) of this section are not applicable to any veteran who has a child, but is receiving pension as a veteran without a dependent because it is reasonable that some part of the child's estate be consumed for the child's maintenance under 38 U.S.C. 522(b).

* * * * *

(h) *Hospitalization.* (1) *General.* The reduction required by paragraphs (d) and (e), except as they refer to domiciliary care, shall not be made for up to three additional calendar months after the last day of the third month referred to in paragraphs (d)(2) or (e)(1) of this section, or after the last day of the month referred to in paragraphs (d)(3) or (e)(2) of this section, under the following conditions:

* * * * *

§ 3.551 [Amended]

5. In § 3.551(a) in the first sentence after the word "reduction" and before the word "when" add the words "as specified below".

§ 3.551 [Amended]

6. In newly redesignated § 3.551(b)(1) remove the phrase ", *and service pension based on entitlement prior to July 1, 1960*" from the heading.

§ 3.551 [Amended]

7. In the heading to § 3.551(c) remove the words ", *improved pension, and service pension based on entitlement after June 30, 1960*". In § 3.551(c)(1) after the word "furnished" and before the word "domiciliary" add the words "hospital, nursing home or", remove the dollar amount "$60" and add in its place the dollar amount "$50".

§ 3.551 [Amended]

8. In § 3.551 remove paragraphs (c)(2) and (4), (6) and (7), and redesignate paragraphs (c)(3) and (c)(5) as (c)(2) and (c)(3), respectively. In the newly redesignated paragraph (c)(2), remove the words "or (2)".

§ 3.551 [Amended]

9. In newly redesignated § 3.551(c)(2) and (c)(3) remove the dollar amount "$60" wherever it appears, and add in its place the dollar amount "$50".

§ 3.551 [Amended]

10. In newly redesignated § 3.551(h)(2) remove the paragraph designations "(c)(2)", "(c)(3)", and "(g)(1)" wherever they appear, and add, in their place, the paragraph designations "(d)", "(e)", and "(h)(1)", respectively.

§ 3.551 [Amended]

11. In newly redesignated § 3.551(h)(3) after the word "monthly" and before the word "payable" add the phrase "or $90, if reduction is under paragraph (e)(1)".

§ 3.454 [Amended]

12. In § 3.454(b)(1) and (c) remove the dollar amount "$60", wherever it appears, and add, in its place, the dollar amount "$50".

§ 3.454 [Amended]

13. In § 3.454(b)(2) and (d) remove "§ 3.551(c)" and add, in its place, "§ 3.551(d) or (e)(2)".

§ 3.454 [Amended]

14. In § 3.454(d) after the word "monthly" add the words "if reduction is under § 3.551(d) or (e)(2), or $90 monthly if reduction is under § 3.551(e)(1)".

15. In § 3.454 add paragraph (b)(3) and its authority citation to read as follows:

§ 3.454 Veterans disability pension.

* * * * *

(b) * * *

(3) Where the amount of improved pension payable to a married veteran under 38 U.S.C. 521(b) is reduced to $90 monthly under § 551(e)(1) an apportionment may be made to such veteran's spouse upon an affirmative showing of hardship. The amount of the apportionment generally will be the difference between $90 and the rate payable if pension was being paid under 38 U.S.C. 521(c) including the additional amount payable under 38 U.S.C. 521(e) if the veteran is so entitled.

(Authority: 38 U.S.C. 3203(a))

38 CFR Part 3

RIN 2900-AE99

Headstone Allowance; Temporary Program of Vocational Training

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) has amended its adjudication regulations concerning payment of a monetary allowance in lieu of a government-furnished headstone or marker and eligibility for the temporary program of vocational training available to certain pension beneficiaries. These amendments are based on statutory changes which affect these programs. The intended effect of these changes is to expand and extend benefit eligibility.

EFFECTIVE DATE: The amendments are effective December 18, 1989, the date the legislation was signed into law.

FOR FURTHER INFORMATION CONTACT: John Bisset, Jr., Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233-3005.

SUPPLEMENTARY INFORMATION: VA published a proposal to amend 38 CFR 3.342 and 3.1612 in the **Federal Register** of May 3, 1991 (56 FR 20394-5). Interested persons were invited to submit written comments, suggestions or objections on or before June 3, 1991. It should be noted that section 8041 of the Omnibus Budget Reconciliation Act of 1990, Public Law 101-508, eliminated the payment of the monetary allowance in lieu of VA-provided headstone or marker for deaths occurring on or after November 1, 1990. As no comments were received, the proposed amendments are adopted with only minor technical amendments.

The Secretary hereby certifies that these regulatory amendments will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601-612. The reason for this certification is that these amendments would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), these amendments are exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that these regulatory amendments are non-major for the following reasons:

(1) They will not have an annual effect on the economy of $100 million or more.

(2) They will not cause a major increase in costs or prices.

(3) They will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program numbers are 64.101 and 64.104.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pension, Veterans.

Approved: November 13, 1991.

Edward J. Derwinski,

Secretary of Veterans Affairs.

For the reasons set forth in the preamble, 38 CFR part 3, subpart A is amended as follows:

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, and Dependency and Indemnity Compensation

1. The authority citation for part 3, subpart A is revised to read as follows:

Authority: 72 Stat. 1114; 38 U.S.C. 501(a).

2. In § 3.342, in paragraphs (c)(1) and (c)(2) remove the words "age 50" where they appear and add, in their place, the words "age 45"; the authority citation at the end of paragraph (c)(2) is removed; a new paragraph (c)(3) and a new authority citation are added to read as follows:

§ 3.342 Permanent and total disability ratings for pension purposes.

* * * * *

(c) * * *

(3) If a veteran secures employment within the scope of a vocational goal identified in his or her individualized written vocational rehabilitation plan, or in a related field which requires reasonably developed skills and the use of some or all of the training or services furnished the veteran under such plan, not later than one year after eligibility to counseling under § 21.6040(b)(1) of this chapter expires, the veteran's permanent and total evaluation for pension purposes shall not be terminated by reason of the veteran's capacity to engage in such employment until the veteran has maintained that employment for a period of not less than 12 consecutive months.

(Authority: 38 U.S.C. 1524(c))

3. In § 3.1612, paragraph (e)(3) is redesignated as paragraph (e)(4), and paragraph (e)(2)(iii) is redesignated as paragraph (e)(3); paragraphs (b)(3), (c), (e)(1) and (e)(2)(i) are revised and new authority citations are added at the end of those paragraphs to read as follows:

§ 3.1612 Monetary allowance in lieu of a Government-furnished headstone or marker.

* * * * *

(b) * * *

(3) The headstone or marker was purchased to mark the otherwise unmarked grave of the deceased veteran or, if death occurred prior to December 18, 1989, the veteran's identifying information was added to an existing headstone or marker.

(Authority: 38 U.S.C. 2306(d))

* * * * *

(c) *Person entitled to request a Government-furnished headstone or marker.* For purposes of this monetary allowance, the term "person entitled to request a headstone or marker" includes, but is not limited to, the person who purchased the headstone or marker (or if death occurred prior to December 18, 1989, the person who paid for adding the veteran's identifying information to an existing headstone or marker), or the executor, administrator or person representing the deceased's estate.

(Authority: 38 U.S.C. 2306(d))

* * * * *

(e) *Payment and amount of the allowance.*

(1) The monetary allowance is payable as reimbursement to the person entitled to request a Government-furnished headstone or marker. If funds

VOL 56 ISS 244 DEC 19 1991 UMI

of the deceased's estate were used to purchase the headstone or marker or, if death occurred prior to December 18, 1989, to have the deceased's identifying information added to an existing headstone or marker, and no executor or administrator has been appointed, payment may be made to a person who will make a distribution of this monetary allowance to the person or persons entitled under the laws governing the distribution of intestate estates in the State of the decedent's personal domicile.

(Authority: 38 U.S.C. 2306(d))

(2) * * *

(i) Actual cost of acquiring a non-Government headstone or marker or, if death occurred prior to December 18, 1989, the actual cost of adding the veteran's identifying information to an existing headstone or marker; or

(Authority: 38 U.S.C. 2306(d))

38 CFR Parts 3 and 13

RIN 2900-AF07

Limitation on Compensation Benefits for Certain Incompetent Veterans; Computation of Estate

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) has amended its adjudication and fiduciary activities regulations concerning the payment of compensation benefits to or for certain incompetent veterans, and the computation of those veterans' estates. This amendment is necessary to implement recently enacted legislation. The intended effect of this amendment is to prohibit the payment of compensation to incompetent veterans without dependents whose estates exceed $25,000, and to clarify how VA will compute the value of the estates of these incompetent veterans.

EFFECTIVE DATE: This amendment is effective November 1, 1990, the date specified in the enacting legislation.

FOR FURTHER INFORMATION CONTACT: John Bisset, Jr., Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233-3005.

SUPPLEMENTARY INFORMATION: VA published a proposal to add a new § 3.853 to 38 CFR and to amend §§ 3.501 and 13.109(d)(5) in the **Federal Register** of June 4, 1991 (56 FR 25399-400). Interested persons were invited to submit written comments, suggestions or objections on or before July 5, 1991. We received one comment from a private individual.

The commenter objected to the proposed regulatory amendments because he believes that, in effect, the statute they implement forces an affected veteran to purchase a home to avoid having his or her benefits terminated. The commenter feels that the regulations should delay termination of benefits until such time as the veteran or his or her fiduciary has exhausted the veteran's procedural due process and appellate rights, or the veteran has an opportunity to purchase a home.

VA does not concur. Section 8001 of the Omnibus Budget Reconciliation Act of 1990, Public Law 101-508, added section 5505 (formerly 3205) to title 38, United States Code to prohibit the payment of compensation benefits to or for an incompetent veteran, having neither spouse, child nor dependent parent, whose estate, excluding the value of the veteran's home, exceeds $25,000 until the estate has been reduced to less than $10,000. By excluding the value of the veteran's home from the estate computation, Congress has expressed its intention that no veteran who owns a home should be forced to sell it in order to have sufficient available assets to meet living expenses until the estate has been reduced to less than $10,000. VA finds no sound basis, however, for inferring that Congress intended different effective dates of termination based on whether or not a veteran owns or purchases a home, whether or not, or to what extent, a veteran elects to exercise his or her procedural due process and appellate rights, or any other reason.

The provisions of 38 CFR 3.105(h)(1) specify that if a request for predetermination hearing is received by VA within 30 days from the date of the notice, benefit payments will continue at the previously established level pending a final determination. If the final determination is that the facts warrant the termination of benefit payments, however, the effective date of termination is governed by the applicable provisions of §§ 3.500 through 3.503. Terminating benefits on the last day of the month in which all factors requiring a statutory termination are present is consistent with VA's regulatory policy for other statutory purposes, e.g., incompetent veterans who are hospitalized, institutionalized or domiciled by the United States under the provisions of § 3.557.

The commenter also believes that these regulations should treat estates that exceed $25,000 by a large amount differently than those that exceed $25,000 by only a small amount since large estates will survive until September 30, 1992, the date that 38 U.S.C. 5505 (formerly 3205) expires, relatively intact.

VA does not concur. The Secretary has broad authority under 38 U.S.C. 501(a) (formerly 210(c)) to make all regulations necessary or appropriate to carry out the laws administered by VA, but only to the extent that these regulations are consistent with the governing statutes. Since 38 U.S.C. 5505 (formerly 3205) makes no distinction based on the amount by which estates exceed $25,000, it is beyond VA's authority to create such a distinction in the implementing regulations.

The proposed regulation (See 56 FR 25399-400), in error, referred to the resumption of compensation payments when the affected veteran's estate was reduced to $10,000. The statutory language is clear (See 38 U.S.C. 5505 (formerly 3205)). Compensation payments are to resume when the affected veteran's estate is reduced to less than $10,000. The final regulation has been appropriately amended.

VA appreciates the comment submitted in response to the proposed rule, which is now adopted with the amendment described above and other minor technical amendments.

The Secretary hereby certifies that these regulatory amendments will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601-612. The reason for this certification is that these amendments would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), these amendments are exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that these regulatory amendments are non-major for the following reasons:

(1) They will not have an annual effect on the economy of $100 million or more.

(2) They will not cause a major increase in costs or prices.

(3) They will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program number is 64.109.

List of Subjects

38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

38 CFR Part 13

Surety bonds, Trusts and trustees, Veterans.

Approved: November 13, 1991.

Edward J. Derwinski,

Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 3 and part 13 are amended as set forth below:

PART 3—ADJUDICATION

Subpart A—Pension Compensation, and Dependency and Indemnity Compensation

1. The authority citation for part 3, subpart A, is revised to read as follows:

Authority: 72 Stat. 1114; 38 U.S.C. 501(a), unless otherwise noted.

2. In § 3.501, new paragraph (n) and its authority citation are added to read as follows:

§ 3.501 Veterans.

* * * * *

(n) *Section 3.853. Incompetents; estate over $25,000.* Incompetent veteran receiving compensation, without spouse, child, or dependent parent, whose estate exceeds $25,000: Last day of the first month in which the veteran's estate exceeds $25,000, but not earlier than November 1, 1990.

(Authority: 38 U.S.C. 5505)

3. The undesignated center heading preceding § 3.850 is revised to read as follows:

Incompetents, Guardianship and Institutional Awards

* * * * *

4. Section 3.853 is added to read as follows:

§ 3.853 Incompetents; estate over $25,000.

(a) Effective November 1, 1990, through September 30, 1992, where a veteran:

(1) Is rated incompetent by VA, and

(2) Has neither spouse, child, nor dependent parent, and

(3) Has an estate, excluding the value of the veteran's home, which exceeds $25,000, further payments of compensation shall not be made until the estate is reduced to less than $10,000. The value of the veteran's estate shall be computed under the provisions of § 13.109 of this chapter. Payment of compensation shall be discontinued the last day of the first month in which the veteran's estate exceeds $25,000.

(b) Where payment of compensation has been discontinued by reason of paragraph (a) of this section, it shall not be resumed for any period prior to October 1, 1992, until VA has received evidence showing the estate has been reduced to less than $10,000, or any criterion of paragraph (a) (1) or (2) of this section is no longer met. Payments shall not be made for any period prior to the date on which the estate was reduced to less than $10,000, or a criterion of paragraph (a) (1) or (2) of this section was no longer met.

(c) If a veteran denied payment of compensation under paragraph (a) of this section is subsequently rated competent for more than 90 days, the withheld compensation shall be paid to the veteran in a lump-sum. However, a lump-sum payment shall not be made to or on behalf of a veteran who, within such 90-day period, dies or is again rated incompetent.

(d) The compensation payments to an incompetent veteran who is hospitalized, institutionalized, or domiciled by the United States, or any political subdivision thereof, are subject to the provisions of § 3.557 of this part.

(Authority: 38 U.S.C. 5505)

PART 13—VETERANS BENEFITS ADMINISTRATION, FIDUCIARY ACTIVITIES

5. The authority citation for part 13 is revised to read as follows:

Authority: 72 Stat. 1114, 1232, as amended, 1237; 38 U.S.C. 501(a), 5502, 5503, 5711, unless otherwise noted.

6. Section 13.109 is amended by revising the section heading, paragraph (d)(5), and the authority citation appearing at the end of the section to read as follows:

§ 13.109 Determination of value of estate; 38 U.S.C. 5503(b)(1)(A) and 38 U.S.C. 5505.

* * * * *

(d) The following will not be included as assets:

* * * * *

(5)(i) *For purposes of determinations under 38 U.S.C. 5503(b)(1)(A).* The value of the veteran's home unless medical prognosis indicates that there is no reasonable likelihood that the veteran will again reside in the home. It may be presumed that there is no likelihood for return when the veteran is absent from the home for a continuous period of 12 months because of the need for care, and the prognosis is void of any expectation for a return to the home.

(ii) *For purposes of determinations under 38 U.S.C. 5505.* The value of the veteran's home.

* * * * *

(Authority: 38 U.S.C. 5505)

* * * * *

RIN 0938-AF36

Medicaid Program: Medicaid Eligibility Quality Control Program

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Response to comments on final rule.

SUMMARY: This document responds to public comments received by the Department on a final rule issued on May 31, 1990, relating to the Department's decision not to publish regulations on the basis of the results of congressionally mandated studies of the quality control systems for the Aid to Families with Dependent Children (AFDC) program and the Medicaid program. The purpose of the studies, which were required by the Consolidated Omnibus Budget Reconciliation Act of 1985, was to examine how best to operate quality control systems in order to obtain information which would allow program managers to improve the quality of administration and provide reasonable data on which to base withholding Federal matching payments for excessive levels of erroneous State payments.

FOR FURTHER INFORMATION CONTACT: Kathy Rama, (301) 966-5929.

SUPPLEMENTARY INFORMATION:

I. Background

The Medicaid Eligibility Quality Control (MEQC) program is a system developed to identify errors in determinations of Medicaid eligibility and to reduce erroneous expenditures in medical assistance payments by

VOL
56
ISS
244
DEC
19
1991
UMI

monitoring eligibility determinations. The system promotes payment accuracy, fiscal responsibility, and program integrity.

On May 31, 1990 (55 FR 22142), we published a final rule that revised certain MEQC requirements. In the preamble to that final rule, we noted that, at the time the notice of proposed rulemaking for the final rule was published (January 26, 1987), certain statutorily required quality control studies had not been completed. The studies were required by section 12301 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA), Public Law 99–272, as amended by section 1710 of the Tax Reform Act of 1986, Public Law 99–514. The purpose of the studies was to examine how best to operate quality control systems in order to obtain information which would allow program managers to improve the quality of administration and provide reasonable data on which to base withholding Federal matching payments for excessive levels of erroneous State payments.

As a result of receiving numerous State comments that questioned the appropriateness of issuing a final rule before the results of the studies were known, we delayed issuing the final rule until the findings of the studies were available. After considering the findings of the studies, we concluded and stated in the preamble to the final rule that it would not be appropriate to publish additional regulations. We gave our reasons as follows:

First, the current MEQC program is sound and has proved to be efficient and effective in reducing erroneous payments. The primary purpose of the MEQC program is to ensure that those individuals who receive assistance are eligible for services. The substantial reductions in error rates achieved by States demonstrate significant improvements in payment accuracy over time, thus indicating the effectiveness of the program.

Second, we analyzed the MEQC program to respond to specific, identified problems in the current process—not simply theoretical improvements which often entail considerable new costs and the diversion of resources, but do little to actually enhance the program.

Third, based on our analysis, we concluded that the principles and methods of the current program are valid. The concept of a uniform, national error threshold and shared fiscal responsibility for error is fair and equitable. The use of a double sampling methodology involving a State review of a sample of cases followed by a Federal re-review of a subsample of those cases is far more practical and efficient than duplicative, separate systems. It also provides an appropriate sharing of responsibilities and costs to achieve both error reduction and fiscal accountability. The sampling procedures and regression estimation methodology provide statistically valid, essentially unbiased and reliable estimates of payment error rates for corrective action and the calculation of disallowances. The definition and measurement of error are also reasonably balanced and complete.

Fourth, the current quality control focus on payment accuracy, fiscal responsibility, and program integrity has been and continues to be necessary and proper, given the appropriate public concern with high levels of erroneous payments. Quality control is, however, only one component of individual State management improvement efforts and the comprehensive Federal monitoring system designed to assess overall program performance. The MEQC program provides States with information on the frequency, magnitude, and sources of error to guide improvement in payment accuracy. The current MEQC program was never intended to be the only source of information about errors, much less provide comprehensive measures of program performance, such as timeliness, service delivery, efficiency, and effectiveness.

To the extent that program improvements are legitimately needed, we indicated that we would address these areas through appropriate statutory and administrative changes. We invited public comments on this approach.

II. Public Comments and Departmental Responses

In response to our request for public comments, we received correspondence from three State agencies, one private health care agency, and one law firm representing 18 public welfare agencies. Three of the commenters raised issues that were not within the scope for which comments were solicited, and as indicated in the preamble to the final rule, we are not addressing them in this document. Our responses to the remaining comments follow:

Comment: Two commenters recommended that the backlog of past "sanctions" in the Medicaid program be eliminated as had been done in the AFDC program.

Response: The Congress eliminated the backlog of past disallowances in the AFDC quality control program and proposed that the Department revise tolerance levels for AFDC quality control because the number of States which were liable for disallowances and the amount of past disallowances were very large. We believe that the fact that Congress took no similar action in the case of Medicaid disallowances reflects the fact that Congress believes the imposition of such disallowances to be appropriate. Further, we believe the Medicaid disallowances for prior years were established properly based on a sound review and measurement system which includes a separate Medicaid review of any ineligible case identified in the AFDC stratum to determine whether Medicaid eligibility exists.

Comment: One commenter suggested that, for future years, the performance standards be revised so that only States at the extreme of bad performance are "sanctioned."

Response: We do not believe that revisions to the 3 percent performance standard established by Congress would be appropriate. The 1988 national average error rate was 2.0 percent, with 4 States exceeding the 3-percent tolerance; the 1989 national average error rate was 2.1 percent, with five States exceeding the 3-percent tolerance. The national error rates for 1986 and 1987 were 2.5 and 2.2 percent, respectively. State performance is relatively consistent among States. We believe a national uniform error threshold is fair and equitable to States.

Comment: One commenter proposed that "sanctions" should be kept sufficiently low so that they do not endanger the States' ability to provide Medicaid services and recommended a new method of calculating disallowances similar to the sliding scale used in the AFDC program.

Response: Unlike the AFDC program, where error rates, the number of States liable, and disallowance amounts are high, recent error rates in Medicaid have been consistently low. The 1989 2.1 percent national error rate is evidence that States can maintain low error rates through accurate eligibility determinations and effective program management. We believe that current disallowance amounts are sufficiently low and do not endanger the States' ability to provide services.

Comment: Two commenters recommended that performance thresholds applied to States be adjusted to reflect caseloads that are differentially prone to error.

Response: Again, we do not believe that changes in the 3-percent performance standard established by the Congress would be appropriate. States may target effective corrective

actions to reduce the incidence of errors in error prone cases. Further, research provides no scientific basis to make consistent adjustments for case characteristics. Because so little of the variation in error rates between States can be explained by statistical analysis, the selection of specific characteristics for which to make adjustments cannot be empirically determined. The arbitrary selection of different alternative adjustment factors can result in dramatically different, and therefore inequitable, adjustments for States.

Comment: Two commenters suggested that States be rewarded for good performance. One commenter recommended that States with underpayment rates that are lower than the national average be allowed to offset their error rates with this reduction.

Response: Recent error rates in Medicaid have been consistently below the statutory threshold. For this reason, we believe it is not necessary to replace the disallowance process currently required by statute with an alternative system of incentives and disallowances. However, we are currently studying the feasibility of structuring an accountability system for Medicaid negative case actions. In this context, we may consider an incentive for good performance.

Comment: One commenter believes the method for calculating excess resource errors should be adjusted to avoid multiple counting of errors. That is, an excess resource error should be assigned only to the first month of eligibility or until resources are spent down.

Response: Under section 1902(r)(2) of the Act, States have the option to apply more liberal policies in determining income and resource eligibility of specified eligibility groups. If a State elects this option, it must amend its State Medicaid plan in order for MEQC to review cases in accordance with it. If a State has not chosen to use this option, statutory requirements mandate that an individual is ineligible for each month that he or she holds excess resources.

Comment: Two commenters believe States should not be "sanctioned" for errors that are found on the basis of information not available during the eligibility determination.

Response: We disagree with this comment. Although the source used to identify errors may not have been available during the eligibility determination, the factor causing the error did exist. States need to be aware of all errors to develop methods for identifying the error cause during the eligibility determination. States are free to use a variety of methods (e.g., collateral contacts) to verify eligibility. The fact that eligibility information was not obtained from one specific source or that data matches may not contain current information is not sufficient reason to hold the State harmless from an error. We recognize that it is unreasonable to hold States accountable for inaccurate, as opposed to outdated, information provided by a Federal agency that is the originating source of the data. Therefore, we have advised States that, effective October 1, 1990, we will not cite errors resulting from erroneous information provided by a Federal agency that is the primary source of verification. However, we believe that not citing errors that are the State's responsibility would undermine the focus of MEQC on fiscal responsibility and payment accuracy.

Comment: One commenter suggested that States should not be "sanctioned" for errors that result from Federal policy interpretations announced for the first time in MEQC reviews. The commenter recommended that the correctness of a payment be determined in accordance with the State plan or a court order and that States be notified of noncomplying State plans before an error is cited, even if the State must enact a law to remove the inconsistency.

Response: Although the comment implies otherwise, Medicaid payment accuracy is determined in accordance with the approved State plan (and approvable plan amendments) since the plan reflects the terms under which Federal matching payments are made to the State. MEQC case reviews are conducted against the approved State plan, regardless of whether or not it has been revised to reflect changes in the statute or regulation, and errors are not cited unless a plan amendment has been disapproved. However, errors are cited when State policy does not conform to the State plan. States can avoid these errors by ensuring that their policies are consistent with State plan provisions.

Regarding payments made under a court order, we determine that a payment is correct if it is made within the scope of the Medicaid program. HCFA does not provide Federal matching payments for services furnished that are beyond the scope of the Medicaid program unless ordered to do so by the court. We are not adopting this recommendation because we do not believe it is reasonable to amend the statute to make available Medicaid funds for court-ordered services that are beyond the scope of the Medicaid program.

Finally, the MEQC program does not interpret or develop Medicaid policy. Medicaid policy interpretations and guidance are available to all States through the State Medicaid Manual as the official HCFA issuance. States also may contact their HCFA Regional Office for technical assistance on correct policy interpretations and correct policy applications.

Comment: One commenter contended that HCFA should assess and report to the States the level of measurement error and sampling error in MEQC reviews.

Response: Since the commenter does not define "measurement error," we are assuming that the term means statistical sampling error (or precision). Estimates of sampling errors (or precision) are provided to the States upon request.

Comment: One commenter suggested that HCFA incorporate broader measures of performance into the MEQC standards.

Response: We agree that States should assess measures of quality and effectiveness against broad program objectives. However, we do not agree that a single comprehensive performance measurement system is necessary to achieve that goal. A comprehensive performance measurement system would be appropriate only if information is unavailable or inadequate for decisionmaking. This is not the case. The MEQC system is but one of several systems that provides program managers with meaningful information. Other procedures include management information reporting systems, management and program evaluations, audits, demonstration projects, and research studies. Further, States are better able to design their own performance measurement systems under current regulations than would be possible under a federally mandated system. Many States oppose the expanded use of performance standards for fiscal liabilities. Therefore, we are not adopting the commenter's suggestion.

Comment: One commenter recommended that we provide a 6-month grace period on "sanctions" after issuance of final regulations.

Response: We disagree with the commenter. We are bound by statutorily set effective dates. The Congress may provide delayed quality control implementation when it chooses and it has done so recently in the care of qualified Medicare beneficiaries. The Administrative Procedure Act requires public opportunity to comment on proposed regulations and provides for a

VOL
56
ISS
244
DE
19
1991
UMI

1-month delayed effective date of final regulations. We believe this regulatory process provides adequate notice for States to anticipate proposed program changes and adequate time to implement provisions of the final rule.

Comment: One commenter believed States should be held harmless from MEQC errors if they relied on erroneous information or advice supplied by Federal agencies.

Response: We agree with the commenter. As stated in an earlier response, we have advised States that, effective October 1, 1990, we will hold them harmless from MEQC errors in situations where erroneous information is provided by a Federal agency that is the primary source of verification (e.g., Supplemental Security Income and Retirement and Survivors Disability Income benefit information from the Social Security Administration). Further, the good faith waiver process of the quality control program has always allowed States to request waivers of errors caused by erroneous information supplied by Federal officials reasonably assumed to be in a position to provide such information.

III. Conclusion

In summary, we are reaffirming our decision not to publish regulations based on the results of the quality control studies required by section 12301 of COBRA, as amended by section 1710 of the Tax Reform Act of 1986.

BILLING CODE 4120-01-M

FEDERAL MARITIME COMMISSION

46 CFR Part 586

[Docket No. 87-06]

Actions To Adjust or Meet Conditions Unfavorable to Shipping in the United States/Peru Trade

AGENCY: Federal Maritime Commission.

ACTION: Rescission of final rule and termination of proceeding.

SUMMARY: The Federal Maritime Commission ("Commission") published a final rule in this proceeding as 46 CFR 586.2 (1990). In response to a Motion to Terminate Proceedings and Rescind Final Rule filed by Naviera Neptuno, S.A. ("Neptuno"), the Commission is rescinding the final rule and terminating the proceeding.

EFFECTIVE DATES: December 19, 1991.

FOR FURTHER INFORMATION CONTACT: Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523-5740.

SUPPLEMENTARY INFORMATION: The Final Rule in this proceeding, issued pursuant to section 19(1)(b), of the Merchant Marine Act, 1920 ("Section 19"), 46 U.S.C. app. 876(1)(b), found conditions unfavorable to shipping to exist in the U.S./Peru trade ("Trade") as a result of the cargo reservation laws, decrees and policies of the Government of Peru ("GOP"). Decree No. 036-82-TC established the GOP cargo reservation system. Although subsequently amended by other decrees which were themselves later repealed by the GOP, Decree No. 036-82-TC remained in effect and provided the underlying basis for reservation of 50% of commercial cargo for movement on Peruvian-flag or associated vessels, thus denying access to major proportions of cargo by third-flag carriers and restricting the service and choice available to U.S. shippers. The Commission's action in this proceeding was based in large part on Decree No. 036-82-TC.

The Commission's final rule, issued on March 28, 1989, assessed a fee of $50,000 per voyage on several Peruvian-flag carriers. The effective date of the rule was, however, deferred due to political and economic conditions then-existing in Peru, brought to the Commission's attention by the Department of State ("DOS"). See 54 FR 12629 (March 28, 1989); 46 CFR 586.2.

Recent GOP Actions and the Motion

The GOP has recently acted to eliminate the cargo reservation policies and decrees which were the focus of the Commission's proceeding. Supreme Decree No. 020-91-TC, enacted July 3, 1991, cancels a number of previous Supreme Decrees, including *inter alia* Supreme Decree No. 036-82-TC. DOS informed the Commission of these enactments by a letter forwarding a July 15, 1991, Diplomatic Note from the Embassy of Peru in which the GOP suggested that the Commission review and repeal the final rule. Neptuno, a Peruvian-flag carrier subject to the rule, has filed a Motion which describes these filings and events and requests that the Commission rescind the final rule and terminate the proceeding.

Replies to the Motion

The Motion was served on all of the parties who had filed comments in earlier proceedings in this Docket. Nedlloyd Lines ("Nedlloyd") replied to the Motion. In addition, DOS sent a letter confirming that the GOP's "decrees are in effect and have eliminated all cargo preference."

Nedlloyd states that the decrees appear to be a significant and progressive step by the GOP but, nevertheless, suggests that rescission of the final rule would be premature. The basis for Nedlloyd's concern is a $100,000 penalty assessed against Nedlloyd earlier this year by the GOP for alleged violations of cargo reservation laws. Nedlloyd states that it is contesting the penalties, and that, although the GOP has taken no action to collect the penalties, they are still "pending." Nedlloyd suggests that the Commission allow a period in which to monitor GOP transition from cargo reservation by directing interested parties to report on conditions in the Trade in sixty days.

Discussion

Nedlloyed states that its asserted liability for penalties based on alleged violations of the cargo reservation scheme remains outstanding. Nedlloyd further advises, however, that this assertion of liability predates the GOP action to remove the cargo reservation scheme itself and that no enforcement efforts have been undertaken by the GOP.[1] In these circumstances, and given Nedlloyd's continuing ability to seek future action by this agency in light of changes in circumstances, we are reluctant to withhold Commission recognition of the GOP's recent actions.

The GOP enactments reflect the intention, expressed in Decree No. 020-91-TC, to "remove the restrictions affecting shipments by exporters and importers, including abolition of Reservation of Freight to promote shipping * * *." Article 1 of the Decree provides for the removal of administrative restrictions of various kinds affecting maritime shipments by exporters or importers. Article 2 abolishes reservation of freight in favor of Peruvian shipping companies, and article 3 provides for "participation of foreign shipping companies in the transport of Peruvian freight for export or import * * * on the basis of strict reciprocity."[2]

Based on the new Peruvian Decree, the Commission will grant Neptuno's Motion. It appears, indeed, that the GOP has taken concrete and positive steps to remove the conditions unfavorable to shipping in our mutual trade previously found. We therefore rescind the final rule and terminate the proceeding.[3]

List of subjects in CFR Part 586

Cargo vessels; Exports; Foreign relations; Imports; Maritime Carriers; Penalties; Rates and fares; Reporting and recordkeeping requirements.

Therefore, pursuant to section 19(1)(b) of the Merchant Marine Act, 1920, 46 U.S.C. app. 876(1)(b); section 10002 of the Foreign Shipping Practices Act of 1988, 46 U.S.C. app. 1710a; Reorganization Plan No. 7 of 1961, 26 FR 7315 (August 12, 1961); and 46 CFR part 585, part 586 of title 46 of the Code of Federal Regulations is amended as follows:

PART 586—ACTIONS TO ADJUST OR MEET CONDITIONS UNFAVORABLE TO SHIPPING IN THE U.S. FOREIGN TRADE

1. The authority citation for part 586 continues to read as follows:

[1] The Commission, of course, would be concerned should efforts be made to belatedly enforce cargo reservation decrees which were the subject of this proceeding. While actual termination of such claims by the GOP would be welcome, the Commission will not speculate further on matters that might concern it in the future in view of the positive achievements in resolving the conditions unfavorable to shipping which were the focus of the proceeding.

[2] Thus, access by non-Peruvian flag carriers will be limited only by denial of access to Peruvian shipping companies to the freight generated in the country of origin of the foreign vessels in question. We note, however, that this proceeding was instituted as a result of concerns of U.S. shippers and shippers' organizations that their access to shipping services was adversely affected by GOP cargo reservation policies and decrees. Among the third-flag carriers affected were Chilean-flag carriers prominent in the movement of refrigerated cargoes. The exclusion of the Chilean-flag carriers arose in the context of a dispute over mutual access to Chilean cargoes by Peruvian-flag carriers. In promulgating its first final rule in this proceeding, 52 FR 46356 (December 7, 1987), the Commission advised that it could not accept as satisfactory a resolution of the matter which incorporated the proposition that regional disputes may be resolved by imposing burdens on U.S. commerce. In effect, the Commission warned, this would allow the GOP to hold the U.S.-Peru trade hostage to obtain concessions elsewhere. We remain committed to the principles earlier enunciated. While it is possible that the language of Article 3 might encompass such an approach to regional problems in the future, a determination to that effect would be speculative at this point. Accordingly, we see no reason in the present context to delay action on the Motion.

[3] This action is, of course, without prejudice to the initiation of further proceedings either on our motion or at the request of any affected third party, should conditions in the Trade warrant.

Authority: 46 U.S.C. app. 876(1)(b); 46 U.S.C. app. 1710a; 46 CFR part 585; Reorganization Plan No. 7 of 1961, 26 FR 7315 (August 12, 1961).

§ 586.2 [Removed]

2. Section 586.2 is removed.

By the Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 1 and 90

[PR Docket No. 90-481; FCC 91-339]

Construction, Licensing, and Operation of Private Land Mobile Radio Stations

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission has adopted a Report and Order modifying and clarifying its rules and policies with regard to station construction, station operation, the discontinuance of station operations, license renewal and license reinstatement in the Private Land Mobile Radio Services. The Report and Order also implements a "finder's preference" program to give a dispositive licensing preference to persons that identify licensees that are not in compliance with the Commission's construction and operation rules.

EFFECTIVE DATE: All rules adopted in this proceeding are effective January 21, 1992.

FOR FURTHER INFORMATION CONTACT: Martin Liebman or Rosalind Allen, 202-634-2443.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, PR Docket No. 90-481, FCC 91-339, adopted October 24, 1991, and released November 21, 1991. The full text of this Report and Order is available for inspection and copying during normal business hours in the FCC Dockets Branch, room 230, 1919 M Street NW., Washington, DC. The complete text may be purchased from the Commission's copy contractor, Downtown Copy Center, 1114 21st Street, NW., Washington, DC 20036, telephone (202) 452-1422.

Summary of Report and Order

1. In the Report and Order in PR Docket No. 90-481, the Commission modifies and clarifies various compliance and licensing rules in the Private Land Mobile Radio Services.

2. First, we clarify our rules regarding the construction and operation of private land mobile radio services. We indicate that the construction of base stations must be in substantial accordance with the parameters specified in a station authorization and that in order to be considered "placed-in-operation", a conventional system must place at least one mobile and one base station in operation by the required deadline, and a trunked system must place at least two mobiles (or a mobile and a control station) and a base station in operation by the required, one-year construction/operation deadline.

3. Second, we clarify our rules regarding the automatic cancellation of licenses. We indicate that license cancel automatically if the licensee permanently discontinues operations for a period of one year or more.

4. Third, we reduce the time period in which a licensee can file for reinstatement and late renewal of an expired license from 180 days to 30 days. Additionally, to make it easier for licensees to file such reinstatement/late renewals, we will permit licensees to file these applications on Forms 574-R and 405-A, as well as the currently required Form 574.

5. Fourth, we establish a new "two-month" database-deletion policy to make frequencies encumbered by expired licenses available for reassignment more rapidly.

6. Finally, we establish a finder's preference program to give an incentive to individuals to assist us in recovering unused channels. Those individuals that provide us with information regarding licensee violations leading to our recovery of channels will be given a dispositive preference to become licensed on the recovered channels.

7. The Report and Order indicates that a preference may only be awarded for the identification of violations of our construction and operation rules and that the preference may only apply to channels that are licensed on an exclusive basis.

8. The Report and Order also provides the procedures that must be followed in filing a finder's preference request and the information that each request must contain.

9. Finally, we indicate that we will deal seriously with any individual that abuses this program or our process, and that such abuse could result in license revocation, monetary forfeiture or possible criminal prosecution.

Regulatory Flexibility Analysis

Pursuant to the Regulatory Flexibility Act of 1980, a final regulatory flexibility analysis has been prepared and is available for public review as part of the full text of this item. The text is available for inspection and copying during normal business hours in the FCC, Private Radio Bureau, Land Mobile and Microwave Division, Rules Branch (room 5202), 2025 M Street NW., Washington, DC. The complete text may also be purchased from the Commission's copy contractor, Downtown Copy Center, 1114 21st Street NW., Washington, DC 20036, (202) 452–1422.

Paperwork Reduction

The collection of information requirement contained in Rule 90.173(k) has been approved by OMB under Section 3504(h) of the Paperwork Reduction Act. Copies of the submission may be purchased from the Commission's copy contractor, Downtown Copy Center, 1114 21st Street NW., Washington, DC 20036, (202) 452–1422. Comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden may be sent to the Federal Communications Commission, Office of the Managing Director, Paperwork Reduction Project, OMB Control Number 3060–0461, Washington, DC 20554, or to the Office of Management and Budget, Paperwork Reduction Project, OMB Control Number 3060–0461, Washington, DC 20503.

OMB Number: 3060–0461

Title: 47 CFR 90.173(k), Construction, Licensing and Operation of Private Land Mobile Radio Stations (Notice of Proposed Rule Making in PR Docket No. 90–481).

Action: New collection.

Respondents: Businesses (including small businesses), non-profit institutions, local governments.

Estimated Annual Burden: 200 responses; 4.5 hours average burden per response; 900 hours total burden.

Needs and Uses: Persons who provide the Commission with information regarding the violation of certain construction and operation Rules would be granted a licensing preference for any channels recovered as a result of that information. This will aid the Commission's compliance program and make effective use of scarce radio spectrum.

List of Subjects

47 CFR Part 1

Radio.

Action	FCC form No.	Fee amount	Fee type code	Address
• • • • •				
14. Finder's preference requests (see Note D below).	Corresp. FCC 155	105	PDX	Federal Communications Commission, Feeable Correspondence, P.O. Box 358305, Pittsburgh, PA 15251–5305.

• • • • •

Notes: D. The fee for a Finder's Preference Request is $105 per channel.

4. The authority citation for part 90 continues to read as follows:

Authority: Sections 4, 303, 48 Stat., as amended, 1082; 47 U.S.C. 154, 303, unless otherwise noted.

5. 47 CFR 90.119 is amended by adding new paragraph (a)(5) and by revising paragraphs (e)(1) and (h) to read as follows:

§ 90.119 Application forms.

(a) • • •

(5) For reinstatement of an expired license. See also paragraphs (e)(1) and (h) of this section.

• • • • •

(e) • • •

(1) Apply for license renewal (if the reinstatement of renewal does not involve the modification of the station or system license) when the licensee has not received renewal Form 574–R in the mail from the Commission within sixty (60) days of license expiration, and may be used to apply for reinstatement of an expired license (if the reinstatement does not involve the modification of the station or system license).

• • • • •

(h) Form 574–R shall be used to apply for a renewal of an existing authorization and may be used to apply for reinstatement of an expired license, if the renewal or reinstatement does not involve the modification of the station or system license. (Form 574–R is generated by the Commission and is mailed to the licensee prior to the expiration of the license term).

6. 47 CFR 90.127 is amended by adding a last sentence to paragraph (b) to read as follows:

§ 90.127 Submission and filing of applications.

• • • • •

(b) • • • Application for license reinstatement must be filed no later than thirty (30) days after the expiration date of the license. See § 1.4 of this chapter.

• • • • •

7. 47 CFR 90.149 is amended by revising paragraph (a), by redesignating paragraph (c) as paragraph (d), by redesignating paragraph (b) as paragraph (c), and by adding a new paragraph (b), to read as follows:

§ 90.149 License term.

(a) Licenses for stations authorized under this part will be issued for a term not to exceed five years from the date of the original issuance, modification or renewal, provided however that licensees have an additional thirty (30) days to apply for reinstatement of expired licenses.

47 CFR Part 90

Private land mobile radio services, Radio, Station applications and authorizations.

Amendatory Text

47 CFR Parts 1 and 90 are amended as follows:

1. The authority citation for Part 1 continues to read as follows:

Authority: Sections 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303; Implement, 5 U.S.C. 552, unless otherwise noted.

2. 47 CFR 1.926 is amended by adding a new paragraph (c) to read as follows:

§ 1.926 Application for renewal of license.

• • • • •

(c) Reinstatement of an expired license in the Private Land Mobile Radio Services may be requested up to thirty (30) days after the expiration date using FCC Form 574, 574–R or 405–A. See § 1.4.

3. 47 CFR 1.1102 is amended by adding a new paragraph (14) and a new Note D to read as follows:

§ 1.1102 Schedule of charges for private radio service.

(b) If no application for reinstatement has been filed as specified in this Part, the authorization shall be deemed to have been automatically cancelled on the date specified on the authorization.

• • • • •

8. 47 CFR 90.155 is amended by revising paragraph (a) and adding new paragraph (c) to read as follows:

§ 90.155 Time in which station must be placed in operation.

(a) All stations authorized under this part, except as provided in paragraph (b) of this section and in §§ 90.629 and 90.631(f), must be placed in operation within eight (8) months from the date of grant or the authorization cancels automatically and must be returned to the Commission.

• • • • •

(c) For purposes of this section, a base station is not considered to be placed in operation unless at least one associated mobile station is also placed in operation. See also §§ 90.633(d) and 90.631(f).

9. 47 CFR 90.157 is amended by revising paragraph (a), by removing paragraph (b) and by redesignating paragraph (c) as new paragraph (b) to read as follows:

§ 90.157 Discontinuance of station operation.

(a) The license for a station shall cancel automatically upon permanent discontinuance of operations and the licensee shall forward the station license to the Commission. Alternatively, the licensee may notify the Commission of the discontinuance of operations of a station by checking the appropriate box on Form 574–R or Form 405–A and requesting license cancellation. Notification of discontinued operation or cancellation shall be sent to: Federal Communications Commission, Gettysburg, PA 17326.

• • • • •

10. 47 CFR 90.173 is amended by adding a new paragraph (k) to read as follows:

§ 90.173 Policies governing the assignment of frequencies.

• • • • •

(k) Notwithstanding any other provisions of this Part, any eligible person may seek a dispositive preference for an exclusive channel assignment in the 220–222 MHz, 470–512 MHz, and 800/900 MHz bands by submitting information that ultimately leads to the recovery of frequencies in these bands. Recovery of such frequencies will come about as a result of information provided regarding the failure of existing licensees to comply with various provisions of §§ 90.155, 90.157, 90.629, 90.631(e) or (f), or 90.633(c) or (d). Preferences will not apply to instances where the targeted channels are those encompassed by the National Plan for Public Safety (the 821–824/866–869 MHz channels) or any Regional Public Safety Plans—unless the requested preference is accompanied by a written statement from the relevant Regional Public Safety Planning Committee indicating that the request is not inconsistent with the Region's Public Safety Plan. The dispositive preference provided for in this paragraph also may be awarded to any person who arranges for an existing licensee to voluntarily request license cancellation because the licensee anticipates that it will be unable to timely construct and place its licensed facilities in operation. See §§ 90.155, 90.629, 90.631 (e) and (f), 90.633 (c) and (d). In the instance of such consensual preferences, both finder and licensee must certify that they have neither given nor received any direct or indirect compensation in connection with the requested license cancellation, and the finder will assume the former licensee's deadline for constructing and placing the licensed facility in operation.

(1) Eligibility for preference—The recipient of a finder's preference must be eligible to be a licensee in the private land mobile services and eligible to be licensed for the channels targeted by the finder's request on either a primary basis or through intercategory sharing—except a finder's preference for occupied channels in the 800 MHz Public Safety Category shall only be available to Public Safety Category eligibles.

(2) Timeliness of finder's request—A preference based on a construction or placed-in-operation violation will not be acceptable for filing until 180 days after the construction deadline of the target licensee. The preference shall not apply to any case scheduled for regular review during the Private Radio Bureau's normal compliance activities or to any case under Commission review or investigation. An applicant that files a timely request for a finder's preference that results in channel recovery, and that also timely submits an application in a form acceptable for filing, will receive a dispositive preference for the recovered channel(s). Where more than one applicant obtains a preference for the same channel(s), we will grant the license to operate on the channel(s) to one of these applicants through our random selection procedures. See § 1.972 of this chapter.

(3) Contents of request—The finder's preference request shall be mailed to the following address: Federal Communications Commission, Feeable Correspondence, P.O. Box 356305, Pittsburgh, PA 15251–5305. See § 1.1102(14) of this chapter. The request shall contain detailed information to establish a *prima facie* violation, including: the name and address of the licensee allegedly violating the applicable rules; the licensee's call sign, frequencies and location of the licensed facility; the Commission Rule(s) that the licensee is allegedly violating, including the dates or benchmarks the licensee has failed to meet; and a detailed statement as to the specific basis for the applicant's knowledge that the licensee is violating the rules specified in this section. General and conclusory statements shall result in the summary dismissal of any such request. All preference requests shall be in the form of a sworn affidavit or a declaration dated and subscribed by the person as true under penalty of perjury as set forth in § 1.16 of this chapter. All preference requests shall certify that a complete copy of the preference request has been served on the target licensee. See § 1.47 of this chapter.

11. 47 CFR 90.175 is amended by revising the introductory paragraph to the section and by adding a new paragraph (f)(15) to read as follows:

§ 90.175 Frequency coordination requirements.

Except for applications listed in paragraph (f) of this section, each application for a new frequency assignment, for a change in existing facilities as listed in § 90.135(a), or for operation at temporary locations in accordance with § 90.137, must include a showing of frequency coordination as set forth below. An application to reinstate a license expired for more than thirty (30) days will be considered as a request for a new frequency assignment. When frequencies are shared by more than one service, concurrence must be obtained from the other applicable certified coordinators.

• • • • •

(f) • • •

(15) Applications timely-filed by recipients of a finder's preference, where the applicant intends to operate at the same site location, and with the same technical parameters as the prior licensee.

12. 47 CFR 90.611 is amended by revising paragraph (d) to read as follows:

§ 90.611 Processing of applications.

• • • • •

(d) Applications for channels in the SMR category that cannot be granted

VOL
56
ISS
244
DE
19
1991
UMI

due to a lack of available channels in a particular area will be placed on a waiting list for that area. Waiting lists will consist of two groups. The first group will be comprised of applications from existing licensees who, in the area corresponding to the particular waiting list, operate trunked systems with 70 or more mobile units per channel. The second group will be comprised of applications to establish new systems or to obtain additional channels for conventional systems. Applications will be placed in the appropriate group according to filing dates, with the earliest date receiving the highest ranking. All applications in the first group will receive priority over any application in the second group regardless of filing date. When channels become available as a result of either the Commission's compliance activities, a licensee's voluntary and independent request for license cancellation, or failure by the recipient of a finder's preference to timely submit an application in a form acceptable for filing, the highest ranking application(s) will be granted based on the site specified and the Commission's mileage separation standards. An applicant filing a timely request for a finder's preference that results in the recovery of SMR category channels, and that also timely submits an application in a form acceptable for filing, will receive a dispositive preference for those channels over the highest ranking application(s). Where more than one applicant obtains a preference for the same channel(s), we will grant the license to operate on the channel(s) to one of these applicants through our random selection procedures. See § 1.972 of this chapter. Trunked systems that have had authorized channels cancelled due to failure to meet the loading requirements in § 90.631 will not be permitted on the waiting list for a period of six months from the date of the issuance of the superseding license.

* * * * *

13. 47 CFR 90.631 is amended by adding a last sentence to paragraph (f) to read as follows:

§ 90.631 Trunked systems loading, construction and authorization requirements.

* * * * *

(f) * * * For purposes of this section, a base station is not considered to be placed in operation unless at least two associated mobile stations, or one control station and one mobile station, are also placed in operation.

* * * * *

14. 47 CFR 90.633 is amended by revising paragraph (d) to read as follows:

§ 90.633 Conventional systems loading requirements.

* * * * *

(d) If a station is not placed in operation in eight months, except as provided in § 90.629, its license cancels automatically and must be returned to the Commission. For purposes of this section, a base station is not considered to be placed in operation unless at least one associated mobile station is also placed in operation.

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 91-238; RM-7691]

Radio Broadcasting Services; Colfax, WA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Dakota Communications, substitutes Channel 273C3 for Channel 272A at Colfax, Washington, and modifies its construction permit for Station KRAO accordingly. See 56 FR 41812, August 23, 1991. Channel 273C3 can be allotted to Colfax in compliance with the Commission's minimum distance separation requirements at the petitioner's requested site without the imposition of a site restriction. The coordinates for Channel 273C3 at Colfax are North Latitute 46-51-43 and West Longitude 117-10-26. Since Colfax is located within 320 kilometers (200 Miles) of the U.S.-Canadian border, concurrence of the Canadian government has been obtained With this action, this proceeding is terminated.

EFFECTIVE DATE: January 27, 1992.

FOR FURTHER INFORMATION CONTACT: Sharon P. McDonald, Mass Media Bureau (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 91-238, adopted December 6, 1991, and released December 13, 1991. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452-1422, 1714 21st Street, NW., Washington, DC 20036.

Proposed Rules

Federal Register
Vol. 56, No. 244
Thursday, December 19, 1991

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89-NM-43-AD]

Airworthiness Directives; McDonnell Douglas Model DC-3 Series Airplanes, Including Those Modified for Turbo-Propeller Power.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Supplemental notice of proposed rulemaking (nprm); reopening of comment period.

SUMMARY: This notice revises an earlier proposed airworthiness directive (AD), applicable to certain McDonnell Douglas Model DC-3 series airplanes, which would have required revising inspection procedures, installing a structural modification, and adding models to the applicability. That proposal was prompted by an in-flight wing separation. This action would revise the proposed rule by adding a requirement to perform repetitive visual inspections of those airplanes that are modified to incorporate wing inspection access holes. The actions specified by this proposed AD are intended to prevent degradation of the structural integrity of the airplane.

DATES: Comments must be received no later than January 22, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-43-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The applicable service information may be obtained from McDonnell Douglas Corporation, Technical Publications-Technical Administrative Support, C1-L5B, 3855 Lakewood Boulevard, Long Beach, California 90846. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or the Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Mike Lee, Aerospace Engineer, ANM-122L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; telephone (213) 988-5325.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 89-NM-43-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 89-NM-43-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion: A proposal to amend part 39 of the Federal Aviation Regulations to supersede AD 69-15-04, Amendment 39-1396, which is applicable to McDonnell Douglas Model DC-3 series airplanes, was published in the **Federal Register** on March 28, 1991 (56 FR 12490). That proposal would have revised the currently required inspection procedures, required the installation of a structural modification, and added airplanes to the applicability of the rule. That proposal was prompted by reports of in-flight wing separations, apparently due to undetected cracks and subsequent failure of the wing structure. Cracking, if not detected and corrected, could result in degradation of the structural integrity of the airplane.

Since issuance of that proposal, the FAA has determined that it must be revised to include repetitive visual inspections of those airplanes that are modified to incorporate wing inspection access holes. Repetitive visual inspections at intervals of 2,000 hours time-in-service are necessary to detect cracking in a timely manner and to assure the continued airworthiness of these airplanes. Paragraph (a) of the proposed rule has been revised accordingly.

The FAA has also determined that C-52A airplanes (military version) may be subject to the addressed unsafe condition since their design is similar to that of the other affected Model DC-3 series airplanes. Accordingly, the applicability of the proposed rule has been revised to include the C-52A models.

Since these changes would expand the scope of the originally proposed AD, the FAA has determined that it is necessary to reopen the comment period to provide additional time for public comment.

The format of the supplemental proposal has been restructured to be consistent with the standard **Federal Register** style.

There are approximately 2,000 Model DC-3 series airplanes of the affected design in the worldwide fleet. It is estimated that 610 airplanes of U.S. registry would be affected by this AD, that it would take approximately 150 work hours per airplane to accomplish the required initial actions, and that the average labor cost would be $45 per work hour. The cost for required parts is estimated to be $1,000 per airplane. Follow-on action would require approximately 50 work hours per

VOL
56
ISS
244
DE
19
1991
UMI

airplane at $45 per work hour to accomplish the required inspections. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $4,727,500 for the first year, or $7,750 per airplane; and $1,372,500 for each year thereafter, or $2,250 per airplane.

These figures are based on an assumption that no airplane has been modified previously in accordance with the requirements proposed in this action.

According to FAA registration records, the mean number of Model DC-3 airplanes registered per owner is about 1.6. Over half of the owners have only one airplane, and the largest number currently operating in a single fleet is 12. There is no easily-available and accurate source of data on the types of businesses in which current U.S. Model DC-3 operators are engaged nor the total number of aircraft of all types that they operate. However, many Model DC-3's are known to be operated by for-hire carriers, especially unscheduled cargo carriers; such use in unscheduled for-hire carriage has been employed here for Regulatory Flexibility Act (RFA) determination purposes.

For air carriers, the FAA defines a "small entity" as one with 9 aircraft (any type) or less, and its criterion for a "significant impact" is at least $3,700 per year for an unscheduled carrier and $51,800 per year for a scheduled carrier operating aircraft of fewer than 60 seats, such as a Model DC-3.

The estimated $7,750 initial modification expenditure that would be required by the proposed AD for even one Model DC-3 converts at 10% (the 10% discount factor required by the Office of Management and Budget for reconciling non-inflation-adjusted future and present expenditure) to an annual equivalent of over $3,700 per year, unless it is considered to apply to a planning period of approximately 2½ years or more. It is thus conceivable that even a single airplane could generate significant costs for a small operator, in terms of the RFA, if the airplane had no economic use (and thus no sale value for future operation) beyond a 2½ year period after the modification, during which there would not have been enough use of the airplane to bring into effect fully or partially offsetting savings from the proposed reduced reinspection requirements.

However, there would seem to be a low likelihood of such an extreme end-of-life cycle scenario for Model DC-3's belonging to a substantial number of small operators, and reinspection cost savings may be projected to completely offset initial expenditures within realistic future lifetimes for existing Model DC-3's (if not in current operators' fleets, then in others to which they might be sold). Savings may be projected to completely offset initial expenditure within a nine-year future period even if the assumed average annual utilization of 667 hours were reduced to 333. Such a period would have added 9×333=2,997 additional hours to the airframe, not an unrealistic increment considering the demonstrated longevity of this type.

Therefore, it is concluded that there is unlikely to be a significant negative economic impact on a substantial number of small entities stemming from the combined effects of the mandatory modification and relaxed inspection provisions of the proposed AD.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket.

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing Amendment 39-1396 and by adding the following new airworthiness directive:

McDonnell Douglas: Docket 89-NM-43-AD. Supersedes AD 69-15-04, Amendment 39-1396.

Applicability: Model DST, Super DC-3, DC-3, DC-3A, DC-3B, DC-3C, and DC-3D series airplanes; all military versions, C-41, C-41A, C-47, C-47A, C-47B, C-48, C-48A, C-49, C-49A, C-49B, C-49C, C-49D, C-49J, C-49K, C-50, C-50A, C-50B, C-50C, C-50D, C-51, C-52, C-52A, C-52B, C-52C, C-53, C-53B, C-53C, C-53D, C-68, C-117A, C-117D, and R4D series airplanes; including those modified for turbo-propeller power; certificated in any category.

Compliance: Required as indicated, unless previously accomplished.

To prevent structural failure of the wings, accomplish the following:

(a) For airplanes not modified with the repair or preventive doublers at both wing stations 94.250 and 127.750, in accordance with McDonnell Douglas Service Bulletin 229, any revision; or McDonnell Douglas Service Bulletin 263, any revision through Revision 8, dated December 15, 1971; or McDonnell Douglas Service Rework Drawing SR03578003, dated April 6, 1988; accomplish the following:

(1) Within 900 hours time-in-service after performing the last inspection in accordance with AD 69-15-04, amendment 39-1396, or within one year after the effective date of this AD, whichever occurs first, accomplish the following:

(i) Inspect the wing in accordance with McDonnell Douglas Service Rework Drawing SR03578001, dated March 11, 1988; or McDonnell Douglas Service Rework Drawing SR03578002, Revision A, dated September 26, 1988; for the applicable airplanes, using the visual and X-ray techniques specified. Repeat the visual inspection thereafter at intervals not to exceed 2,000 hours time-in-service.

(ii) Modify the airplane to incorporate access holes, in accordance with McDonnell Douglas Service Rework Drawing SR03548001, Revision A, dated March 7, 1989.

Note: Airplanes previously modified to incorporate access holes do not have to be remodified if visibility and access can be obtained.

(2) Within 2,000 hours time-in-service or two years after the effective date of this AD, whichever occurs first, modify the wing in accordance with McDonnell Douglas Service Rework Drawing SR03578003, dated April 6, 1988.

(b) For airplanes modified to incorporate the repair or preventive doublers at both wing stations 94.250 and 127.750, in accordance with McDonnell Douglas Service Bulletin 229, any revision; or McDonnell Douglas Service Bulletin 263, any revision through Revision 8, dated December 15, 1971; or McDonnell Douglas Service Rework Drawing SR03578003, dated April 6, 1988: Within 2,000 hours time-in-service after the last inspection in accordance with AD 69-15-04, amendment 39-1396, and thereafter at intervals not to exceed 2,000 hours time-in-service, inspect the wing using the visual method specified in McDonnell Douglas Service Rework Drawing SR03578001, dated March 11, 1988; and McDonnell Douglas Service Rework Drawing SR03578002, Revision A, dated September 26, 1988; for the applicable airplanes.

(c) Cracked structure detected during the inspections required by paragraph (a) or (b) of this AD must be repaired or replaced prior to further flight, in accordance with McDonnell Douglas Service Rework Drawing SR03578003, dated April 6, 1988.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of paragraph (a) or (b) of this AD.

(e) An alternative method of compliance or adjustment of compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Los Angeles ACO.

Issued in Renton, Washington, on December 4, 1991.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Airspace Docket No. 90-AWA-13]

Proposed Establishment of Long Beach Airport Radar Service Area and Alteration of John Wayne Airport/Orange County Airport Radar Service Area; CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Proposed rule; withdrawal.

SUMMARY: This action withdraws the Notice of Proposed Rulemaking (NPRM), Airspace Docket No. 90-AWA-13, which was published in the **Federal Register** on April 26, 1991 (56 FR 19498). That NPRM proposed to establish an Airport Radar Service Area (ARSA) at Long Beach (Daugherty Field), CA, and to adjust the southwest confines of the John Wayne Airport/Orange County ARSA to accommodate the adjoining Long Beach ARSA. After review of the public comments and the airspace configuration of the Los Angeles Basin, this NPRM is being withdrawn by the FAA because future rulemaking is planned for a comprehensive redesign of the airspace in the Los Angeles Basin.

DATES: The proposed rule is withdrawn on December 19, 1991.

FOR FURTHER INFORMATION CONTACT: Alton D. Scott, Airspace and Obstruction Evaluation Branch (ATP-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Rules and Procedures Service, Federal Aviation Administration, Docket No. 90-AWA-13, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-9252.

The Proposed Rule

On April 26, 1991, a Notice of Proposed Rulemaking was published in the **Federal Register** to establish an ARSA at Long Beach (Daugherty Field), CA, and to adjust the southwest confines of the John Wayne Airport/Orange County ARSA to accommodate the adjoining Long Beach ARSA (56 FR 19498).

Summary of Comments

Forty-eight comments were received regarding the proposal. A thorough review of the airspace proposal and the issues raised during the comment period was conducted by the FAA. The common view expressed during the comment period was that the FAA should redesign and simplify the regulatory airspace within the entire Los Angeles Basin. This redesigned airspace should be systematically developed to provide for increased levels of safety and efficiency.

Conclusion

In light of the comments received, it was concluded that the establishment of the Long Beach ARSA would increase the overall airspace complexity in the Los Angeles Basin. Currently, the Los Angeles Basin airspace is composed of 1 terminal control area, 6 airport radar service areas, 25 control tower facilities, and 4 military facilities. The amount and complexity of this airspace dictate a need to modify the entire Los Angeles Basin airspace to make it more compatible with the increasing amount of general aviation and air carrier activity. The NPRM is being withdrawn by the FAA because future rulemaking is planned for a comprehensive redesign of the airspace in the Los Angeles Basin. This future rulemaking would relieve congestion, reduce complexity, reduce controller workload, and make the airspace more compatible for both instrument flight rule and visual flight rule users in this region.

List of Subjects in 14 CFR Part 71

Aviation safety, Airport radar service areas.

Withdrawal of Proposed Rule

Accordingly, pursuant to the authority delegated to me, the Notice of Proposed Rulemaking, Airspace Docket No. 90-AWA-13, as published in the **Federal Register** on April 26, 1991 (56 FR 19498), is hereby withdrawn.

Authority: 49 U.S.C. App. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

Issued in Washington, DC, on December 10, 1991.

Original signed by:

Harold W. Becker,

Manager, Airspace-Rules and Aeronautical Information Division.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Chapter I

[Docket No. RM91-10-000]

Notice of Intent To Establish a Negotiated Rulemaking Committee

Issued December 12, 1991.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of intent to establish a negotiated rulemaking committee.

SUMMARY: The Federal Energy Regulatory Commission (FERC or Commission) proposes to establish a negotiated rulemaking committee to revise and develop a uniform and comprehensive proposed regulation governing *ex parte* communications between persons outside the Commission and Commission officials and employees. The committee's goal will be to develop *ex parte* regulations that allow the maximum amount of information to be available to the Commission, consistent with maintaining the full integrity of the Commission's decisionmaking process. This notice identifies the proposed members of the committee, establishes the committee's agenda, and invites comments on the proposal to establish the negotiated rulemaking committee and on the proposed members of the committee.

DATES: Comments, applications or nominations must be submitted to the Commission no later than January 21, 1992.

ADDRESSES: Comments, applications or nominations should refer to Docket No. RM91-10-000 and must be filed with: Office of the Secretary, Federal Energy Regulatory Commission, 825 North

Capitol Street NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Michael Schopf, Associate General Counsel, Enforcement and General & Administrative Law, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, Phone: (202) 208–0457.

SUPPLEMENTARY INFORMATION: The Federal Energy Regulatory Commission (FERC or Commission) proposes to establish a negotiated rulemaking committee to revise and develop a uniform and comprehensive proposed regulation governing *ex parte* communications between persons outside the Commission and Commission officials and employees. The proposed committee will focus on the legal and policy issues involved in formulating a new regulation having prospective effect only, and will not investigate or examine specific conduct or allegations in past or pending proceedings. The Commission's current *ex parte* regulations carry forward without substantive change two sets of rules that predate the FERC's creation. These are the old Federal Power Commission regulation, embodied in Rule 2201 of the Commission's Rules of Practice and Procedure (18 CFR 385.2201), and the old Interstate Commerce Commission rules applicable to oil pipeline matters, now reflected in Rule 1415 of the Commission's Rules of Practice and Procedures (18 CFR 385.1415). Over the years, the Commission has addressed particular *ex parte* issues in individual cases and has provided internal guidance on *ex parte* questions to the Commission and the staff. These efforts, however, do not eliminate the need for up-to-date, comprehensive and uniform regulations.

There is a need for clearer guidance as to the scope of the *ex parte* prohibitions in trial-type and adjudicatory proceedings. Clearer standards are necessary, for example, to govern informal consultations between the Commission and our environmental staff and other Federal or state agencies having environmental responsibilities or interests, as well as contacts by the Commission and our staff with applicants and other persons for the purpose of obtaining information necessary to the staff's environmental analysis. Also, while the *ex parte* prohibitions are not applicable to informal general policy rulemakings, additional guidance is necessary regarding the procedures to be followed for assuring that significant off-the-record communications are reflected in the public rulemaking file so that they may be considered in the Commission's notice and comment decisional process.

In the Commission's judgment, negotiated rulemaking procedures are well suited to a comprehensive review of the FERC's *ex parte* regulations. In the Negotiated Rulemaking Act of 1990, Public Law No. 101–648, November 28, 1990, Congress has encouraged the use of techniques designed to give identifiable interests that are significantly affected by a rule an opportunity to participate in the early stages of its development. The early participation of significantly affected interests is likely to improve communication among them, give the Commission and the public access to the shared information and knowledge possessed by the various interests, and lead ultimately to a better rule. Since everyone has a stake in a fair and efficient administrative process at the Commission, we have every reason to expect a good faith negotiation.

The Commission had identified interests that may be significantly affected by the rule. These include various industry groups regulated by the Commission, customer groups, consumer and environmental groups, the Federal Government, state regulatory officials, and the federal energy bar.

The following persons, listed with the group or organization each represents, are proposed as members of the negotiated rulemaking committee:

John Cheatham, III, Esq. Senior Vice President, General Counsel and Secretary, Interstate Natural Gas, Association of America.	Interstate Natural Gas Association of America.
Lorraine Cross, Director, State and Federal Agency Relations, American Gas Association.	American Gas Association.
Richard G. Morgan, Esq., Lane & Mittendorf, Washington, DC	Independent Petroleum Association of America.
A. Scott Anderson, Esq., General Counsel, Texas Independent Producers & Royalty Owners Association.	Texas Independent Producers & Royalty Owners Association.
Charles B. Curtis, Esq., Van Ness, Feldman, Sutcliffe & Curtis, Washington, DC.	Natural Gas Supply Association.
Edward J. Grenier, Jr., Esq., Sutherland, Asbill & Brennan, Washington, DC.	Process Gas Consumers.
Michele F. Joy, Esq., Counsel and Secretary, Association of Oil Pipelines.	Association of Oil Pipelines.
Peter B. Kelsey, Esq., Vice President, Law and Corporate Secretary, Edison Electric Institute.	Edison Electric Institute.
Alan J. Roth, Esq., Spiegel & McDiarmid, Washington, DC	American Public Power Association.
Robert Daileader, Jr., Esq., Nixon, Hargrave, Devans & Doyle, Washington, DC.	National Independent Electric Producers.
John R. Molm, Esq., Troutman, Sanders, Lockerman & Ashmore, Atlanta, GA.	National Hydropower Association.
Charles D. Gray, Esq., Assistant General Counsel, National Association of Regulatory Utility, Commissioners.	National Association of Regulatory Commissioners.
Edwin S. Rothschild, Energy Policy Director, Citizen Action	Citizen Action.
Name	National Wildlife Federation.
Thomas F. Brosnan, Esq., Gallagher, Boland, Meiburger & Brosnan, Washington, DC.	Federal Energy Bar Association.
Dinah Bear, Esq., General Councel, U.S. Council on Environmental Quality.	U.S. Council on Environmental Quality.
Gary U. Edles, Esq., General Counsel Administrative Conference of the United States.	Administrative Conference of the United States.
David N. Cook, Esq., Deputy General Counsel, Federal Energy Regulatory Commission.	Agency Representative.
Michael Schopf, Esq., Associate General Counsel, Enforcement and General & Administrative Law.	Agency Representative.

In addition, any Commissioner may serve *ex officio* as a non-voting member of the committee.[1] Committee meetings will be chaired by an impartial facilitator, who will assist the members of the committee in conducting discussions and negotiations and manage the keeping of minutes and records.

As indicated earlier, the agenda of the committee will be to undertake a comprehensive review of the Commission's *ex parte* regulations and to produce a consensus report for Commission consideration containing a proposed rule meeting the objectives discussed above.[2] The committee's goal will be to develop *ex parte* regulations that allow the maximum amount of information to be available to the Commission, consistent with maintaining the full integrity of the Commission's decisionmaking process. While the Commission may accept all, part or none of the consensus proposal of the committee, it will make a good faith effort to use the consensus report as the basis for the proposed Commission rule that will be published as its NOPR.[3] If the committee fails to reach a consensus on the proposed rule that meets the goal set out by the Commission, it may transmit a report specifying any areas in which it has reached a consensus. The committee may include in a report any other information or material the committee considers appropriate. Any committee member may include as an addendum to the report additional information, recommendations or materials. The committee should transmit its report to the Commission by April 16, 1992. The target date for publication by the Commission of a notice of proposed rulemaking is May 15, 1992.

The Commission will provide appropriate administrative support for the committee, including facilities for committee meetings and necessary related office equipment and clerical assistance. Members of the committee will be responsible for their own expenses of participation in the committee, except that, in accordance with section 7 of the Federal Advisory Committee Act and section 588 of the Negotiated Rulemaking Act, the Commission may pay for a member's reasonable travel and per diem expenses if the member certifies a lack of adequate financial resources to participate in the committee, and the Commission determines that the member's participation is necessary to assure adequate representation of the interest being represented by the member.

Interested persons are invited to comment on the proposal to establish the negotiated rulemaking committee and on the proposed membership of the committee. Persons who believe that they will be significantly affected by the proposed rule and that their interest will not be adequately represented by the committee membership specified in this notice may apply or nominate another person for membership on the committee to represent their interest. Each application or nomination must include—

(1) The name of the applicant or nominee and a description of the identifiable interest such person will represent;

(2) Evidence that the applicant or nominee is authorized to represent that interest;

(3) A written commitment that the applicant or nominee will actively participate in good faith in the development of the proposed rule; and

(4) The reasons that the committee membership proposed in this notice does not adequately represent the interest of the person submitting the application or nomination.

Comments, applications or nominations must be submitted to the Commission no later than January 21, 1992. They should be submitted to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, and should refer to Docket No. RM91–10–000.

Comments, applications and nominations will be placed in the public files of the Commission and will be available for public inspection at the Commission's Public Reference Room, 941 North Capitol Street NE., Washington, DC 20426, during regular business hours.

If, after considering the comments, applications, and nominations, the Commission decides to establish a negotiated rulemaking committee, it will provide public notice of that fact. The notice will include the final membership of the committee, along with appropriate guidance on the commencement of the negotiated rulemaking process. The Commission reserves the right not to initiate the negotiated rulemaking process or, once initiated, to terminate the process if it determines the process is no longer in the public interest.

By direction of the Commission. Commissioner Trabandt concurred in part and dissented in part with a separate statement attached.

Lois D. Cashell,

Secretary.

Trabandt, Commissioner, concurring in part and dissenting in part

I dissent in part on the instant Notice of Intent (Notice) in opposition to the use of the negotiated rulemaking process for these purposes and also to the inclusion of the informal rulemaking issue in the negotiations, for the reasons discussed below. I concur in the substance of the Notice otherwise, for the reasons discussed below. I discuss these matters in some detail in order that interested parties will have full benefit of the arguments debated by the Commission over the course of the eight month consideration of this negotiated rulemaking (a.k.a. "reg-neg") proposal. Hopefully, this discussion will assist interested parties in fashioning their comments within thirty days.

1. Introduction

At the outset, I want to make three points very clear. First, I want to state categorically my deep respect for the views of Chairman Allday and my fellow Commissioners on this sensitive subject. I recognize fully that this is a matter of judgment that involves a number of factors in terms of fact, law and policy, as well as our own individual personal experiences on these matters. That I have a strong preference for a traditional NOPR does not by any measure suggest any lack of respect for my colleagues' own assessment of those factors or their conclusion.

Second, I am not opposed at all to clarifying the operation of the *ex parte* rules as they apply to adjudications. In fact, I agreed with Commissioner Moler's suggestion to that effect during the *Iroquois* proceeding [1] and *ex parte* investigation last year. As the discussion at the Commission meeting made very clear, all five members of the Commission are willing to put in place such a clarification, and I strongly support that objective.

Third, I am not opposed to the use of the negotiated rulemaking procedure in our regulation of jurisdictional companies in the electric power, hydroelectric, natural gas and oil

---

[1] A Commissioner who chooses to address the committee or participate in committee deliberations will represent only his/her own position and not the collective viewpoint of the Commission or the position of any other Commissioner.

[2] For purposes of defining "consensus" on a proposed rule, the Commission intends "consensus" to mean unanimous concurrence among the voting interest represented on the committee, including the agency.

pipeline industries. In an appropriate case, the negotiated rulemaking procedure would provide a valuable alternative to the traditional NOPR, as the Environmental Protection Agency has found in the past and Congress established by statute in the Negotiated Rulemaking Act of 1990, 5 U.S.C. 581. I look forward with considerable enthusiasm to the initiation of a negotiated rulemaking in one of our regulatory program areas in the near future. And, I am confident that rules fashioned in a negotiated rulemaking procedure can provide the significant advantages over adversarial rulemakings that Congress contemplated, such as (1) increasing the acceptability and improving the substance of rules, (2) making it less likely that the affected parties will resist enforcement or challenge such rules in court, and (3) shortening the amount of time needed to issue final rules. But, at bottom, I am simply not persuaded that this is the appropriate case.

I also believe that it also bears repeating, as I wrote during the Iroquois *ex parte* review and subsequently in formal correspondence to Chairman Dingell of the Committee on Energy and Commerce and Chairman Conyers of the Committee on Government Operations of the U.S. House of Representatives, that we should not let the *ex parte* rules be used as the basis for gagging, intimidating, mushrooming or muzzling us in the conduct of our official offices. I have maintained an "open door" policy since I took the oath of office as a Commissioner on November 4, 1985. Within the limitations of the *ex parte* rules and other applicable Commission regulations, I have met with literally hundreds of company officials, trade association representatives, consumer and environmental organization representatives, U.S. state and local officials, Canadian Federal and provincial officials and other interested groups. I also have attended and spoken at numerous meetings and conferences involving such groups and officials since November 1985.

As I have said before, I consider such communications to be an important function of the Commission and this office, in terms of both explaining Commission policies to interested parties and maintaining an up-to-date understanding of current industry conditions. It also is interesting to note that during the course of the Iroquois project proceedings over the past several years, I met in that fashion, subject to the aforementioned limitations, with various parties who also happened to be supporters or opponents of the project, including representatives of the project, equity owning utilities, various state officials, the Independent Petroleum Association of America and the New England Fuel Institute, among many others. There were no *ex parte* communications from any party related to Iroquois project proceedings in any such meetings or discussions, nor with regard to any other pending adjudication.

2. Why the Negotiated Rulemaking Procedure Is Inappropriate

First, I believe that the *ex parte* issue is a strictly legal matter based on long-settled notices of administrative due process in a series of cases. The *ex parte* prohibition in 18 CFR 385.2201 reflects the current state of the law and there are recent court cases to the same effect. A copy of those regulations is attached for information and reference purposes. (Attachment A). To the extent that those regulations are deemed ambiguous as a result of the experience in *Iroquois*, I can't understand why the Office of General Counsel (OGC) simply doesn't provide the Commission with a set of specific recommendations for appropriate refinements reflecting the perceived imperfections based on *Iroquois*. There is nothing complex or difficult about those questions. Once receiving the OGC recommendations, we could decide which to adopt and the procedural mechanism for that, *i.e.*, an interpretive order or NOPR. It also is interesting that OGC would support use of negotiated rulemaking for *ex parte* matters, while opposing its use for separation of functions issues on the grounds it's an internal matter, even though the latter issue is a constant complaint of industry and the subject of repeated inquiries and confirmation questions from Members of the U.S. Senate Committee on Energy and Natural Resources and others.

I also share the concern expressed by Chairman Synar of the House Subcommittee on Environment, Energy and Natural Resources in his letter of November 13, 1991, to Chairman Allday about the inappropriateness of the negotiated rulemaking process "as a means of formulating revisions to a federal agency's own *ex parte* rules or other standards of conduct," because "(i)nherent in use of the reg-neg process is recognition that the ultimate outcome will entail compromise among the affected parties. With regard to difficult policy matters, that approach is often appropriate and even desirable. But to the extent there are concerns about FERC's *ex parte* rules, I fear that employing this particular procedure may signal those affected by your *ex parte* rules that FERC's standards of conduct are a proper subject for 'consensus' between the Commission and those it regulates. With all due respect, I do not believe any agency's ethical standards should be a matter of compromise and consensus." (Pages 2 and 3.) In fairness, Chairman Allday by letter of November 26, 1991, responded to Chairman Synar and assured him that, "I strongly believe that the Commission would reject any (reg-neg) Committee 'consensus' recommendation that would compromise the integrity of the Commission's decisionmaking process," while otherwise defending the choice of the reg-neg process for this purpose. (Pages 2 and 3.)

Ironically, the real problem with our current *ex parte* regulations is not with the actual text of the regulations, but rather with the OGC interpretations, including particularly those in the Iroquois proceeding. I agree completely with the criticism of those interpretations set forth in Commissioner Moler's dissenting opinion to our July 30, 1990, order in the Iroquois dockets. A copy of that portion of her dissent is attached. (attachment B.) She persuasively set forth the problem created by those interpretations in the hypothetical discussed on the last page of her opinion. I find it very difficult to believe that the Commission cannot remedy those problems with a relatively precise, and even surgical, amendment of the existing regulation, accompanied by a series of specific examples in the pre-ambulatory text to help guide the implementation by the Commission and outside parties. And, that could all be accomplished rather directly and immediately in a traditional NOPR.

Even more ironically, had we just begun that NOPR process last April, when this Notice was first proposed, we would have been done several months ago, with absolutely no extraordinary costs and with full public participation. I continue to wonder, under these circumstances, what the apparent fascination is with the reg-neg approach for the *ex parte* issue. Any why, for all practical purposes, reg-neg is now apparently considered to be the *only* way to tackle this hardly imponderable issue?

Second, it is not at all clear *what* there is for the advisory committee established for the negotiated rulemaking procedure to negotiate about the *ex parte* rules. I think of the situation in the context of three concentric circles. The innermost circle is the strict statutory *ex parte* prohibition, about which there is no confusion and for which there is no discretion on the part of the Commission. As the statutory language and legislative history of the Negotiated Rulemaking Act stipulates, the negotiated rulemaking procedure cannot be used to amend or modify an agency's statutory obligations. So, the advisory committee cannot negotiate any change in our statutory *ex parte* obligations and prohibitions.

The next concentric circle includes the interpretation of those statutory obligations under applicable case law precedent. Once again, I fail to see how a committee of 25 individuals, apparently including non-lawyers as well as lawyers can sit around a table and negotiate an acceptable legal interpretation of applicable case law. In any event, I thought that was why we have an OGC and several hundred attorneys in the first place.

I read last spring that another independent federal agency reportedly paid a New York law firm 50 thousand dollars for a 36-page opinion on the narrow legal issue of when the term of that agency's Chairman expires under applicable law. While that agency apparently has been sharply criticized by Congress for hiring outside counsel and for wasting so much money, at least they got a legal opinion from a highly qualified and very reputable law firm. Here, we would be spending considerably more money in the end to get a legal opinion from an advisory committee selected primarily to represent diverse industry groups, rather than on the basis of their legal expertise in this particular area of the law (although I do *not* mean to suggest at all that the attorneys listed on the proposed committee are not well qualified practitioners generally capable of representing their respective organizations). Perhaps, we should give serious consideration to hiring a law firm as a preferred alternative, if it is perceived that it would be inappropriate for OGC to provide such legal advice directly to the Commission under these circumstances.

The third outer concentric circle would encompass those requirements and prohibitions on communications that would not be imposed as a matter of law by statutory obligations, but would be deemed appropriate or desirable as a matter of policy. Now that conceivably could be something about which lawyers and non-lawyers could debate, and negotiate, and even potentially reach a consensus. I, however, fail to see any advantage to having such a debate, negotiation, and potential consensus proceeding with only the *ex officio* participation of each of the five most vitally interested parties in the subject, *i.e.*, the members of this Commission who must attempt against considerable odds to remain well-informed for our duties and responsibilities, as Congress and the courts clearly and unambiguously intend. In effect, it would be a negotiation without the principals in the negotiation about a matter of policy of critical and quite personal concern to each of them.

To me, that's nonsensical, particularly when we would be intimately involved in the negotiation of a traditional NOPR on this same subject. I also would note that we were actively involved in the *ex parte* issues included in the 10(j) Final Rule on the April 24 agenda. In that rulemaking, we had a NOPR proposal we worked out and extensive public comments, and we made a decision in the final rule after some debate about "neutrality." And, the whole process from start to finish worked out well. Why wouldn't the process work just as well for a traditional *ex parte* NOPR.

As a practical matter, the way these things work, the Commission staff will probably have a strong guiding hand in formulating the proposed rule. I also am concerned that, in the end, our *ex officio* status may not allow us to participate meaningfully in the actual negotiations. While I have considerable respect for the two individual Commission staffers proposed for the Committee to represent the Commission as an institution, I continue to believe that Commissioners should be allowed to participate as full voting members of the committee. And, based on past discussions, I am quite concerned that, in the third, outer concentric circle subject area of discretionary requirements and prohibitions as a matter of policy, there will be serious consideration of phone logs, visitor logs, memoranda of phone conversations, memoranda of meetings and other requirements, all subject to independent OGC review and investigation. In fact, just such a memoranda of meetings procedure with OGC review apparently was imposed on Commission procedure with OGC review apparently was imposed on Commission employees who were interviewed by General Accounting Office employees and Congressional staffers involved in the oversight review of FERC by the Committee on Government Operations of the U.S. House of Representatives.

I also am very concerned, additionally, that it would be proposed that we would be prohibited from discussing with anyone any issue as a general policy matter that also exists in any pending case. Reportedly, certain Commission offices already have implemented such prohibition on discussions with outside visitors. I also have been told, and assume it's true, that there has been opposition to participation by FERC officials in meetings about legislation that involve issues in pending cases, such as our regulation of natural gas gathering systems, based on a claim that *ex parte* restrictions prohibit any such participation.

In effect, we would be prohibited from talking about every contested subject, even as a general policy matter, because it could be an issue in one or another contested case, as almost all subjects of any interest usually are. If confronted with such proposed requirements and prohibitions from our own advisory committee (particularly with the active participation of the Commission staff as our representative), I am very concerned that the Commission will find it politically difficult to justify doing less in its own discretion as a matter of policy.

I also am not as confident as others that the advisory committee will likely stampede on its own initiative, or be stampeded, to a proposal with looser requirements and prohibitions. First, as discussed above, the statutory obligations and interpretations of law are legal matters, which quite simply are not negotiable. So, in the first place, the only real subject matter for negotiation is the discretionary, additional requirements and prohibitions as a matter of policy. Second, I believe there is a widespread perception in the industry that there is a certain "unevenness" in the amount of access and communication available to various companies and law firms at FERC. The perception appears to be that the Commission process is largely closed to many, if not most, groups, but still accessible to some favored entities for various reasons. I do not assert that as a fact in any way, but it is a consistent criticism.

Thus, I believe it is quite possible, if not likely, that an advisory committee might have a majority supporting broad-based informal communication prohibitions to "level" the regulatory playing field, and make any perceived preferential access or communication more difficult to maintain. And that, quite honestly, is my candid assessment of the direction the advisory committee probably would choose (and for which it may even conceivably have Commission staff support). I would suggest that the comments filed in the 10(j) rulemaking procedure on the *ex parte* issue in

VOL
56
ISS
244
DE

19 91
UMI

hydro-electric licensing support that conclusion.

Also, a number of industry representatives and FEBA practitioners have informally told me that they agree with that assessment. For example, several natural gas industry groups might be expected to support prohibitions or limitations on all discussions on the theory that pipelines reap the most benefit today of pre-filing conferences and more open discussion. I obviously have no enthusiasm for that result, which would return the Commissioners and their staffs to the "mushroom" status of prior years (a term first printed by the founding publisher of *Gas Daily; i.e.*, keep us in the dark and feed us informational manure), particularly when we could otherwise deal with any necessary refinement of the *ex parte* rules directly, expeditiously, less expensively, and quite responsibly through a regular NOPR.

It also has been argued that another reason to have an advisory committee and a negotiated rulemaking is to give industry the chance to participate in deciding what kind of *ex parte* rule we would have, because they too have interests at stake. If the best guess is that a majority of the members of the advisory committee will want to close down access, because of the "unevenness" consideration, that may serve their perceived self-interest, but it sure doesn't help us. In the alternative, if a majority of the members want to support an open process, they can do that in their comments in response to a traditional NOPR. They don't need a negotiated rulemaking to support that result in any event. Consequently, I fail to see how industry's participation in a negotiated rulemaking will provide any better assurance of getting the "right" result.

Finally, even if there was some persuasive argument for an *ex parte* reg-neg process, which there clearly is not in my judgment, this is decidedly not the time for action. Chairman Synar has asked us to wait until the Subcommittee has completed its investigation and review and makes recommendations on the spectrum of *ex parte* issues in a report early next year. We still have the ongoing Subcommittee investigation of the *Iroquois* matter, but thus far we don't have a concrete clue as to what's involved or the likely result. And, we have just been advised, by letter of December 10, 1991, from Chairman Synar, that the Members of the Commission are going to be called to a hearing to testify about the *Iroquois* matter in mid-January after reviewing the transcripts and other materials developed by the Subcommittee and the General Accounting Office. We also have been advised that there will be more general questions, as a result of the Subcommittee's inquiry, "concerning whether certain changes should be made in the law or in FERC's *ex parte* rules, or whether greater efforts should be undertaken to ensure a more thorough understanding of those rules."

In essence, we're initiating the formal reg-neg notice process *before* we ourselves know what problems may exist under current rules and practices. I personally think that the better part of valor is to delay for a short period until we know the details of the *Iroquois* matter and the Subcommittee report. Then, we can decide exactly how the reg-neg committee should—and perhaps more importantly—and should not proceed in its comprehensive review of our *ex parte* regulations.

3. The Information rulemaking Issue

Chairman Allday's letter of June 11, 1991, in response to Chairman Dingell's letter of May 3, 1991, on the subject of a negotiated rulemaking discusses informal rulemakings, as follows:

> Also, while the *ex parte* prohibitions do not apply to general policy rulemaking, the Commission may wish to consider procedures for assuring that significant off-the-record communications received in a rulemaking proceeding are placed in the public rulemaking file so that they may be considered in the Commission's decisional process. The courts have indicated that even in rulemaking proceedings, an agency may not rely on significant new information that is not in the public file or not officially noticeable. *Action for Children's Television v. FCC*, 564 F.2d 458, 476 (D.C. Cir. 1977); *Sierra Club v. Costle*, 657 F.2d 298, 397, 402–403 (D.C. Cir. 1981). The Administrative Conference of the United States has likewise recognized that contacts with outside sources of information are proper and may be necessary to the full development of a rulemaking but has recommended procedures to require the submission of all written communications and significant oral communication in the public file. (Recommendation No. 77–3, 1 CFR 305.77–3.)

Subsequently, the "Staff Report and Analysis" forwarded by Chairman Allday on June 14, 1991, to the Full Committee in response to Chairman Dingell's letter of May 11, 1991, on the subject of pending energy legislation comes to a different conclusion. The Staff Report and Analysis states, at page 21, as follows:

> *Ex parte Communication*
>
> Under the APA, the rules prohibiting *ex parte* communications apply only to adjudications that by statute must be conducted on the record after hearing. Commission regulations apply these prohibitions to all trial-type cases, regardless of whether an evidentiary hearing is required by statute or merely provided by Commission rule or order. Because, as discussed above, contested rate proceedings are generally set for formal hearing, the *ex parte* rules apply.
>
> Even where informal rulemaking procedures are used, the courts have indicated that similar considerations concerning off-the-record communications may apply. The courts have relied on due process grounds to extend the *ex parte* rules to cover informal rulemaking if they involve conflicting private claims to a valuable privilege. *Sangamon Valley Television Corp. v. United States*, 269 F.2d 21 (D.C. Cir. 1959). In any event, in order to assure fairness, any written communications on the merits in a rulemaking proceeding are placed into the public record *and significant oral communications on the merits are to be summarized in writing and placed into the public record.* These practices are currently being evaluated in a generic proceeding examining whether to revise the Commission's long-standing *ex parte* rules.
>
> (Emphasis added; footnotes omitted.)

Still later, the Commission was advised on one occasion during this debate that there already is such a requirement as a result of the adoption of a March 16, 1988 OGC memorandum, discussed below. Nevertheless, at the Commission meeting of November 27, 1991, Commission staff advised the Commission, in response to my direct questions, that the March 16, 1988 memorandum was purely advisory guidance not legally binding on any Commissioner or Commission employee, apparently then or now. To the best of my knowledge, and I expressly inquired at the November 27 meeting, no Commission employee has every filed a memorandum describing a "significant oral communication" in a rulemaking docket in any event.

What is curious about this discussion is that Commission staff also advised on several occasions that we *already* have a settled requirement and practice of summarizing any "significant oral communications on the merits" in an informal rulemaking proceeding and placing them in the public record. That is curious for two reasons. First, as discussed, the Commission to my knowledge has no such requirement in force today and there is no general practice to that effect. Second, Chairman Allday's May 3 letter makes clear that, "the Commission *may wish to consider* procedures for assuring that significant off-the-record communications received in a rulemaking proceeding are placed in the public rulemaking file so that they may be considered in the Commission's decisional process" (emphasis added);

i.e., on a *prospective* basis in the future. Clearly, there may be some confusion or even a difference of opinion at the Commission about the facts regarding current FERC practices in informal rulemakings. But, that does not begin to tell the whole history and story of the informal rulemaking issue.

Frankly, I was surprised that an early proposal to establish a negotiated rulemaking committee stated that, "there is a need for clearer guidance as to the scope of the *ex parte* prohibitions both in trial-type proceedings *and in informal rulemakings.*" There is absolutely no need for clearer guidance as to the scope of the *ex parte* prohibitions in informal rulemakings, because a matter of law *ex parte* prohibitions apply only to adjudications. The suggestion of *ex parte* prohibitions in informal rulemakings is a clear contradiction in terms, or an oxymoron, as they say. There are no "parties" in informal rulemakings and it is not a trial-type proceeding. And, there simply is no court case or administrative case that says *ex parte* either does or should apply to informal rulemakings.

As the Second Circuit succinctly stated, "*Ex parte* communications • • • with a *judicial or quasi-judicial* body regarding a pending matter are improper and should be discouraged." *PANSY v. FERC*, 743 F. 2d 93, 110 (2nd Cir. 1984) (emphasis added). When undertaking rulemaking, unlike adjudication, the Commission engages in legislation, not adjudication. In the legislative process, which, unlike the judicial, involves generic (not fact-specific) considerations, decision makers must have broad access to information.

It has been argued that even after the Supreme Court's *Vermont Yankee* decision (favoring administrative procedural flexibility in the absence of explicit statutory requirements) the D.C. Circuit held to the contrary—at least, that court found *considerations* of *ex parte* applied to informal rulemaking in *Sierra Club v. Costle*, 657 F.2d 289 (1981), especially the discussion following page 400.

I have read the case and the discussion beginning on page 400. *Sierra Club v. Costle* makes clear that *ex parte*, cannot, by definition, ("by or for one party") apply outside the adjudicatory context. Note 501 points out that "It should not be forgotten that informal rulemaking involves 'interested persons,' rather than 'parties' in the usual adjudicative sense of the term. The concept of 'ex parte' implies a different structure from that involving mere 'interested persons.' One can only have contact without 'parties' present [only] in a proceeding where parties are involved, namely adjudication or formal rulemaking."

Beyond the meaning of Latin terms, I find compelling the practical considerations the court brought up against adopting the judicial norm to legislation. The court cautioned, 657 F.2d at 401:

> As judges we are insulated from these pressures [that ordinarily animate a democratic society] because of the nature of the judicial process in which we participate; but we must refrain from the easy temptation to look askance at all face-to-face lobbying efforts, regardless of the forum in which they occur, merely because we see them as inappropriate in the judicial context. Furthermore, the importance to effective regulation of continuing contact with a regulated industry, other affected groups, and the public cannot be underestimated.

(Footnotes omitted.)

The court, at n.503, cited to a speech by the late Chief Judge McGowan to the effect that, "Anyone with experience of both knows that a courtroom differs markedly in style and tone from a legislative chamber. The customs, the traditions, the mores, if you please, of the processes of persuasion, are emphatically not the same. What is acceptable in one is alien to the other." (*See*, n. 504 on the benefits of outside contacts to policy making in the informal regulatory context.)

While the court did hold that the EPA needed to supplement the record with private comments of "central relevance" to the rule, the court did so on the basis of a requirement in the Clean Air Act, not the Administrative Procedures Act. That still does not bring *ex parte* into play, for just stating the proposition obviates the need for having a negotiated rulemaking on that subject. Indeed, and very importantly for this discussion, the court held, 657 F.2d at 401–402, that Congress explicitly *rejected* applying the rules of adjudication to rulemaking when it amended the Government in Sunshine Act.

A distinguished former Chairman tried unsuccessfully to impose just such an *ex parte*-type limitation for the (in)famous 1988 Electric NOPRs. Her March 16, 1988 memorandum forwarded a memorandum by the General Counsel outlining the rules to be applicable to off-the-record communications between employees of the Commission and outside parties on rulemaking matters. I would note that March 16, 1988, also was the date the Commission issued those Electric NOPRs, and the Chairman distributed her memorandum later on that same date, which was not deemed to be a mere coincidence at all by some of us then on the bench. I perhaps uncharitably characterized the memo at that time as a thinly veiled "gag rule" for those 1988 Electric NOPRs, but I do not agree that the 1988 memo was intended to "open up" our process for those NOPRs, as some have asserted.

The OGC memorandum stated that the courts and the Administrative Conference of the United States have recognized that contacts with outside sources of information may be proper and necessary to the full development of a general policy rule, and that constraints appropriate for adjudication are neither practical nor desirable for rulemaking, citing *Sierra Club v. Costle*, and the Administrative Conference, Recommendation 77–3, 1 CFR 305.77–3. However, to ensure the fairness of Commission procedures and the maintenance of a complete rulemaking record, the memo indicated that any written communications on the merits received after a notice of proposed rulemaking has issued should promptly be placed in the public record. Further, *significant oral communications* on the merits after the issuance of a notice of a proposed rulemaking should be summarized in writing and likewise placed in the public file. And, communications that merely duplicate comments and arguments already in the record need not be placed in the public file.

Similarly, the memo stated that explanatory statements by a Commission official to the public or Congress that objectively summarize the issues in pending cases and describe public actions the Commission has already taken are not comments on the merits and need not be included in the record. Finally, the memo admonished Commissioners and staff advisors that they have a continuing obligation to consider all timely comments in a rulemaking with an open mind, and must base their decisions on information and arguments that are in the rulemaking record or that may be officially noticed, citing *National Advertisers, Inc. v. FTC*, 627 F.2d 1151 (D.C. Cir. 1979), cert denied, 447 U.S. 921 (1980).

Now, once again, as we grapple with the mega-NOPR on natural gas and other major policy issues in electric power regulation and hydroelectric licensing, we may be confronted by yet another proposal to impose *ex parte*-type prohibitions on Commissioners in informal rulemakings. That could not come at a worse time, in my judgment, given the obvious need for all the help we can get from all segments of industry in understanding the complexities of the many issues under review in that NOPR.

as well as other anticipated rulemakings in the near future in other areas of our regulation. I remain convinced as a matter of policy that the public interest is best served by free and open communications with all interested parties in these important rulemakings, just as was the case in the 1988 Electric NOPRs.

I had hoped that there would be a consensus to affirmatively remove the informal rulemaking issue from the Advisory Committee's charter. However, the instant Notice of Intent does not do so. Rather, it states, "Also, while the *ex parte* prohibitions are not applicable to general policy rulemakings, addition guidance is necessary regarding the procedures to be followed for assuring that *significant off-the-record communications* are reflected in the public rulemaking file so that they may be considered in the Commission's decisional process." (Emphasis added.) First, I would note again that there are *no* procedures of any kind currently in our regulations for any so-called "significant off-the-record communications" in informal rulemakings. As discussed above, the 1988 Chairman's initiative was rejected and abandoned by the Commission at that time. So, we're talking about additional guidance for procedures which do *not* now exist.

Second, I invite the reader's attention to the term in the 1988 OGC memorandum attached to that Chairman's memorandum, which calls for, "significant oral communications on the merits after the issuance of a notice of proposed rulemaking should be summarized in writing and likewise placed in the public file." One need not be a rocket scientist to figure out that the use of the term "significant off-the-record communications" in the instant notice will probably invite yet another effort to have those 1988 "significant oral communications" requirements imposed on us (this time by the reg-neg committee) with regard to informal rulemakings. And, in fact, the 1988 OGC memo could be the starting point for the proposed new requirements, based on this obvious semantical hook.

I also invite the reader's attention to the fact that the key case used in the March 16, 1988, OGC memorandum and cited again in Chairman Allday's June 11, 1991 letter is *Sierra Club* v. *Costle*, 657 F. 2d 289 (1981). It is quite obvious analytically that the 1988 memorandum directly and this Notice implicitly attempt to invoke that case for the same proposition that there must be informal rulemaking requirements/limitations with regard to "significant off-the-record/oral communications." In my judgment, any objective assessment of how we should proceed to address the *ex parte* issue must now, as a result, accept as an operative assumption that there will probably be an effort to use the *Sierra Club* v. *Costle* opinion to impose the 1988 memorandum requirements, or worse, to limit severely our communications in informal rulemakings. I am persuaded that we must affirmatively and unambiguously foreclose any conceivable possibility of that result.

Also, think please for a moment about how such a requirement would work if eventually imposed on us. In essence, there would be a violation of the new regulations if a Commissioner or Commission employee failed to submit a summary in writing to be placed in the public record in the event of a significant oral communication on the merits after the issuance of a NOPR, although communications that merely duplicate comments and arguments already in the record need not be placed in the public file. Consequently, the test for the requirement turns on two prongs. The first is "significant" and when does an oral communication cease to be "insignificant" and reach some threshold level of "significance" in the context of the subject matter of a NOPR. Skilled attorneys could spend endless hours engaging in open debate and associated mind games about the relative significance or insignificance of a particular communication about a particular subject from a particular person at a particular time in the NOPR process.

Once a conclusion is made that an oral communication was, in fact, significant, the second prong and next step in the analysis would be to determine whether the substance of that particular communication had already been introduced into the record. For openers, that exception would not presumably be available at any time prior to the receipt of formal written comments in the rulemaking docket, except as otherwise submitted in stray correspondence (which already would be required to be put in the record). So during that initial 30 to 60 day comment period, *any* "significant" oral communication would have to be summarized in the public file. Thereafter, the requirement would turn on whether the public comments somewhere and somehow would be deemed to have duplicated the specific "significant" communication.

For any major rulemaking, that could involve a laborious and painstaking search, as well as a certain degree of subjective judgment. For example, the Commission received 7500 pages of initial comments from several hundred parties in the Mega–NOPR docket. To be safe, a Commissioner may have to conclude either: (1) not to have any oral communications about any subject arguably encompassed within a NOPR, or even relevant to any subject in it; or (2) to summarize every oral communication in an abundance of caution to avoid being tripped up by disagreements over "significance" or whether it really was already in the record of the rulemaking docket. Those are two options which I would not wish to voluntarily adopt.

The better course of action is to state categorically our view, as a matter of law and policy, that there are no *ex parte* or other prohibitions applicable to informal rulemakings as a matter of law, and we will not consider any such recommendation with regard to informal rulemaking in a NOPR or in a negotiated rulemaking, as a matter of policy. I would note in that regard that the Public Utility Commission of California recently came to that same conclusion in its Interim Opinion Issuing Proposed Rule To Govern *Ex Parte* Communications In Commission Proceedings. Decision 91–07–074, July 31, 1991. Therein, our distinguished sister agency stated as follows, expressly citing and quoting from *Sierra Club* v. *Costle*. (Slip op. 4 and 5.)

2. Legislative Functions

When acting as a Constitutional alternative to or delegate of the Legislature, the Commission operates in a proactive mode, formulating new or revising existing policy via a process, which often (though not always) involves assessing facts of a more generalized nature than those which form the basis of an adjudicative case. We believe that the overwhelming majority of our activities involve legislative functions. Some of our proceedings are exclusively legislative; these proceedings include rulemakings. Pursuant to Rule 14.1 of our Rules or Practice and Procedure, rulemakings solicit public comment on the proposed rule but do not require evidentiary hearings.

Because rulemakings constitute a forum for soliciting public comment, they require an open process which affords us the opportunity to hear and consider conflicting viewpoints. This open process is a fundamental characteristic of a rulemaking, as the United States Court of Appeals for the District of Columbia Circuit observed in 1981:

Under our system of government, the very legitimacy of general policy[ ]making performed by unelected administrators depends in no small part upon the openness, accessibility, and amenability of these officials to the needs and ideas of the public from whom their ultimate authority derives, and upon whom their commands must fall. * * * Furthermore, the importance to effective regulation of continuing contact with a regulated industry, other affected groups, and the public cannot be underestimated. Informal contacts may enable the agency to win needed support for its program, reduce future enforcement requirements by helping those regulated to anticipate and shape their plans for the future, and spur the provision of information which the agency needs. (*Sierra Club* v. *Costle*, 657 F. 2d 298, 400; see also Administrative Law Treatise, Kenneth Culp Davis, 2nd ed., vol. 1 § 6:18, p. 537.)

We concur with this view. Consequently, to enable us to function efficiently in a rulemaking, we believe full and open communication between the participants in the legislative process and the Commission is mandatory. When the Commission is engaged in rulemaking, it is appropriate in the interests of furthering the Commission's proactive policy[ ]making function to neither prohibit *ex parte* communications, nor to require their public disclosure. Therefore, we exclude *ex parte* communications from coverage under the generic rule.

Also, the clear disposition of Congress and the Administration is that our process get opened up and not further inhibited by new informal rulemaking prohibitions. Certainly, Congress is well aware of the current state of the law and Charles Stalon and I both have testified to that effect in the past. Additionally, it has been argued that we should refine our *ex parte* rules, in part, to respond to the amendment to S.341 (now S.1220) on the same subject introduced by Senator Bingaman. I cannot believe that the Senator or his colleagues on the Committee on Energy and Natural Resources have any interest in further inhibiting our ability to attempt to be well-informed about the industries we collectively regulate, particularly with regard to informal rulemaking.

The Commission has also been advised that the need for additional guidance for informal rulemakings closely follows the recommendation of the Administrative Conference of the United States (ACUS), Recommendation 77–3, 1 CFR 305.77–3 (1977), as well as the earlier advice provided by OGC in the March 16, 1988 memorandum. In point of fact, the 1977 ACUS recommendation has been revised to reflect more recent court decisions, as discussed in some detail in Chapter 6 "Off-The-Record Or *Ex Parte* Communications in Rulemaking" of the ACUS "A Guide To Federal Agency Rulemaking," 2nd Edition, 1991. The ACUS concludes that there is no ban on off-the-record communications, as a matter of law, citing *Sierra Club* v. *Costle*.

Admittedly, the ACUS does recommend as a policy matter that agencies consider experimenting with various procedures to disclose oral communications that contain significant information or argument respecting the merits of a proposed rule and discusses current agency practices. And, quite honestly, the 1988 OGC memo arguably reflects the basic thrust of ACUS Recommendation 77–3 and might be deemed by some to be consistent with the 1991 ACUS recommendation. Also, as the Commission staff argued at the November 27, meeting and as discussed in a 1991 ACUS guide, some other agencies have similar rules. Nonetheless, it is clear that there is no legal requirement for such procedures at this time, and the Commission's decision remains a matter of policy discretion (*e.g.*, the third concentric circle discussed above?).

I am also concerned that the ACUS also recommends certain procedures for Executive Branch communications in rulemakings, which could further inhibit the appropriate flow of information on policy matters with the Administration, at just the wrong time. I have been convinced for some time that FERC general policy making needs to be better co-ordinated with Administration energy policy, which we could otherwise frustrate with wholly contrary informal rulemaking. The adoption by this Administration of Federal Government-wide National Energy Strategy only heightens that need, in my judgment.

4. Procedures

a. Commissioner Participation

If a majority is disposed to use negotiated rulemaking for a review of *ex parte* prohibitions, despite the advantages I see in a simple, regular order or NOPR (but hopefully without any suggestion of a prohibition for informal rulemakings and with an express statement to the contrary), the procedures are important. We should avoid any *fait accompli* by insisting that our offices be represented directly in the negotiation process. I, for one, am not persuaded to completely delegate this task (even on adjudications) on the assurance that we'll otherwise be kept informed and have some role in guiding the negotiations. Also, I do not want to see a precedent established that Commissioners are shut out of negotiated rulemakings. If this initiative was a regular, internally developed rulemaking, as I believe it should be, we would be represented by our staffs, if not ourselves, at the table, just as we were for the *ex parte* aspects of the 10(j) rulemaking. That should also be the requirement for negotiated rulemakings as well, particularly when they involve rules to be imposed on us.

Another way of stating that proposition is to recognize that we are vitally interested parties, which the statute and the Administrative Conference of the United States (ACUS) say must be included in the advisory committee. Also, the ACUS says that the agency itself needs to be involved in the negotiations, with representation that should be able to express the agency's views with credibility.

I also would note that the statute calls for open meetings of the advisory committee, public availability of documents, and for any interested member of the public to submit written views to the advisory committee and make an oral presentation at an appropriate time. So, as vitally interested members of the public, as well as Commissioners, we may have certain statutory rights to participate tangentially in the advisory committee deliberations directly or through our separate staffs. But, that, in effect, is playing around the margins of the negotiations. We should have a seat at the bargaining table, because we, as a matter of fact, have vital interests at stake—*i.e.*, our ability to satisfy our sworn oath of office in a well-informed manner.

I am pleased that the majority at least accepted Commissioner Moler's compromise proposal of *ex officio* status for individual Commissioners representing themselves. Consequently, those of us choosing to attend meetings of the reg-neg committee will be able to participate directly in the discussions of the Committee as a matter of right, without being forced to be more vocal members of the general public under the statute. Nonetheless, I would still prefer strongly that individual Commissioners be afforded the right to participate in the negotiations as a full voting member in the efforts to develop a consensus recommendation for the Commission. I also would be very disturbed if this *ex officio* compromise becomes the binding precedent in any future programmatic reg-neg process.

b. Disposition of the Advisory Committee's Recommendation

The Commission has debated whether to make a binding commitment now that any proposed *ex parte* rule adopted by consensus in the advisory committee would be adopted without modification as the Commission's proposed rule in the subsequent NOPR. I strongly opposed that proposition and, instead, proposed that we adopt a Federal Trade Commission formulation that, "the advisory committee shall engage in direct negotiations to develop *recommendations that will form the basis* for a NOPR" (emphasis added), that we would develop as a proposed rule.

We should not agree that the product of the negotiated rulemaking *ipso facto* becomes the proposed rule. It is palpable "horse hockey" that such a commitment is necessary to provide some incentive for the practicing bar and the industry to participate. Advisory committees serve in almost every agency of the Federal government without any prior assurance that their recommendations will ever be proposed as agency policy or agency recommendations. Also, such a commitment would be a bad precedent in our first negotiated rulemaking under the new law. I would note that the ACUS materials indicate that, in the past, agencies such as EPA have considered themselves legally bound to implement such commitments, once made, on a contract theory approach; so once made, it is not revocable.

We should retain the final authority as to the actual substance of the proposed rule, while giving an assurance only that the recommendations of the advisory committee will be taken into account by us and included as part of the NOPR (but not as the substance of the proposed rule, *per se*). We should not have the burden of proof, so to speak, for modifying or reversing the advisory committee recommendations, which would be the practical result of putting their recommendation in as the proposed rule. I would also note that the 1990 law does not require the adoption of such recommendations as the proposed rule (nor does the Administrative Conference suggest that). In the end, most commentators appreciate that collectively we members of an independent Commission have the responsibility by law to propose rules; and we shouldn't, as a matter of policy, delegate that to an advisory committee, or anyone else.

I am pleased that the majority has adopted a reasonable position on this issue. The Notice states that, "(w)hile the Commission may accept all, part or none of the consensus proposal of the committee, it will make a good faith effort to use the consensus report as the basis for the proposed Commission rule that will be published as its NOPR." (Slip op. at 7.) The Notice also cites to the relevant sections of the statute and related legislative history on this point, which supports that position. On balance, then, the Commission would intend to accord appropriate weight to a consensus Committee recommendation in developing the NOPR, but would not under any circumstances be bound to adopt or propose such a recommendation, in whole or in part.

Additionally, the statute defines "consensus" to mean unanimous concurrence, unless the advisory committee decides itself that there will only be general, but not unanimous concurrence, or any other definition agreed to by members of the advisory committee at the beginning of their efforts. The ACUS materials make clear that one of the threshold considerations by the agency and by members of the advisory committee is what level of concurrence should be required, as a function of the substantive interests of the parties at stake in the negotiations. For me, any recommendations should be the product of unanimous concurrence, if we are to have any obligation to address them. I have no interest in general concurrence, let alone some formulation of majority or super-majority rules, to decide the regulations governing our personal communications.

I am pleased that the majority has adopted in footnote 2 a definition of "consensus" requiring the unanimous concurrence among the voting interests represented on the committee, including the agency. That definition will ensure that the product of these negotiations must constitute a "true consensus" for the Commission in the subsequent NOPR process to accord it due weight as a consensus proposal. Thereby, all participants in the reg-neg process will have an equal and fair opportunity to represent their organizations interest in the negotiation, and no super-majority faction will be able to dictate a consensus proposal for Commission consideration in the NOPR.

c. Scope of the Negotiations

In addition to the issue of informal rulemakings discussed previously, I have serious concerns about any generalized scope of negotiations "to revise and develop a uniform and comprehensive proposed regulation governing *ex parte* communications between persons outside the Commission and Commission officials and employees." The Notice does not state, for example, that the scope of the negotiation is specifically and solely 18 CFR 385.2201, the attached *ex parte* regulation, as it should if that's all we want revised.

The statute also states that the advisory committee has the right to address any other matter the advisory committee determines to be "relevant" to the proposed rule. I'm particularly concerned about where this "relevancy" test could lead as to the scope of the negotiations. For example, the advisory committee conceivably could conclude that the Commission intends a comprehensive review of anything and everything that arguably is "relevant" to *ex parte* regulations, including enforcement. So, it is particularly important that we specify what we want negotiated and what we do not intend to be considered and negotiated, as a critical precautionary protection.

I am pleased that the Notice now states that, "(t)he proposed committee will focus on the legal and policy issues involved in formulating a new regulation having prospective effect only and will not investigate or examine specific conduct or allegations in past or pending proceedings." (Slip op. at 2.) In the face of the Congressional oversight investigation of *ex parte* matters discussed in Chairman Synar's November 13, 1991, and December 10, 1991 letters, it seems prudent to limit now the scope of the reg-neg comprehensive review, particularly since the Commission itself does not yet have a concrete clue as to the *ex parte* problems identified by the Subcommittee under the existing regulations and practice. Additionally, I believe it is the Commission's responsibility to focus the attention of the reg-neg committee on the specific subject matter to be reviewed, rather than await any potential disagreement later in the process.

Furthermore, the statute and the ACUS materials specify that the agency is obligated to provide the advisory committee with a specific set of issues to be considered and negotiated. And, further, the agency should carefully considered how to design the negotiations before they begin, including (among other things) what issues are negotiable; what constraints are imposed on each of these issues by statute and agency policy; what positions will the agency take initially; what is the range of solutions acceptable to the agency; what are the expected needs and positions of the other parties at the table; will the agency offer as a starting point for negotiations its own draft rule? (See generally ACUS Negotiated Rulemaking Sourcebook, 1990, Chapter 6—Negotiating the Rule.)

Before being asked to vote on an Order to Establish A Negotiated Rulemaking, I formally have requested that we have the opportunity to review the Commission staff list of issues, possible options, draft rule, etc. Reviewing the Commission staff documents before considering the draft Notice, and then making sure that the Order specifies precisely what is, and what is not, to be considered by the advisory committee, is the *only* way to ensure that we do not end up with an "unguided institutional missile," or, perhaps even worse, one guided by someone else with differing views.

d. Federal Advisory Committee Act (FACA)

FACA requires that an agency have a general regulation governing advisory committee activities in effect, as a condition precedent to the submission of individual advisory committee charters for review by the General Services Administration (GSA). The GSA final regulations implementing FACA codifies that statutory requirement, as well. The FTC determined that it was required to have the general regulation in place before it initiated action to establish an advisory committee to review its Rule 703. I find nothing in the Negotiated Rulemaking Act that would modify this statutory requirement in FACA, and as it is discussed in the ACUS Sourcebook. Consequently, I would conclude that the Commission should promulgate the general regulation as a first step in any *ex parte* negotiated rulemaking.

I am pleased to note that the Commission staff at the November 27, 1991 Commission Meeting informed the Commission that, concurrent with the public comment period for the instant Notice, Commission staff would take the appropriate steps under the GSA regulations implementing FACA for this reg-neg committee. Those steps are important to ensure that the committee is properly constituted and initiated as a matter of law, before the reg-neg process begins. Any failure to satisfy at the outset all applicable legal requirements, such as the GSA regulations under FACA, would unnecessarily expose the Commission and the reg-neg committee to later criticism and potential challenge.

5. Recommendations

(1) I recommend that FERC consider an alternative approach in the form of a regular NOPR based on internal OGC recommendations for refining the existing regulation, rather than adopt a negotiated rulemaking.

(2) If FERC is going to proceed with a negotiated rulemaking, the Commission should drop any reference to informal rulemakings, and insert in lieu thereof, "The Commission is satisfied that as a matter of law *ex parte* prohibitions do not apply to informal rulemaking and as a matter of policy such prohibitions would be inappropriate. Therefore, the negotiated rulemaking will not consider such prohibitions."

(3) If FERC is going to proceed with a negotiated rulemaking, the Commissioners should be allowed to participate directly in the negotiations.

(4) If FERC is going to proceed with a negotiated rulemaking, there should be no commitment that a consensus recommendation will be promulgated in the NOPR as the proposed rule. Rather, the Commission should only provide assurance that consensus recommendations will be taken into account in our deliberations on the proposed rule and will be reflected in the NOPR. And, a "consensus" must be a true unanimous consensus, including the Commission representatives.

(5) If FERC is going to proceed with a negotiated rulemaking, the Order should specify exactly what's to be negotiated and what's outside the scope; but only after we have the opportunity to review Commission staff draft materials.

(6) If FERC is going to proceed with a negotiated rulemaking, we should satisfy first the FACA requirement for a general advisory committee regulation.

6. Conclusion

I view this Notice as a critical issue for how the Commission will function in the years ahead. I am persuaded that we must retain the ability to discuss general policy (*i.e.*, issues not subject to strict *ex parte* prohibitions in a specific docket) even though the policy issue is involved in particular cases, and to discuss informal rulemakings without any prohibitions based on *ex parte* grounds such as the "significant oral communication" requirement. I hope that FERC can proceed to consider a refinement of the strict *ex parte* rules for adjudications without imposing such prohibitions in informal rulemakings or general policy issues on ourselves or having them *de facto* imposed by the advisory committee.

For these reasons, I concur in part and dissent in part.

Charles A. Trabandt,

Commissioner.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 347

[Docket No. 78N-0021]

RIN 0905-AA06

Skin Protectant Drug Products for Over-the-Counter Human Use; Tentative Final Monograph; Reopening of Administrative Record

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of proposed rulemaking; reopening of administrative record.

SUMMARY: The Food and Drug Administration (FDA) is reopening the administrative record for the rulemaking for over-the-counter (OTC) skin protectant drug products to include data on the ingredient "hard fat." This action is part of the ongoing review of OTC drug products conducted by FDA.

DATES: Written comments by February 18, 1992.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: William E. Gilbertson, Center for Drug Evaluation and Research (HFD-210), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8000.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 7, 1978 (43 FR 34628) FDA published, under § 330.10(a)(6) (21 CFR 330.10(a)(6)), an advance notice of proposed rulemaking to establish a monograph for OTC skin protectant drug products together with the recommendations of the Advisory Review Panel on OTC Topical Analgesic, Antirheumatic, Otic, Burn, and Sunburn Prevention and Treatment Drug Products (the Panel), which was the advisory review panel responsible for evaluating data on the active ingredients in this drug class.

The agency's proposed regulation, in the form of a tentative final monograph, for OTC skin protectant drug products was published in the **Federal Register** of February 15, 1983 (48 FR 6820). Neither the Panel nor the agency considered "hard fat" as an active ingredient for skin protectant uses in either of these publications.

In the **Federal Register** of August 3, 1990 (55 FR 31776) FDA published a final rule, in the form of a final monograph,

VOL
56
ISS
244
DE
19
1991
UMI

establishing conditions under which OTC anorectal drug products are generally recognized as safe and effective and not misbranded. In that document, FDA included "hard fat" as a "protectant active ingredient" in § 346.14 of the final monograph (21 CFR 346.14). The name "hard fat" has replaced the previously used names: Cocoa butter substitutes, hydrogenated cocoglycerides, and hydrogenated palm kernel glycerides. Hard fat is described in an official monograph in "The United States Pharmacopoeia XXII/The National Formulary XVII" (Ref. 1). The agency found that data submitted in response to the OTC anorectal tentative final monograph demonstrated that 19 grades of ingredients designated commercially as Witepsol ingredients perform in a similar fashion to cocoa butter as a skin protectant. Consequently, the agency classified the Witepsols as monograph protectant ingredients for anorectal use when designated as "hard fat."

On December 1, 1990, the agency received a citizen petition (Ref. 2) requesting that the tentative final monograph for OTC skin protectant drug products be amended to include "hard fat" as a Category I ingredient in such products. The request was based on the agency's action on this ingredient in the final rule for OTC anorectal drug products, as discussed above. The petition requested that the agency reopen the administrative record for the rulemaking for OTC skin protectant drug products to include "hard fat," because the tentative final monograph for those products had been published in 1983. The petition provided suggested labeling for OTC skin protectant drug products containing hard fat as an active ingredient.

FDA has carefully considered the request and believes that it would be appropriate to reopen the administrative record for the rulemaking for OTC skin protectant drug products to include the data and information on hard fat considered in the rulemaking for OTC anorectal drug products. Cocoa butter and hard fat (cocoa butter substitutes) are monograph protectant ingredients in the anorectal final rule. Cocoa butter has been considered in the rulemaking for OTC skin protectant drug products and was proposed as Category I in the tentative final monograph (48 FR 6820 at 6832). Based on agency action in the rulemaking for OTC anorectal drug products, hard fat would be classified as a monograph ingredient in the final monograph for OTC skin protectant drug products. The agency is currently developing this final monograph. Therefore, the agency considers that good cause exists, as stated in 21 CFR 330.10(a)(7)(v), to consider the monograph status of hard fat for skin protectant uses at this time. The labeling for such products, suggested in the petition, will be discussed in the final rule for OTC skin protectant drug products.

Interested persons may on or before February 18, 1992, submit to the Dockets Management Branch (address above) written comments regarding the ingredient hard fat used as a skin protectant active ingredient. Three copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Comments received may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 4

RIN 2900–AF41

Schedule for Rating Disabilities—Dental and Oral Conditions

AGENCY: Department of Veterans Affairs.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Department of Veterans Affairs (VA) is issuing an advance notice of proposed rulemaking (ANPRM) concerning that portion of the Schedule for Rating Disabilities which deals with dental and oral conditions. This ANPRM is necessary because of a General Accounting Office (GAO) study and recommendation that the medical criteria in the rating schedule be reviewed and updated as necessary. The intended effect of this ANPRM is to solicit and obtain the comments and suggestions of various interest groups and the general public on necessary additions, deletions and revisions of terminology and how best to proceed with a systematic review of the medical criteria used to evaluate dental and oral conditions.

DATES: Written comments and submissions in response to this ANPRM must be received by VA on or before February 18, 1992.

ADDRESSES: Interested persons and organizations are invited to submit written comments and suggestions regarding this ANPRM to the Secretary of Veterans Affairs (271A), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington DC 20420. All written submissions will be available for public inspection only in the Veterans Service Unit, room 170 at the above address and only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until February 27, 1992.

FOR FURTHER INFORMATION CONTACT: Bob Seavey, Consultant, Regulations Staff (211B), Compensation and Pension Service, Veterans Benefits Administration, (202) 233–3005.

SUPPLEMENTARY INFORMATION: In December 1988, GAO published a report entitled VETERANS' BENEFITS: Need to Update Medical Criteria Used in VA's Disability Rating Schedule (GAO/HRD–89–28). After consulting numerous medical professionals and VA rating specialists GAO concluded that a comprehensive and systematic plan was needed for reviewing and updating VA's Schedule for Rating Disabilities (38 CFR part 4). The medical professionals noted outdated terminology, ambiguous impairment classifications and the need to add a number of medical conditions not presently in the rating schedule. VA rating specialists noted that for some disorders they would prefer more medical criteria for distinguishing between various levels of severity and that inconsistent ratings may result when unlisted conditions had to be rated by analogy to other listed disorders. GAO recommended that VA prepare a plan for a comprehensive review of the rating schedule and, based on the results, revise the medical criteria accordingly. It also recommended that VA implement a procedure for systematically reviewing the rating schedule to keep it updated. VA agreed to both recommendations, and this ANPRM is one step in a comprehensive rating schedule review plan which will ultimately be converted into a systematic, cyclical review process.

This ANPRM is the first stage in VA's consideration of what regulatory action to take, if any, with respect to revising and updating that portion of the rating schedule dealing with dental and oral conditions (38 CFR 4.150). Interested organizations and individuals are invited to submit comments and suggestions for revising current medical criteria, adding additional disabilities and/or deleting certain rarely encountered disorders or transferring them to other sections of the rating schedule. Submissions may run the gamut from narrative discussions of individual rating criteria to wholesale format changes and substitute rating schedules. Where changes are suggested, we would also appreciate a recitation as to the scientific or medical authority for such changes. Early submissions will expedite the comment review process and are encouraged.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 91–359, RM–7835]

Radio Broadcasting Services; Hinesville, GA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Bullie Broadcasting Corporation proposing the substitution of Channel 284C3 for Channel 284A at Hinesville, Georgia, and modification of its construction permit to specify the higher class channel. Channel 284C3 can be allotted to Hinesville in compliance with the Commission's minimum distance separation requirements with a site restriction of 12.8 kilometers (7.9 miles) west in order to avoid a short-spacing to Station WFYV(FM), Channel 283C, Atlantic Beach, Florida. The coordinates are North Latitude 31–52–18 and West Longitude 81–43–46. In accordance with § 1.420(g) of the Commission's Rules, we shall not accept competing expressions of interest or require the petitioner to demonstrate the availability of an additional equivalent channel for use by interested parties.

DATES: Comments must be filed on or before February 3, 1992, and reply comments on or before February 18, 1992.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: J Geoffrey Bentley, Debra J. Jezouit, Birch, Horton, Bittner, and Cherot, 1155 Connecticut Avenue, NW., suite 1200, Washington, DC 20036 (Attorneys for petitioner).

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media Bureau (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's notice of proposed rule making, MM Docket No. 91–359, adopted December 4, 1991, and released December 13, 1991. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center (202) 452–1422, 1714 21st Street, NW., Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a notice of proposed rule making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

Radio Broadcasting Services; Atlantic, Atlantic Beach, and Hatteras, NC

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by Robert L. Purcell seeking the allotment of Channel 297C1 to Atlantic Beach, North Carolina, as the community's first local FM transmission service. To accommodate the allotment at Atlantic Beach, Purcell requests the substitution of Channel 233A for unoccupied but applied for Channel 297A at Atlantic, North Carolina, and the substitution of Channel 268A for unoccupied but applied for Channel 232A at Hatteras, North Carolina. Channel 297C1 can be allotted to Atlantic Beach with a site restriction of 28.8 kilometers (17.9 miles) northeast to avoid a short-spacing to Station WNCT–FM, Channel 300C, Greenville, North Carolina, at coordinates North Latitude 34–48–17 and West Longitude 76–27–13. Channel 268A can be allotted to Hatteras without the imposition of a site restriction, at coordinates 35–12–54 and 75–41–30. Channel 233A can be allotted to Atlantic with a site restriction of 0.6 kilometers (0.4 miles) east to avoid a short-spacing to Station WRNS–FM, Channel 236C, Kinston, North Carolina, at coordinates 34–53–30 and 76–20–00.

DATES: Comments must be filed on or before February 3, 1992, and reply comments on or before February 18, 1992.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Robert L. Purcell, 15010 Carrolton Road, Rockville, Maryland 20853 (Petitioner).

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 541

Denial of Petition for Rulemaking; International Association of Auto Theft Investigators

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Denial of Petition for Rulemaking.

SUMMARY: This notice denies a petition filed by the International Association of Auto Theft Investigators requesting that this agency promulgate a voluntary standard for manufacturers and owners to mark the major parts of motor vehicles with identifying numbers or symbols. This petition is denied since, based on a recent NHTSA study for Congress, the agency believes it is uncertain that promulgation of a voluntary parts marking standard would further the goals of preventing theft and decreasing the fencing of stolen motor vehicles and parts.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara Gray, Office of Market Incentives, NHTSA, 400 Seventh Street, SW., Washington, DC 20590. Ms. Gray's telephone number is (202) 366-1740.

SUPPLEMENTARY INFORMATION: In order to alleviate the growing national problem of motor vehicle theft Congress amended the Motor Vehicle Information and Cost Savings Act in 1984 by adding a new title VI (15 U.S.C. 2021 *et seq.*). Title VI was enacted by Congress as a comprehensive attack on vehicle theft through the following means: A requirement for marking the major component parts of frequently stolen passenger automobiles; increased Federal criminal penalties for vehicle theft; penalties for tampering with the new marking system; tighter controls on the import and export of motor vehicles; and a series of studies examining the new theft prevention program's effectiveness to determine if the program should be modified or expanded.

Section 613 of title VI (15 U.S.C. 2033) authorizes NHTSA to promulgate a voluntary vehicle theft prevention standard that is practicable and provides relevant objective criteria. Under such a standard, persons could voluntarily mark identifying numbers or symbols on major parts of any motor vehicle that they manufacture or own.

In conjunction with title VI, Congress enacted sections 511 and 512 of title 18 of the U.S. Code that, respectively, impose criminal penalties for tampering with an "identification number for a motor vehicle or motor vehicle part" and provide for forfeiture of such vehicles or parts for tampering with the identification numbers. The definition of "identification number" includes a number or symbol that is inscribed or affixed for purposes of identification under title VI.

Pursuant to title VI, NHTSA has promulgated 49 CFR part 541, Federal Motor Vehicle Theft Prevention Standard. That standard requires manufacturers to mark 14 major parts of their passenger automobile car lines that the agency determines are likely to have a high theft rate. Under 49 CFR part 543, Exemption from Vehicle Theft Prevention Standard, manufacturers may obtain exemptions from the parts marking requirements for passenger motor vehicle lines which include, as standard equipment, an antitheft device if the agency concludes that the device is likely to be as effective in reducing and deterring motor vehicle theft as compliance with the parts-marking requirements.

The International Association of Auto Theft Investigators (IAATI) filed a petition dated May 14, 1991, asking that NHTSA promulgate a voluntary parts marking standard, as authorized by section 613 of title VI. IAATI offered the following arguments in support of its petition: That a properly constructed voluntary standard would ameliorate problems in title VI that it believes relate to various compromises in the legislative process; and, that a voluntary standard would "protect" and serve as a guideline for motor vehicle manufacturers that are currently marking vehicles not subject to the theft prevention standard. IAATI further stated that the voluntary standard would, in conjunction with the prohibition against tampering, "protect" markings by vehicle manufacturers that continue to mark vehicles despite obtaining an exemption from parts marking pursuant to 49 CFR part 543. IAATI stated that it encourages continuation of stamping of engines, transmissions, and frames on all vehicles by manufacturers. IAATI also asserted that with the implementation of a voluntary standard, Federal law enforcement officials would be able to prosecute offenders and seize vehicles which have parts marking even though the vehicles are not subject to the mandatory parts marking standard.

After carefully considering each argument for a voluntary parts marking standard, the agency is denying IAATI's petition for a voluntary standard.

In determining whether to initiate action to establish a voluntary parts marking program, NHTSA views the major issue as whether such promulgation would further the goals of title VI. The legislative history of title VI shows that the title was enacted to prevent thefts and decrease the ease with which certain stolen vehicles and their major parts can be fenced. (See House Report 98-1087 part 1 on the Motor Vehicle Theft Law Enforcement Act of 1984, September 26, 1984.)

NHTSA believes that the track record of the existing mandatory parts marking standard is instructive about the likelihood of success of a voluntary standard in furthering the goals of title VI. This belief is based on the similarity that a voluntary standard would have to the existing standard. The success, thus far, of the part 541 prevention standard has been at best inconclusive.

Earlier this year, as required by section 614 of title VI (15 U.S.C. 2034), the agency issued a report to Congress on the effect of the mandatory parts marking standard on motor vehicle theft and recovery. In that report, the agency concluded, based on approximately five years of data, that "no meaningful statement on the effectiveness of parts marking can be made using the available national data sets."

In arriving at this conclusion, the agency considered, among other matters, the potential usefulness of parts marking in aiding criminal prosecution by examining the effects of parts marking on the prosecution, conviction, and sentencing of motor vehicle thieves. The tampering prohibition in 18 U.S.C. 511 and the forfeiture provision in 18 U.S.C. 512 currently apply to identification numbers marked in compliance with the theft prevention standard at 49 CFR part 541. The report showed that between the years 1985 and 1989, out of approximately 150,000 to 200,000 arrests for motor vehicle thefts per year nationwide, at the State and Federal level, Federal prosecutors obtained, for the four year period, a total of 107 convictions for violations of 18 U.S.C. 511. The greatest number of convictions under section 511 in a single year was in 1988, when there were 40 convictions.

Considering the inconclusiveness of the benefits that have accrued from the mandatory parts marking standard, which reflects on the probability of success for a voluntary standard, and considering that if a voluntary standard were to be developed and issued, agency resources would need to be redirected, the agency believes that issuing a voluntary parts marking standard is not warranted at present. Furthermore, no provision of title VI nor part 541 prohibits any manufacturer or owner from marking any vehicle part in any location as long as the markings do not cover or compromise the Federally mandated marking standard for a vehicle subject to part 541.

IAATI also believes that a voluntary marking program would further "protect" vehicle manufacturers that continue to mark vehicles despite obtaining an exemption from parts marking pursuant to 49 CFR part 543. However, the exemption for a manufacturer relieving it of marking the component parts does not mediate the enforcement provisions under title 18 sections 511 or 512.

Additionally, the agency understands, IAATI's desire for manufacturers to continue to stamp engines, transmissions, and frames on all vehicles. However, it is not within the statutory authority of the agency to require manufacturers to stamp these parts, since the statute allows manufacturers to inscribe or affix vehicle identification numbers onto a component part.

For the preceding reasons, there is no reasonable possibility that the requested standard would be issued at the conclusion of a rulemaking proceeding. Therefore, NHTSA denies the petition of the International Association of Auto Theft Investigators to issue a voluntary theft marking standard.

Authority: 15 U.S.C. 2021-2024, 2026 and 2033; delegation of authority at 49 CFR 1.50.

Issued on: December 11, 1991.

Barry Felrice,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018-AB66

Endangered and Threatened Wildlife and Plants; Notice of Public Hearings on Proposed Threatened Status for the Delta Smelt

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; notice of public hearings.

SUMMARY: The Fish and Wildlife Service (Service), under the Endangered Species Act of 1973, as amended (Act), gives notice that public hearings will be held on the proposed threatened status for the delta smelt (*Hypomesus transpacificus*). The hearings will allow all interested parties to submit oral or written comments on the proposal. The proposed rule was published October 3, 1991 at 56 FR 50075.

DATES: The Service has scheduled three public hearings in the following California locations: Thursday, January 9, 1991, in Sacramento; Tuesday, January 14, 1991, in Santa Monica; and Thursday, January 16, 1991, in Visalia. Each public hearing will be held from 1 p.m. to 4 p.m., and from 6 p.m. to 9 p.m. Written comments from all interested parties must be received by January 31 1991. Any comments received after the closing date may not be considered in the final decision on this proposal.

ADDRESSES: The public hearings will be held in the following locations:

- Thursday, January 9, 1991, Radisson Hotel, 500 Leisure Lane, Sacramento, California.
- Tuesday, January 14, 1991, Guest Quarters Suite Hotel, 1707 4th Street, Santa Monica, California.
- Thursday, January 16, 1991, Visalia Convention Center, 303 E. Acequia, Visalia, California.

Written comments and documents should be sent directly to the Field Supervisor, U.S. Fish and Wildlife Service, Sacramento Field Office, 2800 Cottage Way, room E-1803, Sacramento, California 95825-1846. Comments and documents received will be available for public inspection during normal business hours, by appointment, at the above address.

FOR FURTHER INFORMATION CONTACT: A. Keith Taniguchi, Sacramento Field Office, at the above address (telephone 916/978-4866 or FTS 460-4866).

SUPPLEMENTARY INFORMATION:

Background

The delta smelt is restricted to Suisun Bay and the contiguous Sacramento-San Joaquin estuary (the Delta) in northern California. This fish is threatened by one or more of the following factors: Freshwater exports of Sacramento River and San Joaquin River outflows for agriculture and urban use, introduced nonindigenous aquatic species, agricultural and industrial chemicals, prolonged drought, and stochastic (random) extinction by virtue of its 1-year life span and the small isolated nature of the remaining population. A proposed rule to list the delta smelt as a threatened species with critical habitat was published in the **Federal Register** on October 3, 1991 (56 FR 50075).

Section 4(b)(5)(E) of the Act, as amended (16 U.S.C. 1531 *et seq.*), requires that a public hearing be held if it is requested within 45 days of the publication of a proposed rule. On November 6, 1991, the Service received a written request for a public hearing from George R. Baumli of the State Water Contractors, Sacramento, California. The Service received 16 additional requests for public hearings within the 45-day time period. As a result, the Service scheduled three public hearings to be held in the following locations:

January 9, 1991—Radisson Hotel, 500 Leisure Lane, Sacramento, California.

January 14, 1991—Guest Quarters Suite Hotel, 1707 4th Street, Santa Monica, California.

January 16, 1991—Visalia Convention Center, 303 E. Acequia, Visalia, California.

Each hearing will be held from 1 p.m. to 4 p.m., and from 6 p.m. to 9 p.m.

Parties wishing to make statements for the record should bring a copy of their statements to the hearing. Written comments will be given the same weight as oral comments. Oral statements may be limited in length, if the number of parties present at the hearings necessitates such a limitation. However, there will not be any limits to the length of written comments or materials presented at the hearings or mailed to the Service. The comment period closes on January 31, 1991. Written comments should be submitted to the Sacramento Field Office (see ADDRESSES section).

Notices

Federal Register
Vol. 56, No. 244
Thursday, December 19, 1991

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

December 13, 1991.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) title of the information collection; (3) form number(s), if applicable; (4) how often the information is requested; (5) who will be required or asked to report; (6) an estimate of the number of responses; (7) an estimate of the total number of hours needed to provide the information; (8) name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, ORIM, room 404–W Admin. Bldg., Washington, DC 20250, (202) 720–2118.

Revision

• Food and Nutrition Service
Model Food Stamps Periodic Reporting, Notice of Late/Incomplete Reporting, Adequate Notice, Sponsored Aliens, Duplication.
Participation, and Disqualified Recipient Report; FNS–385, 386, 387, 394, 396, 437, 439, 441, 442, and 524.
Recordkeeping; on occasion; monthly; quarterly; semiannually; annually.
Individuals or households; State or local governments; 96,499,081 responses; 21,355,788 hours.
Paul Jones, (703) 305–2476.

Extension

• Food and Safety Inspection Service
Processing Procedures and Cooking Instruction for Cooked, Uncured, Comminuted Meat Patties (9 CFR parts 318 and 320).
Recordkeeping.
Businesses or other for-profit; small businesses or organizations; 680 recordkeepers; 115 hours.
Roy Purdie, (202) 720–5372.

• Food and Nutrition Service
Evaluation of Maryland's Expanded Electronic Benefit Transfer Program.
One time survey.
State or local governments; 28,694 responses; 3,317 hours.
Margaret Andrews, (703) 305–2115.

• Agricultural Marketing Service
Reporting Requirements Under the Regulations Governing Inspection and Certification of processed Fruits and Vegetables and Related Products; FV–159, FV–356, FV–468.
On occasion.
Individuals or households; State or local governments; farms; businesses or other for-profit; Federal agencies or employees; non-profit institutions; small businesses or organizations; 13,062 responses; 670 hours.
James R. Rodeheaver, (202) 720–4693.

• Office of Finance and Management
Uniform Administrative Requirements for Grants and Cooperative Agreements; 7 CFR 3016; SF–424, 269, 272, 272a, 270, 271, 269a, 424a, 424b, 424c, 424d.
Recordkeeping; on occasion; quarterly; annually.
State or local governments; 46,123 responses; 267,766 hours.
Diane Cary, (202) 720–1554.

Reinstatement

• Farmers Home Administration
Form FmHA 1940–59, Settlement Statement, Form FmHA 1940–59.
On occasion.
Businesses or other for-profit; small businesses or organizations; 33,000 responses; 16,500 hours.
Jack Holston, (202) 720–9736.

• Rural Electrification Administration
Accounting Requirements for REA Telephone Borrowers.
Recordkeeping.
Businesses or other for-profit; small businesses or organizations; 900 recordkeepers; 10,800 hours.
Paul Marsden, (202) 720–9551.

Larry K. Roberson,

Deputy Departmental Clearance Officer.

BILLING CODE 3410–01–M

President's Council on Rural America; Meeting

AGENCY: Department of Agriculture.

ACTION: Notice of meeting.

SUMMARY: The Under Secretary for Small Community and Rural Development, Department of Agriculture, is announcing a meeting of the President's Council on Rural America. The meeting is open to the public.

DATES: Meeting on Monday, January 27, 8:30 a.m. to 5 p.m., Tuesday, January 28, 8:30 a.m. to 1 p.m., and Wednesday, January 29, 9 a.m. to 5 p.m.

ADDRESSES: The meeting will be held in:
Colonial Williamsburg, *January 27 and 28;* The Lodge and Conference Center, rooms D and E.
January 29; The Tidewater Room, 310 South England Street, Williamsburg, Virginia 23187, phone: 1–800–HISTORY x7793 or 7477.

The nearest airports are Williamsburg/Newport News and Richmond International.

FOR FURTHER INFORMATION CONTACT: Jennifer Pratt, Special Assistant to the Council, Office of Small Community and Rural Development, room 5405 South Building, USDA, Washington, DC 20250, (202) 690–2394.

SUPPLEMENTARY INFORMATION: The President's Council on Rural America was established by Executive order on July 16, 1990. Members are appointed by the President and include representatives from the private sector and from State and local governments. The Council is reviewing and assessing the Federal Government's rural economic development policy and will advise the President and the Economic Policy Council on how the Federal Government can improve its rural development policy. The purpose of the meeting is to make decisions on a work plan for the Council task groups. The public may participate by providing written and verbal comments. Written comments may be submitted to Jennifer Pratt.

VOL 56 ISS 244 DEC 19 1991 UMI

Dated: December 3, 1991.

Roland R. Vautour,

Under Secretary for Small Community and Rural Development.

BILLING CODE 3415-07-M

Animal and Plant Health Inspection Service

[Docket No. 91-172]

Receipt of Permit Application for Release into the Environment of Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that an application for a permit to release genetically engineered organisms into the environment is being reviewed by the Animal and Plant Health Inspection Service. The application has been submitted in accordance with 7 CFR part 340, which regulates the introduction of certain genetically engineered organisms and products.

ADDRESSES: Copies of the application referenced in this notice, with any confidential business information deleted, are available for public inspection in room 1141, South Building, United States Department of Agriculture, 14th Street and Independence Avenue, SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. You may obtain a copy of this document by writing to the person listed under **"FOR FURTHER INFORMATION CONTACT."**

FOR FURTHER INFORMATION CONTACT: Mary Petrie, Program Specialist, Biotechnology, Biologics, and Environmental Protection, Biotechnology Permits, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-7612.

SUPPLEMENTARY INFORMATION:

The regulations in 7 CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which Are Plant Pests or Which There Is Reason To Believe Are Plant Pests," require a person to obtain a permit before introducing (importing, moving interstate, or releasing into the environment) into the United States certain genetically engineered organisms and products that are considered "regulated articles." The regulations set forth procedures for obtaining a permit for the release into the environment of a regulated article, and for obtaining a limited permit for the importation or interstate movement of a regulated article.

Pursuant to these regulations, the Animal and Plant Health Inspection Service has received and is reviewing the following application for a permit to release genetically engineered organisms into the environment:

Application Number	Applicant	Date Received	Organisms	Field Test Location
91-317-01, renewal of permit 90-332-02, issued on 03-12-91.	DeKalb Plant Genetics	11-13-91	Corn plants genetically engineered to express a phosphinothricin acetyl transferase gene, which confers tolerance to glufosinate and bialaphos herbicides.	Kihei, Hawaii

Done in Washington, DC, this 13th day of December 1991.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-M

Federal Grain Inspection Service

Advisory Committee Meeting

Pursuant to the provisions of section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. No. 92-463), notice is hereby given of the following committee meeting:

Name: Federal Grain Inspection Service Advisory Committee.

Date: January 14-15, 1992.

Place: Capitol Holiday Inn, 550 "C" Street, SW., Washington, DC 20024.

Time: 1:30 p.m. January 14 and 8 a.m. January 15.

Purpose: To provide advice to the Administrator of the Federal Grain Inspection Service with respect to the implementation of the U.S. Grain Standards Act.

The agenda includes: (1) Status of financial matters, (2) Official Commercial Inspection, (3) grain quality activities, (4) status of standards and regulations, (5) international monitoring report, (6) status of research programs, (7) type evaluation program, and (8) other matters.

The meeting will be open to the public. Public participation will be limited to written statements unless permission is received from the Committee Chairman and orally address the Committee. Persons, other than members, who wish to address the Committee or submit written statements before or after the meeting, should contact John C. Foltz, Administrator, FGIS, U.S. Department of Agriculture, P.O. Box 96454, Washington, DC 20090-6454, telephone (202) 720-0219.

Dated: December 12, 1991.

John C. Foltz,

Administrator.

BILLING CODE 3410-EN-M

Food and Nutrition Service

Emergency Food Assistance Program and Soup Kitchens; Availability of Commodities for Fiscal Year 1992

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice.

SUMMARY: This notice announces: (1) The surplus and purchased commodities that will be available for donation to household under The Emergency Food Assistance Program (TEFAP); and (2) the commodities that will be available to soup kitchens and food banks. The commodities made available under this notice shall be directed to needy persons, including unemployed and homeless persons.

EFFECTIVE DATE: October 1, 1991.

FOR FURTHER INFORMATION CONTACT: Philip K. Cohen, Chief, Program Administration Branch, Food Distribution Division, Food and Nutrition Service, U.S. Department of Agriculture, 3101 Park Center Drive, Alexandria, Virginia 22302-1494 or telephone (703) 305-2660.

SUPPLEMENTARY INFORMATION:

Background and Need for Action

Surplus Commodities

Donations of commodities to needy households were initiated in 1981 as part of efforts to reduce stockpiles of government-owned commodities. These donations responded to concern over the costs to taxpayers of storing vast quantities of foods, while at the same time there were persons in need of food assistance. The Emergency Food Assistance Program was codified in title II of Public Law 98-8, the Emergency Food Assistance Act (EFAA) of 1983, as amended (7 U.S.C. 612c note). Surplus foods made available for distribution under the EFAA are limited to amounts determined by the Secretary to be in excess of the quantities needed to carry out other programs, including Commodity Credit Corporation (CCC) sales obligations and domestic food assistance programs. The Secretary of Agriculture anticipates that the following surplus commodities acquired by the CCC under its price-support activities will be made available in the noted amounts for distribution through TEFAP during Fiscal Year 1992: butter, 72 million pounds; flour, 120 million pounds; and cornmeal, 48 million pounds. The actual types and quantities of commodities made available by the Department may differ from the above estimates because of agricultural production, market conditions and the distribution of these donated foods to other domestic outlets.

Purchased Commodities

In recent years, the supply of available surplus commodities has been drastically reduced. These reductions are the result of changes in the agricultural price-support programs which have brought supply and demand into better balance, and accelerated donations and sales. Congress responded to the reduced availability of surplus commodities with section 104 of the Hunger Prevention Act of 1988, Public Law 100-435, which added sections 213 and 214 to the EFAA. Those sections required the Secretary to annually purchase, process, and distribute commodities for household consumption in addition to those surplus commodities otherwise provided under TEFAP. In section 110 of the Hunger Prevention Act, Congress also required the Secretary to purchase, process and distribute commodities for soup kitchens and food banks.

For Fiscal Year 1992, $120 million has been appropriated for purchasing, processing, and distributing additional commodities for household use. The Department anticipates purchasing for distribution to households through TEFAP during this fiscal year peanut butter, raisins, and the following canned foods: corn, tomatoes, green beans, pears, applesauce, and pork or beef. The amounts of each item purchased will depend on the prices USDA must pay.

For Fiscal Year 1992, $32 million has been appropriated to purchase, process, and distribute commodities for distribution to soup kitchens and food banks. For such outlets, the Department anticipates the purchase of nonfat dry milk, frozen cut-up chicken, frozen ground beef, and the following canned foods: peaches, applesauce, orange juice, corn, green beans, peas, poultry, and pork or beef. The amounts of each item purchased will depend on the prices USDA must pay.

December 12, 1991.

Betty Jo Nelsen,

Administrator.

[FR Doc. 91-30357 Filed 12-18-91; 8:45 am]

BILLING CODE 3410-30-M

Forest Service

Lockwood and North Round Valley Timber Sales, Rapid River Roadless Area, Payette National Forest, ID

AGENCY: Forest Service, USDA.

ACTION: Revised notice of intent to prepare an environmental impact statement.

SUMMARY: A Notice of Intent to prepare an Environmental Impact Statement (EIS) for the proposed Lockwood and North Round Valley timber sales (Rapid River roadless area, Idaho) was published in the **Federal Register** June 9, 1989 (Vol. 54, No. 110, p. 24726-24727). That notice is hereby revised to show three changes: (1) The name of the EIS, (2) the responsible official, and (3) the projected schedule.

1. The name of the EIS is now the "Lockwood and North Round Valley Timber Sales." (The previous title was, "Proposed Timber Management Entries Into the Rapid River Roadless Area." To many, that name implied development in the Rapid River drainage. In fact, both sales are entirely outside that drainage.)

2. The responsible official is now David Spann, New Meadows District Ranger, Payette National Forest. (It was formerly the Forest Supervisor of Payette National Forest. The change reflects the increased responsibility Payette National Forest has placed on District Rangers for implementing the National Environmental Policy Act (NEPA).

3. The draft EIS is now scheduled for release to the public in January 1992, and the final EIS in May 1992. (The previous schedule was March 1990 for the draft, and September 1990 for the final).

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action should be directed to David Spann, District Ranger, phone (208) 347-2141; or Pete Walker, Team Leader, phone (208) 634-0629.

Dated: December 10, 1991.

Veto J. LaSalle,

Forest Supervisor.

[FR Doc. 91-30302 Filed 12-18-91; 8:45 am]

BILLING CODE 3410-11-M

Rural Telephone Bank

Notice of Filing Date Extension

AGENCY: Rural Telephone Bank, USDA.

ACTION: Notice of Extension of final date for submitting nominations form.

SUMMARY: Notice is hereby given that Rural Telephone Bank (RTB) stockholders have been granted an extension of time to submit RTB Form 4, Nominations for Directors. This action extends the deadline for submission of RTB Form 4 until December 20, 1991.

ADDRESSES: The nominations form should be mailed to Assistant Secretary, Rural Telephone Bank, U.S. Department of Agriculture, room 4025-S, Washington, DC 20250-1700.

FOR FURTHER INFORMATION CONTACT: Robert Peters, Deputy Assistant Governor, Rural Telephone Bank, (202) 720-9554.

SUPPLEMENTARY INFORMATION:

In letter dated November 8, 1991, stockholders were formally advised of the February, 1992, RTB Board of Directors elections and that nominations were being accepted for the Board. Enclosed with the letter was RTB Form 4 which was to be completed by the stockholder and returned to the RTB no later than December 13, 1991. Stockholders were subsequently advised by letter dated December 2, 1991, that the deadline for submitting RTB Form 4 had been extended until December 20, 1991. Further, to provide the stockholders with additional time to return RTB Form 4, the date for the election of Directors has also been changed from February 12, 1991, to February 18, 1992. (7 U.S.C. *et seq.*)

Dated: December 16, 1991.

Michael M.F. Liu,

Acting Governor.

Soil Conservation Service

Central Hampshire Park Critical Area Treatment RC&D Measure Plan, West Virginia

AGENCY: U.S. Department of Agriculture, Soil Conservation Service.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1960; the Council on Environmental Quality Guidelines, (40 CFR part 1500); and the Soil Conservation Service Guidelines, (7 CFR part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Central Hampshire Park Critical Area Treatment RC&D Measure Plan, Hampshire County, West Virginia.

FOR FURTHER INFORMATION CONTACT: Rollin N. Swank, State Conservationist, Soil Conservation Service, 75 High Street, room 301, Morgantown, West Virginia 26505, Telephone (304) 291–4151.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Rollin N. Swank, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

Notice of a Finding of No Significant Impact

The purpose of the measure is critical area treatment for erosion control. The measure is designed to stabilize by regarding, shaping, and revegetating approximately 3.5 acres of land that has an average erosion rate of 50 tons per acre per year. Conservation practices include rock lined and vegetated waterways, land smoothing, seeding, and mulching.

Central Hampshire Park Critical Area Treatment RC&D Measure Plan, Hampshire County, West Virginia

The Notice of a Finding of No Significant Impact has been forwarded to the Environmental Protection Agency and to various Federal, State and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Rollin N. Swank, State Conservationist.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

This activity is listed in the Catalog of Federal Domestic Assistance under No. 19.901—Resource Conservation and Development—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Dated: December 9, 1991.

Rollin N. Swank,

State Conservationist.

[FR Doc. 91–30306 Filed 12–18–91; 8:45 am]

BILLING CODE 3410–16–M

Finding of No Significant Impact for Frazer Park Watershed, Chester County, SC

Introduction

The Frazer Park Watershed is a federally assisted action authorized for planning under Public Law 83–566, the Watershed Protection and Flood Prevention Act. An environmental assessment was undertaken in conjunction with the development of the watershed plan. This assessment was conducted in consultation with local, State, and Federal agencies as well as with interested organizations and individuals. Data developed during the assessment are available for public review at the following location: U.S. Department of Agriculture, Soil Conservation Service, 1835 Assembly Street, room 950, Columbia, South Carolina 29201.

Recommended Action

The proposal requires the clearing and snagging of 5850 feet within the Dry Fork channel and a portion of the adjacent floodplain. The proposed plan will convey the peak flows through the residential area reducing flood damages to existing residential structures. One structure will be relocated outside the watershed. The plan will provide a recreational area which will be utilized by the residents of Frazer Park.

Effect of Recommended Action

The proposed action will reduce identified flood damages in the Frazer Park Watershed significantly by improving the hydrologic capacity of Dry Fork Creek. Streamflow will be stabilized to the extent that designed storm peak discharges will be carried by channel.

A literature review of cultural resources as they relate to the planned components was made. The review concludes that no significant adverse impacts will occur to cultural resources in the watershed when the plan is implemented. If artifacts of archaeological or historical properties which appear to be significant are discovered during construction, they will not be disturbed until onsite consultation and advice is received from the State of South Carolina Archives and History.

Dry Fork Creek is an ephemeral creek and provides no fishery habitat or other significant aquatic habitat. The watershed supports low to medium wildlife habitat areas.

Woody vegetation will be removed from the channel sides and channel bottom. This woody vegetation will be replaced with sod and herbaceous plants. Therefore the loss of brushy vegetation will be temporary. The "edge effect" created as a result of this project action will greatly benefit songbirds and other small wildlife within the habitat area.

A report has been made to the U.S. Fish and Wildlife Service in compliance with section 7 of the Endangered Species Act.

There are no wetlands identified within the project area.

Scenic values will be complemented with the diversity added to the landscape by the installation of the recreational area and the shaping and vegetation of the floodplain.

No significant adverse environmental impacts will result from installations, with the exception of minor inconveniences to local residents during construction.

Alternatives

The planned action is the most practical means of reducing flood damages, controlling sedimentation, and improving water quality. The other alternatives considered dikes, dams, and flood proofing homes in the floodplain.

Consultation—Public Participation

Formal agency consultation began with the initiation of the notification of the State Single Point of Contact for Federal Assistance in December 6, 1989. Agencies were again notified when planning was authorized in January 11, 1991.

Scoping meeting involving an interdisciplinary team was held on May 28, 1987.

The watershed plan and environmental assessment was transmitted to all participating and interested agencies, groups, and individuals for review and comment in December 1991. Public meetings were held during the planning process to keep interested parties informed of the study progress and to obtain public input to the plan and environmental assessment.

Agency consultation and public participation to date has shown no unresolved conflicts with the implementation of the recommended plan. The participation and support by land users in the planning process indicate their commitment in solving the erosion problems.

Conclusion

The environmental assessment summarized above indicates that this federal action will not cause significant local, regional, or national adverse impacts on the environment. Therefore, based on the above findings, I have determined that an environmental impact statement for the Frazer Park Watershed is not required.

Dated: December 6, 1991.

Billy Abercrombie,

State Conservationist.

[FR Doc. 91–30303 Filed 12–18–91; 8:45 am]

BILLING CODE 3410–16–M

Frazer Park, SC

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR parts 1500–1508); and the Soil Conservation Service Guidelines (7 CFR part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement (EIS) is not being prepared for flood prevention in Frazer Park, Chester County, South Carolina.

FOR FURTHER INFORMATION CONTACT: Mr. Billy Abercrombie, State Conservationist, Soil Conservation Service, 1835 Assembly Street, room 950, Columbia, South Carolina, 29201, telephone (803) 765–5681.

SUPPLEMENTARY INFORMATION: The environmental evaluation of this federally-assisted action indicates that the proposed measure will not cause significant adverse local, regional or national impacts on the environment. As a result of these finding, Mr. Billy Abercrombie, State Conservationist, has determined that the preparation and review of an EIS is not needed.

The proposed action is to reduce flooding and improve flow conditions on 1.1 miles of ephemeral streams in and adjacent to the Frazer Park area.

The Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental evaluation and the environmental assessment are on file and may be reviewed by interested parties at the Soil Conservation Service, 1835 Assembly Street, room 950, Columbia, South Carolina 29201, 803–765–5681.

The FONSI has been sent to interested federal, state, and local agencies and other interested parties. A limited number of copies of the FONSI are available to fill single copy requests.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and Local officials.

Dated: December 6, 1991.

Billy Abercrombie,

State Conservationist.

BILLING CODE 3410–16–M

Larenim Park Critical Area Treatment and Handicap Facility Development RC&D Measure Plan, West Virginia

AGENCY: U.S. Department of Agriculture, Soil Conservation Service.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines, (40 CFR part 1500); and the Soil Conservation Service Guidelines, (7 CFR part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Larenim Park Critical Area Treatment and Handicap Facilities Development RC&D Measure Plan, Mineral County, West Virginia.

FOR FURTHER INFORMATION CONTACT: Rollin N. Swank, State Conservationist, Soil Conservation Service, 75 High Street, room 301, Morgantown, West Virginia 26505, Telephone (304) 291–4151.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Rollin N. Swank, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

Notice of a Finding of No Significant Impact

The purpose of the measure is critical area treatment and handicap facilities development for erosion control. The measure is designed to stabilize by regrading, shaping, and revegetating approximately 2 acres of land that has an average erosion rate of 50 tons per acre per year. Conservation practices include surface water control, land grading and shaping, heavy use area protection, seeding, and mulching.

Larenim Park Critical Area Treatment and Handicap Facilities Development RC&D Measure Plan, Mineral County, West Virginia

The Notice of a Finding of No Significant Impact has been forwarded to the Environmental Protection Agency and to various Federal, State and local agencies and interested parties. convene at 2 p.m., and adjourn at 4 p.m. on Friday, January 10, 1992, at the Raddison Plaza, 369 West Vine Street, Lexington, Kentucky 40507. The meeting will include: (1) A planning and informational session for the SAC; (2) a discussion of the status of the Commission; (3) a report on civil rights progress and/or problems in the State; (4) review of plans for a project in Fiscal Year 1992.

Persons desiring additional information, or planning a presentation to the Committee should contact Kentucky Chairperson Thelma Clemons 502/893-1055 or Bobby D. Doctor, Regional Director, Southern Regional Office of the U.S. Commission on Civil Rights at (404/730-2476, TDD 404/730-2481). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Southern Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, December 13, 1991.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: National Oceanic and Atmospheric Administration.

Title: Certificate of Eligibility for Atlantic Billfishes.

Form Number: None; OMB—0648-0216.

Type of Request: Request for extension of the expiration date of a currently approved collection without any change in the substance or method of collection.

Burden: 260 recordkeepers; 117 recordkeeping hours; average hours per recordkeeper—.45 hours a year.

Needs and Uses: Fish dealers and processors possessing billfish must certify that these billfish have not been caught in a specified management area. The information is used to enforce a prohibition on the commercial sale of billfish from this area.

Affected Public: Businesses or other for profit, small businesses or organizations.

Frequency: Recordkeeping.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Ronald Minsk, 395-7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-3271, Department of Commerce, room 5312, 14th and Constitution Avenue NW., Washington, DC 20230. Written comments and recommendations for the proposed information collection should be sent to Ronald Minsk, OMB Desk Officer, room 3208, New Executive Office Building, Washington, DC 20503.

Dated: December 13, 1991.

Edward Michals,

Departmental Clearance Officer, Office of Management and Organization.

BILLING CODE 3510-CW-M

Foreign-Trade Zones Board

[Order No. 545]

Approval for Expansion of Foreign-Trade Zone 122 Nueces County, Texas

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), and the Foreign-Trade Zones Board Regulations (15 CFR part 400), the Foreign-Trade Zones Board (the Board) adopts the following Resolution and Order:

Whereas, The Port of Corpus Christi Authority, Grantee of Foreign-Trade Zone No. 122, has applied to the Board for authority to expand its general-purpose zone at its port terminal complex in Nueces County, Texas, within the Corpus Christi Customs port of entry;

Whereas, The application was accepted for filing on November 14, 1990, and notice inviting public comment was given in the **Federal Register** on November 27, 1990 (Docket No. 45-90, 55 FR 49317);

Whereas, An examiners committee has investigated the application in accordance with the Board's regulations and recommends approval;

Whereas, The expansion is necessary to improve and expand zone services in the Nueces County area; and,

Whereas, The Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, Therefore, The Board hereby orders:

That the Grantee is authorized to expand its zone in accordance with the application filed on November 14, 1990. The grant does not include authority for manufacturing operations, and the Grantee shall notify the Board for approval prior to the commencement of any manufacturing or assembly operations. The authority given in this Order is subject to settlement locally by the District Director of Customs and the Army District Engineer regarding compliance with their respective requirements relating to foreign-trade zones.

Signed at Washington, DC, this 6th day of December, 1991.

Alan M. Dunn,

Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates, Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

International Trade Administration

[A-428-602]

Brass Sheet and Strip From Germany; Negative Final Determination of Circumvention of Antidumping Duty Order

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of negative final determination of circumvention of antidumping duty order.

SUMMARY: On August 10, 1990, the Department of Commerce published a negative preliminary determination of circumvention of the antidumping duty order on brass sheet and strip from Germany. The circumvention inquiry covered one manufacturer of this product, Wieland-Werke AG, and the period January 1986 through January 1989.

We gave interested parties an opportunity to comment on the preliminary negative determination. After our analysis of the comment and rebuttal briefs, we have determined that Wieland is not circumventing the order on brass sheet and strip from Germany.

EFFECTIVE DATE: December 19, 1991.

FOR FURTHER INFORMATION CONTACT: David Mason, or Maureen Flannery, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2923.

SUPPLEMENTARY INFORMATION:

Background

On August 10, 1990, the Department of Commerce (Department) published in the **Federal Register** (55 FR 32655) a preliminary negative determination of circumvention of the antidumping duty order on brass sheet and strip from Germany. The Department has now completed this inquiry in accordance with section 781(c) of the Tariff Act of 1930, as amended (the Tariff Act).

Scope of the Antidumping Duty Order

Imports covered by the antidumping duty order are shipments of brass sheet and strip, other than leaded brass and tin brass sheet and strip, from Germany. The chemical composition of the products covered is currently defined in the Copper Development Association (C.D.A.) 200-series of the Unified Numbering System (U.N.S.) C200000 series. Products whose chemical composition is defined by other C.D.A. or U.N.S. series are not covered by this order. During the relevant period of this inquiry, such merchandise was classifiable under item numbers 612.3960, 621.3982, and 612.3986 of the Tariff Schedules of the United States Annotated (TSUSA). This merchandise is currently classifiable under Harmonized Tariff Schedules (HTS) item numbers 7409.21.00 and 7409.29.00. TSUSA and HTS item numbers are provided for convenience and for Customs purposes. The written description remains dispositive.

Analysis of Comments Received

We invited interested parties to comment on the preliminary negative determination. We received comments from Wieland-Werke AG (Wieland) and petitioners (the International Association of Machinists and Aerospace Workers, the International Brotherhood of Electrical Workers, the International Union of Electronic, Electrical, Salaried Machine and Furniture Workers, Industrial Union Department, AFL-CIO, and the United Steelworkers of America). We also received rebuttals from both parties listed above. We did not hold a public hearing on this matter since neither party requested one.

Comment 1: Petitioners contend that critical evidence that should have been supplied by the respondent is missing, and in its absence the Department should make an affirmative circumvention determination. Specifically, petitioners point to Wieland's failure to respond to the Department's questions concerning the actual uses to which manganese brass was put by Wieland's customers in the United States, and the expectations of those customers concerning 667-series brass, known as manganese brass.

Petitioners argue that Congress logically expects the Department to ascertain the "actual" characteristics of the merchandise, the "actual" expectations of the ultimate users, the "actual" uses of the merchandise, the "actual" channels of marketing, and the "actual" cost of modification. Anything other than information on actual experience, petitioners claim, would be at odds with Congress' direction that the Department apply "practical measurements" regarding minor alterations. (S. Rep. No. 71, 100th Cong. 1st Sess. 100 (1987).)

Moreover, petitioners contend that Wieland's assertion that it lacks knowledge of its customers' use of the merchandise is not convincing. Petitioners first assert that Wieland probably knew the actual uses to which the product was put and expectations of its customers based upon the orders and specifications for the manganese brass, and by the type of businesses in which its customers were engaged. Secondly, petitioners insist Wieland could have made inquiries concerning its customers' expectations and uses of the brass if Wieland were truly unaware of the actual uses and expectations. Finally, petitioners claim that if Wieland's customers actually used and expected 667-series brass to serve in its normal capacity as an alloy for spot, seam, and butt-resistant welding, rather than as a substitute for 200-series brass, Wieland would have furnished such favorable information to the Department. Consequently, petitioners assert that by withholding data on the actual uses of manganese brass and the expectations of its customers, Wieland has unreasonably deprived the Department of the most vital information in the inquiry. Additionally, petitioners state that the C.D.A.'s skepticism on the interchangeability of 667 or manganese brass with 200-series brass or cartridge brass is of no consequence if, in actuality, Wieland's U.S. customers have used 667-series brass as a substitute for 200-series brass.

To the extent substitution of manganese brass for 200-series brass has taken place, petitioners insist circumvention has occurred, and thus that the Department should make an affirmative determination. Overall, petitioners conclude that, in the absence of essential information on the actual experiences requested, the Department should follow its practice in other proceedings with recalcitrant respondents, and draw the adverse inference that Wieland has been circumventing the antidumping duty order on German brass sheet and strip.

In response, Wieland claims it steadfastly maintained a policy of full cooperation throughout the inquiry and freely provided highly sensitive cost, customer, and marketing data to the Department. Secondly, Wieland maintains that it provided detailed responses to all of the Department's requests, and that it supplemented those responses where appropriate. Third, Wieland states that at no time did the Department indicate that its responses, as supplemented, were in any way deficient or that Wieland was not cooperating in the inquiry. Lastly, Wieland maintains that the information petitioners claim was omitted is not required and, in any event, could not overcome the plain fact that 667-series manganese brass is a wholly separate product from 200-series cartridge brass.

In addition, Wieland asserts there is no support in the statute or legislative history for petitioners' claim that the Department must rely on actual uses of the entries of 667-series brass made. Wieland insists that the objective characteristics and possible uses of a product are strongly indicative of whether that product, as a practical matter, can be substituted for the one covered by an antidumping duty order and thereby determinative of whether circumvention is occurring.

Department's Position: We disagree with petitioners. First, brass of the 667-series existed prior to, and at the time of, the initiation of the investigation on brass sheet and strip. At that time, petitioners specifically sought to include only 200-series brass in the scope of the Department's less than fair value investigation and the International Trade Commission's (ITC) injury determination. In the current inquiry, however, petitioners contend that Wieland is circumventing the order on 200-series brass by its importation of 667-series brass.

The Department has examined the possibility of substitution of 200-series brass with 667-series brass. The Department specifically sought and received information on record from C.D.A. brass metals experts concerning the likelihood and practical effect of such substitution. Based upon this information, the Department has determined that substitution is highly unlikely since under 200-series type applications, 667-series brass is subject to cracking and cannot maintain the

VOL
56
ISS
244
DEC
19
1991
UMI

level of ductility of 200-series brass. Specifically, 200-series brass or cartridge brass is used almost exclusively for bullet shells or ammunition. In this application, the chemical structure of the metal must enable the materials to be drawn, stretched, and formed in order to make a shell which will not crack under firing conditions. Cartridge brass meets this requirement because it has the highest ductility of all the different types of brass. By contrast, 667-series brass does not meet such requirements and would be damaged if used in this application. This distinction has substantial practical implications for substitution. Accordingly, the Department has concluded that an objective standard provides some indication of whether circumvention is occurring in this case and fulfills Congress' dictate that we consider practical measurements.

The record in this case clearly indicates that: (1) 667-series brass existed prior to, and at the time of, the original investigation; (2) petitioners specifically sought to include only 200-series brass in their petition; and (3) there is evidence suggesting that substitution is unlikely because of significant differences in the two products, and there is no evidence indicating that substitution occurred. For these reasons, we cannot find a minor alteration in this case.

Comment 2: Petitioners are concerned that the Department has confused this circumvention inquiry with a scope clarification. Petitioners specifically question the Department's need to focus on a scope clarification analysis in the context of a preliminary determination on circumvention when petitioners, throughout the inquiry, have conceded that 667-series manganese brass was not within the scope of the original investigation.

Department's Position: As petitioners requested, the Department is conducting a circumvention inquiry, not a scope clarification. Indeed, had the petitioners' application not involved allegations of circumvention through minor alterations, it would have been unnecessary to pursue this matter further since the descriptions of the merchandise in the original petition, along with the Department and ITC's final determinations, make clear that 667-series brass is not within the scope of the antidumping duty order covering 200-series brass to the exclusion of other series of brass.

Thus, a matter separate from scope clarification, the Department independently evaluated each of the five criteria under the minor alterations provision as set forth in the legislative history on circumvention (see S. Rep. No. 71, 100th Cong., 1st Sess. 100 (1987)). First, the overall characteristics of the 667-series brass differ from those of the 200-series brass. The alloy, which is the essential characteristic of the products, differs between the two so as not to allow product interchangeability. Next, with regard to expectations of ultimate users and the use of the merchandise, we determined that substitution of 667- and 200-series brass is very unlikely and would result in an inferior product for the expected use for 200-series brass. Further, although the same channels of marketing are used for each product and Wieland estimates the costs of the products to be comparable, the Department does not regard this as dispositive and, in any event, these factors are subordinate in this case to overall physical characteristics, customer expectations, and use.

Furthermore, the Department also considered such factors as the circumstances under which manganese brass entered the United States, and the timing and volume of 667-series brass exported to the United States, in determining whether circumvention was occurring in this case. Even though shipments of 667-series brass began after the petition was filed, the quantities were moderate and shipped for test marketing purposes only, which shipments Wieland has since ceased.

Comment 3: Petitioners contend that the Department has drawn an extremely narrow and restrictive reading of the statutory concept of "minor alterations," as evidenced by the Department's reasoning that Wieland is not modifying its 200-series brass, but is instead manufacturing and exporting a different type of brass altogether. According to petitioners, such an interpretation is not supported by the statute. Instead, petitioners maintain that the determination should be based upon whether the class or kind of merchandise has been changed slightly, not whether a particular sale or order has been changed slightly. Petitioners claim that this interpretation is the sort of "practical measurement" that Congress intended.

Moreover, petitioners assert that German manganese brass was only brought to prominence after publication of the antidumping duty order on 200-series brass. Petitioners insist they were unaware of any domestic production or imports of 667-series brass prior to such publication. Accordingly, petitioners conclude they were reasonable in not designating the 667 alloy in their petition. Consequently, petitioners urge that in designating product coverage in their petition they should not be held to anticipate respondent's attempt to circumvent the antidumping duty order with an unusual alloy that respondent had never before sold in the United States.

In response, Wieland contends that 667-series brass is not a minor alteration of brass sheet and strip of the 200-series, but is instead a distinct and separate product. Wieland states that because 667-series brass does not involve a minor alteration of brass subject to the antidumping duty order, shipments of this product did not constitute circumvention.

Wieland maintains that the 667-series brass existed as a separate product at the time the petitioners filed their petition on 200-series brass. Wieland argues, moreover, that petitioners specifically excluded series 600 brass from the original investigation. According to Wieland, 667-series brass has long been recognized as a separate product, and its production by Wieland and sale in the United States is not a mere alteration of an existing product, but rather the production and marketing of an entirely different product. Wieland concludes that this result is clearly outside the reach of the "minor alterations" provision of the Tariff Act and does not represent the type of evasion which Congress sought to address.

In citing to the legislative history of the minor alterations provision, Wieland argues that there are clear distinctions between this case and examples cited in the legislative history. Specifically, Wieland points out that each example cited in the legislative history illustrates the case of a slight modification of an existing product which adds new and often superfluous features to the product, and that these are far different from this brass sheet and strip case which involves the production of an entirely different product, which predates the antidumping investigation, and which exhibits substantially different composition and characteristics.

Secondly, Wieland contends that the Department based its determination not only on each of the factors contained in the legislative history, but on other factors bearing on the circumstances surrounding the investigated entries, and the volume and timing of those entries. Wieland claims that the Department's use and interpretation of these additional criteria is fully consistent with Congress' intent and the Department's practice.

Department's Position: We disagree with petitioners. To accept petitioners' view that circumvention is present in this instance would be tantamount to converting the minor alterations provision of the statute into one covering all alterations, both significant and minor. Such an interpretation would yield arbitrary results since it would reach products which are the result of normal business practices and not the result of circumvention activities.

By contrast, the legislative history states examples to illustrate conduct that constitutes circumvention through minor alterations. Specifically, the legislative history indicates that the application of fire resistance coating to cookware prior to importation, or the addition of a calculation or memory feature to portable electric typewriters prior to importation are clear examples of minor alterations which this circumvention provision is intended to address. Those products may be substituted for each other, whereas 200 and 667 brass may not. Moreover, the legislative history, either through examples or explanation of this provision, does not indicate that distinct products, which existed prior to the issuance of an order, should be included when they differ in significant respects.

Comment 4: Petitioners contend that they have been hampered by their limited access to Wieland's complete response. Specifically, petitioners contend that Wieland's report on its test marketing of 667-series brass in the United States could offer clues concerning the actual uses and expectations of Wieland's U.S. customers and should be made available to the petitioners under an administrative protective order.

Department's Position: Throughout this circumvention inquiry, the Department made available to the petitioners all proprietary data sought by petitioners, with limited exceptions. Accordingly, petitioners received the results of respondent's marketing test under the administrative protective order as contained in respondent's July 11, and September 29, 1989 responses.

Negative Final Determination of Circumvention

After a full examination of the comments received, we determine that Wieland is not circumventing the antidumping duty order on brass sheet and strip from Germany. This circumvention determination is in accordance with section 781(c) of the Tariff Act (19 U.S.C. 1677j) and 19 CFR 353.29 (1991).

Dated: December 11, 1991.

Alan M. Dunn,

Assistant Secretary for Import Administration.

Export Trade Certificate of Review

ACTION: Notice of application for an amendment to an export trade certificate of review.

SUMMARY: The Office of Export Trading Company Affairs (OETCA), International Trade Administration, Department of Commerce, has received an application for an amendment to an Export Trade Certificate of Review. This notice summarizes the amendment and requests comments relevant to whether the Certificate should be amended.

FOR FURTHER INFORMATION CONTACT: George Muller, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001-21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A Certificate of Review protects the holder and the members identified in the Certificate from state and federal government antitrust actions and from private, treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the **Federal Register** identifying the applicant and summarizing its proposed export conduct.

Request for Public Comments

Interested parties may submit written comments relevant to the determination of whether the Certificate should be amended. An original and five (5) copies should be submitted no later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, room 1800H, Washington, DC 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 89-A0010."

OETCA has received the following application for an amendment to Export Trade Certificate of Review No. 89-00010, which was issued on May 10, 1991 (56 FR 23284, May 21, 1991).

Summary of the Application

Applicant: Air-Conditioning & Refrigeration Institute, ("ARI"), 1501 Wilson Boulevard, suite 600, Arlington, Virginia 22209. Contact: Renee S. Hancher, Manager of International Trade, Telephone: (703) 524-8800.

Application No.: 89-A0010.

Date Deemed Submitted: December 10, 1991.

Request For Amended Conduct: ARI seeks to amend its Certificate to:

1. Add the following companies as "Members" within the meaning of § 325.2(1) of the Regulations (15 CFR 325.2(1)): Alco Controls Division, Emerson Electric Company; Bristol Compressors, Inc.; Climate Master, Inc., A Subsidiary of LSB Industries; Eaton Corporation, Automotive & Appliance Controls Operation; Edwards Engineering Corporation; E.I. du Pont de Nemours & Company, Fluorochemicals Division; EVAPCO, Inc.; FHP Manufacturing Company, Division of Harrow Products, Inc.; Heat Exchangers, Inc.; Manitowoc Equipment Works, Division of Manitowoc Co., Inc.; Mile High Equipment Company; Mortex Products, Inc.; Parker Refrigeration Components Group, Parker-Hannifin Corporation; Paul Mueller Company; Scotsman Ice Systems; Servend International, Inc.; Superior Coils, Inc.; and Tecumseh Products Company;

2. Delete each of the following companies as a "Member" of the Certificate: Artesian Building Systems, Inc.; A.D. Auriema Inc.; Sundstrand Heat Transfer, Inc., Sundstrand Corp.; and Win-Tron Electronics Ltd.;

3. Change the listing of the company name of the following current "Members" as follows: Change Copeland Corporation to Copeland Corporation, Division of Emerson Electric Company; Kysor-Warren to Kysor/Warren; Lau Industries to Lau; Marvair Company to Crispaire; Sterling Radiator Division, Reed National Corp. to Sterling Radiator, A Division of Mestek, Inc.; Titus Products, Division of Phillips Industries, Inc. to TITUS; Turbotec Products, Inc. to Turbotec Products Inc.; Phillips Industries, Inc. to Tomkins Industries, Inc.; and Halsey Taylor, Scotsman Industries to Halsey Taylor Division, Elkay Manufacturing Company; and

4. Add (a) Refrigerant Recovery/Recycling Equipment; (b) Thermal Storage Equipment; and (c) Ground Source Closed-Loop Heat Pumps (ARI

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Policy Board Advisory Committee; Meeting

ACTION: Notice of Advisory Committee Meeting.

SUMMARY: The Defense Policy Board Advisory Committee will meet in closed session on 7–8 January 1992 from 0900 until 1700 in the Pentagon, Washington, DC.

The mission of the Defense Policy Board is to provide the Secretary of Defense, Deputy Secretary of Defense and the Under Secretary of Defense for Policy with independent, informed advice and opinion concerning major matters of defense policy. At this meeting the Board will hold classified discussions on national security matters.

In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law No. 92-463, as amended [5 U.S.C. app. II, (1982)], it has been determined that this Defense Policy Board meeting concerns matters listed in 5 U.S.C. 552b (c)(1)(1982), and that accordingly this meeting will be closed to the public.

Dated: December 16, 1991.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Department of the Army

Notice of Intent To Prepare a Supplement to the Final Environmental Impact Statement (FEIS) on Navigation Improvement of Ft. Pierce Harbor, FL

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: The proposed work consists of increasing the Ft. Pierce Harbor Entrance Channel from the existing 27-foot depth (mlw) by 350-foot width to 30 feet deep by 400 feet wide, increasing the inner channel from the existing 25-foot depth by 200-foot width to 28 feet deep by 250 wide, increasing the depth of the turning basin and berthing areas from the existing 25-foot depth to 28 feet, increasing the size of the turning basin to approximately 22 acres, and constructing a new 250-foot wide by 1250-foot long spur channel north from the turning basin.

EFFECTIVE DATE: December 19, 1991.

FOR FURTHER INFORMATION CONTACT: Dr. Jonathan D. Moulding, U.S. Army Corps of Engineers, P.O. Box 4970, Jacksonville, Florida 32232-0019, (904) 791-2286.

SUPPLEMENTARY INFORMATION:

1. The following alternatives will be considered:

a. Ocean disposal of dredged material.

b. Upland disposal of dredged material.

c. Alternative project dimensions.

2a. Comments on alternatives and environmental concerns are invited from any affected Federal, State, and local agencies, affected Indian tribes, and other private organizations and parties.

2b. Significant issues to be analyzed in depth in the EIS that have been identified to date are the rate of recovery of the rocky ledge habitat community in the channel, selection of a disposal site for the dredged material, and water quality effects during construction dredging.

2c. Coordination with appropriate Federal and State agencies is required under provisions of the Endangered Species Act and National Historic Preservation Act.

3. Scoping will be conducted by letter and through a Scoping meeting held in the Ft. Pierce area in January 1992.

4. The Draft Supplement EIS is expected to be available for review in the 3rd Quarter CY 1992.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

[FR Doc. 91-30329 Filed 12-18-91; 8:45 am]

BILLING CODE 3710-08-M

[AR 55-355]

Military Traffic Management Command, Department of the Army; Defense Traffic Management Regulation (AR 55-355, NAVSUPINST 4600.70, AFR 75-2, MCO P4600.24B, DLAR 4500.3)

AGENCY: Military Traffic Management Command, Department of the Army.

ACTION: Comments on proposal to allow DOD approved classes A&B carriers to trip lease.

SUMMARY: The following are proposed changes to Chapter 33 of the DMTR which prohibits the tripleasing of classes A & B explosives.

DATES: Comment period will end on January 21, 1992.

FOR FURTHER INFORMATION CONTACT: Ms. Patricia McCormick, Headquarters, Military Traffic Management Command, ATTN: MTIN, 5611 Columbia Pike, Falls Church, VA 22041-5050, (703) 756-1596.

SUPPLEMENTARY INFORMATION: MTMC is authorized by DOD Directive 5160.53 to develop and maintain procedures for the movement of DOD shipments within the continental United States. MTMC is also required to ensure that DOD shipments are tendered to carriers able to meet DOD requirements at the lowest overall cost. Therefore, the following criteria have been established to ensure responsive service by the carrier industry as well as allow the carriers to maximize the use of equipment. Changes will be incorporated into chapter 33 of the Defense Traffic Management Regulation (DTMR) AR 55-355, NAVSUPINST 4600.70, AFR 75-2, MCO P4600.14B, DLAR 4500.3.

Facts

a. AR 55-355, chapter 33, 33-17, prohibits the use of trip leased commercial vehicles for the transport of Classes A or B ammunition, explosives or poison, or radioactive Yellow III label materials. This requirement was extended to any shipment requiring a Transportation Protective Service (TPS).

b. As a result of two serious incidents it became apparent that DOD needed to make closer checks on carriers and their drivers to ensure that the equipment was in good order and that the drivers were properly trained as to the hazards associated with the commodities. Also, strict control needed to be maintained to ensure minimal impact on the public should an accident occur.

This action will allow: a. Maximization of acceptable equipment in the transport of explosives by relaxing the tripleasing requirement for classes A & B explosives.

b. The integrity of the equipment and the qualifications of the drivers will be maintained by restricting tripleasing with only other DOD approved classes A & B carriers.

c. Minimization of potential shortages in regional areas of approved explosives carriers with adequate equipment and qualified drivers.

d. May increase potential for smaller, regional type carriers to compete in the market. The following criteria will apply: a. Carriers approved by MTMC to handle DOD classes A & B explosives will be authorized to trip lease with other approved carriers of classes A & B explosives.

b. Carriers must agree not to use any approved carrier which has been prohibited, for whatever reason, from participation in this type traffic or DOD traffic in general.

c. Failure on the part of the trip leased carrier, to provide the required safety and/or security for the shipment could result in adverse action against both the prime carrier and the trip leased carrier.

d. Any violations will be handled in accordance with established classes A & B agreement and the Military Traffic Management Command Regulation 15-1, which could result in the carrier not only losing its approval to handle DOD classes A & B but also nationwide action on its participation on all DOD traffic up to 3 years.

Upon adoption of the above, the classes A & B agreement will be revised to incorporate changes, thereby requiring all approved classes A & B carriers to initiate a new agreement.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Office of Information Resources Management, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: Interested persons are invited to submit comments on or before January 21, 1992.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Mary P. Liggett, Department of Education, 400 Maryland Avenue, SW., room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Mary P. Liggett (202) 708–5174.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, substantially interfere with any agency's ability to perform its statutory obligations.

The Acting Director, Office of Information Resources Management, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Frequency of collection; (4) The affected public; (5) Reporting burden; and/or (6) Recordkeeping burden; and (7) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Mary P. Liggett at the address specified above.

Dated: December 16, 1991.

Mary P. Liggett,

Acting Director, Office of Information Resources Management.

Office of Postsecondary Education

Type of Review: Revision.
Title: Summary Data Sheet/Listing Form.
Frequency: Annually.
Affected Public: Individuals, households, State or Local Government, Federal Agencies or employees, and Non-Profit Institutions.
Reporting Burden: Responses—57; *Burden Hours*—855.
Recordkeeping Burden: Recordkeepers—57; *Burden Hours*—4.56.
Abstract: The Department requests this data from State Education Agencies. The information will be used to prepare a State listing of schools in which teaching services will qualify the teachers for Defense/Direct and Perkins Loan Programs. ED will use the information to publish a directory of designated low-income elementary/secondary schools.

Office of Policy and Planning

Type of Review: New.
Title: Drug-Free Schools and Communities Act: Outcomes of DFSCA State and Local Programs.
Frequency: Annually.
Affected Public: Individuals, Households, State or Local Governments.
Reporting Burden: Responses—9,570; *Burden Hours*—4,816.
Recordkeeping Burden: Recordkeepers—0; *Burden Hours*—0.
Abstract: This study will collect data in order to examine the effectiveness of comprehensive School-Based Drug Prevention Programs. The Department will use this information to identify successful drug prevention strategies and in planning future directions for the Drug-Free Schools and Communities Act.

BILLING CODE 4000–01–M

Notice Inviting Applications for New Awards for Fiscal Year 1992 Under the Drug-Free Schools and Communities Programs

AGENCY: Department of Education.

ACTION: Correction notice.

SUMMARY: On September 18, 1991, a combined application notice establishing closing dates for many of the Department's direct grant and fellowship programs was published in the **Federal Register** (56 FR 47270).

On page 47281, change the application deadline date from January 21, 1992 to February 4, 1992, and the applications available date from December 6, 1991 to December 30, 1991, for (1) the Drug-Free Schools and Communities Program—Demonstration Grants to Institutions of Higher Education (CFDA 84.184A); and (2) the Drug-Free Schools Communities Program—Counselor Training Grants Program (CFDA 84.241A).

FOR APPLICATIONS OR INFORMATION CONTACT: The Division of Drug-Free Schools and Communities, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, SW., room 2133, Washington, DC 20202-6439. Telephone: (202) 401–1258. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 3202, 3203, 3211.

Dated: December 13, 1991.

John T. MacDonald,

Assistant Secretary for Elementary and Secondary Education.

BILLING CODE 4000–01–M

ENDANGERED SPECIES COMMITTEE

Order and Rulings by Administrative Law Judge From Prehearing Conference Held on December 3–4, 1991, Setting of Discovery and Hearing Schedule, Date of Second Prehearing Conference, Other Hearing-Related Matters

AGENCY: Endangered Species Committee.

ACTION: Notice of Order and Rulings by Administrative Law Judge, Setting of Discovery and Hearing Schedule, Notice of Date and Location for Second Prehearing Conference, and Other Hearing-Related Matters.

SUMMARY: On September 11, 1991 the Bureau of Land Management, Department of the Interior, filed an application with the Secretary of the Interior seeking an exemption from section 7 of the Endangered Species Act that would permit the Bureau to hold timber sales on 44 tracts remaining in the Bureau's 1991 timber sales program in Oregon. See 56 FR 48546, September 25, 1991, the **Federal Register** notice announcing receipt of the application. In accordance with 16 U.S.C. 1536(g) and 50 CFR 452.03, on October 1, 1991 the Secretary of the Interior made certain threshold determinations concerning the application and concluded that the application qualifies for consideration by the Endangered Species Committee. See 56 FR 54562, October 22, 1991, the **Federal Register** notice announcing the Secretary's determinations.

Under 16 U.S.C. 1536(g)(5) the Secretary, who serves as Chairman of the Endangered Species Committee, has 140 days from the date he determines that the application qualifies for consideration to conduct a fact-finding hearing to develop the record from which he will prepare a report to the Committee under 16 U.S.C. 1536(g)(4)–(8) and 50 CFR part 452 and to complete the report and provide it to the Committee. Section 1536(g)(5) permits this 140-day period to be extended upon the mutual agreement of the Secretary and the exemption applicant.

The Secretary of the Interior has designated Harvey C. Sweitzer, an administrative law judge, to conduct the fact-finding hearing. See 56 FR 57633, November 13, 1991. The administrative law judge will be assisted by the staff of the Endangered Species Committee, which will include the Division of General Law, Office of the Solicitor, Department of the Interior, and the Office of Program Analysis, Department of the Interior. The hearing will take place in Portland, Oregon beginning on January 8, 1992 at 9 a.m. at 911 Federal Building (Old Bonneville Power Administration Building), 911 Northeast 11th Street, Portland, Oregon 97208. It is anticipated that the hearing will continue until January 30, 1992. A prehearing conference will take place at the same location on January 7, 1992 at 9 a.m.

The administrative law judge conducted a prehearing conference on December 3–4, 1991, in Portland, Oregon. See 56 FR 57633, November 13, 1991. Participants in the prehearing conference were the Bureau of Land Management, the United States Fish and Wildlife Service, and the groups that timely filed petitions to intervene in accordance with 50 CFR 452.06(b). The prehearing conference dealt with the matters cited in 50 CFR 452.05(b)(1), and resulted in the issuance of a prehearing conference order on December 11, 1991, which set general discovery and hearing schedules, granted of motions to intervene, narrowed specific areas of fact and law to be addressed at the hearing, invited briefs on specific matters of law and procedure, and announced the date of a second prehearing conference to take place immediately prior to the commencement of the hearing.

On December 16, 1991, the administrative law judge issued an addendum to his prehearing order modifying several of the filing deadlines set forth in the December 11 order. Both the December 11 order (as issued by the administrative law judge) and the addendum are set forth below.

Order

A prehearing conference was held in Portland, Oregon on December 3 and 4, 1991, in the above-captioned matter pursuant to 56 FR 57633–36 (Nov. 13, 1991). The following rulings are hereby issued, reflecting and clarifying matters discussed during the conference.

(1.) *Definitions.* As used herein:

(a). "Parties" without qualification, intends parties intervenor (both full and limited) as well as the original parties (BLM and FWS) in the matter.

(b.) "Order of November 26, 1991" intends the Order of that date issued in this matter by the undersigned, a copy of which was served on all parties and potential parties.

(c.) "Filed" means received by mail or personal delivery, or by facsimile transmission, by Administrative Law Judge (ALJ), Office of Hearings and Appeals (OHA), 6432 Federal Building, Salt Lake City, Utah 84138, (801) 524–5539 (fax). If a document is filed by facsimile transmission, the ALJ shall be provided with the actual document by mail or personal delivery as soon as reasonably possible. (It is requested that each document be in duplicate.)

(d.) "Served" means received by mail, personal delivery, or facsimile transmission at the offices of each party's counsel. If by facsimile transmission, counsel shall be provided a copy of the actual document by mail or personal delivery as early as practicable. (Note that 5 copies are also to be sent to Ms. Abate pursuant to 56 FR 57634.)

(2.) *Intervenors.* (a.) Full status as parties intervenor is granted to the following organizations, their petitions to intervene having met the pertinent requirement for intervention:

(i.) The Northwest Forest Resource Council, Western Council of Industrial Workers, Northwest Forestry Association, Western Forest Industries Association, C&D Lumber Co., Swanson Brothers Lumber Co., Rogge Forest Products, Inc., and Pope & Talbot, Inc. (hereinafter collectively referred to as "NFRC");

(ii.) Portland Audubon Society, Lane County Audubon Society, Pilchuck Audubon Society, National Audubon Society, Oregon Natural Resources Council, Headwaters, Sierra Club, The Wilderness Society, Defenders of Wildlife, and National Wildlife Federation (hereinafter collectively referred to as "PAS");

(iii.) Association of O&C Counties, Coos County, Douglas County, Lake County, Polk County and Yamhill County (hereinafter collectively referred to as "O&C Counties");

(iv.) Oregon Land Coalition (OLC).

NFRC, O&C Counties, and OLC shall pool cross-examination to the end that only one counsel shall cross-examine a witness on behalf of the three entities.

(b.) Limited Intervenor status is granted to the State of Oregon (State) pursuant to the oral agreement of the State and the other parties, for the purpose of possible submission of evidence. Evidence shall not be proffered by the State until the original parties and full intervenors have completed their cases in chief, and shall be subject to cross-examination. The State shall not cross-examine witnesses, except that it may cross-examine employees of the State who are called as witnesses by other parties. Its participation in the hearing shall be governed by the same time schedule as governs the other parties.

(c.) Conditional limited intervention status is granted to the Environmental Protection Agency (EPA). Evidence shall not be proffered by EPA until the State has had opportunity to make its proffer. EPA shall not cross-examine witnesses except under extraordinary circumstances upon a showing of good cause. its participation in the hearing shall be governed by the same time schedules as govern the other parties.

(d.) By December 13, 1991, the EPA shall serve the internal memorandum regarding the separation of functions within the EPA which was filed by telefax on December 5, 1991, and shall file and serve a document setting forth;

(i.) The interest of EPA or a division thereof in this proceeding;

(ii.) The anticipated contribution to the determination of the issues in these proceeding to be made by EPA or a division thereof;

(iii.) A description of any communications between any person who has been, is, or will be involved in the representation of EPA or a division thereof in this proceeding and any member of the Endangered Species Committed (ESC) or any employee assisting such ESC member, that have taken place on or after October 1, 1991, and pertained to the substantive issues

VOL
56
ISS
244
DEC
19
1991
UMI

to be reviewed and determined as result of this proceeding.

(iv.) A discussion of whether any such communications may bias any member of the ESC, and

(v.) Any other facts or law bearing upon the propriety of permitting limited intervention by EPA or a division thereof.

(e.) Within 5 days following receipt of EPA's documentation, any party may file and serve a motion for reconsideration of the above Order allowing EPA limited intervenor status.

(f.) On December 2, 1991, the Forest Conservation Council requested withdrawal of its written petition for intervenor status. The request to withdraw is granted.

(3.) *Dispositive motions.* On December 2, 1991, FWS and PAS filed questions, regarding the propriety of reaching a decision on BLM's application. FWS requested that its questions be certified to the Endangered Species Committee for rulings prior to the beginning of the hearing. At the prehearing conference, both FWS and PAS agreed that motions relating to these questions would be filed by December 9. Motions and supporting memoranda were received from FWS and PAS. Response briefs on these issues, subject to the rulings of law set forth in this paragraph, shall be filed and received no later than noon, December 24, 1991. Reply briefs shall be filed and received no later than December 27, 1991.

(4.) *Clarification of issues to be briefed.* In view of the issues raised in the December 9 submissions by FWS and PAS, the following clarifications are set forth for purposes of briefing and ruling on these motions:

(a.) Compliance with the National Environmental Policy Act (NEPA) is relevant in light of section 7(k) of the ESA only to the extent that the applicant must be able to show that "an environmental impact statement which discusses the impacts upon endangered species or threatened species or their critical habitats shall have been previously prepared with respect to any agency action exempted by such order." 16 U.S.C. 1536(k). The parties are invited to submit briefs regarding how section 7(k) is to be interpreted and the relationship of such interpretation of law to the facts to be developed at the hearing. Such briefs shall be filed by December 31, 1991.

(b.) Under the ESA and the regulations, the Secretary of the Interior was required to make specific "threshold" determinations regarding the completeness of the exemption application. 16 U.S.C. 1536(g)(3), (4); 50 CFR 452.03. The Committee may and did convene to examine BLM's application only after a finding by the Secretary that the threshold criteria were met. The ESA and the regulations prescribe the criteria by which the Committee may grant some form of exemption for the proposed action, if any. 16 U.S.C. 1536(h); 50 CFR 453.03. These criteria do not include revisiting the threshold determinations. Accordingly, reexamination of the threshold rulings are not properly within the province of the hearing to be conducted and argument or evidence pertaining thereto may be excluded on the grounds of irrelevancy.

In light of this conclusion of law, the parties are advised that they need not brief or present evidence regarding the issue of the validity or correctness of the threshold rulings, except to the extent that the facts relating to said issue may be relevant to the criteria for determining whether an exemption should be granted, as set forth in 16 U.S.C. 1536(h)(1). As further clarification, the aforementioned conclusion of law applies to the threshold determination, challenged by FWS and PAS in their motions, that BLM and FWS carried out the consultation responsibilities in good faith and made a reasonable and responsible effort to develop and fairly consider modifications or reasonable and prudent alternatives to the proposed agency action.

(c.) The question of whether the BLM should have consulted on the overall Jamison strategy is not at issue in this proceeding. Said question may not be considered in this proceeding because the question is already at issue before the Court of Appeals, Ninth Circuit, on appeal of *Lane County Audubon Society v. Jamison*, Civ. No. 91-61230-HO (D. Or. Sept. 11, 1991).

(d.) Reexamination of the validity of the FWS's jeopardy determinations regarding BLM's 44 proposed FY 1991 timber sales is not properly within the province of the hearing to be conducted.

(5.) *Rules of evidence.* Admissibility of evidence at the hearing will be consistent with the Administrative Procedure Act. See especially 5 U.S.C. 556(d). The Federal Rules of Evidence (FRE) shall be used for guidance, and shall be liberally construed. Irrelevant, immaterial, unreliable, or unduly repetitious evidence shall not be received. Rule 403 (FRE) will be employed in that "[a]lthough relevant, evidence may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice [etc.] or by considerations of undue delay [etc.]" Hearsay shall be received if it appears reliable and is not otherwise improper. Where a copy of a document is offered without a proffer of the original, the accuracy and authenticity of the document may be assumed unless questioned. Where the ALJ deems an objection to proffered evidence should be considered with regard to weight to be accorded the evidence rather than to its admissibility, the evidence may be received with mention thereof for consideration by the ESC.

(6.) *Witness lists.* Witness Lists shall be filed and served by December 9, 1991. Each party's witness list shall set forth the names, addresses, and qualifications of all witnesses it intends to call at the hearing in this matter and a brief but accurate statement of each witness' expected testimony.

(7.) *Direct evidence.* Direct testimony in support of each party's case in chief shall be reduced to writing, sworn to under oath, and filed and served by December 27, 1991. A copy of each proposed exhibit, or an accurate description of the same, shall accompany said filing and service. (Any objections thereto may be made at the hearing.) Additional direct testimony and exhibits may be submitted after said date in writing or orally at hearing only upon a showing of good cause, to include an explanation of why the need for the same was not reasonably anticipated by December 27, 1991. Testimony recorded on videotape shall not be admitted except under extraordinary circumstances upon a motion demonstrating good cause for admission.

(8.) *Notification of cross-examination.* Each party shall file and serve by January 3, 1992, a list of witnesses which it intends to cross-examine at the hearing. Any witness who is not so listed, although his direct testimony is submitted as aforesaid, need not attend the hearing.

(9.) *Discovery.* Except as otherwise provided herein, rules 26, 33, 34, and 36 of the Federal Rules of Civil Procedure shall govern the conduct of discovery in this proceeding.

(a.) Depositions: Depositions shall not be taken except under extraordinary circumstances upon a motion demonstrating good cause.

(b.) Other Discovery: Any discovery shall ordinarily consist of written interrogatories, requests for production of documents, and requests for admissions. The parties are not required to move for permission to employ these methods of discovery.

(c.) Discovery Requests: Discovery requests shall be served on all parties but shall not be filed with the ALJ nor with the ESC staff. Initial and supplemental discovery requests shall be served by December 9, 1991, and by December 30, 1991, respectively.

(d.) Responses to Discovery Requests: Responses to initial and supplemental discovery requests shall be served by December 20, 1991, and by January 3, 1992, respectively; except that responses to a discovery request filed and served prior to December 5, 1991, shall be filed and served by December 9, 1991.

(e.) Objections to Discovery Requests: Objections to any discovery request shall be filed and served on or before the earlier of January 3, 1992, or 5 days after service of such request upon the party objecting to the request; except that objections to a discovery request filed and served prior to December 5, 1991, shall be filed and served no later than December 9, 1991.

(f.) Responses to Discovery Objections: Responses to such objections shall be filed with and received by the ALJ no later than 3 days following receipt of the objections.

(10.) *Motions; Communications with the Administrative Law Judge.*

(a.) All motions or any other communications by the parties with the ALJ prior to the hearing shall be in writing and duly served. See 50 CFR 452.05(d)(2)(iii).

(b.) Any response to a motion (except a motion relating to discovery) filed with the ALJ shall be filed and served within 5 days after receipt of the motion.

(c.) Any reply to such a response shall be filed and served within 5 days after receipt of the response.

(11.) *Stipulations of fact and law.* The parties and intervenors were unable to agree to any stipulations of fact or law at the prehearing conference. Such stipulations are strongly encouraged, and should be filed as soon as possible.

(12.) *Prehearing conference.* Another prehearing conference shall be held on January 7, 1992, commencing at 9 a.m., in Conference Room C, 911 Federal Building (Old Bonneville Power Administration Building), 911 NE. 11th Street, Portland, Oregon. The prehearing conference shall deal with any additional matters which may aid in the disposition of the proceeding.

(13.) *Time table governing discovery, required documents, and the conduct of the hearing.* For clarity and convenience, the dates for filing and serving certain documents are reiterated in the schedule set forth below, which schedule shall govern the conduct of this proceeding:

(a.) Final witness lists.	December 9, 1991.
(b.) Responses and objections to pre-12/5/91 discovery requests.	December 9, 1991.
(c.) Initial discovery requests.	December 9, 1991.
(d.) Objections to initial discovery requests.	Within 5 days of receipt of request.
(e.) Responses to objections.	Within 3 days of receipt of objection.
(f.) Responses to initial discovery.	December 20, 1991.
(g.) Pre-filed direct testimony & exhibits.	December 27, 1991.
(h.) Supplemental discovery requests.	December 30, 1991.
(i.) Responses and objections to supplemental discovery.	Earlier of January 3, 1992, or 5 days after receipt.
(j.) Lists of witnesses to be called at cross-examination at hearing.	January 3, 1992.
(k.) Pre-hearing conference.	January 7, 1992.
(l.) Hearing commences.	January 8, 1992.

Presentation of evidence and cross-examination shall take place pursuant to the following schedule:

6 days (maximum)	Case in chief of proponents (i.e., BLM, NFRC, O & C Counties, and OLC).
6 days (maximum)	Case in chief of opponents (i.e., FWS and PAS).
1 day (maximum)	Opponents' rebuttal.
1 day (maximum)	Proponents' rebuttal.
1 day (maximum)	Limited intervenors.
1 day (maximum)	Other matters.
(m.) Hearing closes	No later than January 30, 1992.
(n.) Posthearing briefs.	February 7, 1992.

(14.) *Posthearing brief.* Each party may file a posthearing brief. Any such brief shall be filed and served by February 7, 1992. No responses to such briefs shall be allowed.

(15.) *Applicability of November 26, 1991, order.* The Order of November 26, 1991, is vacated to the extent that it is inconsistent with this Prehearing Conference Order. To the extent not so inconsistent, it remains in effect.

(16.) *Reminder.* The parties are strongly encouraged to consult the November 13, 1991, **Federal Register** notice (56 FR 57633, 57634-57636) for guidance regarding the kind of empirical and analytical evidence that should be most beneficial to the ESC in its analysis of the criteria for determination of whether or not an exemption is appropriate.

Harvey C. Sweitzer,
Administrative Law Judge.

Addendum to Prehearing Order

Following review of the prehearing conference order dated December 11, 1991, FWS' motion (filed December 11, 1991) to extend the deadline for filing its response brief regarding the two jurisdictional questions raised by FWS, PAS' motion (filed December 11, 1991) to extend the deadline for filing a reply brief regarding PAS' motion to terminate the proceedings, and FWS' motion (filed December 13, 1991) to clarify said order, and NFRC's opposition (filed December 16, 1991) to the latter motion, the following rulings are entered clarifying, supplementing, and modifying the said order.

1. The docket number for this proceeding is "ESA 91-1" and all future applicable documentation should reference this docket number. An additional letter or number utilized in reference to the petitions for intervention which were filed is now unnecessary.

2. FWS' motion to extend from December 27 to December 30, 1991, the deadline for filing a response brief regarding the two jurisdictional questions raised by FWS is granted.

3. PAS' motion to extend from December 27 to December 30, 1991, the deadline for filing a reply brief regarding PAS' motion to terminate the proceedings is granted.

4. To conform said order to the content of the discussions during the prehearing conference, FWS' motion to clarify said order is granted in that the concluding phrase of paragraph 9(d) of the order is omitted; paragraph 9(d) is thus modified to read: "Responses to Discovery Requests. Responses to initial and supplemental discovery requests shall be served by December 20, 1991, and by January 3, 1992, respectively."

5. As clarification of paragraph 10(a) of said order, the parties are advised that communications with the office of the administrative law judge (ALJ) regarding nonsubstantive matters, such as an inquiry regarding whether a document was received by OHA, may be made by telephone and need not be in writing nor served on other parties or Ms. Barbara Abate of the Office of the Solicitor in Washington, DC.

6. Only one copy, rather than five, of any motion to compel discovery, objection to discovery, or response to objection to discovery, need be provided to Ms. Barbara Abate. For all other

VOL 56 ISS 244 DEC 19 1991 UMI

motions and documents filed with the ALJ, five copies thereof should continue to be sent to Ms. Abate, as provided at 56 FR 57833, 57834.

7. The following sentence is added to paragraph 7 of the order: "Exhibits should be identified by the offering party's abbreviation followed by the applicable number, e.g., 'BLM-1,' 'FWS-1,' etc.

Harvey C. Sweitzer,

Administrative Law Judge.

ADDRESSES: Motions should be filed with Administrative Law Judge Sweitzer, Hearings Division, Office of Hearings and Appeals, U.S. Department of the Interior, 6432 Federal Building, Salt Lake City, Utah 84138. Five copies of all motions and other documents required to be filed with the administrative law judge must be sent to Ms. Barbara Abate, room 6531, U.S. Department of the Interior, Washington, DC 20240. Any documents filed with the administrative law judge must also be served on all participants. The participants' addresses are: (1) Bureau of Land Management, c/o Paul Smyth, Esq., room 6311, Office of the Solicitor, U.S. Department of the Interior, Washington, DC 20240; (2) U.S. Fish and Wildlife Service, c/o Dan Shillito, Esq., room 6560, Office of the Solicitor, U.S. Department of the Interior, Washington, DC 20240; Northwest Forest Resource Council, c/o Mark C. Rutzik, Esq., Preston, Thorgrimson, Shidler, Gates & Ellis, 111 SW. Fifth Avenue, suite 3200, Portland, OR 97204-3688; Portland Audubon Society, c/o Victor M. Sher, Esq., Sierra Club Legal Defense Fund, Inc., 203 Hoge Bldg., 705 Second Avenue, Seattle, WA 981-4-1711; Association of O&C Counties, c/o Kevin Q. Davis, Esq., Stoel, Rives, Boley, Jones & Grey, Standard Insurance Bldg., 900 SW. Fifth Avenue, Suite 2300, Portland, OR 97204-1268; Oregon Lands Coalition, c/o William Perry Pendley, Esq., Mountain States Legal Foundation, 1660 Lincoln Street, suite 2300, Denver, CO 80264; State of Oregon, c/o Melinda L. Bruce, Esq., Assistant Attorney General, Department of Justice, State of Oregon, 1162 Court Street, Salem, OR 97310-0560; Environmental Protection Agency, c/o Anthony F. Guadagno, Esq., Grants Law Branch, Office of General Counsel (LE-132G), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Correspondence to the Chairman or the Committee should be addressed to the Executive Secretariat, U.S. Department of the Interior, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Copies of the exemption application may be inspected without charge and may be obtained for a fee of $221.00 at the Natural Resources Library, 1st floor, Department of the Interior, 1849 C St., NW., Washington, DC 20240. The Administrative Record can also be reviewed on a laser image storage device at the Library, from 1 p.m. until 5 p.m. Monday through Friday, Federal holidays excepted. In addition, copies of the application are being offered for sale by the Superintendent of Documents, and will also be available for examination free of charge at all U.S. Government Depository libraries. Further, the application and the Administrative Record can be reviewed in Portland, Oregon at the following location from 8-11 a.m. and 1-3 p.m. Pacific time, Monday through Friday, Federal holidays expected: Office of Environmental Affairs, Department of the Interior, 500 NE. Multnomah, St., suite 600, Portland, Oregon 97232-2036. Because of the small size of the reviewing facility, persons wishing to review the documentation should telephone the facility at (503) 231-6157 or FTS 429-6157 to establish a time for the review. Questions concerning the exemption process may be addressed to Jon H. Goldstein at (202) 208-4077 or FTS 268-4077.

Thomas L. Sansonetti,

Counsel, Endangered Species Committee.

BILLING CODE 4310-RI5-M

DEPARTMENT OF ENERGY

Secretary of Energy Advisory Board; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting:

Name: Secretary of Energy Advisory Board.

Date and Time: Wednesday, January 8, 1992, 8:30 a.m.-4:30 p.m.

Location: Crystal Ballroom, Sheraton Carlton Hotel, 923 16th Street and K Street NW., Washington, DC 20006.

Contact: Dr. Robert M. Simon, Designated Federal Officer, 1000 Independence Avenue SW., Washington, DC 20585 (202) 586-7092.

Purpose: The Board was established to serve as the Secretary of Energy's primary mechanism for long-range planning and analysis of major issues facing the Department of Energy. The Board will advise the Secretary on the research, development, energy and national defense responsibilities, activities, and operations of the Department and provide expert guidance in these areas to the Department.

Tentative Agenda

Location: Crystal Ballroom, Sheraton Carlton Hotel, 923 16th Street and K Street, NW., Washington, DC 20006.

Wednesday, January 8, 1992, 8:30 a.m.-4:30 p.m.

8:30 a.m.—Call to order and introductions
Welcoming remarks.
8:45 a.m.—Interim reports by task forces and working group.
10:30 a.m.—Break.
10:45 a.m.—Interim report by task forces and working group.
Noon-1:00 p.m.—Lunch.
1:00 p.m.—Interim reports by task forces and working group.
2:45 p.m.—Break.
3:00 p.m.—Discussion of future SEAB activities.
4:15 p.m.—Public Comment.
4:30 p.m.—Adjourn.

Public Participation: The Chairman of the Task Force is empowered to conduct the meeting in a fashion that will, in the Chairman's judgment, facilitate the orderly conduct of business.

Any member of the public who wishes to make an oral statement pertaining to agenda items should contact the Designated Federal Officer at the address or telephone number listed above. Requests must be received before 3 p.m. (e.d.t.) Friday, January 3, 1992, and reasonable provision will be made to include the presentation during the public comment period. It is requested that oral presenters provide 15 copies of their statements at the time of their presentations.

Written testimony pertaining to agenda items may be submitted prior to the meeting. Written testimony must be received by the Designated Federal Officer at the address shown above before 5 p.m. (e.d.t.) Friday, January 3, 1992, to assure that it is considered by Task Force members during the meeting.

Minutes: A transcript of the meeting will be available for public review and copying approximately 30 days following the meeting at the Public Reading Room, 1E-190, Forrestal Building, 1000 Independence Avenue, SW. Washington, DC, between 9:00 a.m. and 4:00 p.m., Monday through Friday except Federal holidays.

Issued: Washington, DC.

Marcia L. Morris,

Deputy Advisory Committee Management Officer.

[FR Doc. 91-30361 Filed 12-18-91; 8:45 am]

BILLING CODE 6450-01-M

Secretary of Energy Advisory Board, Task Force on Radioactive Waste Management; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting:

Name: Secretary of Energy Advisory Board Task Force on Radioactive Waste Management.

Date and Time: January 9, 1992, 8:30 a.m.-4 p.m.

Place: Kimball Conference Room, First Floor, National Wildlife Federation, 1400 16th Street, NW. Washington, DC 20036.

Contact: Dr. Daniel S. Metlay, AC-1, Designated Federal Officer. 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-3903.

Purpose: The Secretary of Energy Advisory Board Task Force on Radioactive Waste Management was established in October 1990 to: (1) identify the factors that affect the level of public trust and confidence in Department of Energy programs; (2) assess the effectiveness of alternative financial, organizational, legal, and regulatory arrangements in promoting public trust and confidence; (3) consider the effects on other programmatic objectives, such as cost and timely acceptance of waste, of those alternative arrangements; and (4) provide the Secretary with recommendations and guidance for implementing those recommendations.

Tentative agenda

Thursday, January 9, 1992 8:30 a.m-4 p.m.

8:30 a.m.-9 a.m.—Introduction and Welcome.
9:00 a.m.-10:45 a.m.—Presentations by Office of Civilian Radioactive Waste Management.
10:45 a.m.-11:00 a.m.—Break.
11:00 a.m.-12:00 p.m.—Presentation by Assistant Secretary of Environmental Restoration and Waste Management Leo Duffy.
12:00 p.m.-1:30 p.m.—Lunch break.
1:30 p.m.-3:30 p.m.—Presentations by Office of Environmental Restoration and Waste Management.
3:30 p.m.-4 p.m.—Public comment.
4:00 p.m.—Adjourn.

Public Participation: The Chairman of the Task Force is empowered to conduct the meeting in a fashion that will, in the Chairman's judgment, facilitate the orderly conduct of business.

Members of the public are welcome to comment at the meeting on any of these presentations or to provide views on other matters that fall within the scope of the Task Force's Work. It is requested that those individuals provide 15 copies of their statements at the time of their presentation. Members of the public may also submit written comments to Dr. Metlay at the address given above.

Minutes: A transcript of the meeting will be available for public review and copying approximately 30 days following the meeting a the Public Reading Room, 1E-190 Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 9 a.m. and 4 p.m. Monday through Friday except Federal holidays.

Issued: Washington, DC.

Marcia L. Morris,

Deputy Advisory Committee Management Officer.

BILLING CODE 6450-01-M

Energy Information Administration

Agency Information Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of request submitted for review by the Office of Management and Budget.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for review under provisions of the Paperwork Reduction Act (Pub. L. No. 96-511, 44 U.S.C. 3501 *et seq.*). The listing does not include collections of information contained in new or revised regulations which are to be submitted under section 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (a DOE component which term includes the Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, extension, or reinstatement; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses per respondent annually; (11) An estimate of the average hours per response; (12) The estimated total annual respondent burden; and (13) A brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed within 30 days of publication of this notice. If you anticipate that you will be submitting comments but find it difficult to do so within the time allowed by this notice, you should advise the OMB DOE Desk Officer listed below of your intention to do so as soon as possible. The Desk Officer may be telephoned at (202) 395-3084. (Also, please notify the EIA contact listed below.)

ADDRESS: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards at the address below.)

FOR FURTHER INFORMATION AND COPIES OF RELEVANT MATERIALS CONTACT: Jay Casselberry, Office of Statistical Standards, (EI-73), Forrestal Building, U.S. Department of Energy, Washington, DC 20585. Mr. Casselberry may be telephoned at (202) 254-5348.

SUPPLEMENTARY INFORMATION: The energy information collection submitted to OMB for review was:

1. Federal Energy Regulatory Commission
2. FERC-556
3. 1902-0075
4. Cogeneration and Small Power Production
5. Extension
6. On occasion
7. Required to obtain or retain a benefit
8. State or local governments, Businesses or other for-profit, Small businesses or organizations
9. 344 respondents
10. 1 reponse
11. 6 hours per response
12. 2,064 hours
13. To encourage small power production and cogeneration, the Public Utilities Regulatory Policies Act of 1978 confers certain benefits on small power production and cogeneration facilities that meet particular ownership and technical criteria. FERC-556 specifies the criteria that must be met and the process for which such benefits may be obtained.

Statutory Authority

Sec. 5(a), 5(b), 13(b), and 52, Pub. L. No. 93-275, Federal Energy Administration Act of 1974, 15 U.S.C. 764(a), 764(b), 772(b), and 790a.

Issued in Washington, DC, December 13, 1991.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

Federal Energy Regulatory Commission

[Docket No. RP91–161–005]

Columbia Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

December 13, 1991.

Take notice that Columbia Gas Transmission Corporation (Columbia) on December 4, 1991, tendered for filing the following revised tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1, with the proposed effective date of December 1, 1991:

Second Substitute Eleventh Revised Sheet No. 26C
Second Substitute Second Revised Sheet No. 26D

On November 27, 1991, Columbia filed to place its motion rates in Docket No. RP91–161–000, et al., into effect on December 1, 1991. Subsequent to that filing, Columbia determined that the retainage percentage and the charge for Fuel as set forth on the tariff sheets were inadvertently stated at 2.40% and 5.32c per Dth, respectively, instead of the filed for 2.33% retainage percentage and the revised Fuel Charge of 5.15c per Dth. Therefore, the instant filing is being submitted to reflect the proper retainage percentage and Fuel Charge to be effective December 1, 1991.

Columbia states that copies of the filing were served upon Columbia's jurisdictional customers and interested State commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedures, 18 CFR 385.211. All such protests should be filed on or before December 20, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TM92–6–21–001]

Columbia Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

December 13, 1991.

Take notice that Columbia Gas Transmission Corporation (Columbia) on December 4, 1991, tendered for filing the following revised tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1, with the proposed effective date of January 1, 1992:

Substitute Second Revised Eleventh Revised Sheet No. 26C
Substitute Second Revised Second Revised Sheet No. 26D

On November 27, 1991, Columbia filed tariff sheets to implement the 1992 Gas Research Institute (GRI) funding unit, as authorized by FERC Opinion No. 365. Subsequent to that filing, Columbia filed to correct an error on certain tariff sheets filed November 27, 1991 at Docket No. RP91–161, to be effective December 1, 1991, which are the underlying sheets to the GRI filing. The instant filing is being submitted to correct those errors and reflect the proper retainage percentage of 2.33% and revised Fuel Charge of 5.15¢ per Dth.

Columbia states that copies of the filing were served on Columbia's jurisdictional customers and interested State commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedures, 18 CFR 385.211. All such protests should be filed on or before December 20, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. CI92–9–000]

Grace Petroleum Corp.; Application for Certificate

December 13, 1991.

Take notice that the Applicant listed herein has filed an application pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce as described herein, all as more fully described in the application which is on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 2, 1992, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP[illegible]–144–002]

Great Lakes Gas Transmission Limited Partnership; Proposed Changes on FERC Gas Tariff

December 13, 1991.

Take notice that Great Lakes Gas Transmission Limited Partnership ("Great Lakes") on December 3, 1991 tendered for filing Substitute Eleventh Revised Sheet No. 53–B to its FERC Gas Tariff, Original Volume No. 2, to be effective June 1, 1991.

Great Lakes states that this tariff sheet is being filed as a substitute to a tariff sheet filed on October 30, 1991 which inadvertently contained an incorrect pagination reference.

Great Lakes states that copies of the filing were served on all of Great Lakes' customers and the Public Service Commissions of Minnesota, Michigan and Wisconsin.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC. 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedures, 18 CFR 385.211. All such protests should be filed on or before December 20, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket Nos. TA92–1–53–002 and TA92–2–53–001]

K N Energy, Inc.; Proposed Changes in FERC Gas Tariff

December 13, 1991.

Take notice that K N Energy, Inc. ("K N") on December 9, 1991 tendered for filing proposed changes in its FERC Gas Tariff to adjust the rates charged to its jurisdictional customers in order to comply with the Commission's Order in K N's Annual PGA requiring restatement of rates to correctly reflect pipeline supplier rates from Colorado Interstate Gas Company. The filing proposes increases (decreases) to K N's rates per Mcf as set forth in the table below:

	Zone 1	Zone 2
CD, SF and WPS Commodity	$(0.0099)	$(0.0099)
D1 Demand	.0002	.0002
D2 Demand	.0005	.0005
WPS Demand	.0004	.0004
IOR Commodity	(0.0091)	(0.0089)

The proposed revisions in PGA gas cost also require refiling tariff sheets filed with K N's annual GRI filing (Docket No. TM92–2–53–000).

K N states that copies of the filing were served upon K N's jurisdictional customers and interested public bodies.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedures, 18 CFR 385.211. All such protests should be filed on or before December 20, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP91–161–002]

Northern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

December 13, 1991.

Take notice that Northern Natural Gas Company (Northern) on December 6, 1991, tendered for filing to become part of Northern's FERC Gas Tariff, the following tariff sheets:

Third Revised Volume No. 1

Fifth Revised Sheet No. 70B

Original Volume No. 2

Seventh Revised Sheet No. 11.2

Northern states that such tariff sheets, with a proposed effective date of July 26, 1991, are being submitted in compliance with the Commission's November 21, 1991 Order in Docket Nos. RP91–161–000 and RP91–161–001, which amends Northern's Purchased Gas Adjustment clause (PGA) to provide notice to Northern's customers that it intends to

Northwest Pipeline Corp.; Informal Settlement Conference

December 13, 1991.

Take notice that an informal settlement conference will be convened in this proceeding on Wednesday, January 15, 1992, at 10 a.m., at the offices of the Federal Energy Regulatory Commission, 810 First Street NE., Washington, DC 20426, for the purpose of exploring the possible settlement of the issues in this proceeding.

Any party, as defined by 18 CFR 385.102(c), or any participant as defined by 18 CFR 385.102(b), is invited to attend. Persons wishing to become a party must move to intervene and receive intervenor status pursuant to the Commission's regulations [18 CFR 385.214].

For additional information, contact Marc G. Denkinger (202) 208-2215 or Joan Dreskin (202) 208-0738.

Lois D. Cashell,

Secretary

BILLING CODE 6717-01-M

[Docket No. TM92-4-17-001]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

December 13, 1991.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on December 3, 1991 tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, six copies of the following tariff sheet:

Sub Fortieth Revised Sheet No. 50.2

Texas Eastern states that this substitute tariff sheet is being filed for the sole purpose of reflecting the correct Rate Schedule ISS-1 rate on the tariff sheet previously filed on November 25, 1991.

The proposed effective date of the tariff sheet listed above is January 1, 1992.

Texas Eastern states that copies of the filing served on Texas Eastern's jurisdictional customers and interested State commissions. Texas Eastern further states that copies of the filing have also been mailed to all Rate Schedule FT-1 and IT-1 Shippers.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedures, 18 CFR 385.211. All such protests should be filed on or before December 20, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 91-30241 Filed 12-18-91; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA92-2-18-000]

Texas Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

December 13, 1991.

Take notice that Texas Gas Transmission Corporation (Texas Gas), on December 10, 1991, tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

Forty-ninth Revised Sheet No. 10
Forty-ninth Revised Sheet No. 10A
Thirtieth Revised Sheet No. 11
Twentieth Revised Sheet No. 11A
Twentieth Revised Sheet No. 11B

Texas Gas states that these tariff sheets are being filed to comply with the Commission's Letter Order dated December 4, 1991, rejecting Texas Gas's original Annual PGA filing (Docket No. TA92-1-18). Texas Gas states that these tariff sheets reflect changes in projected purchased gas costs and the unrecovered purchased gas cost surcharge pursuant to the Annual PGA provision of the Purchased Gas Adjustment clause of its FERC Gas Tariff and are proposed to be effective February 1, 1992. Texas Gas further states that the proposed tariff sheets reflect a current commodity rate increase of $.1288 per MMBtu from the rates set forth in the quarterly PGA filed September 30, 1991 (Docket No. TQ92-1-18), and a decrease of $(.1193) per MMBtu in the Unrecovered Purchased Gas Cost surcharge. No changes in the demand rates or SGN standby rates are proposed in the instant filing. Texas Gas states that these tariff sheets reflect the same rates as those contained in the Annual filing (Docket No. TA92-1-18) rejected by the Commission.

Copies of the filing were served upon Texas Gas's jurisdictional customers and interested State commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such protests or motions should be filed on or before January 6, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Project No. 2239-004-Wisconsin]

Tomahawk Power & Pulp Co.; Notice Establishing Procedures for Relicensing and a Deadline for Submission of Final Amendments

December 13, 1991.

The license for the Kings Dam Hydro Project No. 2239, located on the Wisconsin River in Lincoln County, Wisconsin expires on July 31, 1993. The statutory deadline for filing an application for new license was July 31, 1991 An application for new license has been filed as follows:

Project No.	Applicant	Contact
P-2239-004	Tomahawk Power & Pulp Company, 610 Jackson Street, Wausau, WI 54401.	John Laughlin, 610 Jackson St., Wausau, WI 54401, (715) 842-4613.

The following is an approximate schedule and procedures that will be followed in processing the application:

Date	Action
Sept. 19, 1991	Commission notified applicant that its application is deficient.
Dec. 19, 1991	Commission's deadline for applicant's response to deficiency request.
Jan. 30, 1992	Commission notifies applicant that its application has been accepted.
Feb. 15, 1992	Commission issues public notice of the accepted application establishing dates for filing motions to intervene and protests.
Dec. 30, 1991	Commission's deadline for applicant for filing a final amendment, if any, to its application.
Mar. 15, 1992	Commission notifies all parties and agencies that the application is ready for environmental analysis.

Upon receipt of all additional information and the information filed in response to the public notice of the acceptance of the application, the Commission will evaluate the application in accordance with applicable statutory requirements and take appropriate action on the application.

Any questions concerning this notice should be directed to Ed Lee at (202) 219-2809.

BILLING CODE 6717-01-M

[Docket No. TM91-8-29-003]

Transcontinental Gas Pipe Line Corp.; Compliance Filing

December 13, 1991.

On December 6, 1991, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing First Revised Sheet No. 144 to its FERC Gas Tariff, Third Revised Volume No. 1.

Transco proposes to notify its customers via its electronic bulletin board of any rate change proposal filed by North Penn which Transco will track under its Rate Schedule SS-1 within 3 business days following Transco's receipt of notice of such filing.

Transco proposes to file to track a North Penn rate change no later than 15 days following the date Transco receives a copy of the Commission order which accepts and makes effective North Penn's rate change.

Transco has requested that this revised tariff sheet be effective January 5, 1992.

Transco states that copies of the filing were served upon all interested state commissions and all parties to the captioned proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedures, 18 CFR 385.211. All such protests should be filed on or before December 20, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP92-15-001]

Wyoming Interstate Co., Ltd.; Tariff Filing

December 13, 1991.

Take notice that Wyoming Interstate Company, Ltd. (WIC), on December 6, 1991, tendered for filing Substitute Original Sheet Nos. 23 and 46 of its First Revised Volume No. 2 Gas Tariff.

WIC states that this filing was made to comply with a Commission Order issued on November 22, 1991, in Docket Nos. RP91-177-003 and RP92-15-000.

This Compliance Filing corrects a reference on Substitute Original Sheet No. 23 and clarifies that changes in receipt point(s) on a firm transportation agreement do not change priority of service date of said agreement. Substitute Original Sheet No. 46 also clarifies that changes in delivery point(s) or an increase in maximum daily quantity trigger a new priority date for those changes to the agreement.

WIC asked for an effective date of October 25, 1991, which is coincidental with the Commission's acceptance of WIC's First Revised Volume No. 2 Tariff.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 20, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4084-4]

Clean Air Act Advisory Committee; Open Meeting

SUMMARY: On November 8, 1990, the U.S. Environmental Protection Agency (EPA) gave notice of the establishment of a Clean Air Act Advisory Committee (CAAAC) (55 FR, No. 217, 46993). This Committee was established pursuant to the Federal Advisory Committee Act (5 U.S.C. app. I) to provide advice to the Agency on policy and technical issues related to the development and implementation of the requirements of the Clean Air Act Amendments of 1990.

OPEN MEETING DATES: Notice is hereby given that the Clean Air Act Advisory Committee will hold an open meeting on January 16, 1992 from 8:30 a.m. to 4:30 p.m., at the Washington Hilton Hotel, 1919 Connecticut Avenue NW., Washington, DC. Seating will be available on a first come, first served basis but should be fully adequate for all members of the public interested in attending.

The meeting will include a discussion of the status of Clean Air Act implementation efforts, and the effective implementation of the Clean Air Act at the state and local level.

INSPECTION OF COMMITTEE DOCUMENTS: Documents relating to the above noted topics will be publicly available at the meeting. Thereafter, these documents, together with the CAAAC meeting minutes will be available for public inspection in EPA Air Docket No. A-90-39 in room 1500 of EPA Headquarters, 401 M Street SW., Washington, DC. Hours of inspections are 8:30 a.m. to 12

VOL 56 ISS 244 DEC 19 1991 UMI

noon and 1:30 to 3:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION concerning the CAAAC or its activities please contact Mr. Paul Rasmussen, Designated Federal Official to the Committee at (202) 260–7430, FAX (202) 260–4185, or by mail at U.S. EPA, Office of program Management Operations (ANR–443), Office of Air and Radiation, Washington, DC 20460.

Dated: December 12, 1991.

William G. Rosenberg,

Assistant Administrator, Office of Air and Radiation.

FEDERAL COMMUNICATIONS COMMISSION

FCC Establishes Advisory Committee to Enhance Network Reliability

December 13, 1991.

The Federal Communications Commission has established an Advisory Committee, called the Network Reliability Council, to provide recommendations to the Commission that will help prevent network outages or limit their impact.

In order to ensure a balanced membership on the Council, the Commission will carefully select members on the basis of their technical knowledge and the impact of their activities on network reliability. The members will be chosen so that the largest possible diversity of interests, given the function to be performed, will be represented.

The formation of the Advisory Committee is necessary and in the public interest to prepare and evaluate recommendations to the industry and to the FCC for avoiding, and minimizing the impact of, future network outages.

For additional information, contact Robert Kimball (202) 634–4215.

Federal Communications Commission.

FEDERAL MARITIME COMMISSION

Port of Oakland et al.;

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200599.

Title: Port of Oakland/NYK Line Nonexclusive, Preferential Assignment Agreement.

Parties:
Port of Oakland,
Nippon Yusen Kaisha.

Synopsis: The Agreement, filed December 11, 1991, provides for the assignment, on a nonexclusive preferential basis, of premises in the Port's Outer Harbor Terminal to Nippon Yusen Kaisha. The term of the Agreement is 15 years, with options to extend the term for two (2) additional periods of two (10) years each. The assigned premises are to be used primarily as a containership terminal.

By Order of the Federal Maritime Commission.

Dated: December 13, 1991.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Lee Anne Lewis, et al.; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than January 9, 1992.

A. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Lee Anne Lewis, Englewood, Colorado, and Jerrold G. Hauptman, Lakewood, Colorado; to each acquire an additional 49.76 percent of the voting shares of Centennial National Bank, Englewood, Colorado, for totals of 49.92 percent each.

Board of Governors of the Federal Reserve System, December 13, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

Mid-Wisconsin Financial Services, Inc.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 9, 1992.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Mid-Wisconsin Financial Services, Inc., Medford, Wisconsin; to acquire Premier Insurance Services, Inc., Neillsville, Wisconsin, and thereby engage in general insurance agency activities in the cities of Medford, Colby and Neillsville, Wisconsin, all towns with a population not exceeding 5,000 pursuant to § 225.25(b)(8)(iii) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, December 13, 1991.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

San Bancorp, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than January 9, 1992.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. San Bancorp, Sanborn, Iowa; to acquire 100 percent of the voting shares of Ocheyedan Bancorporation, Ocheyedan, Iowa, and thereby indirectly acquire Ocheyedan Savings Bank, Ocheyedan, Iowa.

FEDERAL TRADE COMMISSION

[File No. 871 0045]

Roberto Fojo, M.D.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, a Miami, Florida obstetrician/gynecologist from agreeing with any other physician to withhold or threaten to withhold emergency room services at any hospital, and, for a period of five years, from threatening that any physician would or might withhold such services at any hospital.

DATES: Comments must be received on or before February 18, 1992.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, room 159, 6th Street and Pennsylvania Avenue NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Mark Horoschak, FTC/S–3115, Washington, DC 20580, (202) 326–2756.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade

VOL
56
ISS
244
DE
19
1991
UMI

Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii)).

In the Matter of Roberto Fojo, M.D.

Agreement Containing Consent Order To Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of Roberto Fojo, M.D., hereinafter sometimes referred to as proposed respondent, and it now appearing that proposed respondent is willing to enter into an agreement containing an order to cease and desist from engaging in the acts and practices being investigated.

It is hereby agreed by and between proposed respondent and his duly authorized attorney and counsel for the Federal Trade Commission That:

1. Proposed respondent Roberto Fojo, M.D. ("Dr. Fojo") is a physician licensed and doing business under and by virtue of the laws of the State of Florida. The mailing address and principal place of business of Dr. Fojo is 1190 Northwest 95th Street, Suite 107, Miami, Florida 33150.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address stated in this agreement shall constitute service. Proposed respondent waives any right he may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. He understands that once the order has been issued, he will be required to file one or more compliance reports showing that he has fully complied with the order. Proposed respondent further understands that he may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is ordered That for the purposes of this order, the following definitions shall apply:

1. "Respondent" means Roberto Fojo, M.D., and his employees, agents and representatives.

2. "Emergency room call services" means being available, as determined by a hospital, to come to the hospital and treat emergency room patients needing medical or surgical services.

II

It is further ordered That respondent, directly or indirectly, or through any corporate or other device, in connection with the provision of health care services in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, shall forthwith cease and desist from:

A. Entering into, continuing, or attempting to enter into or continue, any agreement or understanding, either express or implied, with any physician to withhold or threaten to withhold emergency room call services at any hospital; and

B. For a period of five (5) years from the date this order becomes final, expressly or impliedly threatening that any physician would or might, in concert with any other physician, withhold emergency room call services at any hospital.

Provided that nothing in this order shall prohibit respondent from entering into any agreement with any physician with whom respondent practices medicine in partnership or as a professional corporation, or who is employed by such partnership or professional corporation or by respondent.

III

It is further ordered, That respondent:

A. Distribute a copy of this order and the accompanying complaint, by first class mail within thirty (30) days after this order becomes final, to each hospital at which he has hospital privileges at the time this order becomes final;

B. File a written report with the Commission within sixty (60) days after this order becomes final, and at such other times the Commission may by written notice require, setting forth in detail the manner and form in which respondent has complied and is complying with this order; and

C. Notify the Commission within thirty (30) days of any change in his business address.

In the Matter of Roberto Fojo, M.D., Analysis of Proposed Consent Order to Aid Public Comment

The Federal Trade Commission has accepted, subject to final approval, an agreement to a proposed consent order from an obstetrician/gynecologist ("Ob/Gyn") who practices in Miami, Florida. The agreement, which has been placed on the public record, has been signed by Roberto Fojo, M.D. ("proposed respondent"). The agreement with the proposed respondent would settle charges by the Federal Trade Commission that he violated section 5 of the Federal Trade Commission Act by conspiring to withhold and threaten to withhold emergency room call services from North Shore Medical Center, Inc. ("North Shore" or "the hospital"), a hospital located in Miami, Florida.

The proposed consent order has been placed on the public record for 60 days for reception of comments by interested persons. Comments received during this period will become part of the public record. After 60 days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Complaint

A complaint has been prepared for issuance by the Commission along with the proposed order. It alleges that at the time of the alleged conspiracy, proposed respondent was an Ob/Gyn with medical staff privileges at North Shore and was chairman of North Shore's department of obstetrics and gynecology. The complaint alleges that, as is typically the case at hospitals, in exchange for being allowed to use North Shore's facilities and support personnel without making any payment to the hospital, the physicians on the medical staff of North Shore agree to take emergency room call without receiving payment from the hospital.

The complaint alleges that beginning as early as November 1986, proposed respondent conspired with other Ob/Gyns to withhold and threaten to withhold emergency room call services from North Shore and its patients. It alleges that the aim of the conspirators was to improve their economic arrangement with North Shore by coercing the hospital to release them from their obligation to take emergency room call and to pay in some manner those Ob/Gyns who were willing to take call.

The complaint alleges that, in furtherance of the conspiracy, proposed respondent and other Ob/Gyns voted to remove their names from North Shore's emergency room call roster and to inform North Shore's administration that they would not take emergency room call at North Shore after a certain date. It alleges that the proposed respondent communicated this threat to North Shore's administration. The complaint alleges that by acting in concert, proposed respondent and other conspirators sought to enhance their bargaining power and to reduce the risk that the hospital would terminate their individual hospital privileges if they refused to take call. Loss of medical staff privileges at North Shore would have placed the conspirators at a competitive disadvantage vis-a-vis other Ob/Gyns. The complaint alleges that in January, 1987, all but two members of the Ob/Gyn department at North Shore stopped taking emergency room call.

The complaint alleges that, as a result of the conspiracy, North Shore altered its economic arrangement with the Ob/Gyns and paid them, as well as other physicians on its staff, to take emergency room call from February 1 through June 30, 1987. The complaint alleges that, thereafter, North Shore decided that this arrangement was too expensive and as of July 1, 1987, staffed its emergency room with those few Ob/Gyns who were will to take call in exchange for hospital privileges.

The complaint alleges that proposed respondent's conspiracy has restrained trade unreasonably in the following ways:

a. Restraining competition among the proposed respondent and other Ob/Gyns on the medical staff of North Shore;

b. Coercing North Shore to provide proposed respondent and other Ob/Gyns access to its facilities on more favorable economic terms; and

c. Depriving consumers of the benefits of competition.

The Proposed Consent Order

The consent order is designed to prevent a recurrence of the allegedly illegal conduct. Part I of the proposed order contains definitions of the terms "respondent" and "emergency room call services."

Part II of the proposed order prohibits proposed respondent from entering into or attempting to enter into any agreement or understanding, either express or implied, with any physician to withhold or threaten to withhold emergency room call services at any hospital. Part II of the proposed order also prohibits respondent, for a period of five years, from expressly or impliedly threatening that any physician would or might, in concert with any other physician, withhold emergency room call services at any hospital. Part II of the proposed order provides that the order does not prohibit proposed respondent from entering into any agreement with his employees or with partners in his medical practice.

Part III of the proposed order requires proposed respondent, within thirty days after the proposed order becomes final, to distribute a copy of the order and complaint to certain hospitals. Part III of the proposed order also requires proposed respondent to file a written compliance report with the Commission within sixty days after the order becomes final and to notify the Commission within thirty days of any change in his business address.

The purpose of this analysis is to facilitate public comment on the proposed order, and is not intended to constitute an official interpretation of the agreement and proposed order or to modify their terms in any way.

The proposed consent order has been entered into for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the complaint.

Donald S. Clark,

Secretary

BILLING CODE 6750-01-M

[File No. 902 3268]

Sun Company, Inc., et al.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, the misrepresentation of the efficacy claims for Sunoco Ultra octane gasoline and would require respondents to maintain materials to substantiate such claims in the future.

DATES: Comments must be received on or before February 18, 1992.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, room 159, 6th Street and Pennsylvania Avenue NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Joel Winston, FTC/S-4002, Washington, DC 20580, (202) 326-3153.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent

VOL 56 ISS 244 DEC 19 1991 UMI

agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii)).

In the matter of Sun Company, Inc., a corporation, and Sun Refining and Marketing Company, a corporation.

Agreement Containing Consent Order To Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of Sun Company, Inc., and Sun Refining and Marketing Company, corporations ("proposed respondents"), and it now appearing that proposed respondents are willing to enter into an agreement containing an order to cease and desist from the acts and practices being investigated.

It is hereby agreed by and between Sun Company, Inc., and Sun Refining and Marketing Company, by their duly authorized officers, and their attorneys, and counsel for the Federal Trade Commission That:

1. Proposed respondent Sun Company, Inc. is a Pennsylvania corporation with its office and principal place of business located at 100 Matsonford Road, Radnor, Pennsylvania 19087.

Proposed respondent Sun Refining and Marketing Company is a Pennsylvania corporation with its office and principal place of business located at Tenn Penn Center, 1801 Market Street, Philadelphia, Pennsylvania 19103.

2. Proposed respondents admit all the jurisdictional facts set forth in the attached draft complaint.

3. Proposed respondents waive:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All right to seek judicial review or otherwise to challenge or contest the validity of the Order entered pursuant to this Agreement; and

(d) All claims under the Equal Access to Justice Act, 5 U.S.C. 504.

4. This Agreement shall not become a part of the public record of the proceeding unless and until it is accepted by the Commission. If this Agreement is accepted by the Commission, it, together with the attached draft Complaint, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this Agreement and so notify the proposed respondents, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This Agreement is for settlement purposes only and does not constitute an admission by proposed respondents that the law has been violated as alleged in the attached draft complaint.

6. This Agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may without further notice to proposed respondents: (1) Issue its complaint corresponding in form and substance with the attached draft Complaint and its decision containing the following Order to cease and desist in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the Order to cease and desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the decision containing the agreed-to Order to proposed respondents' address as stated in this Agreement shall constitute service. Proposed respondents waive any right they might have to any other manner of service. The Complaint may be used in construing the terms of the Order, and no agreement, understanding, representation, or interpretation not contained in the Order or in the Agreement may be used to vary or contradict the terms of the Order.

7. Proposed respondents have read the attached draft Complaint and the following Order. They understand that once the Order has been issued, they will be required to file one or more compliance reports showing that they have fully complied with the Order. Proposed respondents further understand that they may be liable for civil penalties in the amount provided by law for each violation of the Order after it becomes final.

Order

Part I

It is ordered That respondents Sun Company, Inc., and Sun Refining and Marketing company, corporations, their successors and assigns, and their officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising, labelling, packaging, offering for sale, sale or distribution of SUNOCO ULTRA 93.5 and 94 gasolines or any other gasoline in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from making any representation, directly or by implication, about:

(1) The superiority of ULTRA 93.5 and 94 in providing engine power or acceleration for any automobile; or

(2) The relative or absolute attributes or performance of any gasoline with respect to vehicle engine power, acceleration, or any other performance characteristic,

unless at the time of making such representation, respondents possess and rely upon a reasonable basis consisting of competent and reliable scientific evidence which substantiates the representation. For the purposes of this Order, "competent and reliable scientific evidence" shall mean tests, experiments, analysis, research, studies, or other evidence based on the expertise of professionals in the relevant area conducted and evaluated in an objective manner by persons qualified to do so, using procedures generally accepted in the profession or science to yield accurate and reliable results.

Provided That, nothing in this Order shall prohibit respondents from truthfully representing the numerical octane rating of any gasoline.

Part II

It is further ordered That for three (3) years after the date of the last dissemination of the representation to which they pertain, respondents shall maintain and upon request make available to the Federal Trade Commission or its staff for inspection and copying:

A. All materials relied upon to substantiate any claim or representation covered by this Order; and

B. All tests, reports, studies or surveys in respondents' possession or control that contradict any representation of respondents covered by this Order.

Part III

It is further ordered That respondents shall forthwith distribute a copy of this Order to all operating divisions, subsidiaries, franchisees, officers, managerial employees, and all of their employees or agents engaged in the preparation and placement of advertisements or promotional materials covered by this Order and shall obtain from each such employee a signed statement acknowledging receipt of the order.

Part IV

It if further ordered That respondents shall notify the Commission at least thirty (30) days prior to any proposed change in the corporation(s) such as a dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation(s) that may affect compliance obligations under this Order.

Part V

It is further ordered That respondents shall, within sixty (60) days after service upon them of this Order and at such other times as the Commission may require, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this Order.

Analysis of Proposed Consent Order to Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order form Sun Company, Inc. and its wholly-owned subsidiary, Sun Refining and Marketing Company ("respondents" or "Sun").

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

This matter concerns Sun's advertisements for Sunoco Ultra 93.5 and 94 octane gasolines ("Ultra"). The Commission's complaint alleges that Sun's ads represented that Ultra provides superior engine power and acceleration, that would be significant to consumers, for automobiles generally as compared to any other gasoline. According to the complaint, Sun falsely represented that it has a reasonable basis that substantiated that claim.

The consent order contains provisions designed to remedy the violation charged and to prevent respondents from engaging in similar unfair or deceptive practices in the future.

Part I of the order prohibits Sun from making any representation about (1) the superiority of Ultra in providing engine power or acceleration, or (2) the relative or absolute attributes or performance of any gasoline with respect to power, acceleration, or any other performance characteristic, unless respondents have a reasonable basis, consisting of competent and reliable scientific evidence, at the time the claim is made. Part I further provides that nothing in the order prohibits Sun from truthfully representing the numerical octane rating of any gasoline.

Part II of the order requires respondents to maintain and make available to the Commission materials they rely upon to substantiate any claim covered by the order, and tests, reports, studies or surveys that contradict any such claim.

Part III of the order requires respondents to distribute a copy of the order to their corporate branches, officers, and managerial and advertising employees, and to obtain from each such employee a signed statement acknowledging receipt of the order.

Part IV of the order requires respondents to notify the Commission prior to any change in the corporation that may affect compliance obligations arising out of the order.

Part V of the order requires respondents to file compliance reports with the Commission.

This matter does not involve any alleged mislabeling in the posting of octane ratings at service station pumps, and has no relation to the Commission's ongoing investigation to determine compliance by gasoline distributors with the Commission's Octane Posting and Certification Rule, 16 CFR part 306.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order, or to modify in any way their terms.

Benjamin I. Berman,

Acting Secretary.

Dissenting Statement of Commissioner Deborah K. Owen in Sun Company, Inc. and Sun Refining and Marketing Company, File No. 902-3268

Deciding whether to accept a consent agreement for public comment involves weighing, among other factors, the potential benefits of securing stronger relief, against the costs and risks inherent in further negotiation and possible litigation. Pinpointing where the correct balance lies is often a formidable challenge, and people who share a dedication to tough law enforcement may reasonably disagree as to where it appropriately falls. In this matter, I believe that the relief obtained is grossly insufficient in light of the respondents' past conduct, and because the total consumer injury arising from the claims involved may be very costly. Accordingly, I dissent from the Commission's decision to accept this consent agreement for public comment.

This is the second time that respondents have tangled with the Commission over ads linking octane and automobile engine performance. In 1974, the Commission ordered respondents' corporate predecessor, Sun Oil Co., to cease and desist from making false performance and uniqueness claims for its gasoline.[1] Since these respondents have a history of self-proclamation as the industry's octane king, I am skeptical that a second, mere "go and do more" consent agreement will have much useful deterrent effect.

Securing stronger relief is certainly called for when there are indications that consumer injury is particularly significant. Consumer injury due to misperceptions about the relation between octane and performance, and the resultant "overbuying" of octane, may be very great. A report released last February by the U.S. General Accounting Office,[2] though cautioning that the existing evidence is not conclusive, suggested that consumers may be spending hundreds of millions of dollars, or more, yearly on unnecessary purchases of higher octane gasolines. Such dollar figures may not be surprising in view of the huge size of the gasoline market. In addition, recognizing the widespread nature of consumer misunderstanding about octane and performance, the Commission recently issued a "Facts for Consumers" bulletin, with the cooperation of the American Automobile Association to help consumers select the octane grade most appropriate for their needs.

I suspect, however, that this admirable effort represents only a small corrective to the consumer misperceptions that ads such as Sunoco's have not merely taken

advantage of, but have strongly reinforced.

Based on these considerations, I conclude that the public interest would have been better served if the remedy in this matter had provided stronger incentives to insure compliance with the FTC Act, or had provided other relief that would truly benefit consumers. Query why in this instance, unlike others,[1] the Commission is content to have consumer enlightenment financed with taxpayers' dollars, rather than with the ill-gotten gains of a company that the Commission has found reason to believe has violated the FTC Act—more than once.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Availability of Draft 1992 Revised Classification System for Human Immunodeficiency Virus Infection and Expanded AIDS Surveillance Case Definition for Adolescents and Adults; Extension of Comment Period

AGENCY: Centers for Disease Control (CDC), Public Health Service (PHS), Department of Health and Human Services.

ACTION: Extension of public comment period.

SUMMARY: This notice announces the extension of the review and comment period of a draft document entitled "1992 Revised Classification System for Human Immunodeficiency Virus Infection and Expanded AIDS Surveillance Case Definition for Adolescents and Adults," prepared by the Centers for Disease Control.

DATES: To ensure consideration, written comments on this draft document must be received on or before February 14, 1992.

ADDRESSES: Requests for copies of the draft HIV classification system and expanded AIDS surveillance case definition must be submitted to the National AIDS Clearinghouse, P.O. Box 6003, Rockville, MD 20849-6003; telephone (800) 458-5231. Written comments on this draft document should be sent to the same address for receipt by February 14, 1992.

FOR FURTHER INFORMATION CONTACT: Technical Information Activity, Division of HIV/AIDS, National Center for Infectious Diseases, Centers for Disease Control, Mailstop E-49, 1600 Clifton Road, NE., Atlanta, Georgia, 30333; telephone: (404) 639-2076.

SUPPLEMENTARY INFORMATION: A notice of availability and request for comments on the "1992 Revised Classification System for Human Immunodeficiency Virus Infection and Expanded AIDS Surveillance Case Definition for Adolescents and Adults," was published in the **Federal Register** on November 15, 1991 (56 FR 58059). This notice extends the comment period for written comments on the draft document from December 16, 1991, to February 14, 1992.

Dated: December 13, 1991.

Food and Drug Administration

[Docket No. 91F-0391]

Ciba-Geigy Corp.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Ciba-Geigy Corp. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of *N*-phenylbenzenamine reaction products with 2,4,4-trimethylpentenes, as an antioxidant and/or stabilizer in pressure-sensitive adhesives in contact with food.

FOR FURTHER INFORMATION CONTACT: Richard H. White, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C Street, SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5) (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 1B4286) has been filed by Ciba-Geigy Corp., Seven Skyline Dr., Hawthorne, NY 10532-2188. The petition proposes to amend the food additive regulations in § 178.2010, Antioxidants and/or Stabilizers for Polymers (21 CFR 178.2010), to provide for the safe use of *N*-phenylbenzenamine reaction products with 2,4,4-trimethylpentenes, as an antioxidant and/or stabilizer in pressure-sensitive adhesives in contact with food.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: December 9, 1991.

[Docket No. 89P-0329]

Eggnog Deviating From Identity Standard; Amendment of Temporary Permit for Market Testing

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FAD) is announcing that it amending a temporary permit issued to H.P. Hood, Inc., to market test a product designated as "light eggnog" that deviates from the U.S. standard of identity for eggnog (21 CFR 131.170) by (1) increasing the amount of test product to be distributed, (2) adding one additional plant, and (3) increasing the area of distribution. This amendment will provide the permit holder with a broader base for the collection of data on consumer acceptance of the product.

FOR FURTHER INFORMATION CONTACT: Frederick E. Boland, Center for Food Safety and Applied Nutrition (HFF-414), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202-485-0117.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 29, 1989 (54 FR 35725), FDA announced the issuance of a temporary permit under the provisions of 21 CFR 130.17 to H.P. Hood, Inc., 500 Rutherford Ave., Boston, MA 02129, to market test a product designated as "light eggnog." The agency issued the permit to facilitate interstate market testing of a food that deviates from the requirements of a standard of identity promulgated under section 401 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 341).

The permit covers limited interstate market testing of "light eggnog" that deviates from the U.S. standard of identity for eggnog in 21 CFR 131.170 in that: (1) The fat content of the product is reduced from 6 percent to 0.75 percent, and (2) sufficient vitamin A palmitate is added to ensure that a 4-fluid-ounce serving of the product contains 8 percent of the U.S. Recommended Daily Allowance for vitamin A. The product meets all requirements of the standard with the exception of these deviations.

The permit was amended April 2, 1991 (56 FR 13480), to allow the permit holder to continue experimental market testing of the product pending agency action on a petition to establish a standard of identity for "light (or lite) eggnog." The April 2, 1991, notice invited other firms to participate in the extended market testing under the conditions that applied to H.P. Hood, Inc. FDA also stated in the notice that the market testing includes all products where the milkfat content is reduced by at least 50 percent and the calorie content is reduced by at least ⅓ as compared to regular eggnog.

H.P. Hood, Inc., has requested that FDA amend its temporary permit to provide for an increase of 225,000 quarts (qt) (212,918 liters (L)) of the test product per year and to increase the area of distribution of the product. The company requested this increase to enable it to obtain information about consumer attitudes toward the product in a broader geographic area. This increase will raise the total quantity involved in market testing from 1,300,650 qt (1,230,805 L) to 1,525,650 qt (1,443,723 L) per year. The increase of 225,000 qt (212,918 L) will be processed and packaged at H.P. Hood Plant No. 36-5631, Oneida, NY 14321, and will be distributed in Florida, Georgia, New Jersey, New York, North Carolina, Pennsylvania, South Carolina, and Virginia. FDA finds that this amendment will not alter the substance of the temporary permit (54 FR 35725) and consumers will benefit from continued tests to determine whether a product that is nutritionally equivalent to eggnog but contains fewer calories and less fat is acceptable.

Therefore, under the provision of 21 CFR 130.17(f), FDA is amending the temporary permit by (1) increasing the amount of test product to be distributed by 225,000 qt (212,918 L) per year, (2) adding one additional plant, and (3) fncreasing the area of distribution. All other terms and conditions of this permit remain the same.

Dated: December 6, 1991.

Douglas M. Archer,

Deputy Director, Center for Food Safety and Applied Nutrition.

UMI

Act (sec. 409(b)(5) (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 2B4296) has been filed by The Shepherd Color Co., P.O. Box 465627, Cincinnati, OH 45246. The petition proposes to amend the food additive regulations in § 178.3297, Colorants for Polymers, (21 CFR 178.3297) to provide for the safe use of cobalt aluminate as a colorant for all polymers intended to contact food.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: December 9, 1991.

Fred R. Shank,

Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160-01-M

[Docket No. 91E-0377]

Determination of Regulatory Review Period for Purposes of Patent Extension; Plendil®

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for Plendil® and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims that human drug product.

ADDRESSES: Written comments and petitions should be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, room 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: John S. Ensign, Office of Health Affairs (HFY-20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100-670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase beings. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA recently approved for marketing the human drug product Plendil®. Plendil® (felodipine) is indicated for the treatment of hypertension. Plendil® may be used alone or concomitantly with other antihypertensive agents. Subsequent to this approval, the Patent and Trademark Office received a patent term restoration application for Plendil® (U.S. Patent No. 4,264,611) from Aktiebolaget Astra, and the Patent and Trademark Office requested FDA's assistance in determining this patent's eligibility for patent term restoration. FDA, in a letter dated September 18, 1991, advised the Patent and Trademark Office that this human drug product had undergone a regulatory review period and that the approval of Plendil® represented the first commercial marketing of the product. Shortly thereafter, the Patent and Trademark Office requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for Plendil® is 2,494 days. Of this time, 1,248 days occurred during the testing phase of the regulatory review period, while 1,246 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act became effective:* September 27, 1984. The applicant claims January 16, 1986, as the date the investigational new drug application (IND) became effective. However, FDA records indicate that the IND became effective September 27, 1984, which was 30 days after FDA receipt of the IND.

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the Federal Food, Drug, and Cosmetic Act:* February 26, 1988. FDA has verified the applicant's claim that the new drug application (NDA) for Plendil® (NDA 19-834) was filed on February 26, 1988.

3. *The date the application was approved:* July 25, 1991. FDA has verified the applicant's claim that NDA 19-834 was approved on July 25, 1991.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 2 years of patent term extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before February 18, 1992, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before June 17, 1992, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41-42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: December 9, 1991.

Stuart L. Nightingale,

Associate Commissioner for Health Affairs.

[FR Doc. 91-30219 Filed 12-18-91; 8:45 am]

BILLING CODE 4160-01-M

Health Care Financing Administration

Notice of Hearing: Reconsideration of Disapproval of Oklahoma State Plan Amendments (SPAs)

AGENCY: Health Care Financing Administration, HHS.

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on January 23, 1992, at 10 a.m.; room 1230; 12th Floor; 1200 Main Tower; Dallas, Texas 75202 to reconsider our decision to disapprove Oklahoma SPAs 89-19 and 90-03.

CLOSING DATE: Requests to participate in the hearing as a party must be received by the Docket Clerk by January 3, 1992.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, HCFA Hearing Staff, Suite 110, Security Office Park, 7000 Security Blvd., Baltimore, Maryland 21207, Telephone: (410) 597-3013.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider our decision to disapprove Oklahoma State plan amendments (SPAs) number 89-19 and 90-03.

Section 1116 of the Social Security Act (the Act) and 42 CFR, part 430 establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a State plan or plan amendment. The Health Care Financing Administration (HCFA) is required to publish a copy of the notice to a State Medicaid agency that informs the agency of the time and place of the hearing and the issues to be considered. If we subsequently notify the agency of additional issues that will be considered at the hearing, we will also publish that notice.

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with the requirements contained at 42 CFR 430.76(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins in accordance with the requirements contained at 42 CFR 430.76(c).

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

Oklahoma sought approval of SPA 89-19 which would, among other things, limit providers of outpatient psychiatric services for individuals under 21 to hospitals and psychiatric facilities which have inpatient psychiatric programs.

The issue in this matter is whether the State's proposal constitutes a reasonable standard relating to the qualification of providers of outpatient psychiatric services, and thus complies with section 1902(a)(23) of the Act and Federal regulations at 42 CFR 431.51(b). These provisions require that a State plan must provide that any recipient may obtain Medicaid services from any institution, agency, pharmacy, person or organization that is qualified to perform the services. An exception to these requirements is found at 42 CFR 431.51(c), which allows a State to set reasonable standards relating to the qualification of providers.

Oklahoma's proposal to limit providers of outpatient psychiatric services for individuals under 21 to hospitals and psychiatric facilities which have inpatient psychiatric programs is predicated upon a belief that providers of outpatient psychiatric services cannot meet staffing and other program requirements unless they also offer inpatient psychiatric services. HCFA does not agree that it is reasonable to presume that providers of outpatient psychiatric services cannot meet staffing and program requirements relating to these services unless they also provide inpatient psychiatric services. Therefore, HCFA disapproved the amendment because the State's limitation of providers in this manner does not constitute a reasonable standard relating to the qualification of providers of inpatient psychiatric services, in violation of section 1902(a)(23) of the Act and Federal regulations at 42 CFR 431.51(b).

Oklahoma also sought approval of SPA 90-03 which would modify outpatient hospital treatment services under its Medicaid program. Although, this SPA amends material previously submitted in SPA 89-19, the revisions made by SPA 90-03 incorporate the same deficiencies found in SPA 89-19 upon which HCFA based its disapproval. That is, Oklahoma SPA 90-03 similarly proposes to limit providers of outpatient psychiatric hospital services to those hospitals and psychiatric facilities which have inpatient psychiatric programs.

The issue in this matter is whether the State's proposal constitutes a reasonable standard relating to the qualification of providers of outpatient psychiatric services and thus complies with section 1902(a)(23) of the Act and Federal regulations at 42 CFR 431.51(b).

SPA 90-03 revises the material submitted in SPA 89-19, but HCFA believes it does not correct the deficiencies upon which it based the recommendation to disapprove SPA 89-19. HCFA believes Oklahoma's proposal to limit coverage of outpatient psychiatric services to hospitals or facilities which have inpatient psychiatric programs impermissibly restricts providers who may participate under the program because this limitation does not constitute a reasonable standard relating to the qualifications of providers, consistent with 42 CFR 431.51(c). Therefore, HCFA disapproved the amendment because it violates section 1902(a)(23) of the Act and Federal regulations at 42 CFR 431.51(b).

The notice to Oklahoma announcing an administrative hearing to reconsider the disapproval of its SPA's reads as follows:

Mr. Benjamin Demps, Jr.,
Director, Oklahoma Department of Human Services, P.O. Box 25352, Oklahoma City, Oklahoma 73125

Dear Mr. Demps: I am responding to your request for reconsideration of the decision to disapprove Oklahoma State Plan Amendments (SPAs) 89-19 and 90-03.

Oklahoma SPA 89-19 would limit providers of outpatient psychiatric services for individuals under 21 to hospital and psychiatric facilities which have inpatient psychiatric programs. Although, Oklahoma SPA 90-03 amends material previously submitted in SPA 89-19, the revisions made by SPA 90-03 to SPA 89-19 do not correct the deficiencies upon which the Health Care Financing Administration based its disapproval. That is, Oklahoma SPA 90-03 would similarly limit providers of outpatient psychiatric hospital services to those hospitals and psychiatric facilities which have inpatient psychiatric programs.

The issue in the disapproval of SPAs 89-19 and 90-03 is whether the State's proposal constitutes a reasonable standard relating to qualification of providers of outpatient psychiatric services and thus complies with section 1902(a)(23) of the Social Security Act (the Act) and regulations at 42 CFR 431.51(b) and (c). Section 1902(a)(23) of the Act and Federal regulations at 42 CFR 431.51(b) require that a State plan must provide that any recipient may obtain Medicaid services from any institution, agency, pharmacy, person or organization that is qualified to perform the services. 42 CFR 431.51(c) provides an exception to this requirement by allowing a State to set reasonable standards relating to the qualifications of providers.

I am scheduling a hearing on your request for reconsideration to be held on January 23, 1992, at 10:00 a.m.; Room 1230; 12th Floor; 1200 Main Tower; Dallas, Texas 75202. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties. The hearing will be governed by the procedures prescribed at 42 CFR part 430.

I am designating Mr. Stanley Krostar as the presiding officer. If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communication which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting the Bureau's Clearance Officer at the phone number listed below. Comments and suggestions on the requirement should be made directly to the Bureau Clearance Officer and to the Office of Management and Budget, Paperwork Reduction Project (1004–0160), Washington, DC 20503, telephone (202) 395–7340.

Title: Geothermal Leasing Reports, 43 CFR 3203.

OMB Approval Number: 1004–0160.

Abstract: Respondents supply information on diligent efforts toward utilization of geothermal resources; bona fide efforts made to produce geothermal resources; and significant expenditure of funds made on the geothermal lease. This information allows the Bureau to determine if the lessee qualifies for a lease extension.

Bureau Form Numbers: None.

Frequency:

Diligent Efforts Report—Yearly
Bona Fide Efforts Report—Every five years
Significant Expenditures Report—Yearly.

Description of Respondents: Individuals, small businesses, and large corporations.

Estimated Completion Time: 2 hours each report.

Annual Responses: 75.

Annual Burden Hours: 150.

Bureau Clearance Officer (Alternate): Gerri Jenkins (202) 653–6105.

Dated: November 5, 1991.
A.A. Sokoloski,
Acting AD, Energy and Mineral Resources.

Rock Springs District Grazing Advisory Board Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting of the Rock Springs District Grazing Advisory Board.

SUMMARY: This notice sets forth the schedule and proposed agenda of a meeting of the Rock Springs District Grazing Advisory Board. Notice of this meeting is required under Pub. L. 92–463.

DATE: February 20, 1992, 9:30 a.m. until 4 p.m.

ADDRESS: Bureau of Land Management District Office, Highway 191 North, Rock Springs, Wyoming.

FOR FURTHER INFORMATION CONTACT: Marlowe E. Kinch, District Manager, Rock Springs District Bureau of Land Management, P.O. Box 1869, Rock Springs, Wyoming 82902–1869, (307) 382–5350.

SUPPLEMENTARY INFORMATION: The agenda for the meeting will include:

1. Introduction and opening remarks.
2. Election of a Chairman and Vice-Chairman.
3. District rangeland monitoring.
4. Lyman Cattle AMP development.
5. Bench Corral Individual AMP development.
6. Henry's Fork AMP revision.
7. Record of Decision—Vegetation Treatment on BLM Lands in Thirteen Western States.
8. Improvements proposed for completion in FY 92 with range betterment (8100) funds.
9. Update on wild horse gathering.
10. Public comment period.

The meeting is open to the public. Interested persons may make oral statements to the Board between 3:30 p.m. and 4 p.m., or file written statements for the Board's consideration. Anyone wishing to make an oral presentation should notify the District Manager, Bureau of Land Management, Highway 191 North, P.O. Box1869, Rock Springs, Wyoming 82902–1869, by February 18, 1992. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Minutes of meeting will be maintained in the District Office and be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Marlowe E. Kinch,
District Manager.

BILLING CODE 4310–22–M

Bureau of Land Management

ACTION: Emergency Vehicle Closure, Mohave County, Arizona.

SUMMARY: Notice is hereby given that effective immediately all vehicle usage will be limited to existing roads and trails designed and constructed for vehicle traffic, on all public lands within the following described lands, in the Hualapai Mountains, Mohave County, Arizona:

Gila and Salt River Meridian

T. 18 N., R. 16 W.,
Secs. 13, 24, 25, 26, 35, 36.
T. 18 N., R. 15 W.,
Secs. 6, 7, 18.
T. 19 N., R. 14 W.,
Secs. 6, 7, 18.
T. 19 N., R. 15 W.,
All.
T. 19 N., R. 16 W.,
Secs. 1, 12.
T. 20 N., R. 14 W.,
Secs. 18, 19, 30, 31.
T. 20 N., R. 15 W.,
Secs. 7, 8, 9, 10, 13, 14, 15, 17, 18, 19, 21, 22, 23, 24, 26, 27, 31, 32, 33, 34, 35, 36.
T. 20 N., R. 16 W.,
Secs. 12, 14, 24, 25, 36.
Totaling 50, 570 acres.

The purpose of this limitation is to protect the habitat of the Hualapai Mexican vole, a Federally listed endangered species from damage by indiscriminate off-road vehicle use. The action will eliminate further development of de facto roads and trails that are created only as a result of the passage of vehicles, and in so doing will help control habitat loss from erosion caused by motorized vehicles. All major ingress and egress points, along with major internal roads will be signed regarding the vehicle limitations immediately following publication of this notice. Maps of the affected area are available from the Kingman Resource Area office free of charge.

The authority for this action is 43 CFR 8341.2. The emergency order will remain in effect until off-highway vehicle designations can be implemented for the Kingman Resource Area, Phoenix District, Arizona.

FOR FURTHER INFORMATION CONTACT: Jesse J. Juen, Acting Area Manager, Bureau of Land Management, Kingman Resource Area, 2475 Beverly Avenue, Kingman, Arizona 86401 (602) 757–3161.

Dated: December 10, 1991.
William T. Childress,
Acting District Manager.

BILLING CODE 4310–32–M

[WY–930–4214–10; WYW 125723]

Proposed Withdrawal and Opportunity for Public Meeting; WY

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service, has filed an application to withdraw 440 acres of National Forest System lands for protection of the proposed Burgess Visitor Information Center site while in the final development stages. This notice closes the lands for up to 2 years from location and entry under the United States mining laws. The lands will remain open to mineral leasing and to all other forms of disposition which may by law be made of National Forest System land.

DATE: Comments and requests for a meeting should be received on or before March 19, 1992.

ADDRESSES: Comments and meeting requests should be sent to the Wyoming State Director, BLM, 2515 Warren Avenue, Cheyenne, Wyoming 82001.

FOR FURTHER INFORMATION CONTACT: Janet Booth, BLM Wyoming State Office, (307) 775–6124.

SUPPLEMENTARY INFORMATION: On October 28, 1991, the U.S. Department of Agriculture filed an application to withdraw the following described National Forest System lands from location and entry under the United States mining laws, subject to valid existing rights:.

Sixth Principal Meridian, Wyoming

Bighorn National Forest

T. 56 N., R. 88 W.,
Sec. 29, SE¼SW¼;
Sec. 31, NE¼, NE¼SE¼;
Sec. 32, NW¼, NW¼SW¼.

The areas described contain 440 acres in Sheridan County.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the undersigned officer within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of time and place will be published in the Federal Register at least 30 days before the scheduled date of the meeting.

The application will be processed in accordance with the regulations set forth in 43 CFR Part 2300.

For a period of 2 years from the date of publication of this notice in the Federal Register, the land will be segregated as specified above unless the application is denied or canceled or the withdrawal is approved prior to that date. The temporary uses which will be permitted during this segregative period consist of livestock grazing for that time until construction begins.

The temporary segregation of the lands in connection with this withdrawal application shall not affect the administrative jurisdiction over the land, and the segregation shall not have the effect of authorizing any use of the land by the Department of Agriculture.

Dated: December 3, 1991.
F. William Eikenberry,
Associate State Director, Wyoming.

BILLING CODE 4310–22–M

Fish and Wildlife Service

Receipt of Applications for Permit

The following applicants have applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, *as amended* (16 U.S.C. 1531, *et seq.*):

PRT–759976

Applicant: Omaha's Henry Doorly Zoo, Omaha, NE.

The applicant requests a permit to export 150 straws of semen taken from two captive-born gaurs (*Bos gaurus*) to Imamichi Institute for Animal Reproduction, Saitama, Japan, for artificial insemination of captive-born female gaurs.

PRT–761569

Applicant: Carl J. Hunt, Barstow, CA.

The applicant requests a permit to import two male and two female captive-hatched white-eared pheasants (*Crossoptilon crossoptilon*) from South View Aviaries, Burnaby, BC, Canada, for captive breeding.

Written data or comments should be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203 and must be received by the Director within 30 days of the date of this publication.

Documents and other information submitted with these applications are available for review by any party who submits a written request for a copy of such documents to, or by appointment during normal business hours (7:45–4.15) in the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203. Phone: (703/358–2104); FAX: (703/358–2281)

Dated: December 13, 1991.
Margaret Tieger,
Acting Chief, Branch of Permits, Office of Management Authority.

[FR Doc. 91–30247 Filed 12–18–91; 8:45 am]
BILLING CODE 4310–55–M

Emergency Exemption; Issuance

On November 22, 1991, the U.S. Fish and Wildlife Service (Service) issued a permit (PRT–763764) to the Wildlife Waystation to import three female Siberian/Bengal tiger (*Panthera tigris*) hybrids. The 30-day public comment period required by section 10(c) of the Endangered Species Act was waived. The Service determined that an emergency affecting the health and life of the tigers existed and that no reasonable alternative was available to the applicant. The tigers would have been euthanized in New Zealand before the 30-day comment period elapsed.

Dated: December 13, 1991.
Margaret Tieger,
Acting Chief, Branch of Permits, Office of Management Authority.

Availability of Draft Recovery Plans for Solanum drymophilum, Calyptronoma rivalis, Daphnopsis hellerana, and Cornutia obovata for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service announces the availability for public review of draft recovery plans for *Solanum drymophilum, Calyptronoma rivalis, Daphnopsis hellerana,* and *Cornutia obovata*

DATES: Comments on the draft recovery plans must be received on or before February 18, 1992 to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plans may obtain copies by contacting the Southeast Regional Office, Richard B. Russell Federal Building, 75 Spring Street, SW., Atlanta, Georgia 30303. Written comments and materials regarding the plans should be addressed to Field Supervisor at the Caribbean Field Office, Box 491, Boquerón, Puerto Rico 00622. Comments and materials received are available upon request for public inspection, by appointment, during normal business hours at either of the above-mentioned addresses.

FOR FURTHER INFORMATION CONTACT: Susan Silander, Caribbean Field Office, Box 491, Boquerón, Puerto Rico 00622 (809/851-7297).

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the U.S. Fish and Wildlife Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for the recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*) requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised Recovery Plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

Three draft plans for four Puerto Rican plants have been prepared for review. Because *Cornutia obovata* (palo de nigua) and *Daphnopsis hellerana* (no common name) are both found in similar habitats in the limestone hills of the northwestern coast a joint recovery plan has been prepared for these two endangered trees. Only seven individuals of *Corntia obovata* are know to occur in seven different areas. A total of 50 individuals of *Daphnopsis hellerana* are found in three populations in the limestone hills to the west of the San Juan metropolitan area. Among the factors threatening these two species are extensive deforestation and complete elimination of limestone hills by quarrying.

Solanum drymophilum (enrubio) is a small spiny shrub endemic to the lower montane and evergreen seasonal forests of the central and eastern mountains of Puerto Rico. At present only one population of approximately 200 individuals is known to exist. The species has become endangered as a result of deforestation in these mountains, and apparently as a result of intentional eradication of the species in order to avoid possible injury to cattle.

Calyptronoma rivalis (palma de manaca) is an arborescent palm which may reach up to 40 feet in height. It is endemic to Puerto Rico, where it grows along streambanks in the karst region of the island. Three natural populations consisting of approximately 275 individuals are known to occur in Camuy, Quebradillas, and San Sebastian. The species is threatened by flash-flooding caused by deforestation, agricultural expansion and rural development.

All three recovery plans available for review are technical/agency drafts. Among the recovery measures suggested in these documents are land acquisition of privately-owned sites, incorporation of protection measures into Commonwealth Forest management plans, propagation and introduction, research and education.

Public Comments Solicited

The Service solicits written comments on the recovery plans described. All comments received by the date specified above will be considered prior to approval of the plan.

Authority

The authority for this action is Section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: December 9, 1991.

James P. Oland,

Field Supervisor.

BILLING CODE 4310-55-M

Environmental Assessment: Buffalo Lake National Wildlife Refuge, Umbarger, TX

AGENCY: Fish and Wildlife Service (FWS), DOI.

ACTION: Notice of availability for review.

SUMMARY: The FWS is issuing this notice to advise that an environmental assessment for the modification of Umbarger Dam at Buffalo Lake National Wildlife Refuge at Umbarger, Randall County, Texas is available for review. A public meeting will be held on January 15, 1992, in the Student Union Ballroom at West Texas State University, Canyon, Texas, at 7 p.m.

DATES: The EA will be available for public review December 19, 1991. Comments should be submitted to the Associate Manager, (OK/TX), Division of Refuges, Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico, by February 3, 1992.

FOR FURTHER INFORMATION CONTACT: Ms. M. Kathleen Wood, Refuge Program Specialist, Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103, Telephone (505) 766-2036 (ext. 29).

SUPPLEMENTARY INFORMATION: The objectives of the Umbarger Dam modification are (1) eliminate the dam safety deficiencies, and (2) maintain the amount of downstream flood protection that has historically been provided by the dam. Past studies have shown that there is a good chance that Umbarger Dam could fail under heavy flooding conditions. Such a failure would place hundreds of downstream lives in danger, cause millions of dollars in property damage, and impact other downstream resources. The dam safety deficiencies have been mainly related to an inadequate spillway.

All alternatives currently being considered are intended to protect human health and safety by elimination of the dam safety deficiencies. The preferred alternative achieves the project objectives and is one of the more economical solutions. It does not significantly change the existing environmental conditions and actually increases the level of downstream flood protection over that which presently exists. It is designed to provide a dam and reservoir that should not normally impound water. However, this alternative does not eliminate the possible future operation of the facility as a storage reservoir if a viable water supply is located that could be imported into the basin and if the dam is further modified to perform safely as a storage reservoir. Other alternatives include breaching the dam and modifications to allow operation as a water storage reservoir.

Copies of the EA are available for review at the Buffalo lake National Wildlife Refuge, 1 mile south of Umbarger, P.O. Box 179, Umbarger, Texas 79091; FWS Bridge/Dam Safety Office, 145 Union Avenue, Lakewood, CO 80228; the Southwest Regional Office, FWS, 500 Gold SW, P.O. Box 1306, Albuquerque, NM 87103, and the public libraries in Amarillo and Canyon, Texas.

M. Kathleen Wood,

Refuge Program Specialist, Albuquerque, New Mexico.

BILLING CODE 4310-55-M

DEPARTMENT OF JUSTICE

Lodging of Consent Decree

In accordance with section 122 of the Comprehensive Environmental Response, Compensation and Liability Act, as amended ("CERCLA"), 42 U.S.C. 9622, and the policy of the Department of Justice, 28 CFR 50.7, notice is hereby given that a complaint was filed on December 3, 1991, in *United States* v. *Anderson, Greenwood & Co. (for Keystone), et al.*, Civil Action No. H-91-3529, in the United States District Court for the Southern District of Texas, Houston Division, and, simultaneously, three Consent Decrees between the United States, Duane Sheridan, and 116 defendants were lodged with the court. These Consent Decrees settle the government's claims in the complaint pursuant to sections 106 and 107 of CERCLA, 42 U.S.C. 9606, 9607, for (1) injunctive relief to abate an imminent and substantial endangerment to the public health, welfare or the environment because of actual or threatened releases of hazardous substances from a facility located near Hempstead, Waller County, Texas, and known as the "Sheridan Site," and for (2) recovery of response costs incurred by the United States. The complaint alleged, among other things, that certain defendants were owners or operators of the facility at the time of disposal of hazardous substances at the Sheridan Site and that certain defendants were persons who by contract, agreement or otherwise arranged for disposal of hazardous substances at the Site or who arranged for transport of hazardous substances to the Site. The complaint further alleged that the United States has incurred response costs in response to actual or threatened releases of hazardous substances at or from the Sheridan Site.

Under the terms of the proposed Source Control Operable Unit Consent Decree, 111 defendants agree to fund and implement a remedy at the Site that includes bioremediation of sludges and contaminated soil, residue stabilization, installation of a RCRA compliant cap over the pond and dike area, installation of a flexible spur jetty to control erosion of the Brazos River bank, groundwater monitoring, decontamination of all on-site tanks and processing equipment, and treatment of storm water and wastewater before discharge into the Brazos River. The Consent Decree also calls for the defendants to réimburse the United States for $430,000 in past government response costs incurred through December 31, 1988 for oversight at the source control operable unit, and $20,000 for all costs incurred, and to be incurred, with regard to a wildlife mitigation plan.

Under the terms of the proposed Groundwater Operable Unit Consent Decree, 117 defendants (the 111 signatories to the Source Control Operable Unit Consent Decree plus six additional defendants) agree to fund and implement the remedy (i.e., monitor the natural attenuation of contaminants through natural processes such as sorption, dispersion and biodegradation) and pay one hundred percent of the past, present and future costs to the Environmental Protection Agency ("EPA").

Under the terms of the proposed De Minimis Source Control Operable Unit Consent Decree, five defendants (five defendants (five of the six signatories of the Groundwater Operable Unit Consent Decree which failed to sign the Source Control Operable Unit Consent Decree) agree to pay the United States $32,160.00 to be applied toward EPA's future oversight costs.

The Department of Justice will receive comments relating to the proposed Consent Decrees for a period of 30 days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, 10th and Pennsylvania Avenue, NW., Washington, DC 20530. All comments should refer to *United States* v. *Anderson, Greenwood & Co. (for Keystone), et al.*, D.J. Ref. No. 90-11-2-445.

The proposed Consent Decrees may be examined at the following offices of the United States Attorney and the Environmental Protection Agency:

EPA Region VI

Contact: E. Anne Miller, Office of Regional Counsel, U.S. Environmental Protection Agency, Region VI, 1445 Ross Avenue, Dallas, Texas 75202-2733, (214) 655-2120

United States Attorney's Office

Assistant United States Attorney Civil Division, U.S. Courthouse's & Federal Building, 515 Rusk, 3rd floor, Houston, Texas 77002, (713) 229-2600.

Copies of the proposed Consent Decrees may also be examined at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue NW., Box 1097, Washington, DC 20004, (202) 347-2072. A copy of the proposed Consent Decrees may be obtained in person or by mail from the Document Center. In requesting a copy of the Decree, please enclose a check in the amount of $202.50 (25 cents per page reproduction costs), payable to the Consent Decree Library.

Barry M. Hartman,

Acting Assistance Attorney General, Environment and Natural Resources Division.

[FR Doc. 91-30102 Filed 2-18-91; 8:45 am]

BILLING CODE 4410-01-M

Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

Notice is hereby given, that on December 2, 1991, a proposed Partial Consent Decree ("Decree") was lodged with the United States District Court for the Northern District of Illinois in *United States* v. *Standard T. Chemical Company, Inc., et al.*, Civil Action No. 89 C 5730 (N.D. Ill.), between the United States—on behalf of the Environmental Protection Agency ("EPA")—and thirteen of the fourteen entities named as parties defendant in this cost recovery action brought under section 107 of the Comprehensive Environmental Response Compensation and Liability Act ("CERCLA"), 42 U.S.C. 9607.

The subject of the Decree is a CERCLA site located on South Cottage Grove in Chicago, Illinois, known as the

VOL 56 ISS 244 DEC 19 1991 UMI

U.S. Scrap Site ("Site"). The proposed Decree provides, *inter alia*, that the settling defendants pay EPA's Hazardous Substance Trust Fund $310,000 (plus interest) in partial reimbursement of past costs incurred by the United States in undertaking various response actions at the Site. Also, the U.S. Army will cause $5,700 to be paid to the Hazardous Substance Trust Fund in reimbursement of costs incurred by EPA at the Site and in resolution of the CERCLA counterclaims threatened and asserted against the United States in this civil action.

The Department of Justice will receive comments relating to the proposed Decree for 30 days following the publication of this Notice. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. Standard T. Chemical Company, Inc., et al.*, D.J. Ref. No. 90-11-3-465. The proposed Decree may be examined at the Office of the United States Attorney for the Northern District of Illinois, Everett McKinley Dirksen Building, room 1500-S, 219 South Dearborn Street, Chicago, IL 60604, or at the Environmental Enforcement Section Document Center, 601 Pennsylvania Ave. NW., Box 1097, Washington, DC 20004 (202-347-7829). A copy of the proposed Decree may be obtained in person or by mail from the Document Center. In requesting a copy, please enclose a check in the amount of $8.25 (25 cents per page reproduction costs) payable to Consent Decree Library.

John C. Cruden,

Chief, Environmental Enforcement Section, Environmental & Natural Resources Division, United States Department of Justice.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Job Training Partnership Act Title III: State Designations of Entities as Dislocated Worker Units

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: The Department of Labor is publishing for public information an update of a listing of names, addresses, and telephone numbers of entities designated by States as Dislocated Worker Units.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Colombo, Director, Office of Employment and Training Programs, Employment and Training Administration, Department of Labor, room N-4469, 200 Constitution Avenue, NW., Washington, DC 20210. Telephone: 202-535-0577 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: Title III of the Job Training Partnership Act (JTPA) provides that the Department of Labor (Department) shall fund programs for States to assist dislocated workers. Section 311(b)(2) of JTPA provides that a State will designate or create an identifiable State Dislocated Worker Unit (DWU) or office with the capability to respond rapidly, onsite, to permanent plant closures and substantial layoffs throughout the State. The DWU is a key feature of the States' implementation of programs under Title III.

Periodic updates of this listing will be published, based on revisions received by the Department.

Signed at Washington, DC, this 26th day of November, 1991.

Dated:

Roberts T. Jones,

Assistant Secretary of Labor.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Biotic Systems and Resources; Meeting

SUMMARY: In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to review and evaluate proposals and provide advice and recommendations as part of the selection process for award. Because the proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries, and personal information concerning individuals associated with proposals, the meeting is closed to the public. These matters are within exemptions (4) and (6) of U.S.C. 552b (c), Government in the Sunshine Act.

Name: Special Emphasis Panel in Biotic Systems and Resources.

Dates & Times: January 13–15, 1992; 8:30 a.m. to 5 p.m.

Location: National Science Foundation, 1800 G Street, NW., Washington, DC 20550; room 543.

Type of Meeting: Closed.

Agenda: Review and evaluate Conservation and Restoration Biology Proposals.

Contact Person: Joann Roskoski, Associate Program Manager, Ecology Program, room 215, National Science Foundation, Washington, DC 20550. (202) 357–9734.

Dated: December 16, 1991.

Special Emphasis Panel in Cross-Disciplinary Activities; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting:

Name: Special Emphasis Panel in Cross-Disciplinary Activities

Date and Time: January 9, 1992; 8:30 a.m. to 5 p.m.

Place: University of Michigan, Department of Electrical Engineering and Computer Science, Ann Arbor, Michigan 48109.

Type of Meeting: Closed.

Contact Person: John C. Cherniavsky, Head, Office of Cross-Disciplinary Activities, room 436, National Science Foundation, Washington, D.C. 20550. Telephone: (202) 357–7349.

Purpose of Meeting: To provide advice and recommendations concerning a research proposal submitted to NSF for financial support.

Agenda: Site visit to review and evaluate the University of Michigan's research proposal.

Reason for Closing: The proposal being reviewed includes information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions 4 and 6 of 5 U.S.C. 552 b. (c) (4) and (6) the Government in the Sunshine Act.

Dated: December 16, 1991.

M. Rebecca Winkler,
Committee Management Officer.

Special Emphasis Panel in Design and Manufacturing Systems; Meeting

SUMMARY: In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to review and evaluate proposals and provide advice and recommendations as part of the selection process for awards. Because the proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with proposals, the meetings are closed to the public. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Name: Special Emphasis Panel in Design and Manufacturing Systems

Date/Time: January 14, 1992—8:30 a.m. to 5 p.m.

Place: Rooms 500-D & E, 1110 Vermont Ave., NW., Washington, DC.

Type of Meeting: Closed.

Agenda: Review and evaluate Manufacturing Processes and Equipment unsolicited proposals.

Contact: Dr. Bruce Kramer, Program Director, Materials Processing and Manufacturing or Dr. Suren Rao, Program Director, Manufacturing Machine and Equipment, Division of Design and Manufacturing Systems, National Science Foundation, room 1128, Washington, DC 20550 (202) 357–7676.

Dated: December 16, 1991.

M. Rebecca Winkler,
Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements; Office of Management and Budget Review

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the Office of Management and Budget (OMB) review of information collection.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

1. Type of submission, new, revision, or extension: Revision
2. The title of the information collection: Personal Qualification Statement—Licensee
3. The form number if applicable: NRC Form 398
4. How often the collection is required: On occasion and every six years (at renewal).
5. Who will be required or asked to report: Individuals requiring a license to operate the controls at a nuclear facility.
6. An estimate of the number of responses: 1867 annually
7. An estimate of the total number of hours needed to complete the requirement or request: 2,333; approximately 1.4 hours per response.
8. An indication of whether section 3504(h), Public Law 96–511 applies: Not applicable
9. Abstract: NRC Form 398 requests detailed information that should be submitted by a licensing candidate when applying for a new or renewal license to operate the controls at a nuclear facility. This information, once collected, would be used for licensing actions and for generating reports on the Operator Licensing Program.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, NW., Lower Level, Washington, DC 20555.

Comments and questions should be directed to the OMB reviewer: Ronald Minsk, Office of Information and Regulatory Affairs (3150–0090), NEOB–3019, Office of Management and Budget, Washington, DC 20503.

Comments can also be submitted by telephone at (202) 395–3084.

The NRC Clearance Officer is Brenda J. Shelton, (301) 492–8132.

Dated at Bethesda, Maryland, this 6th day of December 1991.

For the Nuclear Regulatory Commission.

Gerald F. Cranford,

Designated Senior Official for Information Resources Management.

[FR Doc. 91–30310 Filed 12–18–91; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–213]

Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment of Facility Operating License No. DPR-61, issued to Connecticut Yankee Atomic Power Company (CYAPCO, the licensee), for operation of the Haddam Neck Plant, located in Middlesex County, Connecticut.

Environmental Assessment

Identification of the Proposed Action

The proposed amendment will revise various sections of the Technical Specifications (TS) to reflect the conversion to a Zircaloy-clad fuel assembly design and the prohibition of three loop operation for Modes 1 and 2. The Technical Specification changes will allow for the use of Zircaloy-clad fuel assemblies in the reactor core. The proposed action is in accordance with the licensee's amendment request dated June 27, 1991.

The Need for the Proposed Action

During the upcoming refueling for Cycle 17 CYAPCO will begin to use Zircaloy-clad fuel instead of stainless steel clad fuel. The plan needs these TS changes to support the operation of the Haddam Neck Plant for Cycle 17.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revision to the TS. The acceptability of the use of Zircaloy-clad fuel for Cycle 17 was based on NRC's review of considerations in the areas of mechanical, nuclear, and thermalhydraulic design. In addition, the non-loss-of-coolant accident (LOCA) transient analyses have been reevaluated for the Zircaloy-clad fuel design and the plant response has been found to be unaffected. The small and large break analyses is being reviewed by the staff for conformance with 10 CFR 50.46 and appendix K. These TS changes will only allow the Zircaloy-clad fuel to be loaded into the core. The plant will not be allowed to operate with the Zircaloy-clad fuel until the small and large break LOCA analyses are reviewed and approved. In addition, since the reanalyses were not performed for three-loop operation, three-loop operation is not allowed for Cycle 17.

The TS change will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Therefore, the Commission concludes that there are no significant radiological environmental impacts associated with the prod TS amendment.

With regard to potential nonradiological impacts, the proposed amendment does involve features located entirely within the restricted area as defined in 10 CFR part 20. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed amendment.

Alternatives to the Proposed Action

Since the Commission has concluded there is no measurable environmental impact associated with the proposed amendment, any alternatives with equal or great environmental impact need not be evaluated. The principal alternative to the amendment would be to deny the amendment request. Such action would not enhance the protection of the environment.

Alternative Use of Resources

This action does not involve the use of resources not considered previously in the Final Environmental Statement for Haddam Neck.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of no Significant Impact

Based upon the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed amendment.

For further details with respect to this proposed action, see the licensee's letter dated June 27, 1991. This letter is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Russell Library, 123 Broad Street, Middletown, Connecticut 06547.

Dated at Rockville, Maryland, this 11th day of December 1991.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, Project Directorate I–4, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards, Subcommittees on Safety Philosophy, Technology, and Criteria/ Severe Accidents/Regulatory Policies and Practices; Meeting

The Subcommittees on Safety Philosophy, Technology, and Criteria, Severe Accidents/Regulatory Policies and Practices will hold a joint meeting on January 7–8, 1992, room P–110, 7920 Norfolk Avenue, Bethesda, MD.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Tuesday, January 7, 1992—8:30 a.m. until the conclusion of business

Wednesday, January 8, 1992—8:30 a.m. until the conclusion of business.

The Subcommittees will discuss a number of interrelated proposed staff position papers as follows: (1) Proposed Revision to 10 CFR part 100, Decoupling Siting from Design, (2) Site Characteristics to be Used in part 100 Revision and Large Release Determination, (3) Proposed Definition of a Large Release for Safety Goals Implementation (tentative) and (4) Proposed Revision to TID–14844 to Update Source Term.

Oral statements may be presented by members of the public with the concurrence of the Subcommittees Chairmen; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittees, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittees, along with any of their consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittees will then hear presentations by and hold discussions with representatives of the NRC staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been cancelled or rescheduled, the Chairmen's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the Designated Federal Official, Mr. Dean Houston (telephone 301/492–9521) between 7:30 a.m. and 4:15 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., that may have occurred.

Dated: December 13, 1991.

Gary R. Quittschreiber,

Chief, Nuclear Reactors Branch.

[Docket No. 50-213]

In the Matter of Connecticut Yankee Atomic Power Co. (Haddam Neck Plant); Exemption

I

The Connecticut Yankee Atomic Power Company (CYAPCO, the licensee) is the holder of Facility Operating License No. DPR-61 which authorizes operation of the Haddam Neck Plant. The license provides, among other things, that the Haddam Neck Plant is subject to all rules, regulations, and Orders of the Commission now or hereafter in effect.

The plant is a single-unit pressurized water reactor at the licensee's site located in Middlesex County, Connecticut.

II

One of the conditions of all operating licenses for water-cooled power reactors, as specified in 10 CFR 50.54(o), is that primary reactor containments shall meet the containment leakage test requirements set forth in 10 CFR part 50, appendix J. More specifically, Section III.C, in part, requires that:

Section III.C, Type C tests—1. Test method

Type C tests shall be performed by local pressurization. The pressure shall be applied in the same direction as that when the valve would be required to perform its safety function, unless it can be determined that the results from the tests for a pressure applied in a different direction will provide equivalent or more conservative results.

By letters dated April 28 and September 8, 1989 as amended by letter dated October 19, 1990, CYAPCO requested exemptions for eight penetrations from the above requirements. For penetrations P-3 and P-8, CYAPCO has requested an exemption from all requirements of Section III.C and for penetrations P-4, P-14, P-33, P-62, P-78 and P-80, CYAPCO has requested an exemption from Section III.C.1 to allow reverse direction testing.

III

By letters dated April 28 and September 8, 1989, the licensee requested exemptions from the requirements of 10 CFR part 50, appendix J, Section III.C, for 18 penetrations. By letter dated October 19, 1990, the licensee withdrew the exemption request for 10 penetrations. The licensee stated that the 10 penetrations would be modified to meet the requirements in Section III.C. In this section, the staff has evaluated the penetrations separately. Most of these eight penetrations were previously reviewed in the staff's Safety Evaluation for a schedular exemption from Appendix J dated September 29, 1987. The staff's conclusions for each penetration is addressed below. More details are contained in the NRC staff's related Safety Evaluation issued concurrent with this Exemption.

Section III.C, Type C tests

The licensee has requested permanent exemptions for the following penetrations:

P-3—High-Pressure Safety Injection
P-4—Pressurizer Relief Tank Vent
P-14—Vapor Seal Head Tank
P-80—Auxiliary Spray From Fire System

1. Penetration P-3

The containment isolation valves (CIVs) for this penetration consist of five valves in parallel inside containment, four of which are check valves and the fifth a locked-closed manual valve, SI-V-860. The licensee has requested an exemption from the requirement that the check valves be tested with air instead of water and that valve SI-V-860 be exempted from all Type C requirements.

The licensee has shown that all four check valves will be sealed with water at a pressure greater than 1.1 Pa (calculated peak containment pressure during design basis loss of coolant accident [LOCA]) and that the water seal can be maintained for at least 30 days. Based on the above, the staff has concluded that these check valves need not be exempted from the requirements of Section III.C.2 and III.C.3. Local leak rate testing of these check valves with water is an acceptable test for appendix J.

SI-V-860 is a locked-closed manual valve. It is water sealed with an ultimately unlimited supply of seal water from the containment sump. The configuration of the system is such that all leakage through this valve during a LOCA would be water going back into containment. The NRC concludes that any leakage through this valve is of no consequence since it is returned to the containment. Based on the above, the staff concludes that a permanent exemption from all Type C testing requirements of appendix J for valve SI-V-860 is acceptable.

2. P-4—Pressurizer Relief Tank Vent

The licensee has proposed to test CIV WG-TV-1845 in the reverse-direction. The orientation of this valve is such that the reverse-direction testing tends to push the disk out of its seat and therefore tends to provide a more conservative or at least equivalent result when compared to the forward direction testing. However, reverse-direction testing does not include leak testing of the stem packing, body-to-bonnet joint, or a flanged pipe joint on the containment side of the valve.

The licensee has stated there are two compensating factors:

a. The stem/bonnet will be exposed to the Type A test (containment integrated leak rate test) pressure every 3 to 4 years, and

b. The containment side of WG-TV-1845 is normally exposed to the pressurizer relief tank nitrogen blanket pressure of approximately 3 psig during normal power operation.

The staff agrees that the containment integrated leak rate test and the maintenance of the 3 psig overpressure in the pressurizer relief tank during power operation will provide reasonable assurance of the leak-tight integrity of the stem/bonnet boundaries. In addition, the licensee has agreed to soap bubble test the pressurized stem/bonnet boundaries of the valve at the frequency for the Type C test at the pressurizer relief tank pressure and during each Type A tests at Pa. Based on the above, the staff finds that a permanent exemption from the requirement of Section III.C.1, "equivalent of more conservative results" of appendix J is acceptable and, therefore, CIV WG-TV-1845 can be tested in the reverse-direction.

3. P-14—Vapor Seal Head Tank

The licensee has proposed to test CIV DH-TV-1843 in the reverse-direction. This is a 1½-inch double-seated valve with socket weld ends (thus, no pipe flanges to test). It is oriented such that the stem packing and body-to-bonnet joint are included in the reverse-direction testing. The licensee states since this value has a balanced port design, being a double-plug flow control valve, the direction of the pressurization should have no effect on disc/seat leak-tightness. The staff agrees with the licensee's assertion that testing in either direction should give equivalent results. Based on the above, the staff concludes that the reverse-direction testing of this valve is in accordance with the requirements of appendix J and no exemption is needed.

4. P-80—Auxiliary Spray From Fire System

By letter dated September 29, 1987, the staff granted a permanent exemption for this penetration. This exemption did not consider the possibility that the stem/bonnet boundaries on the containment side of CIV RH-MOV-31 may be omitted from reverse-direction testing. The licensee has concluded that this potential leak path needs to be addressed and therefore requested this modification to their exemption. The Type A test procedure blanks and vents the outboard side of RH-MOV-31 to establish proper differential pressure across penetration P-80. However, the inboard side of the RH-MOV-31 may not be exposed to the Type A pressurization if check valve RH-CV-35 (which is not a CIV) inside containment is leak tight. The licensee proposes to amend its Type A test procedures to open a capped line inside containment between RH-MOV-31 and RH-CV-35 to assure direct pressurization of CIV RH-MOV-31 in future containment integrated leak rate tests. In addition, the licensee has agreed to soap bubble check the pressurized stem/bonnet boundaries of the CIV RH-MOV-31 during Type A test. Based on the above, the staff concludes that the previously granted permanent exemption from appendix J is still valid with the added condition that licensee be required to soap bubble check the pressurized stem/bonnet boundaries during the Type A test. The typical acceptance criterion of zero bubbles for such checks would provide a direct indication of the leak-tightness of the stem/bonnet.

IV

Pursuant to 10 CFR 50.12(a)(2), the Commission will not consider granting an exemption unless special circumstances are present. Item (ii) of the subject regulation includes special circumstances where application of the subject regulation is not necessary to achieve the underlying purpose of the rule.

As discussed previously, the NRC has concluded for penetration P-3 that the valve is under a constant water seal during a LOCA by the safety injection systems. The leak rate does not affect the radiological consequences to the public during a LOCA because the system configuration is such that all leakage is returned to the containment. Therefore, the staff concludes that Type C leak testing of penetration P-3 is not necessary to meet the underlying purpose of the rule in that all leakage during a LOCA would be water going into containment rather than air coming out.

For Penetration P-4, the NRC has concluded that the reverse-direction testing in conjunction with the containment integrated leak rate test and the fact that the system design in such that the penetration must maintain a 3 psig overpressure in the pressurizer relief tank, provides adequate assurance that this valve is leak tight. Additionally, the licensee has agreed to soap bubble the stem/bonnet boundaries of the valve at a frequency for the Type C test at the pressurizer relief tank pressure and during the Type A test at Pa. Based on the above, the staff concludes that a permanent exemption for penetration P-4 for reverse-direction testing with the compensatory measures satisfies the underlying purpose of the rule.

For penetration P-80, the staff has concluded that given the system configuration, any significant leakage through this valve into containment would be detected because it would lead to spray down of containment. In a sense this valve is under continuous test (maintenance of the fire water system pressure boundary). The staff has concluded that this system configuration with the reverse-direction Type C test with water provides adequate assurance that this valve is leak tight. The licensee has stated they will flange the fire water system outside of containment and open a capped line inside of containment during the containment integrated leak rate test to assure the CIV RH-MOV-31 will be exposed to the required Type A test differential pressure. In addition, the licensee has agreed to soap bubble the stem/bonnet boundaries during the Type A test. Based on the above, the staff concludes that a permanent exemption for penetration P-80 for reverse-direction testing with the compensatory measures satisfies the underlying purpose of the rule.

V

Accordingly, the Commission has determined that pursuant to 10 CFR 50.12, the exemption is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the public interest. Therefore, the Commission hereby approves the following exemption request.

Permanent exemptions are hereby granted from the requirement of 10 CFR part 50, appendix J, Section III.C for penetration P-3 and Section III.C.1 for penetrations P-4 and P-80.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will have no significant impact on the environment (56 FR 64528).

This exemption is effective upon issuance.

Dated at Rockville, Maryland this 11th day of December 1991.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Director, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

DEPARTMENT OF STATE

[Public Notice 1537]

Secretary of State's Advisory Committee on Private International Law; Study Group on Intercountry Adoption; Meeting

The second meeting of the Study Group on Intercountry Adoption will take place on Friday, January 10, 1992 from 9:30 a.m. to about 5 p.m. in Conference Room 1107 of the State Department building in Washington, DC.

The purpose of the meeting is to review the tentative draft convention on international cooperation and protection of children in respect of intercountry adoption prepared by a special commission on intercountry adoption of the Hague Conference on Private International Law. The tentative draft convention, prepared by this special commission at its session in April/May 1991 and modified by a drafting committee in September 1991, will form the basic working document for the third and last preparatory session of The Hague Conference's special commission on February 3–14, 1992. The results of the February session will be the draft convention that will form the basic working document of the session of The Hague Conference itself (diplomatic conference) in Spring 1993.

Among the questions to be reviewed at the Study Group meeting in January for the purpose of providing guidance to the U.S. delegation to sessions at The Hague are the scope of application of the convention, how to deal with simple adoptions under the law of certain states of origin, how the convention may deal with "independent" or "private" adoptions, the criteria and flexibility of the convention with regard to licensing or accreditation of adoption services providers, the required procedures set out for intercountry adoptions, the recognition of adoptions pursuant to the convention, and the possible need for provisions to deal with the law applicable to certain aspects of intercountry adoptions.

Copies of the relevant documents for the meeting may be requested from the Legal Adviser's Office by contacting Peter H. Pfund at (202) 653–9851, by fax at (202) 632–5283, or by writing the Office of the Legal Adviser (L/PIL),

1991
UMI

Suite 501, 2100 K Street NW., Washington, DC 20037–7180.

The meeting will be held in Conference Room 1107 at the State Department; participants should use only the diplomatic entrance at 22nd and C Streets, NW., for this meeting. Members of the general public may attend up to the capacity of the meeting room. As the room capacity is limited and access to the building is controlled, the office indicated above should be notified no later than Friday, January 3, 1992 of the name, affiliation, address and phone number of persons wishing to attend. Persons whose names have been so notified will be helped in gaining admission to the building on January 10 for the beginning of the meeting. In order to facilitate planning, members of the public are requested to indicate particular issues on which they expect to comment. Persons interested but unable to attend the meeting are welcome to submit written comments or proposals to the address/fax number indicated above.

Dated: December 11, 1991.

Peter H. Ffund,

Vice-Chair, Secretary of State's Advisory Committee on Private International Law.

BILLING CODE 4710–08–M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Fitness Determination of Aviation Services West, Inc.; d/b/a Lake Powell Air Service, d/b/a Cedar City Air Service, d/b/a Kanab Air Service, d/b/a Arizona Air, d/b/a St. George Air Service

AGENCY: Department of Transportation.

ACTION: Notice of Commuter Air Carrier Fitness Determination—Order 91–12–23, Order to Show Cause.

SUMMARY: The Department of Transportation is proposing to find that Aviation Services West, Inc. d/b/a Lake Powell Air Service d/b/a Cedar City Air Service d/b/a Kanab Air Service d/b/a Arizona Air d/b/a St. George Air Services is fit, willing, and able to provide commuter air service under section 419(e) of the Federal Aviation Act.

RESPONSES: All interested persons wishing to respond to the Department of Transportation's tentative fitness determination should file their responses with the Air Carrier Fitness Division, P–56, Department of Transportation, 400 Seventh Street, SW., room 6401, Washington, DC 20590, and serve them on all persons listed in Attachment A to the order. Responses shall be filed no later than December 30, 1991.

FOR FURTHER INFORMATION CONTACT: Mrs. Kathy Lusby Cooperstein, Air Carrier Fitness Division (P–56, room 6401), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366–2337.

Dated: December 13, 1991.

Patrick V. Murphy, Jr.,

Deputy Assistant Secretary for Policy and International Affairs.

[FR Doc. 91–30284 Filed 12–18–91; 8:45 am]

BILLING CODE 4910–62–M

Federal Aviation Administration

Proposed Advisory Circular 25.1523–1, Minimum Flightcrew

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Availability of Proposed Advisory Circular (AC) 25.1523–1 and request for comments.

SUMMARY: This notice announces the availability of and requests comments on a proposed advisory circular (AC) which provides a method of compliance with the requirements of § 25.1523 of the Federal Aviation Regulations (FAR) which contain the certification requirements for the determination of minimum flightcrew on transport category airplanes. This notice is necessary to give all interested persons an opportunity to present their views on the proposed AC.

DATES: Comments must be received on or before April 20, 1992.

ADDRESSES: Send all comments on proposed AC to: Federal Aviation Administration, attention: Transport Standards Staff, ANM–110, Northwest Mountain Region, 1601 Lind Avenue SW., Renton, Washington 98055–4056. Comments may be inspected at the above address between 7:30 a.m. and 4 p.m. weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jan Thor, Transport Standards Staff, at the address above, telephone (206) 227–2127.

SUPPLEMENTARY INFORMATION:

Comments Invited

A copy of the draft AC may be obtained by contacting the person named above under **"FOR FURTHER INFORMATION CONTACT."** Interested persons are invited to comment on the proposed AC by submitting such written data, views, or arguments as they may desire. Commenters should identify AC 25.1523–1 and submit comments, in duplicate, to the address specified above. All communications received on or before the closing date for comments will be considered by the Transport Standards Staff before issuing the final AC.

Background

In early 1981, the President established a task force on aircraft crew complement which was directed to make "its recommendation whether operation of the new generation of commercial jet transport airplanes by two-person crews is safe and certification of such airplanes is consistent with the Secretary's duty under the certification provisions of the Federal Aviation Act of 1958 to promote flight safety." Several recommendations were made in the Report of the President's Task Force on Aircraft Crew Complement, dated July 2, 1981, including one that suggested that the agency complete and keep current section 187 (Minimum Flightcrew) of FAA Order 8110.8, Engineering Flight Test Guide for Transport Category Airplanes. The agency decided to publish the entire contents of the Order in advisory circulars to make such material formally available to the general public. Advisory Circular 25.1523–1 is one of the ACs developed as a result of this decision.

A notice announcing the availability of and requesting comments on draft AC 25.1523 was published in the **Federal Register** on May 12, 1986 (51 FR 17435). The comment period closed on August 11, 1986. In mid-1987, the FAA met with pilot groups, aircraft manufacturers, operators, and flight attendants to solicit comments and ideas related to crew complement issues. This was done in anticipation of two major certification programs involving new two-pilot aircraft: the McDonnell Douglas MD–11 and the Boeing 747–400. The knowledge gained through this process was effectively used in the 747–400 and MD–11 minimum flightcrew evaluations. As a result of the comments received from industry (both from the original publication of the subject AC and the above-referenced meetings), and recommendations that resulted from the USAF/FAA-sponsored "Workload Measurement Techniques" contract, the draft AC was revised extensively, and is being made available once again for public comment.

Issued in Renton, Washington, on December 11, 1991.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service, ANM–100.

BILLING CODE 4910–13–M

Huntsville International Airport, AL; Notice of Intent To Rule on Application

AGENCY: Federal Aviation Administration, DOT.

ACTION: Correction to Notice of Intent to Rule on Application to Impose a Passenger Facility Charge (PFC) at the Huntsville International Airport, Huntsville, Alabama.

SUMMARY: This correction incorporates information from the public agency's application and date which FAA action is required.

In notice document 91–26915 beginning on page 61471 in the issue of Tuesday, December 3, 1991, make the following corrections:

1. In the first column, "March 12, 1992" should read "March 7, 1992".

2. In the second column, "Total Estimated PFC Revenue: $24,617,126" should read "Total Estimated PFC Revenue: $36,472,657".

Issued in Atlanta, Georgia, on December 11, 1991.

Marisue Haigler,

Assistant Manager, Airports Division, Southern Region.

BILLING CODE 4910–13–M

National Highway Traffic Safety Administration

[Docket No. 91–64–IP–No. 1]

Mazda (North America), Inc.; Receipt of Petition for Determination of Inconsequential Noncompliance

Mazda (North America), Inc. (Mazda) of Washington, DC, has determined that some of its vehicles fail to comply with 49 CFR 571.108, "Lamps, Reflective Devices, and Associated Equipment" (Standard No. 108), and has filed an appropriate report pursuant to 49 CFR part 573. Mazda has also petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) on the basis that the noncompliance is inconsequential to motor vehicle safety.

This notice of receipt of a petition is published under section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decision or other exercise of judgement concerning the merits of the petition.

During the period of April 1990 to May 1991, Mazda installed certain rear combination lamps on 43,239, 1990 and 1991 model year MX–5 passenger cars. In the manufacturing process of these rear combination lamps, some lamps lack a sufficient quantity of reflecting paint on the inner surface of the turn signal lamp body. As a result, there is the possibility that the turn signal lamps on these vehicles do not comply with the photometric requirements of Standard No. 108.

Paragraph S5.1.1.11 of Standard No. 108 specifies that a turn signal lamp shall meet a minimum percentage of a corresponding minimum value of lighting intensity for each of 19 designated test points. Paragraph S.5.1.1.12 of Standard No. 108 specifies that a turn signal lamp is not required to meet this minimum photometric value at each test point, if the sum of the percentages of the minimum lighting intensity measured at the test points is not less than those specified for each of five different groups of the test points.

Mazda provided test data on three samples of the subject turn signal lamps, which show that the lamps do not meet minimum intensity requirements at five of the 19 test points specified in S5.1.1.11 of Standard 108. At test point 5U–V the minimum intensity is 113.8 candela (cd), while the minimum values measured on the three lamps ranged from 75.3 cd to 89.6 cd. At test points H–5L, H–V, and H–5R the minimum required value is 130 cd, while the minimum values measured on the three lamps ranged from 108.9 cd to 116.6 cd. At test point 5D–V the minimum required value is 113.8 cd, while the minimum values measured on the three lamps ranged from 94.5 cd to 103.1 cd. In addition to not meeting minimum lighting intensity requirements at these five test points, the data provided by Mazda show that the turn signal lamps do not meet minimum requirements when the test points are grouped as specified in S5.1.1.12.

Mazda supports its petition for inconsequential noncompliance with the following:

1. The overall candela output level provided by the subject turn signal lamps exceeds the minimum value required by Standard 108.

Of the 19 test points, only 5 are below the minimum candela output level, ranging from 66.0 percent to 90.4 percent of the required value. However, the sum of the candela measured at all 19 test points is 22.7 percent to 26.8 percent more than the sum of the required value. The sum of the measured candela ranges from 1365.9 cd to 1410.6 cd, and the sum of the required candela is 1112.4 cd.

Of the five groups of test points specified in S5.1.1.12, only Group Three has a total candela output level which is below the required value. Group Three is 14.2 percent to 17.6 percent less than the required value. However, the sum of the candela output for Group Three, along with that of Groups Two and Four which are close to Group Three, exceeds the required value. The sum of the measured candela for Groups Two, Three, and Four ranges from 1014.2 cd to 1065.6 cd, and the sum of the required values for these three groups is 943.2 cd.

2. "The performance of the subject turn signal lamps is adequate in all regards. To confirm the photometric performance of the subject lamp, Mazda conducted jury evaluation comparing the illumination visibility of the subject lamp with a proper one which provides candela output marginally exceeding [Standard] 108 minimum requirements. In this evaluation, ten observers evaluated the subject lamp with the light turned on and by viewing from each 2, 5, 10, and 30 [meters] backward. There was no difference * * *, and it was judged that [the turn signal lamp] has no problem on visibility and signaling performance."

3. Mazda has not received any owner complaints, field reports, or allegation of hazardous circumstances relating to the illumination or signaling capability of these turn signal lamps.

4. There is no possibility that the performance of the lamps will worsen with vehicle usage.

5. Existence of the manufacturing error which produced this problem was eliminated in May 1991, because an exclusive manufacturing line was set up for the subject lamp at that time.

Interested persons are invited to submit written data, views, and arguments on the petition of Mazda, described above. Comments should refer to the Docket Number and be submitted to: Docket Section, National Highway Traffic Safety Administration, room 5109, 400 Seventh Street, SW., Washington, DC, 20590. It is requested but not required that six copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, the Notice will be published in the

BILLING CODE 4810-31-M

Bureau of Alcohol, Tobacco and Firearms

Granting of Relief, Federal Firearms Privileges

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF).

ACTION: Notice of granting of restoration of federal firearms privileges.

SUMMARY: The persons named in this notice have been granted restoration of their Federal firearms privileges by the Director, Bureau of Alcohol, Tobacco and Firearms.

As a result, these persons may lawfully acquire, transfer, receive, ship, and possess firearms if they are in compliance with applicable laws of the jurisdiction in which they live.

FOR FURTHER INFORMATION CONTACT: Special Agent in Charge Karl Stankovic, Firearms Enforcement Branch, Firearms Division, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226, (202-927-7770).

SUPPLEMENTARY INFORMATION: In accordance with 18 U.S.C. 925(c), the persons named in this notice have been granted restoration of Federal firearms privileges with respect to the acquisition, transfer, receipt, shipment, or possession of firearms. These privileges were lost by reason of their convictions of crimes punishable by imprisonment for a term exceeding one year or because they otherwise fell within a category of persons prohibited by Federal law from acquiring, transferring, receiving, shipping or possessing firearms.

It has been established to the Director's satisfaction that the circumstances regarding the applicants' disabilities and each applicant's record and reputation are such that the applicants will not be likely to act in a manner dangerous to public safety, and that the granting of the restoration will not be contrary to the public interest.

The following persons have been granted restoration:

Affeldt, Robert Douglas, 203 Wass Street, Fenton, Michigan, convicted on July 9, 1986, in the United States District Court, Flint, Michigan.

Albright, Walter John, 83 Bigelow Street, Pittsburgh, Pennsylvania, convicted on March 11, 1964, in the Court of Oyer, Alleghany County, Pennsylvania.

Compliance With Executive Order 12291

It has been determined that this notice is not a "major rule" within the meaning of Executive order 12291, because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in cost or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Signed: November 26, 1991.

Stephen E. Higgins,

Director.

UNITED STATES INFORMATION AGENCY

Library/Book Fellows Program

AGENCY: United States Information Agency.

ACTION: Notice of intent to negotiate a grant renewal with the American Library Association.

SUMMARY: Subject to the availability of funds, the United States Information Agency (USIA) intends to negotiate a grant renewal, on a noncompetitive basis, with the American Library Association. This grant, in the amount of approximately $400,000, will enable the American Library Association to continue the management of the Library/Book Fellows Program, which places American library and publishing professionals in foreign institutions for periods of four to twelve months to carry out projects important to long-term U.S. and host-country interests. Projects are designed to increase international access to information, and to strengthen mutual understanding between the U.S. and other societies through sharing of professional knowledge and through the development of personal and institutional linkages between American professionals and those of other countries. Under this grant, the American Library Association will recruit, evaluate, and select participants, arrange participants' travel and orientation, and monitor progress and evaluate the effectiveness of each fellowship project.

Overall authority for these exchanges is contained in the Mutual Educational and Cultural Exchange Act of 1961, as amended, Public Law 87-256 (Fulbright-Hays Act).

PUBLIC RESPONSE: This announcement is not a request for competitive proposals. However, interested persons may indicate their interest and capability to respond to the requirement. Information received as a result of the notice will be considered solely for the purpose of determining whether to open the requirement to competition. A determination not to open the requirement to competition based upon responses to this notice is within the discretion of the United States Information Agency.

DATES: Public response to this notice must be received at the United States Information Agency by 5 p.m., Eastern Standard Time on January 10, 1992. Faxed documents will not be accepted, nor will documents postmarked on January 10, 1991, but received at a later date. The grant period is to begin in January 1992.

ADDRESSES: Public response should be addressed to: United States Information Agency; Reference: Library/Book Fellows Program; Office of the Executive Director E/X; room 336; 301 4th Street SW., Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Mary Boone or Helen Amabile, United States Information Agency; Library Programs Division E/CL; room 314; 301 4th St. SW., Washington, DC 20547. Telephone (202) 619-4915.

Dated: December 12, 1991.

Barry Fulton,

Deputy Associate Director, Bureau of Educational and Cultural Affairs.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 61

[FRL 4034-1]

National Emission Standards for Hazardous Air Pollutants; Polonium-210 Emissions From Elemental Phosphorus Plants

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This final rule announces the Administrator's decision modifying 40 CFR part 61, subpart K, the National Emission Standard for Hazardous Air Pollutants ("NESHAP") for Radionuclide Emissions from Elemental Phosphorus Plants (54 FR 51699 December 15, 1989. In this final rule, subpart K is amended to permit elemental phosphorus plants an alternative means of demonstrating compliance with the standard. Under the previous standard, an elemental phosphorus plant has to ensure that total emissions of polonium-210 from that facility did not exceed 2 curies per year. Under this amendment, an elemental phosphorus plant will be in compliance if it limits polonium-210 emissions to 2 curies per year. However, in the alternative, the plant may demonstrate compliance by: (1) Installing a Hydro-Sonic® Tandem Nozzle Fixed Throat Free-Jet Scrubber System [1] including four scrubber units, (2) operating all four scrubber units continuously with a minimum average over any 6-hour period of 40 inches (water column) of pressure drop across each scrubber during calcining of phosphate shale, (3) scrubbing emissions from all calciners and/or nodulizing kilns at the plant, and (4) limiting total emissions of polonium-210 from the plant to no more than 4.5 curies per year. EPA proposed this modified standard for elemental phosphorus plants as a result of settlement discussions between EPA and the FMC Corporation ("FMC") in *FMC Corporation* v. *U.S. Environmental Protection Agency*, Docket No. 90-1057 in the D.C. Circuit Court of Appeals, a judicial action by FMC challenging subpart K as it was originally promulgated.

DATES: This rule is effective December 13, 1991. The provisions in this rule will be applied immediately to all affected facilities including existing sources. Under section 307(b)(1) of the Clean Air Act (CAA), judicial review of this amended standard is available only by filing a petition for review in the United States Court of Appeals for the District of Columbia Circuit within 60 days of publication of this rule. Under section 307(b)(2) of the CAA, the provisions which are the subject of today's notice will not be subject to judicial review in any civil or criminal proceedings brought by EPA to enforce these requirements.

FOR FURTHER INFORMATION CONTACT: Craig Conklin, Environmental Standards Branch, Criteria and Standards Division (ANR-460W), Office of Radiation Programs, Environmental Protection Agency, Washington DC 20406. (703) 308-8755.

SUPPLEMENTARY INFORMATION:

Petition for Reconsideration

No objection to this rule which was not raised with reasonable specificity during the public comment period may be raised as part of any judicial review of this rule. If a party contends that it was impracticable to raise an objection during the comment period and that such objection is of central relevance to the outcome of the rule, that party may submit a petition for reconsideration pursuant to Clean Air Act section 307(d)(7)(B).

Docket

The rulemaking record is contained in Docket No. A-91-51 and contains information on pilot scrubber test results, the settlement agreement between EPA and FMC, information considered in determining health effects, and other information used in revising the standard. It also contains all comments received from the public during the comment period. The docket is available for public inspection and copying between 8 a.m. and 3 p.m. on weekdays. A reasonable fee may be charged for copying.

I. Definitions

A. Terms

Activity—The amount of a radioactive material. It is a measure of the transformation rate of radioactive nuclei at a given time. The customary unit of activity, the curie, is 3.7×10^{10} nuclear transformations per second.

Half-Life—The time in which half the atoms of a particular radioactive substance transform, or decay, to another nuclear form.

Incidence—This term denotes the predicated number of fatal cancers in a population from exposure to a pollutant. Other health effects (non-fatal cancers, genetic, and developmental) are noted separately.

Maximum Individual Risk—The maximum additional cancer risk of a person due to exposure to an emitted pollutant for a 70-year lifetime.

Pathway—A way that radionuclides might contaminate the environment or reach people, e.g. air, water, food.

Radionuclide—A type of atom which spontaneously undergoes radioactive decay.

Source Term—the amount of radioactive material emitted to the atmosphere from a source, either estimated, measured or reported, that is used in the risk assessment.

B. Acronyms

CAA—The Clean Air Act, 42 U.S.C. 7401 *et seq.*

CAAA—The Clean Air Act Amendments of 1990

II. Background

A. Standard Setting Under Section 112

On October 31, 1989, EPA promulgated under section 112 of the Clean Air Act, 42 U.S.C. 7412, National Emission Standards for Hazardous Air Pollutants (NESHAPs) to control radionuclide emissions to the ambient air from a number of different source categories, 40 CFR part 61. This rule was published in the **Federal Register** on December 15, 1989 (54 FR 51654). The NESHAPs were promulgated pursuant to a voluntary remand granted by the U.S. Court of Appeals for the DC Circuit. The purpose of the remand was to enable EPA to implement the Court's earlier ruling in *NRDC, Inc.* v. *EPA*, 824 F.2d 1146 (DC Cir. 1987) ("the Vinyl Chloride decision"), which articulated specific legal requirements for promulgation of standards under section 112.

The Vinyl Chloride decision set forth a decision-making framework for promulgation of NESHAPs in which the Administrator makes a determination under section 112 in two steps: First, determine a "safe" or "acceptable" level of risk considering only health-related factors, and second, set a standard that provides an "ample margin of safety," in which costs, feasibility, and other relevant factors in addition to health may be considered.

After proposing and receiving comments on several options by which to define "safe", the Administrator selected an approach, first announced in the final NESHAPs for certain benzene source categories (54 FR 38044 September 14, 1989). Under this approach, the Administrator established a presumption of acceptability for a risk of approximately one in ten thousand to the maximally exposed individual, and a goal to protect the greatest number of persons possible to a lifetime risk level no higher than approximately one in one million. After evaluating existing emissions against this benchmark, other risk information is then considered and a final decision is made about what risk is acceptable. The Agency then considers other information, including economic costs and technical feasibility, along with all of the health-related factors previously used to determine the "safe" level, to set a standard which protects public health with an ample margin of safety.

B. The NESHAP for Elemental Phosphorus Plants

One of the source categories governed by 40 CFR part 61 is Elemental Phosphorus Plants. Subpart K of 40 CFR part 61 ("subpart K") established a 2 curies/year standard for emissions of polonium-210 from such facilities.

Polonium-210 and lead-210 are vaporous waste byproducts that result from the high temperature calcination of phosphate ore at elemental phosphorus plants. Because phosphate ore contains relatively high concentrations of uranium and radium, it also contains significant quantities of polonium-210 and lead-210. The high calcining temperature (1,300 °C volatilizes the lead-210 and polonium-210 from the phosphate rock, resulting in the release of much greater quantities of these radionuclides than of the uranium, thorium, and radium radionuclides. Analyses of doses and risks from these emissions show that polonium-210 and lead-210 are the major contributors, 94.7% and 4.3% respectively, to the risk from radionuclide emissions from elemental phosphorus plants

During the rulemaking that resulted in promulgation of the current subpart K EPA performed a plant-by-plant risk assessment of radionuclide emissions from all eight U.S. elemental phosphorus plants. In that analysis, EPA estimated that the lifetime fatal cancer risk to the maximally exposed individual was approximately 5.7×10^{-4}. Because a reduction in the polonium-210 emissions also results in an equivalent reduction in lead-210 emissions and because polonium-210 emissions account for approximately 95% of the risk from radionuclide emissions, EPA concluded that the total risk from radionuclide emissions could be reduced to the level required by the Agency's NESHAP policy without the need for establishing an emission limit for lead-210.

In applying the Vinyl Chloride decision methodology, EPA selected an acceptable level for emissions of polonium-210 of 2 curies/year, which corresponds to an estimating maximum lifetime risk for any individual of 1×10^{-4}. When it promulgated NESHAPs for radionuclide emissions from Department of Energy facilities, Nuclear Regulatory Commission licensees, underground uranium mines, and inactive uranium mill tailings piles, EPA noted the numerous uncertainties in establishing risk assessment parameters, modelling actual emissions, and estimating the numbers of people exposed and concluded that an estimated maximum risk as high as 3×10^{-4} could be regarded as essentially equivalent to an estimated maximum risk of 1×10^{-4} for purposes of selecting an "acceptable" emission level. In selecting an "acceptable" emission level for polonium-210 emissions from elemental phosphorus plants, EPA concluded that existing emissions were higher than the level which could be deemed acceptable, but EPA did not consider whether specific alternative emission levels between existing levels and 2 curies per year might be deemed acceptable. EPA did not consider the acceptability of emission levels higher than 2 curies/year because it appeared from the available information that a level of 2 curies/year or less could be readily achieved at all facilities by proper installation and operation of available control technology and there was no technology known to the Agency that could achieve some level between existing emissions and 2 curies/year. If the baseline levels were not acceptable, then EPA believed that the next logical choice for an option to be considered was one that was achievable with existing technology and which presented risks about a factor of three below the baseline. As EPA noted when it originally proposed subpart K, see 54 FR 9612, 9625, March 7, 1989, although risks associated with radionuclide emissions exist on a continuum, the Agency selects an acceptable level by considering specific discrete alternative emission levels. The fact that EPA must choose a specific emission level as acceptable does not necessarily mean that alternatives that were not specifically considered and that present risks slightly higher than the chosen level are inherently unacceptable

After selecting an acceptable level of 2 curies/year, EPA then determined that significantly reducing emissions of polonium-210 below 2 curies/year would be very costly and would result in very small incremental risk reductions. For these reasons, EPA concluded that a standard of 2 curies/year would also protect public health with an ample margin of safety

C. Objections to Subport K by FMC Corporation

FMC Corporation operates an elemental phosphorus plant in Pocatello, Idaho, which is the single largest source affected by subpart K. Following promulgation of subpart K, FMC Corporation petitioned for judicial review of the standard pursuant to Clean Air Act section 307(b), *FMC Corporation* v. *U.S. Environmental Protection Agency*, Docket No. 90-1057, United States Court of Appeals for the DC Circuit. The Circuit Court subsequently consolidated the FMC petition with ten other petitions for review of various radionuclide NESHAPs. These consolidated cases are presently being held in abeyance pending further actions by EPA.

19
1991
UMI

Following publication of the radionuclide NESHAPs on December 15, 1989, EPA received over 25 separate petitions requesting that EPA reconsider some or all of the individual standards incorporated in 40 CFR part 61 pursuant to Clean Air Act section 307(d)(7)(B). In one of these petitions, FMC requested that EPA reconsider the standard for Elemental Phosphorus Plants set forth in subpart K. In its petition, FMC argued that: (1) The Notice of Proposed Rulemaking did not provide adequate notice of the provisions in the final rule, or of the EPA methodology and its application; (2) EPA failed to properly consider intermediate emission levels and the associated acceptable risk levels; (3) EPA based the final rule upon material omitted from the administrative record; (4) new epidemiologic information calls into question EPA estimates of the health risk associated with radionuclide emissions from FMC's Pocatello, Idaho facility; and (5) the rule may not have been validly promulgated because Assistant Administrator William Rosenberg did not have the authority to sign the rule.

At the time FMC submitted its petition for reconsideration, EPA was not persuaded that any of the legal or substantive arguments advanced by FMC provided any basis for reconsideration of the rule. Although EPA acknowledged that it had not considered intermediate emission levels between the baseline emission levels and 2 curies/year in selecting an acceptable risk level, it was not clear why this alleged deficiency in the Agency's analytic process would have any effect on the final standard. EPA assumed at that time that all affected facilities, including the FMC plant in Pocatello, Idaho, could achieve compliance with the 2 curies/year standard by installation of a specific scrubber system manufactured by the John Zink Company, which had proven highly effective in reducing polonium-210 emissions at an elemental phosphorus plant operated by another company. Since EPA knew of no other technology that would achieve a level of emissions in between the baseline and 2 curies/year, EPA did not believe it was reasonable to consider an intermediate emission level as an option for the acceptable risk decision. Subsequently, on April 23, 1990, FMC submitted the results of pilot testing it had performed with the Hydro-Sonic® scrubber system. Based on the results of this pilot testing and on the size and operational characteristics of its Pocatello, Idaho facility, FMC argued that installation of this system at the Pocatello plant might not be sufficient to enable FMC to meet the 2 curies/year standard established by subpart K. These concerns regarding the capabilities of the available scrubber technology made FMC's prior argument that EPA should have considered intermediate emission levels in selecting an acceptable level seem more consequential.

After evaluating the results of the pilot testing of the Hydro-Sonic® scrubber system by FMC, EPA concluded that the pilot test results were equivocal. While it is quite probable that the 2 curies/year standard can be achieved by FMC at its Pocatello, Idaho facility following installation of the scrubber system, it is possible that the resultant reductions in emissions might not be sufficient to achieve this result. Given this uncertainty, the reluctance of FMC to make the large capital investments necessary to install and operate the scrubber system was understandable. After it became apparent to EPA that FMC would be willing to install the Hydro-Sonic® scrubber system at its Pocatello, Idaho facility if it could have reasonable assurance that it could thereby achieve compliance with subpart K, EPA decided to enter into settlement discussions with FMC.

D. Settlement Discussions Between EPA and FMC Corporation

Throughout the settlement discussions between FMC and EPA, the Agency had two principal policy objectives: (1) To have FMC install the Hydro-Sonic® scrubber system, and to achieve the resulting reductions in the risks to human health associated with exposure to polonium-210, as rapidly as possible; and (2) to resolve in a definitive manner all pending disputes between FMC and EPA concerning subpart K. It quickly became apparent that FMC would be willing to forego further litigation concerning subpart K if FMC could be assured that installation and operation of such a scrubber system would result in compliance with subpart K. At that point, the principal task for the negotiators was to establish a set of specifications for installation and operation of the scrubber system which would assure EPA that polonium-210 emissions were being reduced to a level sufficient to provide an ample margin of safety, while still affording FMC engineers an adequate range of operational flexibility.

EPA and FMC ultimately reached agreement on the detailed specifications for the scrubber system which were set forth in the Agency's proposed amendment of subpart K. If an elemental phosphorus plant installs and operates a Hydro-Sonic® scrubber system conforming to those criteria, it will be deemed to be in compliance with subpart K, even if it does not thereby achieve compliance with the underlying standard of 2 curies/year. The standard provides for some operational flexibility, but a plant must strictly adhere to the operating conditions unless it can otherwise reduce emissions to less than 2 curies/year. To ensure that the standard does not unnecessarily constrain affected facilities, alternative operating conditions which can be shown to achieve an overall removal efficiency for polonium-210 equal to or greater than the operating conditions specified by the standard can be used with the prior approval of the EPA Administrator.

Once a tentative settlement agreement was reached between EPA and FMC, EPA published a notice of settlement as required by the Section 113(g) of the 1990 Clean Air Act Amendments. (56 FR 32572, July 17, 1991). A status report and notice of the proposed settlement agreement was also filed and served on all parties in the pending Court of Appeals case, *FMC Corporation* v. *EPA*, Docket No. 90–1057 (DC Cir.), on July 19, 1991. The settlement agreement between EPA and FMC was approved by EPA on August 21, 1991.

Under the settlement agreement between FMC and EPA, and EPA granted FMC's pending petition for reconsideration for the purpose of proposing revisions to modify subpart K. Pursuant to the provisions of the settlement agreement, FMC and EPA filed a joint motion with the DC Circuit Court to sever FMC's petition for review from the remaining consolidated cases and to hold the FMC petition in abeyance pending conclusion of this rulemaking. The D.C. Circuit Court granted this joint motion on September 27, 1991.

If EPA adopts the proposed modification of subpart K set forth in the proposed rule as a final rule, or EPA adopts a final rule which contains provisions which are substantially similar to the proposed modifications, FMC has agreed that it will seek dismissal with prejudice of its pending petition for review of subpart K. In that event, FMC has further agreed that it will waive any right it would otherwise have to seek judicial review of the newly promulgated final rule.

III. Reconsideration of Standard

A. Analytic Methodology

In reconsidering the currently effective subpart K, EPA has utilized the analytic framework required by the Vinyl Chloride decision and has applied the policy concerning acceptable risk established by the Administrator's benzene decision. The Agency's decision to reconsider the emission standard in subpart K should not be construed as an indication that EPA is revisiting or reconsidering the benzene policy, the level of risk determined in that policy to be presumptively safe, or any of the health based regulations issued under that policy.

B. Decision on Acceptable Risk

As stated in the original rule promulgating subpart K, the maximum individual lifetime risk to any individual from baseline emissions is 5.8×10^{-4}. This is clearly higher than the presumptively safe level established by the Administrator's benzene decision. The estimated annual incidence from baseline emissions is 0.091 fatal cancers per year. There are an estimated 8100 people that are exposed to risk levels greater than 1×10^{-4}, and an estimated 424,000 people that are exposed to risk levels greater than 1×10^{-6}.

After examining these factors in the previous rulemaking, the Administrator determined that the risk level represented by the baseline was unacceptable. EPA then estimated that a reduction in polonium-210 emissions to 2 curies/year would reduce the incidence to 0.024, or 1 case every 40 years and expose no one to a risk level greater than 1×10^{-4}. EPA did not consider emission levels between the assumed baseline of 10 curies/year and 2 curies/year in selecting an acceptable or "safe" level. Upon reconsideration, the Agency has now performed risk estimates for five levels of emissions between 2 and 10 curies/years. These estimates are presented in Table 1, along with the risk estimates associated with a baseline emission of 10 curies/year and the current emission limit of 2 curies/year. Based upon these risk estimates a reduction in polonium-210 emissions to 4.5 curies per year would reduce the incidence to 0.048, or 1 case every 21 years and expose no one to a risk level greater than 2.6×10^{-4}. This approximately equals the level that is presumptively safe. Based upon these risk estimates and the uncertainties in establishing parameters for risk assessment and in modelling actual emissions and exposures referred to in the prior rulemaking, the Agency has concluded that the acceptable level of emissions of polonium-210 is a level that limits the maximum individual risk to any individual to 2.6×10^{-4}, represented by an emission level of 4.5 Ci/y $P_{-}210$.

TABLE 1.—ACCEPTABLE LEVEL OF RISK DECISION

	Emissions (Ci/y)						
	2	3	4	4.5	5	6	10
Maximum individual risk (individual)	1×10^{-4}	1.8×10^{-4}	2.3×10^{-4}	2.6×10^{-4}	2.9×10^{-4}	3.5×10^{-4}	5.8×10^{-4}
Incidence within 80 km (deaths/y)	0.024	0.037	0.044	0.048	0.052	0.06	0.091
Risk individual:							
E-2 to E-1	0	0	0	0	0	0	0
E-3 to E-2	0	0	0	0	0	0	0
E-4 to E-3	0	264	700	709	1,950	2,160	8,100
E-5 to E-4	27,000	39,000	54,000	55,000	75,000	76,000	122,000
E-6 to E-5	390,000	380,000	370,000	368,000	347,000	346,000	294,000
less E-6	1.5M	1.4M	1.4M	1.4M	1.4M	1.4M	1.4M

Other Health Impacts: Non-fatal cancers number no more than 5 percent of deaths.

C. Decision on Ample Margin of Safety

In addition to considering the health-related factors discussed above, EPA has also examined the cost and technological feasibility of the various types of emission control technology available to lower polonium-210 emissions from elemental phosphorus plants, as well as the degree of certainty that the available technology will succeed in reducing polonium-210 emissions to 2 curies/year at all affected facilities, in selecting an emission level which will provide an ample margin of safety to protect public health.

EPA accepts the engineering judgment by FMC that a scrubber system installed and operated as specified in the proposed rule presently represents the most practicable technology capable of reducing the polonium-210 emissions at FMC's Pocatello, Idaho elemental phosphorus plant. EPA has also concluded that proper installation and operation of one of the available emission control technologies will be sufficient to reduce emissions to below 2 curies/year at all affected facilities other than the FMC Pocatello, Idaho plant, and that it is quite probable that an emission level below 2 curies/year can be achieved at the FMC Pocatello facility as well. However, even if FMC is unable to reduce polonium-210 emissions to 2 curies/year by installing and operating the specified scrubber system in the specified manner, EPA has concluded that adherence to the specified conditions will reduce polonium-210 emissions sufficiently to provide an ample margin of safety to protect public health, as required by section 112 of the Clean Air Act.

Based on this determination concerning ample margin of safety, EPA is amending the emission standard in subpart K to permit each affected facility to demonstrate compliance either by limiting total polonium-210 emissions to no more than 2 curies per year, or by: (1) Installing a Hydro-Sonic® Tandem Nozzle Fixed Throat Free-Jet Scrubber System including four scrubber units, (2) operating all four scrubber units continuously with a minimum average over any 6-hour period of 40 inches (water column) of pressure drop across each scrubber during calcining of phosphate shale, (3) scrubbing emissions from all calciners and/or nodulizing kilns at the plant, and (4) limiting total emissions of polonium-210 from the plant to no more than 4.5 curies per year. This choice of compliance mechanisms will be available to all affected facilities. However, EPA anticipates that facilities other than the FMC Pocatello, Idaho plant will likely enjoy greater operational flexibility simply by meeting the 2 curies/year limitation.

IV. Responses to Comments

On September 11, 1991, the EPA published in the **Federal Register** proposed revisions to the National Emission Standard for Hazardous Air Pollutants (NESHAP) for polonium-210

VOL
56
ISS
244
DE
19
1991
UMI

emissions from elemental phosphorus plants. The **Federal Register** notice requested public comments on the revised NESHAP, the risk management approach used to develop the standard and the technological parameters specified in the standard. A public hearing was held in Pocatello, Idaho on September 17, 1991, to give interested parties an opportunity to present their views, and written comments were solicited. Comments were received from 20 private citizens, 3 government agencies, and one affected company. Nineteen of the private citizens stated that the standard should not be relaxed. The government agencies were concerned that FMC adequately demonstrate its arguments, that sufficient information is available to evaluate the proposed rule, and that the proposed rule is reasonable and environmentally sound. FMC was the only affected company to provide comments.

This section of the preamble discusses the legal, policy-related, and technical comments received during the comment period. Many of the commenters provided similar comments and, when possible, these comments have been combined. The following sections are split into discussions of legal/policy-related comments and technical comments. The main position and concerns presented by the commenters are followed by an EPA response to the comments in the context of the final rule.

A. Legal and Policy-Related Comments

Comment: One commenter stated that this special rulemaking was not conducted as a formal negotiated rulemaking because only EPA and FMC were involved.

Response: This rulemaking was never intended to be a formal negotiated rulemaking as defined by the Negotiated Rulemaking Act of 1990. Throughout the discussions between FMC and EPA, the Agency had two principal policy objectives: (1) To reduce the risks to human health associated with polonium–210 emissions; and (2) to resolve all pending disputes between FMC and EPA concerning subpart K. The Agency believed that installation of a Hydro-Sonic® Tandem Nozzle Fixed Throat Free-Jet Scrubber System, as pilot tested by FMC, would achieve the greatest reduction in public health risk. To settle the pending disputes, the Agency believed that a settlement agreement would provide the best assurance of resolving all issues in a timely and environmentally responsible manner. It was always the Agency's intention to conduct the actual rulemaking in accordance with standard public notice and comment procedures.

Comment: A few commenters stated that the publication of the proposed rule one week prior to the public hearing did not provide them enough time to become familiar with the recommended revisions. They felt that simply meeting the legal requirements for providing public notice is not sufficient for obtaining thoughtful public input because most ordinary citizens do not read the **Federal Register**. These commenters believe that advance notification in the local newspapers would have generated more public interest in the hearing and the proposed revisions to the rule.

Response: The complete proposed rule was published in the **Federal Register** on September 11, 1991 (56 FR 46252 September 11, 1991), six days before the September 17, 1991 public hearing in Pocatello, Idaho. However, the proposed substantive changes were also published previously on August 23, 1991 (56 FR 41811 August 23, 1991) in a separate notice of public hearing. Because a public hearing was held, the period for submission of written comments continued until October 17, 1991. EPA believes that all interested parties had sufficient time in which to review the proposed revisions to the rule and provide thoughtful input into this rulemaking.

Comment: One commenter stated that EPA did not coordinate this effort with State, Tribal, or EPA Idaho Operations personnel. This commenter also indicated that EPA's Indian Policy had been violated because the Agency did not take active steps to allow input from the Shoshone-Bannock Tribes of the Fort Hall Reservation.

Response: This comment is not accurate. Personnel from EPA Region 10 were included in the Agency's deliberations concerning settlement discussions and rulemaking activities. The Region 10 Radiation Program Manager provided the Air Quality Planning Section of the Shoshone-Bannock Tribes of the Fort Hall Reservation, on which the FMC facility is located, with a copy of the proposed settlement agreement and an advance copy of the proposed rule, thereby affording the Shoshone-Bannock additional time to review and comment on the document. In fact, a representative of the Air Quality Planning Section provided comments during the public hearing and written comments during the comment period that followed the public hearing.

EPA also notified environmental groups such as the Environmental Defense Fund (EDF) and Natural Resources Defense Council (NRDC) of the proposed rule. Neither the NRDC or EDF expressed any interest in this rulemaking and did not provide any comments. FMC's largest competitor in the elemental phosphorus industry, Monsanto Corporation, was also contacted but did not provide any comments. It is clear that the Agency expended considerable effort to encourage public participation in this rulemaking.

Comment: One commenter expressed concern because the NESHAP for radionuclide emissions from elemental phosphorus plants was exempted from the 1990 Clean Air Act Amendments. Unlike the standards to be promulgated to control other hazardous air pollutants, this standard will not be automatically reviewed and revised as necessary every 8 years. Therefore, the commenter felt that the population surrounding the Pocatello, Idaho, facility will not benefit from new emission control technology developments in the future when better control technology may be reasonably available.

Response: Section 112(q)(2) of the 1990 Clean Air Act Amendments (CAAA) states that no standard shall be established under section 112, as amended by the CAAA of 1990, for radionuclide emissions from elemental phosphorus plants, grate calcination elemental phosphorus plants, phosphogypsum stacks, or any subcategory of the foregoing. Accordingly, those provisions of the new Clean Air Act under which sources emitting hazardous air pollutants will be required to install the Maximum Available Control Technology, and EPA must review such requirements in light of changes in practices, processes, and control technologies every eight years, will not apply with respect to radionuclide emissions from elemental phosphorus plants. However, this does not mean that the pollution control technology at such plants will not be subject to periodic review.

Even though subpart K is not governed by the provision of the CAAA requiring periodic reassessment of NESHAPs, the standard remains subject to review under section 112 as it was in effect prior to the 1990 Clean Air Act Amendments. The costs and capabilities of available control technology may be considered in the second step of the Vinyl Chloride methodology, and are an element in implementation of the policy which the Administrator established in the benzene decision. Thus, the present standard could be revisited in the future if necessary to protect public health with an ample margin of safety. Moreover, to the extent that the work practice and operational provisions of this rule are construed as promulgated under section 112(e)(1) of the previous Clean Air Act, section 112(e)(4) would require EPA to repromulgate such provisions as a quantitative emission standard whenever it becomes feasible to do so.

EPA presently intends to reevaluate subpart K within approximately 2–3 years, after FMC has obtained sufficient operating history with the new scrubbers. This review will involve, at a minimum, a re-assessment of the risks associated with actual polonium–210 emissions, scrubber removal efficiency, and scrubber availability during calciner operations.

In evaluating the effect of the 1990 Clean Air Act on elemental phosphorus plants emissions, it is also helpful to remember that this source category will likely be subject to regulation under the new section 112 to control the emissions of other hazardous air pollutants. If there are substantial improvements in the future in the technology which is available to control such other air pollutants, installation of this technology on elemental phosphorus plants may also yield further reductions in radionuclide emissions.

Comment: One commenter stated that the Agency's analysis of the risks associated with radionuclide emissions from elemental phosphorous plants does not address the cumulative health effects associated with exposure to more than one source of radiation. In particular, the commenter was concerned with the additional risk associated with exposure to phosphogypsum stacks and elemental phosphorus slag.

Response: The Agency agrees that this is a legitimate concern. However, explicitly accounting for overlapping and multiple sources of exposure greatly complicates the calculation of exposures and risks. Since concentrations of radionuclides decline rapidly with distance from the source, it is highly unlikely that any individual could be the most exposed individual for more than one source. In most cases, members of the public who receive the highest dose from one source will receive an increase in risk of less than 1×10^{-6} from other sources.

B. Technical Comments

Comment: Several commenters stated that there is no justification for raising the emission limit for elemental phosphorous plants from 2 curies/year to 4.5 curies/year.

Response: Comments that EPA is raising the emission limit to 4.5 curies/year do not accurately characterize the Agency's action. An elemental phosphorus plant that is emitting more than 2 curies/year but less than 4.5 curies/year will not be in compliance with the new standard unless the facility has installed the specified scrubber technology and is consistently operating the scrubber in conformity with a set of very specific criteria. At most affected facilities, this alternative standard would actually result in emissions lower than 2 curies/year. Even at the FMC facility, EPA expects that the required technology will likely be sufficient to approach if not meet the 2 curies/year standard. The alternative standard reflects the Agency's conclusion that 4.5 curies/year is acceptable, but that sources must do very specific things to reduce exposures further in order to provide an ample margin of safety.

Comment: Several commenters expressed concern that while FMC is a large corporation with several billion dollars in annual income, it will not have to spend any money on pollution control equipment as a result of revised polonium-210 emission limit. This would provide FMC an economic advantage over its competitors that have already installed pollution control equipment and meet the existing standard.

Response: The Agency agrees that, if modification of this standard allowed FMC to forego installation of emissions control technology, FMC would have received an unfair economic advantage over its competitors who have already installed the control technology and met the standard. However, this is not the case. Installation of the Hydro-Sonic® Tandem Nozzle Fixed Throat Free-Jet Scrubber System is explicitly required by the alternative standard. Moreover, FMC is required by its existing compliance agreement with Region 10 to complete installation of the required technology by December 15, 1991. Expenditures by FMC on installation of the scrubber are expected to exceed $16,000,000.

EPA does not believe that modification of the standard provides FMC with any economic advantage over its competitors. If revision of the NESHAP for elemental phosphorus plants conferred an unfair advantage on FMC, EPA would expect that other companies who operate such plants would have objected. However, none of FMC's competitors objected to modification of the standard. Indeed, EPA expects facilities other than the FMC plant in Pocatello, Idaho will enjoy greater operational flexibility because they will be able to comply with the standard without demonstrating they are meeting the stringent operating conditions required by the alternative standard.

Comment: Several commenters discussed the fact that Pocatello is a non-attainment area for PM–10 (fine particulate) emissions and that a doubling of the polonium-210 emission limit would also result in a doubling of the visible emissions from the facility. The commenters stated that the visibility of the mountains in the distance is already obscured by dark gray or brown clouds that are caused by emissions from FMC's facility.

Response: As explained above, EPA is not doubling the limit for polonium-210 emissions. EPA expects that when FMC operates the Hydro-Sonic® scrubber system in accordance with the requirements specified in the rule, the resultant emissions will approach or meet the original limit of 2 Ci/y. EPA also expects that installation and operation of the required scrubber technology will yield substantial new reductions in particulate emissions. Moreover, this rule does not provide FMC any relief from its legal obligation to meet all other applicable standards for airborne emissions.

Comment: One commenter suggested that EPA approve the proposed revisions to the rule. This commenter stated that EPA's enforcement dollars would be better spent on other environmental issues associated with FMC's operations in Pocatello.

Response: The Science Advisory Board (SAB), in its report "Reducing Risk: Setting Priorities and Strategies For Environmental Protection" made several recommendations to the Administrator of the EPA on ways to improve the Agency's ability to address environmental protection issues. Among these was the recommendation that the EPA target its environmental protection efforts on the basis of opportunities for greatest risk reduction. This recommendation is being is aggressively instituted throughout the Agency. EPA believes that all the environmental issues associated with the FMC facility in Pocatello, Idaho, deserve Agency attention regardless of whether it is the use of elemental phosphorus slag in construction, the contamination of water, or the release of hazardous air pollutants into the atmosphere. However, the EPA also believes that, if necessary, priorities should be set in a manner consistent with the SAB's recommendation.

Comment: Many commenters addressed the fact that Monsanto

VOL
56
ISS
244
DEC
19
1991
UMI

Corporation, which is FMC's largest competitor in the elemental phosphorus industry, has already installed similar pollution control equipment at one of its facilities and is meeting the existing standard. They believe that this provides adequate proof that the system can be operated in a manner which meets the existing standard.

Response: The Agency's knowledge of the successful operation of the Hydro-Sonic® scrubber system at the Monsanto facility helped it formulate the scrubber system requirements and operating parameters specified in the rule. However, it is important to remember that the total quantity of polonium-210 emitted is a function not only of the efficiency of emission reduction technology, but also of the total volume of phosphate shale which is calcined. The FMC facility is the largest elemental phosphorus plant presently operating in the U.S. Moreover, the removal efficiency of a scrubber system may vary depending on factors such as particle size, particle velocity, total surface area of the water droplets, etc. Because the particulate emissions from FMC's calciners have a smaller size distribution than those at Monsanto and the polonium-210 tends to be attached to the smaller particles, the scrubber system many not be as efficient in reducing polonium-210 emissions. EPA's analysis of the FMC pilot test results indicates uncertainty regarding whether the system will be as effective as it is at the Monsanto plant.

Comment: One commenter stated that they were not prejudiced against or for the proposed revisions. Their main concerns were: (1) That FMC adequately demonstrate their arguments, (2) that sufficient information is available to evaluate the proposal, and (3) that the proposal is reasonable and environmentally sound.

Response: The Agency believes that it has responded in a careful and responsible manner to FMC's concerns regarding its technical capability to meet the original standard. The information provided by FMC and the EPA Region 10 offices, the analysis of pilot test results analysis performed by the Industrial Studies Branch of the Office of Air Quality Planning and Standards, and the risk assessments performed by the Office of Radiation Programs provide a sound technical basis for a revised standard. If EPA had not been responsive to FMC's concerns regarding its ability to meet the standard, installation of the Hydro-Sonic® system at the FMC facility and the resultant reduction in polonium-210 emissions might have been delayed during the pendency of litigation, perhaps for years.

Comment: Many commenters expressed concern about FMC's intent and ability to operate the scrubbers as contemplated by the revised standard. Several individuals stated their belief that FMC does not operate the existing scrubbers at night. One commenter stated his belief that emissions during breakdown of the scrubber system are not included in the rule, and that uncontrolled emissions during such malfunctions would result in actual emissions greater than 4.5 curies/year. Another commenter expressed concerns about FMC's interruptable power supply and the availability of power for the emission control system during such interruptions.

Response: The Agency is also concerned about how FMC operates the scrubber system once it has been installed. To address these concerns, EPA explicitly included language in the rule that requires: (1) All four scrubber units be operated continuously during the calcining of phosphate shale; (2) the scrubber pressure drop over any 6-hour period must average at least 40 inches (water column); and (3) that emissions from all calciners and/or nodulizing kilns at the plant be scrubbed. This language prohibits FMC from either operating the calciners when the scrubbers are not operational for whatever reason or bypassing the scrubbers. Further, it means that any malfunction of the scrubber system which results in reduced pressure drop must be included in the 6-hour average. In order to meet the standard, EPA expects that FMC will normally operate the scrubbers at a pressure drop significantly exceeding 40 inches, in order to accommodate brief periods when the pressure drop falls below 40 inches, and will shut down the calciners if adequate pressure drop cannot be promptly restored. In addition, FMC has advised EPA that operation of the calciners when the scrubbers are shut down would damage the scrubbers and is therefore not feasible in any case.

Comment: Several commenters questioned the choice of 40 inches as the required average pressure drop for the system. One commenter stated he could not determine whether an average pressure drop of 40 inches represents the best available technology or is merely a negotiated specification. One commenter asserted that the Hydro-Sonic® scrubber system can handle a pressure drop of "close to 58 inches." Another suggested that EPA require an average pressure drop of 60 inches.

Response: As noted above, in order to consistently meet the required 40 inches average pressure drop, FMC will have to operate the system regularly at a pressure drop significantly exceeding 40 inches. The standard does not permit exclusion from the calculation of average pressure drop of periods when the calciners are operating but the scrubbers are malfunctioning or operating at lower efficiency. EPA considers this approach superior to a system which would allow affected facilities to exclude periods of breakdown or malfunction from the calculation, because it avoids disagreements concerning the legitimacy or frequency of reported breakdowns. If EPA were to retain the present approach to calculation of the average and also specify a higher average pressure drop, it would be necessary to verify that the system could be practically operated on a regular basis at pressure drops significantly exceeding that average. Based on the information provided by FMC, EPA has concluded that continuous maintenance of a pressure drop sufficient to achieve an average substantially greater than 40 inches would adversely affect the reliability of the system, as well as greatly increasing energy costs associated with its operation.

Comment: A few commenters expressed concern about the frequency of stack testing, the nature of the records that must be maintained by the plant, the distribution of the annual report, the persons responsible for monitoring facility compliance, and whether or not the public will have access to the annual reports.

Response: Elemental phosphorus plants are required to conduct emissions tests on an annual basis and report the results within 60 days of conducting the test. An emission test shall be performed on each calciner and/or nodulizing kiln and if the emissions are discharged through more than one stack, then each stack must be tested. Each test consists of three runs and the average of the runs is used to calculate the emissions. The phosphate rock processing rate is also determined for each run and averaged. The written test report must include the name and location of the facility; the name of the person responsible for operation of the facility and the name of the person responsible for the report (if different); a description of the effluent control system on each release point and an estimate of its efficiency; the results of the testing, including the results of each sampling run completed; the values used in calculating the emissions and the source of these data; and a certification by a corporate officer of the accuracy and completeness of the test report. FMC will submit its annual test report to EPA's regional office in Seattle, Washington. A copy of this report is also sent to EPA Headquarters in Washington, DC. The regional offices are responsible for inspecting these facilities to determine compliance with the regulations. All annual reports and the results of all compliance monitoring activities are available for public inspection.

Comment: Several commenters recommended that the standard specify the scrubber fluid flow rate because of its importance in determining scrubber removal efficiency. They also recommended that this parameter be continuously monitored and recorded so that system performance could be better evaluated.

Response: The Agency agrees that an adequate flow rate of water into the nozzles is important in maintaining the particulate removal efficiency of the scrubber system. The Agency does not believe that is necessary at this time to specify a particular flow rate or range of flow rates. However, EPA does believe that the performance of the scrubber system can be monitored and evaluated better by FMC and EPA if the flow rate is continuously monitored and recorded by system instrumentation. Accordingly, EPA has decided to incorporate this additional monitoring requirement in the final rule. When compliance monitoring activities are conducted at the FMC facility in Pocatello, Idaho, fluid flow rates will be considered as part of the inspection process. If such inspections suggest that the effectiveness of the scrubbers has been compromised by failure to maintain an adequate flow rate, EPA will direct FMC to correct the problem.

Comment: A few commenters questioned how the radioactivity in the scrubber fluid will be removed and how the sediment in the scrubber fluid pond will be disposed of. They believe that the radionuclide content of the scrubber fluid should be limited in order to maintain a high level of removal efficiency and that disposal of the sediment should be regulated under the NESHAP since the Resource and Conservation Recovery Act (RCRA) does not address radioactivity.

Responses: The Agency agrees that the total dissolved and suspended solids, including radioactive material, in the scrubber fluid must be minimized in order to maintain a high level of efficiency. Because the level of dissolved and suspended solids in the fluid in approximately 2% of the scrubber fluid, the level of radioactive material in the scrubber fluid will also be kept at low enough levels so that the scrubber removal efficiency will not be impacted. The disposal of scrubber fluid pond sediment is of special interest to the Agency because of the naturally occurring radioactive material, polonium-210 and lead-210, which may settle in the pond sediment. Until it can be determined what level of radioactivity can be expected to be found in the pond sediment, the Agency will be closely monitoring this situation.

Comment: One commenter was concerned that the revised standard would allow the Monsanto facility to increase its emissions from less than 2 Ci/y to 4.5 Ci/y. The commenter questioned whether EPA would take action against the Monsanto facility in such circumstances.

Response: Operating experience at the Monsanto facility indicates that operation of the scrubber system at that facility in the manner required by the alternative standard would result in emissions below 2 Ci/y. Moreover, Monsanto originally installed the scrubber system at its facility in order to meet National Ambient Air Quality Standards governing the release of fine particulate material (PM–10 emissions). If Monsanto were to operate its scrubber system in a manner which neither achieved the 2 Ci/y standard nor conformed to the operating criteria specified in the alternative standard, EPA would respond to such a violation in the same manner as a comparable violation at any other facility.

V. Final Rule to Amend Subpart K

A. Description of Final Rule

In accordance with the above discussion, EPA is amending § 61.122 of 40 CFR part 61, subpart K, to permit elemental phosphorus plants an alternative means of demonstrating compliance. As under the present standard, compliance may be demonstrated by limiting total polonium-210 emissions to no more than 2 curies/year. In the alternative, compliance may be conclusively shown by: (1) Installing a Hydro-Sonic® Tandem Nozzle Fixed Throat Free-Jet Scrubber System including four scrubber units, (2) operating all four scrubber units continuously with a minimum average over any 6-hour period of 40 inches (water column) of pressure drop across each scrubber during calcining of phosphate shale, (3) scrubbing emission from all calciners and/or nodulizing kilns at the plant, and (4) ensuring total emissions of polonium-210 from the plant do not exceed 4.5 curies per year. Alternative operating conditions, which can be shown to achieve an overall removal efficiency for emissions of polonium-210 which is equal to or greater than the efficiency which would be achieved under the operating conditions described in (1), (2), and (3) above (and that ensure that total emissions of polonium-210 from the plant do not exceed 4.5 curies per year), may be used with prior approval of the Administrator. Facilities wishing to utilize alternative operating conditions will have to apply for such approval in writing, and the Administrator will act upon such requests within 30 days after receipt of a complete and technically sufficient application. To ensure that the operating conditions specified by the revised standard can be enforced and verified and to enhance the enforceability of the numerical limits in the standard, EPA is also amending § 61.126 to require the continuous measurement of system pressure drop and fluid flow rate when scrubbers are used, and primary and secondary current and voltage in each electric field when an electrostatic precipitator is used.

Although the alternative mechanism for demonstrating compliance with the standard which is incorporated in the final rule is legally available to all elemental phosphorus plants, EPA has concluded that all of the affected facilities except for the FMC plant in Pocatello, Idaho will achieve greater operational flexibility by electing to meet the underlying 2 curies/year limitation. Since the only practical effect of this proposal will be on FMC's Pocatello facility and FMC is already installing the Hydro-Sonic® system at that facility, EPA does not believe that the final rule will provide an inappropriate competitive advantage to the Hydro-Sonic® system. If a large new elemental phosphorus plant were to be constructed in the future or an existing plant were to be modified or expanded so as to raise this issue, EPA would then be prepared to consider any alternative emission control technology that could be shown to offer equivalent or improved performance.

B. Legal Authority

At the outset, it should be noted that section 112(q)(2) of the 1990 Clean Air Act Amendments provides that section 112, as in effect prior to the 1990 Amendments, continues to govern the promulgation of any NESHAP for elemental phosphorus plants. The procedures to be utilized to modify or revise a NESHAP under the old section 112 are the same as the procedures used

VOL
56
ISS
244
DE
19
1991
UMI

to promulgate the NESHAP in the first place. (Clean Air Act Sections cited in the balance of this discussion are the sections in effect prior to enactment of the 1990 Amendments.)

The revised standard set forth in the final rule affords facilities governed by the standard a choice between: (1) A simple quantitative emission limitation of 2 curies/year of polonium-210, and (2) an alternative quantitative emission limitation of 4.5 curies/year of polonium-210 which is supplemented by detailed and mandatory operation and maintenance requirements intended to provide additional emission reductions. On its face, section 112 appears to establish a dichotomy between "emission standards" promulgated under section 112(b) and "design, equipment, work practice, and operational standards" promulgated under section 112(e). Since any standard promulgated under section 112(e) is "treated as an emission standard" under section 112(e)(5), it appears that this dichotomy may have little ultimate practical significance. Nonetheless, the Agency believes it is necessary to consider which section(s) provide the legal authority to promulgate the final standard.

In those instances where a standard consists exclusively of a quantitative emission limitation, the authority to promulgate the standard is clearly provided by section 112(b). Conversely, when a standard consists exclusively of design, equipment, work practice, and/or operational requirements, such a standard must be promulgated under the authority provided by section 112(e). In the case where a standard is partially quantitative, but is supplemented by operational or work practice requirements, as in this instance, EPA believes that the better interpretation of section 112 is to construe such a "hybrid" standard as an emission standard governed by section 112(b). Nothing in section 112 compels a different conclusion. Moreover, section 302(k) expressly defines an emission standard as "including any requirement relating to the operation or maintenance of a source to assure continuous emission reduction." Finally, since the analytic framework established by the Vinyl Chloride decision authorizes EPA to determine what constitutes an "ample margin of safety" in part on the basis of technological feasibility, it would not be logical for EPA to be precluded from writing an emission standard which reflects the hybrid character of the standard setting process.

In the alternative, the final standard here can be viewed as an emission standard supplemented by a work practice standard promulgated under section 112(e). The Administrator may promulgate a work practice standard under section 112(e) to the extent he determines that "it is not feasible to prescribe or enforce an emission standard."

Section 112(e)(2) defines the phrase "not feasible to prescribe or enforce an emission standard" to include any situation where "the application of measurement methodology to a particular class of sources is not practicable due to technological or economic limitations." EPA believes that this definition clearly encompasses the factual circumstances here. Of course, the measurement methodology is presently adequate to enable EPA to "enforce" a quantitative emission limit. However, given the uncertainties for the FMC facility regarding the quantitative emission reductions which can be achieved with the available technology, as described above, EPA has determined that it is not practicable to apply measurement methodology to "prescribe" a quantitative emission limit based on the available technology.

To the extent that the work practice and operational provisions of the final standard are construed as promulgated under the authority of section 112(e)(1), section 112(e)(4) requires EPA to repromulgate these provisions as an emission standard whenever it becomes feasible to do so. After FMC has installed the scrubber technology specified by the final rule, and has operated that technology in a variety of circumstances over a period of a few (1–3) years, EPA expects that it will be practicable to prescribe a quantitative emission limit based on the capabilities of the technology.

C. Effective Date

The revisions to the NESHAP for radionuclide emissions from elemental phosphorus plants adopted by this rule are effective immediately upon promulgation. Under section 112(c)(1)(B)(i) of the Clean Air Act, emissions from existing sources which would violate a newly promulgated or revised NESHAP are not prohibited until 90 days after the effective date of the standard. However, in this instance, EPA has decided that it will apply the provisions of the new standard immediately to all facilities including existing sources.

EPA believes that the evident purpose of the 90 day delay for compliance by existing sources embodied in section 112(c)(1)(B)(i) is to afford such sources time to prepare for the imposition of new requirements. Indeed, section 112(c)(1)(B)(i) is phrased as an exception to a general prohibition on emissions violative of a NESHAP. Therefore, EPA doubts that it was intended to apply to those revisions of a standard which relax existing requirements rather than creating new requirements. Although the Administrative Procedure Act (APA) does not formally apply in this instance, an analogous provision in the APA provides support for this interpretation. The general requirement that a substantive rule must be published or served 30 days before its effective date, which is also intended to afford affected parties time to prepare for imposition of the rule, does not apply to "a substantive rule which grants or recognizes an exception or relieves a restriction." 5 U.S.C. 553(d)(1).

In this case, any facility which would be in compliance with the prior standard for radionuclide emissions from elemental phosphorous plants would also be in compliance with the revised standard. The revisions simply offer facilities who elect to rely on them an alternate means of demonstrating compliance. Since the revisions impose no new binding requirements and serve only to create additional flexibility, there is no reason to interpret section 112 as requiring a delay in their applicability. Therefore, EPA will apply the revisions of subpart K incorporated in this rule immediately to all facilities including existing sources.

VI. Miscellaneous

EPA has determined that this action does not constitute a major rule within the meaning of Executive Order 12291 since it is not likely to result in (1) a nationwide annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, a Regulatory Impact Analysis is not being prepared for this action.

Section 603 of the Regulatory Flexibility Act, 5 U.S.C. 603, requires EPA to prepare and make available for comment an "initial regulatory flexibility analysis" in connection with any rulemaking for which there is a statutory requirement that a general notice of proposed rulemaking be published. The "initial regulatory flexibility analysis" describes the effect of the proposed rule on small business entities. However, section 604(b) of the Regulatory Flexibility Act provides that section 603 "shall not apply to any proposed * * * rule if the head of the Agency certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities."

EPA believes that the proposed changes, as promulgated, would tend to ease the regulatory burdens associated with provisions of the existing final rule. Therefore, this rule will have no adverse effect on small businesses. For the preceding reasons, I certify that this rule will not have significant economic impact on a substantial number of small entities. This action was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments from OMB to EPA and any EPA written response to those comments are available for public inspection at Docket A–91–51.

List of Subjects for 40 CFR Part 61

Air pollution control, Radionuclides, Reporting and recordkeeping requirements.

Dated: December 13, 1991.

William K. Reilly,

Administrator.

PART 61—[AMENDED]

Part 61 of chapter I of title 40 of the Code of Federal Regulations is amended as follows:

1. The authority citation for part 61 continues to read as follows:

Authority: Secs. 101, 112, 114, 116, 301, Clean Air Act as amended (42 U.S.C. 7401, 7412, 7414, 7416, 7601).

Subpart K—National Emission Standards for Radionuclide Emissions From Elemental Phosphorus Plants

2. Subpart K is amended by revising § 61.122 to read as follows:

§ 61.122 Emission standard.

Emissions of polonium-210 to the ambient air from all calciners and nodulizing kilns at an elemental phosphorus plant shall not exceed a total of 2 curies a year; except that compliance with this standard may be conclusively shown if the elemental phosphorus plant:

(a) Installs a Hydro-Sonic® Tandem Nozzle Fixed Throat Free-Jet Scrubber System including four scrubber units,

(b) All four scrubber units are operated continuously with a minimum average over any 6-hour period of 40 inches (water column) of pressure drop across each scrubber during calcining of phosphate shale,

(c) The system is used to scrub emissions from all calciners and/or nodulizing kilns at the plant, and

(d) Total emissions of polonium-210 from the plant do not exceed 4.5 curies per year.

Alternative operating conditions, which can be shown to achieve an overall removal efficiency for emissions of polonium-210 which is equal to or greater than the efficiency which would be achieved under the operating conditions described in paragraphs (a), (b), and (c) of this section, may be used with prior approval of the Administrator. A facility shall apply for such approval in writing, and the Administrator shall act upon the request within 30 days after receipt of a complete and technically sufficient application.

3. Subpart K is amended by revising § 61.126 to read as follows:

§ 61.126 Monitoring of operations.

(a) The owner or operator of any source subject to this subpart using a wet-scrubbing emission control device shall install, calibrate, maintain, and operate a monitoring device for the continuous measurement and recording of the pressure drop of the gas stream across each scrubber. The monitoring device must be certified by the manufacturer to be accurate within ±250 pascal (±1 inch of water). The owner or operator of any source subject to this subpart using a wet-scrubbing emission control device shall also install, calibrate, maintain, and operate a monitoring device for the continuous measurement and recording of the scrubber fluid flow rate. These continuous measurement recordings shall be maintained at the source and made available for inspection by the Administrator, or his authorized representative, for a minimum of 5 years.

(b) The owner or operator of any source subject to this subpart using an electrostatic precipitator control device shall install, calibrate, maintain, and operate a monitoring device for the continuous measurement and recording of the primary and secondary current and the voltage in each electric field. These continuous measurement recordings shall be maintained at the source and made available for inspection by the Administrator, or his authorized representative, for a minimum of 5 years.

DEPARTMENT OF EDUCATION

[CFDA No: 84.212A]

Fund for the Improvement and Reform of Schools and Teaching: The Family-School Partnership Program; Notice Inviting Applications for New Awards for Fiscal Year 1992

Purpose of Program: To increase the involvement of families in improving the educational achievement of their children.

Eligible Applicants: Local educational agencies eligible to receive a grant under chapter 1 of title I of the Elementary and Secondary Education Act of 1965, as amended.

Deadline for Transmittal of Applications: 3/6/92.

Deadline for Intergovernmental Review: 5/6/92.

Applications Available: 1/14/92.

Available Funds: $2,500,000 (est.)

Estimated Range of Awards: $50,000–$200,000.

Estimated Average Size of Awards: $135,000.

Estimated Number of Awards: 19.

Note: The Department is not bound by any estimates in this notice.

Budget Period: 12 months.

Project Period: Up to 36 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 758.

Priorities—Absolute Priority: Under 34 CFR 75.105(c)(3), 34 CFR 758.4(d) and 34 CFR 758.5 (a) and (b), the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this competition only applications that meet this absolute priority:

Projects that provide training for families on the family's educational responsibilities at the preschool level.

Invitational Priorities: Within the absolute priority specified in this notice, the Secretary is particularly interested in applications that meet one or more of the following invitational priorities. However, under 34 CFR 75.105(c)(1), an application that meets one or more of the following invitational priorities does not receive competitive or absolute preference over other applications:

Invitational Priority 1—

Projects that will increase the involvement of families in improving the educational achievement of at-risk children;

Invitational Priority 2—

Projects that assist families in their efforts to prepare at-risk children to enter school ready to learn;

Invitational Priority 3—

Projects that form family-school partnerships designed around the accomplishment of the National Education Goals.

Supplementary Information: This program and these priorities complement AMERICA 2000, the President's strategy for moving the nation toward achievement of the National Education Goals. By assisting families in preparing their children to enter school ready to learn, and increasing the family's involvement in the educational achievement of their children, this program will enhance the ability of schools to improve the academic performance of students.

The Secretary is also interested in projects that have the potential to be disseminated by the National Diffusion Network (NDN). The NDN is a dissemination system through which proven exemplary education programs and processes are made available to interested school systems or other educational institutions around the country. In order to become eligible for dissemination by NDN, a project must be proven to be effective. Evidence of project effectiveness must be collected and presented to the Department's Program Effectiveness Panel (PEP). Projects that are judged effective by PEP become eligible to compete for dissemination funds from the NDN. Therefore, the Secretary encourages applicants who are interested in having their projects disseminated by the NDN to include an evaluation plan that will assess effectiveness and impact of project activities with emphasis upon changes in school practices and student performance.

For Applications or Information Contact: Diane Hill, U.S. Department of Education, Fund for the Improvement and Reform of Schools and Teaching, 555 New Jersey Avenue, NW., room 522, Washington, DC 20208–5524. Telephone: (202) 219–1496. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 4821–4823

Exclusion of Attorneys From Interviews Under Subpoena

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is revoking its regulations pertaining to exclusion of attorneys from interviews under subpoena. These regulations were vacated upon judicial review by the United States Court of Appeals for the District of Columbia Circuit.

EFFECTIVE DATE: January 21, 1992.

FOR FURTHER INFORMATION CONTACT: Roger K. Davis, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington DC 20555, telephone (301) 492–1606.

SUPPLEMENTARY INFORMATION: Upon judicial review, the United States Court of Appeals for the District of Columbia Circuit vacated the attorney exclusion portion of the rule, titled "Sequestration of Witnesses Under Subpoena/ Exclusion of Attorneys," which was published by the Commission on January 4, 1990 (55 FR 243). *Professional Reactor Operator Society* v. *United States Nuclear Regulatory Commission*, 939 F.2d 1047 (DC Cir. 1991). Consequently, the NRC is revoking and removing the definition of "exclusion" appearing in 10 CFR 19.3, and the standard and procedures for attorney exclusion appearing in 10 CFR 19.18(b)–(e).

Since this action implements the ruling of the appeals court, the NRC has determined that there is "good cause" for publication of this final rule without a general notice of proposed revocation for comment. See 5 U.S.C. 553(b). However, the NRC is concurrently publishing for comment a proposed rule that would replace the vacated attorney exclusion provisions with a rule that conforms to the guidance of the court.

Environmental Impact: Categorical Exclusion

The NRC has determined that this final rule is the type of action described in categorical exclusion 10 CFR 51.22(c)(1). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this final rule.

Paperwork Reduction Act Statement

This final rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). Existing requirements were approved by the Office of Management and Budget approval number 3150–0044.

Regulatory Analysis

This regulatory action is taken in response to the decision of the United States Court of Appeals for the District of Columbia in *Professional Reactor Operator Society* v. *United States Nuclear Regulatory Commission*, 939 F.2d 1047 (D.C. Cir. 1991). The appeals court vacated the attorney exclusion portion of 10 CFR part 19. Consequently, the NRC is revoking the attorney exclusion provisions reported in 10 CFR part 19.

Backfit Analysis

The NRC has determined that a backfit analysis is not required because these amendments do not involve any provisions which would impose backfits as defined in 10 CFR 50.109(a)(1).

List of Subjects in 10 CFR Part 19

Criminal penalties, Environmental protection, Nuclear materials, Nuclear power plants and reactors, Occupational safety and health, Radiation protection, Reporting and recordkeeping requirements, Sex discrimination.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 552 and 553, the NRC is adopting the following amendments to 10 CFR Part 19.

PART 19—NOTICES, INSTRUCTIONS AND REPORTS TO WORKERS: INSPECTION AND INVESTIGATIONS

1. The authority citation for part 19 continues to read as follows:

Authority: Secs. 53, 63, 81, 103, 104, 161, 186, 68 Stat. 930, 933, 935, 936, 937, 948, 955, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2073, 2093, 2111, 2133, 2134, 2201, 2236, 2282); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841). Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 19.11 (a), (c), (d), and (e) and 19.12 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); and §§ 19.13 and 19.14(a) are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

§ 19.3 [Amended]

2. In § 19.3, the definition of "Exclusion" is removed.

§ 19.18 [Amended]

3. In § 19.18, paragraphs (b)–(e) are removed and reserved.

Dated at Rockville, Maryland this 13th day of December 1991.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590–01–M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 19

RIN 3150–AE11

Exclusion of Attorneys From Interviews Under Subpoena

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to amend its regulations to provide for the exclusion of counsel from interviews of a subpoenaed witness when that counsel represents multiple interests and there is concrete evidence that such representation would obstruct and impede the investigation. The proposed amendments are designed to ensure the integrity and efficacy of the investigative and inspection process. The proposed amendments are not expected to have any economic impact on the NRC or its licensees. Concurrently, the NRC is publishing a final rule revoking its previously-published attorney exclusion regulations. Those regulations were vacated upon judicial review.

DATES: Comment period expires February 18, 1992. Comments received after this date will be considered if it is practical to do so, but the Commission can only assure consideration of those comments received on or before that date.

ADDRESSES: Mail written comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Servicing Branch.

Deliver comments to: 2120 L Street, NW., Washington, DC, between 7:30 am and 4:15 pm, Monday through Friday.

Comments received may be examined at the NRC Public Document Room, at 2120 L Street NW. (Lower Level), Washington, DC.

FOR FURTHER INFORMATION CONTACT: Roger K. Davis, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone: (301) 492–1606.

SUPPLEMENTARY INFORMATION: On January 4, 1990 (55 FR 243), the Nuclear Regulatory Commission (NRC) published in the **Federal Register** amendments to its regulations found at 10 CFR Part 19. The NRC published the proposed rule on November 14, 1988 (53 FR 45768). These amendments provided for the sequestration of witnesses compelled by subpoena to appear in connection with NRC investigations or inspections. These amendments also provided for the exclusion of counsel for a subpoenaed witness when that counsel represented multiple interests and there was reasonable basis to believe that such representation would prejudice, impede, or impair the integrity of the inquiry. In addition, the amendments specified responsibilities of the NRC and rights of individual witnesses, licensees and attorneys when exclusion authority was to be exercised.

Both the sequestration provision and the attorney exclusion portion of the rule were challenged in a petition to the United States Court of appeals for the District of Columbia Circuit for judicial review. On July 23, 1991, the court of appeals upheld the sequestration portion of the Commission's rule, vacated the portion on attorney exclusion, and remanded the matter to the Commission for further consideration consistent with the court's opinion. *Professional Reactor Operator Society* v. *United States Nuclear Regulatory Commission*, 939 F.2d 1047 (D.C. Cir. 1991). The provisions of the rule relating to attorney exclusion were the definition of "exclusion" appearing in 10 CFR 19.3 and the standard and procedures for attorney exclusion appearing in 10 CFR 19.18(b)–(e).

The court of appeals found that the "reasonable basis" part of the standard for exclusion of counsel infringed to an impermissible degree on the right to counsel guarantee of the Administrative Procedure Act (APA), 5 U.S.C. 555(b). The court reasoned that it was not free, without express Congressional direction, to expand or contract the right to counsel at investigatory interviews depending on the mission of a particular agency. In a prior interpretation of the APA right to counsel guarantee, the court had ruled that the Securities and Exchange Commission could not exclude an attorney from representing a subpoenaed witness during an interview unless the agency came forward with "concrete evidence" that the counsel's presence would obstruct and impede its investigation. *SEC* v. *Csapo*, 533 F.2d 7, 11 (D.C. Cir. 1976). Since the NRC's "rational basis" standard was less rigorous than the "concrete evidence" requirement stated in *Csapo*, the court vacated the attorney exclusion portion of the NRC rule.

These proposed amendments are, in essence, a logical outgrowth of the court's guidance in *Professional Reactor Operator Society* v. *NRC, supra*. In response to the appeals court decision, the Commission has determined that its statutory responsibilities would be served by adoption of an attorney exclusion rule containing a "concrete evidence" standard. The Commission notes that a number of the commenters on the NRC's earlier proposed rule (53 FR 45768) expressed the view that the proper standard for exclusion of counsel by the NRC was the *Csapo* "concrete evidence" standard.

It is clear that one important means by which the Commission implements its responsibility for ensuring public health and safety is by investigation of unsafe practices and potential violations of the Atomic Energy Act and NRC regulations. *See* 10 CFR Part 19; 10 CFR 1.36. NRC investigators must often interview licensees, their employees, and other individuals having possible knowledge of matters under investigation. Effective identification and correction of unsafe practices or regulatory violations through an investigative or inspection process may depend upon the willingness of individuals having possible knowledge of the practices or violations to speak openly and candidly to Commission officials. In many cases, investigating officials must also conduct extensive and difficult inquiries to determine whether violations were willful and/or whether licensee's management engaged in wrongdoing.

As specified in 10 CFR 19.2, the rule would apply to all interviews under subpoena within the jurisdiction of the Nuclear Regulatory Commission other than those which focus on NRC employees or its contractors. The rule does not apply, however, to subpoenas issued pursuant to 10 CFR 2.720. Although in the discussion that follows we use the terms "licensee" or "licensee's counsel," the rule and its rationale apply as well to "non-licensees" whose activities fall within the jurisdiction of the Commission. Similarly, while much of the discussion most directly concerns interviews conducted under subpoena by the NRC's Office of Investigations, the proposed rule would also apply to NRC inspections and investigations conducted under subpoena by other NRC officials.

The Commission's principal concerns relate to cases in which licensee's counsel or counsel retained by the licensee represent both the licensee or licensee's officials under investigation and other employees who are to be witnesses. In these contexts, the Commission believes that there is potential for inhibiting the candor of witnesses who may be hesitant or unwilling to divulge information against the interests of the licensee or its officials in the presence of the licensee's counsel or counsel retained by the

VOL 56 ISS 244 DEC 19 1991 UMI

licensee. The concern about potential inhibition may be heightened where the counsel intends to tell the employer everything that was said during an interview. It also may be heightened where the matter under investigation concerns whether licensee's employees have been, or are being, harassed or intimidated for raising safety issues. Multiple representation can also raise the concern that a subject of the investigation may learn facts, theories or strategies that are revealed in an interview and then act in ways that would obstruct further steps in the investigation. Consequently, the Commission has had a long-standing concern [1] that, in some instances of multiple representation, the Commission's ability to identify and correct unsafe practices and regulatory violations may be seriously impaired.

The Commission recognizes that neither mere multiple representation nor speculation about a potential for obstruction of an investigation is a sufficient basis to exclude counsel. The Commission does not presume that a witness's retention of counsel who also represents the licensee or other employees necessarily will inhibit that witness from providing information to an NRC inspector or investigator during an interview. It also does not view vigorous advocacy by competent counsel as improper.

Rather, the proposed rule provides direction for handling cases in which there is concrete evidence that the presence of counsel for multiple interests at a witness's interview would obstruct and impede the investigation. The Commission cannot predict in detail what manner of circumstances will arise in particular investigations that will lead to consideration of application of the exclusion rule. However, invocation of the rule would obviously be supported by concrete evidence that the witness would be more forthcoming or candid during the interview if the witness were not represented by counsel who also represents the licensee or other employees. This might involve evidence that the witness would answer in greater detail if there were not an understanding that the counsel would, or might, report the substance of the interview to the licensee or other witness. For instance, evidence that the employee had a concern that his employment would be jeopardized by transmittal of information from the interview to the licensee would surely be relevant. It would also be relevant if there were evidence that the multiple representation would lead to disclosure of the substance of an interview to a future interviewee or subject in the investigation and that this disclosure would have an adverse impact on the investigation.

While there have been particular cases raising questions about means of addressing the perceived impairment of investigations as a result of multiple representation,[2] this rulemaking does not require, or rest upon, a determination of whether past cases have involved concrete evidence of obstruction. The principal bases of this rule are the Commission's policy judgments that: (1) Cases may arise where there will be concrete evidence that the presence of counsel representing multiple interests during an NRC interview would seriously obstruct the NRC investigation; (2) The remedy of exclusion of the counsel from that interview should be available; and (3) The rule should facilitate expeditious and satisfactory consideration of many questions concerning multiple representation during the course of NRC investigations. The Commission notes that the propriety and utility of such a rule, however rarely invoked and applied, was recognized in both *Csapo* and a previous circuit court decision involving the SEC's sequestration rule, although the facts of those cases did not warrant exclusion. *SEC* v. *Csapo*, 533 F.2d 7; *SEC.* v. *Higashi*, 359 F.2d 550, 552 (9th Cir. 1966).

Environmental Impact: Categorical Exclusion

The NRC has determined that this proposed rule is the type of action described in categorical exclusion 10 CFR 51.22(c)(1). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this proposed rule.

Paperwork Reduction Act Statement

This proposed rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). Existing requirements were approved by the Office of Management and Budget approval number 3150–0044.

Regulatory Analysis

The APA affords individuals compelled to submit to agency inquiry under subpoena the right to be accompanied by counsel or other representative of choice. 5 U.S.C. 555(b). Although the right to counsel guarantee of section 555(b) is not to be lightly disturbed, it is not absolute and may be circumscribed within permissible limits when justice requires as when there is concrete evidence that the presence of counsel during an investigative interview would impede and obstruct the agency's investigation.

Questions concerning the scope of the right to counsel have arisen in the context of NRC investigative interviews of licensee employees when the employee is represented by counsel who also represents the licensee or other witnesses or parties in the investigation. Although this arrangement is not improper on its face, the Commission believes that such multiple representation has the potential in some cases of inhibiting the candor of the witnesses and seriously impairing the integrity or efficacy of the NRC investigation. The proposed rule, which delineates NRC responsibilities concerning the availability of the remedy of exclusion of counsel, as well as rights of witness and counsel concerning the presence of counsel during the conduct of interviews, is intended to further expeditious and satisfactory resolution of NRC's inquiry into public health and safety matters. Guidance in this area should reduce delay and uncertainty in the completion of an investigation when certain questions of multiple representation arise. The foregoing discussion constitutes the regulatory analysis for this proposed rule.

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission hereby certifies that this rule, if promulgated, would not have a significant impact on a substantial number of small entities. The proposed rule, which sets forth rights and limitations on the choice of counsel of licensee employees and other individuals who are compelled to appear before NRC representatives under subpoena, would have no significant economic impact on a substantial number of small entities.

Backfit Analysis

The NRC has determined that a backfit analysis is not required because these amendments do not involve any provisions which would impose backfits as defined in 10 CFR 50.109(a)(1).

List of Subjects in 10 CFR Part 19

Criminal penalties, Environmental protection, Nuclear materials, Nuclear power plants and reactors, Occupational safety and health, Radiation protection, Reporting and recordkeeping requirements, Sex discriminations.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 553, the NRC is proposing to adopt the following amendments to 10 CFR part 19.

PART 19—NOTICES, INSTRUCTIONS AND REPORTS TO WORKERS: INSPECTION AND INVESTIGATIONS

1. The authority citation for part 19 continues to read as follows:

Authority: Secs. 53, 63, 81, 103, 104, 161, 186, 68 Stat. 930, 933, 935, 936, 937, 948, 955, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2073, 2093, 2111, 2133, 2134, 2201, 2236, 2282); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841). Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 19.11(a), (c), (d), and (e) and 19.12 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); and §§ 19.13 and 19.14(a) are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. In § 19.3, the definition of "Exclusion" is added to read as follows:

§ 19.3 Definitions.

* * * * *

Exclusion means the removal of counsel from an interview whenever the NRC official conducting the interview has concrete evidence that counsel's representation of multiple interests will obstruct and impede the particular investigation, inspection or inquiry.

* * * * *

3. In § 19.18, paragraphs (b)–(e) are added to read as follows:

§ 19.18 Sequestration of witnesses and exclusions of counsel in interviews conducted under subpoena.

* * * * *

(b) Any witness compelled by subpoena to appear at an interview during an agency inquiry may be accompanied, represented, and advised by counsel of his or her choice. However, when the agency official conducting the inquiry determines, after consultation with the office of the General Counsel, that the agency has concrete evidence that the investigation or inspection will be obstructed and impeded, directly or indirectly, by an attorney's representation of multiple interests, the agency official may prohibit that attorney from being present during the interview.

(c) The interviewing official is to provide a witness whose counsel has been excluded under paragraph (b) of this section and the witness's counsel a written statement of the reasons supporting the decision to exclude. This statement, which must be provided no later than five working days after exclusion, must explain the basis for the counsel's exclusion.

(d) Within five days after receipt of the written notification required in paragraph (c) of this section, a witness whose counsel has been excluded may appeal the exclusion decision by filing a motion to quash the subpoena with the Commission. The filing of the motion to quash will stay the effectiveness of the subpoena pending the Commission's decision on the motion.

(e) If a witness's counsel is excluded under paragraph (b) of this section, the interview may, at the witness's request, either proceed without counsel or be delayed for a reasonable period of time to permit the retention of new counsel. The interview may also be rescheduled to a subsequent date established by the NRC.

Dated at Rockville, Maryland this 13th day of December, 1991.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 123

Disaster—Physical Disaster and Economic Injury Loans

AGENCY: Small Business Administration.

ACTION: Interim final rule.

SUMMARY: This interim final rule amends SBA's regulations concerning physical and economic injury disaster loans to implement a program for direct loans to small business concerns which have sustained severe economic injury as a result of troop deployments, related to the Persian Gulf conflict, from military installations in the same county or a county contiguous thereto. SBA is publishing this regulation as an interim final rule pursuant to the authority set forth in Public Law 102–190.

EFFECTIVE DATE: This rule is effective December 19, 1991.

ADDRESSES: Written comments should be addressed to Alfred E. Judd, Acting Assistant Administrator for Disaster Assistance, U.S. Small Business Administration, 409 Third Street SW., Eighth Floor, Washington, DC 20416.

FOR FURTHER INFORMATION CONTACT: Alfred E. Judd, (202) 205–6734.

SUPPLEMENTARY INFORMATION: SBA regulations governing physical and economic injury disaster loans are set out in part 123 of title 13, Code of Federal Regulations (CFR). SBA is amending these regulations to add coverage for a program which will provide for direct loans to small business concerns which have sustained economic injury as the result of troop deployments, related to the Persian Gulf conflict, from military installations located in the same county or a county contiguous thereto. (Hereinafter, the term county, as used in this preamble and regulation, shall include other equivalent political subdivisions.)

Section 1087 of Public Law 102–190, the National Defense Authorization Act for Fiscal Years 1992 and 1993, enacted on December 5, 1991, authorizes the Administrator of SBA to make emergency direct loans to small business concerns located in a county in the United States in which at least five small business concerns have suffered severe economic injury as a result of the emergency deployment, after July 31, 1990, in connection with the Persian Gulf conflict, of members and units of the Armed Forces from military installations in or near that county. Public Law 102–190 provides that the source of funding for this program is funds appropriated to the Department of Defense in Public Law 101–511, if and to the extent such funding is available. This interim final rule amends 13 CFR part 123 to implement this program.

Under these regulations, in order to be eligible for a loan pursuant to the authority set forth in section 1087, a small business concern must meet certain criteria established in the statute, as well as SBA's general loan eligibility standards contained in title 13, Code of Federal Regulations, pertaining to economic injury disaster loans. The statute requires that, to be eligible for a loan, a small business concern must have (1) suffered economic injury as a result of the emergency deployment of members and units of the Armed Forces in connection with the Persian Gulf conflict and (2) been unable to obtain credit elsewhere. The relevant general eligibility criteria set forth in 13 CFR 123.40 and 123.41, which describe the eligibility criteria for economic injury disaster loans, also apply to loans made under this authority.

To receive a loan under this program, a small business concern must be located within a county designated, by SBA, pursuant to a Governor's certification, as an area of economic injury resulting from the deployment of troops related to the Persian Gulf conflict. (Hereinafter, the term Governor, as used in this regulation, shall include other equivalent officials.) SBA will require that the Governors of affected states certify that small business concerns in counties within their respective states have suffered such severe economic injury. This certification will be based upon criteria similar to that used by SBA to declare economic injury as a result of a physical disaster. These criteria are described in 13 CFR 123.23(c).

The Governors will be required to submit their certification to the Assistant Administrator for Disaster Assistance, in SBA's Central Office, as well as any additional documentation SBA may require. Such documentation will be similar to the supplemental documentation required by SBA for its economic injury disaster loan program. Thereafter, SBA will expeditiously make designations of eligible areas of economic injury.

A loan made under this program to a small business concern shall not exceed $50,000. The terms and interest rate for loans under this program shall be the same as the terms and interest rate for loans made pursuant to section 7(c)(5)(C) of the Small Business Act [15 U.S.C. 636(c)(5)(C)). The term of a loan made pursuant to this section may not exceed 30 years and the interest rate may not exceed four percent (4%). Further, a small business concern must meet the requirements of SBA's size standard regulations codified at part 121 of the Code of Federal Regulations and other eligibility criteria generally applicable to SBA economic injury disaster loans.

The Administrator's authority to make loans under these regulations shall expire after a 270-day period beginning on the date on which the Administrator first accepts applications for loans under this program.

In accordance with section 1087(g) of Public Law 102–190, SBA is publishing this regulation as an interim final rule effective immediately upon publication. However, SBA will accept written comments concerning this rule suggesting any modifications.

Compliance With Executive Order 12291 and 12612, the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., and the Paperwork Reduction Act, 44 U.S.C. Ch. 35

For purposes of Executive Order 12291, SBA certifies that this rule will not constitute a major rule because it is not likely to have an annual effect on the economy of $100 million or more, will not result in a major increase in costs for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, and will not have significant adverse effects on competition. SBA makes this certification based upon the fact that the appropriation for the emergency loan program established herein will not exceed $30,000,000 and does not affect State or local government.

For purposes of the Regulatory Flexibility Act, SBA certifies that this rule will not have a significant economic impact on a substantial number of small entities for the same reason that it would not be a major rule.

For purposes of the Paperwork Reduction Act, SBA certifies that this rule will impose no new reporting or recordkeeping requirements.

For purposes of Executive Order 12612, SBA certifies that this rule will not have federalism implications warranting the preparation of a Federalism Assessment

List of Subjects in 13 CFR Part 123

Disaster assistance, Loan programs—business, Reporting and recordkeeping requirements, Small businesses.

For the reasons set out in the preamble, part 123 of title 13, Code of Federal Regulations, is amended as follows:

PART 123—[AMENDED]

1. The authority citation for part 123 is revised to read as follows:

Authority: Sections 5(b)(6), 7 (b), (c), (f) of the Small Business Act, 15 U.S.C. 634(b)(6), 636 (b), (c), (f); Pub. L. 100–590; and Pub. L. 102–190.

2. Section 123.1(a), *Explanation of regulations,* is amended by adding at the end thereof a new sentence to read as follows:

§ 123.1 Explanation of regulations.

(a) * * * Subpart D includes regulations for direct loans to small business concerns which have suffered economic injury as a result of troop deployments, related to the Persian Gulf conflict, from military installations located in the same county or a county contiguous thereto.

* * * * *

3. Part 123 of title 13, Code of Federal Regulations is amended by adding at the end thereof a new subpart D to read as follows:

Subpart D—Persian Gulf Troop Deployment Economic Injury Loans

Sec.
123.60 Introduction.
123.61 Definitions.
123.62 Designation procedure
123.63 Eligibility.
123.64 Terms and conditions of loan.
123.65 Applications for loans.
123.66 Expiration of authority.
123.67 Relationship to SBA disaster loan program
123.68 Funding.
123.69 Other requirements

Subpart D—Persian Gulf Troop Deployment Economic Injury Loans

§ 123.60 Introduction.

Loans to which this subpart applies are available only to eligible small business concerns, as described in § 123.63, located in a county in the United States in which at least five small business concerns have suffered severe economic injury as a result of the emergency deployment, after July 31 1990, of members and units of the Armed Forces from military installations in such county or a county contiguous thereto, in connection with the Persian Gulf conflict. (Hereinafter, the term county, as used in this subpart, shall include other equivalent political subdivisions as defined in § 123.61.)

§ 123.61 Definitions.

For purposes of this section:

(a) The term *county* includes other equivalent political subdivisions such as, but not limited to, parishes, independent cities of, and as defined by, the Commonwealth of Virginia and the City of Baltimore, Maryland, and municipalities of the Commonwealth of Puerto Rico, of a State, territory, or other equivalent jurisdiction within the United States.

(b) The term *credit elsewhere* refers to the availability, based on cash flow and disposable assets of the applicant, of sufficient credit from non-Federal sources on reasonable terms and conditions, taking into consideration prevailing rates and terms in the community in or near where the concern transacts business for similar purposes and periods of time.

(c) The term *severe economic injury* shall have the same meaning as the term "substantial economic injury" defined in 13 CFR 123.41(a).

(d) The term *small business concern* has the meaning given that term in section 3 of the Small Business Act (15 U.S.C. 632).

§ 123.62 Designation procedure.

(a) The Governor of a State where a military installation is located may certify to SBA that small business concerns in a county in which a military installation is located, or a county contiguous thereto, have suffered severe economic injury as a result of the emergency deployment, after July 31, 1990, of members and units of the Armed Forces from military installations in the State, in connection with the Persian Gulf conflict. (Hereinafter, the terms Governor and State, as used in this subpart, shall include other equivalent officials and other equivalent jurisdictions.)

(b) The economic injury must be to such a degree as to warrant Federal involvement in the form of subsidized loans. This requirement will be satisfied if at least five (5) small business concerns in the county where the military installation is located, or a county which is contiguous thereto, have suffered such severe economic injury.

(c) The Governor's certification shall further specify each military installation, and the county it is located in and those counties which are contiguous thereto, within his or her respective State from which a deployment occurred sufficient to cause severe economic injury to small business concerns in the same county or counties contiguous thereto.

(d) The Administrator will take final action, and, if the request is approved, publish a notice, in the **Federal Register**, of designation of an area of economic injury.

(e) The Governor's certification, together with all necessary supporting documentation, should be received by the SBA Office of Disaster Assistance, Central Office, within 15 days of the effective date of this regulation. If the Governor's certification is received within the 15-day period, SBA will process the request for designation prior to the beginning of the application filing period. Certifications received after the 15-day period will be processed in an expeditious manner.

§ 123.63 To be eligible for a loan under this program, a small business concern must:

(a) Be located in a county in the United States, which has been designated in accordance with § 123.62;

(b) Have suffered severe economic injury as a result of the emergency deployment of members and units of the Armed Forces, from military installations in that county or a county contiguous thereto, in connection with the deployment of members and units of the Armed Forces during the Persian Gulf conflict;

(c) Be unable to obtain credit elsewhere; and

(d) Be otherwise eligible for SBA economic injury disaster assistance loans pursuant to 13 CFR 123.41(b).

(e) Agricultural enterprises, as defined in § 123.17, are not eligible for loans pursuant to this subpart.

§ 123.64 Terms and conditions of loan.

(a) Any loan made to a small business concern pursuant to this section shall be a direct loan.

(b) A loan made to a small business concern pursuant to this section may not exceed fifty thousand dollars ($50,000).

(c) The interest rate for a loan made pursuant to this section shall not exceed four percent (4%).

(d) The term of a loan made pursuant to this section shall not exceed thirty (30) years.

(e) Repayment ability shall be determined by SBA. Maturity and installment terms shall be established on each loan on the basis of the borrower's ability to pay. In most cases equal monthly installment payments of principal and interest, beginning five (5) months from the date of the note, are required, but other payment terms may be accorded borrowers with seasonal or fluctuating income, and installment payments of varying amounts over the first two (2) years of the loan may be agreed upon if SBA determines that such schedule better reflects the borrower's ability to pay. There is no penalty for prepayment of a direct loan.

(f) SBA will require such collateral as is available for any economic injury loan made pursuant to this subpart which exceeds five thousand dollars ($5,000). When SBA requires an

VOL
56
ISS
244
DE
19
1991
UMI

applicant to pledge available collateral in accordance with this section, the applicant's refusal to pledge such collateral may justify the decline of a loan. Generally, SBA will not decline a loan where the applicant does not have any fixed amount of collateral available to pledge if there is reasonable assurance of repayment.

§ 123.66 Applications for loans.

(a) To receive a loan pursuant to this section, a small business concern shall submit an application to the SBA Disaster Area Office which serves the area where the small business concern is located. The application form and procedures are as set forth in § 123.7 of this part.

(b) The application filing period for small business concerns seeking a loan will begin 30 days from the effective date of this regulation. Applications will not be available, nor will they be accepted, prior to that date. The filing period ends 180 days after the application filing period commences. Applications cannot be accepted after the 180-day filing period.

(c) The provisions of § 123.12, concerning reconsideration, apply to all loans made pursuant to this subpart. However, any request for reconsideration submitted in accordance with § 123.12(b) must be received by SBA within 30 days of the initial decline. Further, in no event may SBA obligate funds pursuant to this subpart for a loan after the 270-day period has expired. Thus, any application for a loan under this subpart which is not funded at the expiration of the 270-day period, no matter what the circumstances or reasons, cannot and will not be approved.

§ 123.66 Expiration of authority.

The authority of the Administrator of the Small Business Administration to obligate funds for loans pursuant to this subpart shall expire after a 270-day period beginning on the date the application filing period commences (see § 123.65(b)).

§ 123.67 Relationship to SBA Disaster Loan Program.

This program will be administered in a manner similar to the Economic Injury Disaster Loan Program (15 U.S.C. 7(b)) and the regulations promulgated thereunder.

§ 123.68 Funding.

Public Law 102–190 provides that the source of funding for this program is funds appropriated to the Department of Defense in Public Law 101–511, if and to the extent such funding is available.

§ 123.69 Other requirements.

For explanation of regulations, see § 123.1; for fees and charges, see § 123.6(a); for loan authorization and closing requirements, see § 123.8; for loan administration, extension, and liquidation, see §§ 123.13(a) and (b); for civil rights requirements, see § 123.15(a); for books and records requirements, see § 123.18; and for use of proceeds, see § 123.41(g).

Dated: December 12, 1991.

Patricia Saiki,

Administrator.

DEPARTMENT OF EDUCATION

[CFDA No: 84.211A]

Fund for the Improvement and Reform of Schools and Teaching, Schools and Teachers Program; Notice Inviting Applications for New Awards for Fiscal Year 1992

Purpose of Program: To support Schools and Teachers projects that improve educational opportunities for and the performance of elementary and secondary school students and teachers.

Eligible Applicants: State educational agencies, local educational agencies, institutions of higher education, nonprofit organizations, individual public or private schools, consortia of individual schools, and consortia of these schools and institutions.

Deadline for Transmittal of Applications: 3/6/92.

Deadline for Intergovernmental Review: 5/6/92.

Applications Available: 1/14/92.

Available Funds: $1,500,000 (est).

Estimated Range of Awards: $50,000–$250,000.

Estimated Average Size of Awards: $150,000.

Estimated Number of Awards: 10.

Note: The Department is not bound by any estimates in this notice.

Budget Period: 12 months.

Project Period: Up to 36 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 757.

Priorities—Absolute Priority: Under 34 CFR 75.105(c)(3), 34 CFR 757.4(j), and 34 CFR 757.5(a), the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this competition only applications that meet this absolute priority:

Projects devoted to improving the teacher certification process, especially for schools, school districts, and States facing serious shortages of teachers.

Competitive Preference Priorities: Within the absolute priority specified in this notice, the Secretary, under 34 CFR 75.105(c)(2)(i) and 34 CFR 757.5(b), gives preference to applications that meet one or more of the following competitive preference priorities. Under 34 CFR 757.20(d), the Secretary awards up to 25 points to an application that meets one or more of the competitive preference priorities in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for this program.

Competitive Preference Priority 1—

Projects that benefit students or schools with below-average academic performance;

Competitive Preference Priority 2—

Projects that lead to increased access of all students to a high quality education; or

Competitive Preference Priority 3—

Projects that develop or implement a system for providing incentives to schools, administrators, teachers, students, or others to make measurable progress toward specific goals of improved educational performance.

Invitational Priorities: Within the absolute priority specified in this notice, the Secretary is particularly interested in applications that meet one or more of the following invitational priorities. However, under 34 CFR 75.105(c)(1), an application that meets an invitational priority does not receive competitive or absolute preference over other applications.

Invitational Priority 1—

Projects that recognize in the teacher certification process the importance of the five core subject areas of English, history, geography, mathematics, and science.

Invitational Priority 2—

Projects that provide an alternate route for teacher certification for individuals who have not completed professional education in a traditional teacher training program. The Secretary is interested in projects that involve individuals who have professional experience in fields outside of education, such as government, the military, and human services, and recent college graduates with majors in the liberal arts and sciences.

Invitational Priority 3—

Projects that show the commitment to the project of the applicant and other participating organizations as evidenced by: (1) The contribution of resources by the applicant and any other participating organization; (2) prior work in the areas of concern of the project by the applicant and any other participating organization; and (3) the potential for continuation of the project beyond the period of Federal support.

Supplementary Information: This program and these priorities complement AMERICA 2000, the President's strategy for moving the nation toward achievement of the National Education Goals. By promoting improvements in the preparation of teachers in the five core subjects, and by supporting non-traditional routes of entry into the teaching profession, this program will strengthen the ability of teachers to help students achieve high levels of academic performance.

The Secretary is also interested in projects that have the potential to be disseminated by the National Diffusion Network (NDN). The NDN is a dissemination system through which proven exemplary education programs and processes are made available to interested school systems or other educational institutions around the country. In order to become eligible for dissemination by NDN, a project must be proven to be effective. Evidence of project effectiveness must be collected and presented to the Department's Program Effectiveness Panel (PEP). Projects that are judged effective by PEP become eligible to compete for dissemination funds from the NDN. Therefore, the Secretary encourages applicants who are interested in having their projects disseminated by the NDN to include an evaluation plan that will assess effectiveness and impact of project activities with emphasis upon changes in school practices and student performance.

For Applications or Information Contact: Eleanor Dougherty, U.S. Department of Education, Fund for the Improvement and Reform of Schools and Teaching, 555 New Jersey Avenue, NW., room 522, Washington, D.C. 20208–5524. Telephone: (202) 219–1496. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 4811–4812.

Dated: December 13, 1991

Diane Ravitch,

Assistant Secretary and Counselor to the Secretary.

UMI

DEPARTMENT OF EDUCATION

[CFDA NO. 84.211B]

Fund for the Improvement and Reform of Schools and Teaching: Schools and Teachers Program—School Level Projects; Notice Inviting Applications for New Awards for Fiscal Year 1992

Purpose of Program: To support school-level projects under the Schools and Teachers Program that improve educational opportunities for and the performance of elementary and secondary school students and teachers. The type of applicants who are eligible to apply is what distinguishes the competition for school-level projects from the competition for other types of projects in the Schools and Teachers Program.

Eligible Applicants: Local educational agencies acting as the fiscal agent for a full-time teacher or administrator.

Deadline for Transmittal of Applications: 3/6/92.

Deadline for Intergovernmental Review: 5/6/92.

Applications Available: 1/14/92.

Available Funds: $1,500,000 (est.)

Estimated Range of Awards: $5,000–$125,000.

Estimated Average Size of Awards: $50,000.

Estimated Number of Awards: 30.

Note: The Department is not bound by any estimates in this notice.

Budget Period: 12 months.

Project Period: Up to 36 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 757.

Priorities—Absolute Priorities: Under 34 CFR 75.105(c)(3), 34 CFR 757.4(c), and 34 CFR 757.5(a) and (c), the Secretary gives an absolute preference to applications that meet the following priorities. The Secretary funds under this competition only applications that meet these absolute priorities:

Absolute Priority 1—

School-level projects conducted at an individual school or a consortium of schools, under the direction of a full-time teacher or administrator.

Absolute Priority 2—

Projects that propose to strengthen school leadership and teaching.

Competitive Preference Priorities: Within the absolute priorities specified in this notice, the Secretary, under 34 CFR 75.105(c)(2)(i) and 34 CFR 757.5(b), gives preference to applications that meet one or more of the following competitive preference priorities. Under 34 CFR 757.20(d), the Secretary awards up to 25 points to an application that meets one or more of these competitive preference priorities in a particularly effective way. These points are in addition to any points the application earns under the selection criteria for the program.

Competitive Preference Priority 1—

Projects that benefit students or schools with below-average academic performance;

Competitive Preference Priority 2—

Projects that lead to increased access of all students to a high quality education; or

Competitive Preference Priority 3—

Projects that develop or implement a system for providing incentives to schools, administrators, teachers, students, or others to make measurable progress toward specific goals of improved educational performance.

Invitational Priorities: Within the absolute priorities specified in this notice, the Secretary is particularly interested in applications that meet one or more of the following invitational priorities. However, under 34 CFR 75.105(c)(1), an application that meets an invitational priority does not receive competitive or absolute preference over other applications:

Invitational Priority 1—

Projects that will contribute to the ability of American students to demonstrate competency in the core subject of history;

Invitational Priority 2—

Projects that focus on the common heritage of the American people, with a special emphasis on the Founding Documents such as the Declaration of Independence, the Constitution, the Bill of Rights, and The Federalist as the source of that heritage;

Invitational Priority 3—

Projects that are designed to promote educational change that improves academic achievement, enhances skills necessary to compete in a global economy, and fosters informed citizenship among all American children;

Invitational Priority 4—

Projects that are directed toward improving education at the elementary level.

Supplementary Information. This program and these priorities support AMERICA 2000, the President's strategy for moving the nation toward achievement of the National Education Goals. By strengthening school leadership and teaching, with particular emphasis on the core subject of history, this program will enhance the ability of the nation's schools to improve the academic performance of students.

The Secretary is also interested in projects that have the potential to be disseminated by the National Diffusion Network (NDN). The NDN is a dissemination system through which proven exemplary education programs and processes are made available to interested school systems or other educational institutions around the country. In order to become eligible for dissemination by NDN, a project must be proven to be effective. Evidence of project effectiveness must be collected and presented to the Department's Program Effectiveness Panel (PEP). Projects that are judged effective by PEP become eligible to compete for dissemination funds from the NDN. Therefore, the Secretary encourages applicants who are interested in having their projects disseminated by the NDN to include an evaluation plan that will assess effectiveness and impact of project activities with emphasis upon changes in school practices and student performance.

DEPARTMENT OF EDUCATION

[CFDA No.: 84.215B]

Fund for Innovation in Education: Comprehensive School Health Education Program; Notice Inviting Applications for New Awards for Fiscal Year 1992

Purpose of Program: To encourage the provision of comprehensive school health education for elementary and secondary students.

Eligible Applicants: State educational agencies, local educational agencies, institutions of higher education, private schools, and other public and private agencies, organizations, and institutions.

Deadline for Transmittal of Applications: 2/14/92.

Deadline for Intergovernmental Review: 4/14/92

Applications Available: 12/23/91.

Available Funds: $2,500,000 (est.).

Estimated Range of Awards: $75,000—$250,000.

Estimated Average Size of Awards: $170,000.

Estimated Number of Awards: 15.

Note: The Department is not bound by any estimates in this notice.

Budget Period: 12 months.

Project Period: Up to 36 months.

Applicable Regulations: The Education Department of General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for Student Rights in Research, Experimental Programs, and Testing in 34 CFR part 98.

Priorities: Under 34 CFR 75.105(c)(1) the Secretary is particularly interested in applications that meet one or more of the following invitational priorities. However, an application that meets one or more of these invitational priorities does not receive competitive or absolute preference over other applications:

Invitational Priority 1

Projects to strengthen and expand comprehensive school health education curriculum for elementary school children (K–8). Of particular interest are projects that establish a comprehensive new curriculum that integrates key school health education concepts into all aspects of the school program.

Invitational Priority 2

Projects that improve the training of elementary teachers (K–8) and other appropriate school personnel in comprehensive school health education. Of particular interest are projects that develop and implement new in-service programs for school personnel to expand knowledge of personal health and fitness, nutrition, family health, accident prevention and safety, substance use and abuse, and prevention of communicable diseases.

Invitational Priority 3

Projects involving schools, parents, and communities in planning and implementing comprehensive school health education for elementary school students. Of particular interest are projects that provide opportunities to help parents understand health issues and problems and offer parents ideas for improving their children's health at home. This priority supports an important element of AMERICA 2000, the President's strategy for achieving the National Education Goals, by encouraging schools, parents, and communities to join together to improve the education of children.

Supplementary Information: Within these priorities, the Secretary is particularly interested in projects that provide students with the knowledge and decision-making skills that will enable them to establish healthy behaviors and practices throughout their lives.

The Secretary is also interested in projects that have potential to be disseminated by the National Diffusion Network (NDN). The NDN is a dissemination system through which proven exemplary education programs and processes are made available to interested school systems or other educational institutions around the country. In order to become eligible for dissemination by NDN, a project must be proven to be effective. Evidence of project effectiveness must be collected and presented to the Department's Program Effectiveness Panel (PEP). Projects that are judged effective by PEP become eligible to compete for dissemination funds from the NDN. Therefore, the Secretary encourages applicants who may be interested in having their projects disseminated by the NDN to include an evaluation plan that will assess effectiveness and impact of project activities with emphasis upon changes in school practices and student performance.

Selection Criteria: In evaluating applications for grants under this program, the Secretary uses the selection criteria in EDGAR, 34 CFR 75.210.

The regulations in 34 CFR 75.210(c) provide that the Secretary may award up to 100 points for the selection criteria, including a reserved 15 points. For this competition the Secretary distributes the 15 points as follows:

Plan of Operation: (34 CFR 75.210(b)(3)). Five points are added to this criterion for a possible total of 20 points.

Evaluation Plan: (34 CFR 75.210(b)(6)). Ten points are added to this criterion for a possible total of 15 points.

For Applications or Information Contact: Joe Caliguro, U.S. Department of Education, Fund for the Improvement and Reform of Schools and Teaching, 555 New Jersey Avenue, NW., room 522, Washington, DC 20208–5524. Telephone (202) 219–1496. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC. 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program authority: 20 U.S.C. 3151, 3155.

Dated: December 13, 1991.

Wetland Identification and Delineation Rule

AGENCIES: Environmental Protection Agency; Corps of Engineers, Department of the Army, DOD; Soil Conservation Service, Agriculture; and Fish and Wildlife Service, Interior.

ACTION: Proposed rule; notice of availability; comment period extension.

SUMMARY: The Environmental Protection Agency (EPA), Army Corps of Engineers (Corps), and Soil Conservation Service (SCS) are proposing today to incorporate portions of the Federal Manual for Identifying and Delineating Jurisdictional Wetlands into the regulations governing the agencies' wetland protection programs. The provisions proposed today reflect revisions to the manual proposed on August 14, 1991 (56 FR 40446), and the final rule adopted by the agencies will be consistent with final manual adopted by the agencies after consideration of all public comments on the manual and today's proposal. In addition, in order to ensure adequate opportunity for public input, the above three agencies and the Fish and Wildlife Service are making the field data and other technical references available today for public review and comment. On October 16, 1991 (56 FR 61868), these four agencies extended the comment period on the proposed manual until December 14, 1991. In order to provide notice of today's proposed rule at least 30 days prior to the end of the comment period on the proposed manual, the comment period for both today's rulemaking and the proposed manual will close on January 21, 1992.

DATES: Written comments must be submitted on or before January 21, 1992.

ADDRESSES: Comments should be submitted in writing to: Mr. Gregory Peck, Chief, Wetlands and Aquatic Resources Regulatory Branch, Mail Code (A-104F), U.S. EPA, 401 M Street SW., Washington DC 20460.

FOR FURTHER INFORMATION CONTACT: Specific details are available from Mr. Michael Fritz (EPA) at (202) 260-6013; Ms. Karen Kochenbach (Corps) at (202) 272-0817; Mr. Billy Teels (SCS) at (202) 447-5991; or Mr. David Densmore (FWS) at (703) 358-2182.

SUPPLEMENTARY INFORMATION: On August 14, 1991, the Environmental Protection Agency (EPA), Department of the Army (Army), Soil Conservation Service (SCS) and the Fish and Wildlife Service (FWS) proposed to revise the 1989 Federal Manual for Identifying and Delineating Jurisdictional Wetlands, a technical guidance document which EPA and the Department of the Army have used to interpret and implement their respective wetlands definitions in identifying and delineating wetlands areas (56 FR 40446) (proposed manual). Although the SCS assisted in developing the 1989 manual, the SCS has used criteria that appear in 7 CFR part 12 for the identification of wetlands. In the preamble to those proposed revisions, the agencies stated that it would be appropriate and in the public interest to include parts of the final manual in the Code of Federal Regulations, and stated that the agencies would propose specific regulatory provisions prior to the close of the public comment on the proposal manual. Today's notice proposes such language and solicits comment on the amendments. The agencies will consider all comments submitted by the public on the proposed manual in finalizing the rule proposed today. Thus, comments previously submitted on the proposed manual do not have to be resubmitted in order to have them considered as part of this legislative rulemaking. Similarly, any comments received on today's proposed rule will be considered when the agencies finalize the proposed manual. The provisions of the proposed rule are discussed below.

In addition, following publication of the proposed revisions to the manual on August 14, 1991, the four agencies conducted extensive field testing of the proposed revisions. As part of today's proposed rulemaking, the agencies are establishing a docket that includes comments received from persons outside the agencies, data from the field testing, and technical references relating to wetland characteristics and other technical issues that are relevant to the proposed manual. The docket is open to the public in accordance with the requirements set forth in the Freedom of Information Act (5 U.S.C. 552), and is located at:

EPA-Office of Wetlands, Oceans and Watersheds, 499 S. Capitol St., SW., room 714, Washington, DC 20003, (202) 260-6071.

Information in the docket, including the public comments and the field testing data, will be carefully considered and evaluated by the agencies before today's proposed rulemaking and revisions to the manual are finalized.

While the docket maintained at the address listed above contains a complete, national set of the field testing data, each Corps District also has available for inspection copies of the field data collected during field testing within its particular Corps Division. These copies are available at the following locations:

Alaska District, Corps of Engineers, Building 21-700, Elmendorf Air Force Base, Anchorage, AK 99506-0898, (907) 753-2712.

Albuquerque District, Corps of Engineers, 517 Gold Ave. SW., Albuquerque, NM 87103-1580, (505) 766-2776.

Background

Four federal agencies are principally involved with wetland identification and delineation: The Corps, EPA, FWS, and SCS. The Corps and EPA are responsible for making jurisdictional determinations of wetlands regulated under the Clean Water Act (CWA) (33 U.S.C. 1252, *et seq.*). The Corps also makes jurisdictional determinations under section 10 of the Rivers and Harbors Appropriation Act of 1899 (33 U.S.C. 403). Under section 404 of the Clean Water Act, the Secretary of the Army, acting through the Chief of Engineers, is authorized to issue permits for the discharge of dredged or fill material into waters of the United States, including wetlands. EPA has developed the section 404(b)(1) Guidelines, in conjunction with the Army, and has primary responsibility for defining the geographic extent of waters of the United States, including wetlands. The Corps also issues permits for filling, dredging and other construction in certain wetlands under section 10.

Under authority of section 404(m) of the Clean Water Act, as well as the Fish and Wildlife Coordination Act, the FWS reviews applications for these federal permits and provides comments to the Corps on the environmental impacts of proposed work. In addition, the FWS is conducting an inventory of the Nation's wetlands and is producing a series of National Wetlands Inventory maps for the entire country. While the SCS has been involved in wetland identification since 1956, with the passage of the Food Security Act of 1985, as amended (16 USC 3801 *et seq.*), SCS is responsible for wetlands determinations and conservation requirements under this Act.

In January 1989, these four agencies jointly signed a technical guidance manual entitled the Federal Manual for Identifying and Delineating Jurisdictional Wetlands. This document marked the first time the four agencies had developed a uniform approach to identifying and delineating vegetated wetlands (see discussions in the proposed manual; 56 FR 40449). Based upon two years of experience implementing the manual and on comments received from the public in writing and at four public meetings held across the country, the agencies proposed revisions to the 1989 manual on August 14, 1991. The proposed revisions were intended to: (1) Tighten the evidentiary requirements for demonstrating the presence of the three wetland parameters, (2) make it easier for Federal or State agency staff to explain to landowners how wetlands are being delineated, and (3) generally maintain and improve the scientific validity of the agencies' delineation methods.

Determining the appropriate scope of wetlands jurisdiction and the resulting extent to which society will benefit from protection of such areas requires consideration of both scientific and policy issues. For example, determining the appropriate wetland/upland boundary is not always clear-cut from a scientific perspective.

The technical criteria and procedures contained in the manual and this proposed rule are intended, therefore, not only to improve the accuracy of and scientific basis for jurisdictional wetland identifications, but also to achieve the following wetland policy objectives: (1) Conserving wetlands and deriving correlated environmental benefits; (2) interagency consistency in wetland identification; (3) ensuring that regulatory restrictions on the use of property are imposed only where warranted to achieve the ecological objectives of the Clean Water Act, and (4) greater public understanding of and confidence in the wetland identification process, which is essential to the continued success and improvement of Federal wetland programs.

The agencies recognize, therefore, that alternative criteria and procedures should be evaluated not only on their scientific merit, but on their effect on relevant policy considerations. In order to foster public confidence in federal

VOL

DEC
19
1991
UMI

wetlands programs, debate over scientific uncertainty must be informed by the need to establish practical wetland identification procedures consistent with overall wetland policies and programs. Because the agencies believe that use of the manual will achieve those policy objectives in a scientifically valid manner, the agencies propose to use the manual and the specific criteria and procedures set out in this proposed rule.

Current Federal Definitions of Wetlands

Several definitions of wetlands have been formulated by the four federal agencies in order to carry out their statutory, regulatory and non-regulatory responsibilities related to wetland protection. The Corps, EPA, and SCS have adopted regulatory definitions of wetlands (see 40 CFR part 110, 40 CFR part 116, 40 CFR part 117, 40 CFR part 122, 40 CFR part 230, 40 CFR part 232, 40 CFR part 435, 33 CFR part 328, and 7 CFR part 12), and today's proposed rule would amend each of these provisions. FWS defines wetlands for purposes of conducting an inventory of the nation's wetlands, but this definition is not regulatory. Therefore, today's proposed rule would not amend any FWS regulations.

Section 404 of the Clean Water Act—EPA and Corps Definition

EPA and the Corps use the following wetlands definition for purposes of administering their responsibilities under the CWA:

> The term wetlands means those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas (EPA–40 CFR 230.3; December 24, 1980; Corps—33 CFR 328.3, November 13, 1986).

Food Security Act of 1985—SCS Definition

The following wetland definition is used by the SCS for identifying wetlands on agricultural land in assessing farmer eligibility for U.S. Department of Agriculture program benefits under the "Swampbuster" provision of the Act.

> Wetlands are defined as areas that have a predominance of hydric soils and that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and under normal circumstances do support, a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions, except lands in Alaska identified as having a high potential for agricultural development and a predominance of permafrost soils. (7 CFR 12.2(a)(28))

Like the EPA/ Corps definition, SCS's definition centers on the presence of hydrology, hydrophytic vegetation, and hydric soils. Any area that meets the hydric soil criteria (as defined by the National Technical Committee for Hydric Soils) is considered to have a predominance of hydric soils. Unlike the EPA/Corps definition, this definition specifically excludes wetlands in Alaska which have a high potential for agricultural development and a predominance of permafrost soils.

Fish and Wildlife Service Definition

The FWS, in cooperation with other Federal agencies, state agencies and private organizations and individuals, developed a wetland definition for conducting an inventory of the Nation's wetlands. This definition was published in the FWS's publication, "Classification of Wetlands and Deepwater Habitats of the United States" (Cowardin, et al. 1979);

> Wetlands are lands transitional between terrestrial and aquatic systems where the water table is usually at or near the surface or the land is covered by shallow water. For purposes of this classification wetlands must have one or more of the following three attributes: (1) At least periodically, the land supports predominantly hydrophytes; (2) the substrate is predominantly undrained hydric soil, and (3) the substrate is nonsoil and is saturated with water or covered by shallow water at some time during the growing season of each year.

This definition includes both vegetated and non-vegetated wetlands, recognizing that some types of wetlands lack vegetation. Examples of non-vegetated wetlands mapped by the FWS's National Wetlands Inventory, but which are not addressed by the regulatory definitions include flats where drastic fluctuations in water level, wave action, turbidity, or high concentration of salts may prevent the growth of hydrophytic vegetation, gravel beaches or rocky shores without vegetation, and seaweed-covered beds.

Summary of Proposed Rule

Under the proposed rule, EPA, Army and SCS would maintain their current regulatory definitions of wetlands. However, a new section would be added to the agencies' regulations which would describe the identifying characteristics of wetlands by incorporating the central components of the proposed manual. In addition, the Army proposes to amend the Code of Federal Regulations to include the entire federal manual (when it is finalized) as an appendix to its regulations. The agencies believe that these proposed changes will heighten the visibility and accessibility to the public of the agencies' wetlands identification and delineation procedures.

EPA notes that regulations applicable to various EPA programs currently contain their own definitions of wetlands. These programs include the regulation of the discharge of oil and hazardous substances under section 311 of the Clean Water Act (see 40 CFR 110.1, 116.3, 117.1), the National Pollutant Discharge Elimination System under section 402 of the Clean Water Act (see 40 CFR 122.2), and effluent guidelines for oil and gas extraction under section 301 of the Clean Water Act (see 40 CFR 435.41). These definitions are substantively identical to the definition used for purposes of the agency's section 404 program (§ 232.2(r)), but contain some minor wording differences. EPA is proposing to delete the current wetlands definitions applicable to the non-section 404 programs and include instead for those programs a reference to the amended definition that will be contained in § 232.2(r). These proposed changes would not substantively alter the regulatory requirements under the agency's non-section 404 programs, but would simply ensure consistency of definitions among EPA programs.

The new regulatory provision that the agencies propose today is entitled "Identifying Characteristics of Jurisdictional Wetlands." (see 33 CFR 328.6, 40 CFR 232.4, 7 CFR 12.31 of proposed rule). As noted above, each of the agencies' regulatory definition of wetlands focuses on three elements: Wetland hydrology, hydrophytic vegetation and hydric soils. The proposed manual implements the regulatory definitions by establishing criteria for determining whether each of these elements is present. Under the proposed manual, an area must meet all three criteria to be a wetland, unless it otherwise qualifies as a wetland under the "exceptions," "problem areas," or "disturbed areas" sections of the proposed manual.

The rule proposed today reflects the content and structure of the proposed manual and therefore does not represent a substantive departure from the guidance material contained in the August 14, 1991 notice. Paragraph (a) of the proposed rule reiterates the approach of the proposed manual in requiring that the hydrology, vegetation and soils criteria must all be met for an area to be a wetland, unless the area qualifies as a wetland under the exception, problem area, or disturbed area provisions of the proposed rule. The proposed rule contains the proposed manual's criteria for determining whether wetland hydrology, hydrophytic vegetation and hydric soils are present (see paragraphs (b)–(d) of each proposed section). In addition, the proposed rule identifies those types of areas which are exceptions, problem areas, and disturbed areas in a manner consistent with the proposed manual. (See paragraphs (e)–(g) of each proposed section).

The agencies caution that today's rule, when it is finalized, should not be applied to the actual identification and delineation of wetlands without the benefit of the finalized delineation manual. The final manual will contain detailed technical guidance describing appropriate procedures for determining whether an area has wetland hydrology, hydric soils and hydrophytic vegetation, as well as for evaluating whether an area qualifies as an exception, problem area or disturbed area. The manual should therefore be followed to ensure that the regulatory requirements that will be established in this rulemaking are properly implemented when making individual delineations.

In the preamble to the proposed manual, the agencies described other alternatives that the agencies were considering adopting in the final manual (*e.g.*, including a "facultative neutral test" as part of the hydrophytic vegetation criterion and expanding the list of the exceptions listed in the proposed manual). See 56 FR 40447–48. In addition to the specific regulatory language proposed today, the agencies will consider all the alternatives discussed in the preamble to the proposed manual when the agencies adopt final regulations after the close of the public comment period, so that the final manual and regulatory provisions will be entirely consistent. Therefore, the agencies request comment on the alternatives discussed in the proposed manual's preamble as well the specific regulatory language being proposed today.

In addition, the agencies also solicit comment on other alternatives that they are considering adopting in the final regulation. As noted above, the criteria contained in the proposed rule are identical to those contained in the proposed manual. The proposed hydric soil criterion references several other documents for determining whether hydric soils are present. For clarity purposes, the agencies are considering adopting an alternative approach that, instead of simply referencing other documents, would include a definition of hydric soils taken from "Hydric Soils of the United States." This criterion would read as follows:

> Hydric soils are present when an area has soils that have developed anaerobic conditions in the upper part due to inundation or saturation from surface or ground water during the growing season. Hydric soils are described with more specificity in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands, which appears at Appendix A of this Part, and the Soil Conservation Service's publication, Hydric Soils of the United States (as amended).

The agencies believe that this approach, by containing a substantive standard for determining the presence of hydric soils, may provide a clearer standard than the proposed rule for determining the presence of hydric soils, and therefore solicit comment on the appropriateness of this approach. In addition, this alternative approach would clarify that field verification of the presence of hydric soils may not always be necessary where reliable data has been previously collected and there is sufficient information available to make a conclusive determination regarding the presence of hydric soils.

In addition, the agencies solicit comment on whether the wetland types listed in the "exceptions" and "problem areas" sections of the proposed rule should be an exhaustive list, or merely illustrative of the types of areas that would qualify as wetlands under these provisions.

Executive Order 12291

This proposed regulation makes important revisions to the regulations governing the agencies' wetland protection programs. The proposed revisions are intended to (1) tighten the evidentiary requirements for demonstrating the presence of the three wetland parameters, (2) make the wetland delineation process easier to explain, and (3) improve the accuracy of and scientific basis for jurisdictional wetland identifications. In addition, the proposal is intended to conserve wetlands and ensure that regulatory restrictions on the use of property are imposed only where warranted to achieve the ecological objectives of the Clean Water Act. This rule was submitted to the Office of Management and Budget for Executive Order No. 12291 review.

Regulatory Flexibility Analysis

The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, requires agencies to prepare an initial regulatory flexibility analysis for all proposed regulations that have a significant impact on a substantial number of small entities. No regulatory flexibility analysis is required, however, where the head of an agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Based on the reasons discussed in the preceding paragraph, we hereby certify, pursuant to 5 U.S.C. 605(b), that this regulation will not have a significant impact on a substantial number of small entities.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980, 44 U.S.C. 3050 *et seq.*, agencies must submit a copy of any rule that contains a collection of information requirement to the Director of the Office of Management and Budget for review and approval. This proposed regulation contains no additional information collection requirements, and therefore the Paperwork Reduction Act is not applicable.

List of Subjects in 40 CFR Parts 110, 116, 117, 122, 230, 232 and 435; 33 CFR Part 328; and 7 CFR Part 12

Wetlands, Water pollution control.

F. Henry Habicht II,

Deputy Administrator, Environmental Protection Agency.

Nancy P. Dorn,

Assistant Secretary (Civil Works), Department of the Army.

Dr. John H. Beuter,

Deputy Assistant Secretary for Natural Resources and Environment, Department of Agriculture.

Joseph E. Doddridge,

Acting Assistant Secretary for Fish and Wildlife and Parks, Department of the Interior.

For the reasons set out in the preamble, 40 CFR parts 110, 116, 117, 122, 230, 232, and 435, 33 CFR part 328, and 7 CFR part 12 are proposed to be amended as follows:

40 CFR Chapter I—[Amended]

PART 110—DISCHARGE OF OIL

1. The authority citation for part 110 continues to read as follows:

Authority: 33 U.S.C. 1321(b)(3) and (b)(4) and 1361(a); 33 U.S.C. 1517(m)(3).

2. Section 110.1, definition of wetlands, is revised to read as follows:

§ 110.1 Definitions.

* * * * *

Wetlands means those areas defined at § 232.2(r) of this chapter.

VOL
56

PART 116—DESIGNATION OF HAZARDOUS SUBSTANCES

1. The authority citation for part 116 continues to read as follows:

Authority: 33 U.S.C. 1521 *et seq.*

2. In § 116.3, the definition of navigable waters is revised to read as set forth below, and the definitions are placed in alphabetical order.

§ 116.3 Definitions.

* * * * *

Navigable waters is defined in section 502(7) of the Act to mean "waters of the United States, including the territorial seas," and includes, but is not limited to: (1) All waters which are presently used, or were used in the past, or may be susceptible to use as a means to transport interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide, and including adjacent wetlands; the term "wetlands" as used in this regulation means those areas defined at § 232.2(r) of this chapter. The term "adjacent" means bordering, contiguous or neighboring; (2) tributaries of navigable waters of the United States, including adjacent wetlands; (3) interstate waters, including wetlands; and (4) all other waters of the United States such as intrastate lakes, rivers, streams, mudflats, sandflats and wetlands, the use, degradation or destruction of which affect interstate commerce including, but not limited to:

(i) Intrastate lakes, rivers, streams, and wetlands which are utilized by interstate travelers for recreational or other purposes; and

(ii) Intrastate lakes, rivers, streams, and wetlands from which fish or shellfish are or could be taken and sold in interstate commerce; and

(iii) Intrastate lakes, rivers, streams, and wetlands which are utilized for industrial purposes by industries in interstate commerce.

* * * * *

PART 117—DETERMINATION OF REPORTABLE QUANTITIES FOR HAZARDOUS SUBSTANCES

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 1251 *et seq.*

2. Section 117.1(i)(6) is revised to read as follows:

§ 117.1 Definitions.

* * * * *

(i) * * *

(6) Wetlands adjacent to waters identified in paragraphs (i) (1) through (5) of this section ("Wetlands" means those areas defined at § 232.2(r) of this chapter: *Provided,* That waste treatment systems (other than cooling ponds meeting the criteria of this paragraph) are not waters of the United States.

* * * * *

PART 122—EPA ADMINISTERED PERMIT PROGRAMS: THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

1. The authority citation for part 122 continues to read as follows:

Authority: 33 U.S.C. 1251 *et. seq.*

2. Section 122.2, definition of wetlands, is revised to read as follows:

§ 122.2 Definitions.

* * * * *

Wetlands means those areas defined at § 232.2(r) of this chapter.

* * * * *

PART 230—SECTION 404(b)(1) GUIDELINES FOR SPECIFICATION OF DISPOSAL SITES FOR DREDGED OR FILL MATERIAL

1. The authority citation for part 230 continues to read as follows:

Authority: 33 U.S.C. 1344(b) and 1361(a).

2. Section 230.3(t) is revised to read as follows:

§ 230.3 Definitions.

* * * * *

(t) The term *wetlands* means those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs and similar areas. Identifying characteristics of jurisdictional wetlands are described in § 232.4 of this chapter. Technical guidance on identifying and delineating wetlands is contained in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands (see appendix A of 33 CFR part 328) [1].

PART 232—404 PROGRAM DEFINITIONS; EXEMPT ACTIVITIES NOT REQUIRING 404 PERMITS; WETLAND IDENTIFICATION AND DELINEATION

1. The authority citation for part 232 continues to read as follows:

Authority: 33 U.S.C. 1344.

[1] The text of appendix of 33 CFR part 328 was proposed in the **Federal Register** issue of August 14, 1991 (56 FR 40446).

2. The heading for part 232 is revised as set forth above:

PART 232—404 PROGRAM DEFINITIONS; EXEMPT ACTIVITIES NOT REQUIRING 404 PERMITS; WETLAND IDENTIFICATION AND DELINEATION

3. Section 232.2(r) is revised to read as follows:

§ 232.2 Definitions.

* * * * *

(r) *Wetlands* means those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs and similar areas. Identifying characteristics of jurisdictional wetlands are described in § 232.4 of this part. Technical guidance on identifying and delineating wetlands is contained in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands (see appendix A of 33 CFR part 328)[2].

4. Section 232.4 is added to read as follows:

§ 232.4 Identifying Characteristics of Jurisdictional Wetlands.

(a) Under natural, undisturbed conditions, wetlands generally possess three characteristics: Wetland hydrology, hydrophytic vegetation, and hydric soils. These three criteria, as described in paragraphs (b)–(d) of this section, must be present for an area to be identified as wetlands, unless otherwise specified in paragraphs (e)–(g) of this section.

(b) Wetlands hydrology is present if an area is inundated for 15 or more consecutive days, or saturated from surface or ground water to the surface for 21 or more consecutive days, during the growing season in most years. Wetland hydrology is also present if an area is periodically flooded by tidal water in most years. In the absence of direct measurement of inundation, soil saturation, or tidal flooding, an area meets the wetland hydrology criterion if one of the following indicators are documented:

(1) A minimum of 3 years of hydrologic records, collected during the years of normal rainfall, correlated with long-term hydrologic records for the specific geographic area, that demonstrate the area meets the wetland hydrology criterion; or

[2] See footnote 1 to 40 CFR part 230.3(t).

(2) Aerial photography for a minimum of 5 years that reveals evidence of inundation and/or saturation in most years, correlated with long-term hydrologic records for the specific geographic area, that demonstrates the area meets the wetland hydrology criterion; or

(3) The material presence of one or more primary hydrologic indicators below, which, when considered with evidence of frequency and duration of rainfall or other hydrologic conditions, that provides sufficient evidence to establish that the area meets the wetlands hydrology criterion:

(i) Surface water inundation; or

(ii) Observed free water at the surface in an unlined borehole; or

(iii) Water can be squeezed or shaken from a soil sample taken at the soil surface; or

(iv) Oxidized stains along the channels of living roots (oxidized rhizospheres); or

(v) Sulfidic material within 12 inches of the soil surface; or

(vi) Specific plant morphological adaptation/responses to prolonged inundation or saturation: pneumatophores, prop roots, hypertrophied lenticels, arenchymous tissues, and floating stems and leaves of floating-leaved plants growing in the area (may be observed lying flat on the soil), and buttressed trunks or stems.

(4) If none of the indicators in paragraphs (b)(1), (b)(2), or (b)(3) of this section is present, one or more of the following secondary hydrologic indicators, when used in conjunction with corroborative information (*e.g.*, maps), supports a wetland hydrology determination:

(i) Silt marks (waterborne silt deposits) that indicate inundation; or

(ii) Drift lines; or

(iii) Surface-scoured areas; or

(iv) Other common plant morphological adaptations/responses to hydrology: Shallow root systems and adventitious roots.

(c) Hydrophytic vegetation is present when, under normal circumstances, a frequency analysis of all species within the community yields a prevalence index of less than 3.0 (where obligate wetland = 1.0, facultative wetland = 2.0, facultative = 3.0, facultative upland = 4.0, and upland = 5.0). Hydrophytic vegetation is described with more specificity in the U.S. Fish and Wildlife Service's publication, National List of Plant Species that Occur in Wetlands, which is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC, 20402 (Stock Number 024–010–00682–0).

(d) Hydric soils are present when, based on field verification, an area has:

(1) Soils listed by series in "Hydric Soils of the United States" (as amended), which is available from the Chairperson, National Technical Committee for Hydric Soils, U.S. Department of Agriculture, Soil Conservation Service, South Agriculture Building, room 0054, 14th and Independence Avenue, SW., Washington, DC 20250;

(2) Organic soils (histosols, except foists);

(3) Mineral soils classifying as sulfaquents, hydraquents, or histic subgroups of aquic suborders; or

(4) Other soils that meet the National Technical Committee for Hydric Soils' criteria for hydric soil, which is available from the Chairperson, National Technical Committee for Hydric Soils, U.S. Department of Agriculture, Soil Conservation Service, South Agriculture Building, room 0054, 14th and Independence Avenue, SW., Washington, DC 20250.

(e) Exceptions to the Criteria. Areas satisfying the conditions specified below are wetlands even though they may not meet one of the criteria specified in paragraphs (b)–(d) of this section.

(1) Wetland Hydrology. Pocosins, playas, prairie potholes, and vernal pools are types of wetlands that may not satisfy the hydrology criterion specified in paragraph (b) of this section, but are inundated and/or saturated at the surface for 7 or more consecutive days during the growing season. These wetland types are described with more specificity in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands which appears at appendix A of 33 CFR part 328. Such areas are wetland provided they meet the hydrophytic vegetation and hydric soils criteria contained in paragraphs (c) and (d) of this section.

(2) Hydrophytic Vegetation. Eastern hemlock swamps, white pine bogs, and tamarack swamps are types of wetlands that may not satisfy the hydrophytic vegetation criterion specified in paragraph (c) of this section. These wetland types are described with more specificity in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands which appears at appendix A of 33 CFR part 328. Such areas are wetlands provided they meet the wetland hydrology and hydric soils criteria contained in paragraphs (b) and (d) of this section.

(f) Problem Wetland Areas. Problem wetland areas are those areas which provide wetland functions and values but where evidence of one or more of the criteria contained in paragraphs (b)–(d) of this section may be absent during a limited or extended period of time due to particular characteristics of the soil, vegetation, and hydrology of these areas. Problem areas and the conditions under which they may be wetlands are specified in appendix B of the Federal Manual for Identifying and Delineating Jurisdictional Wetlands which appears at appendix A of 33 CFR part 328.

(g) Disturbed Areas.

(1) Disturbed areas are those areas that previously met the criteria contained under paragraphs (b)–(d) of this section, or previously qualified as a wetland under paragraphs (e)–(f) of this section, but have had vegetation, soils, and/or hydrology altered by recent human activity or natural events such that the required evidence of the affected criteria has been removed. These wetland types are described with more specificity in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands which appears at appendix A of 33 CFR part 328. If a disturbed area is identified as a wetland, field personnel shall document the reasons for determining that the site would have been a wetland but for the disturbance. Such documentation shall include affirmative evidence reasonably supporting a conclusion that the site previously met the requisite criteria.

(2) Areas which have been disturbed by authorized or otherwise legal human activity are wetlands if the activity does not result in the relatively permanent removal of wetland hydrology, hydrophytic vegetation, or hydric soils. The removal of hydrology, vegetation or soils is not relatively pemanent if the affected hydrology, vegetation, or soils reasonably could be expected to return after the cessation of the legal activity. Illegal or unauthorized activities may not eliminate Clean Water Act jurisdiction.

(3) With regard to areas disturbed as a result of natural events (*e.g.*, avalanches, mudslides, fire, volcanic depositions, and beaver dams), the agency shall consider the relative permanence of the change, and whether the area is still functioning as a wetland. If natural events have relatively permanently disturbed an area to the extent that wetland hydrology is no longer present, and therefore hydric soils and hydrophytic vegetation, even if still present, would not be expected to persist at the site, the area is no longer a wetland.

VOL 56 ISS 244 DEC 19 1991 UMI

PART 435—OIL AND GAS EXTRACTION POINT SOURCE CATEGORY

1. The authority citation for part 435 continues to read as follows:

Authority: 33 U.S.C. 1251 *et seq.*

2. Section 435.41(f) is revised to read as follows:

§ 435.41 Specialized definitions.

* * * * *

(f) Wetlands means those areas defined at § 232.2(r) of this chapter.

33 CFR Chapter II—[Amended]

PART 328—DEFINITION OF WATERS OF THE UNITED STATES

1. The authority citation for part 328 continues to read as follows:

Authority: 33 U.S.C. 1344.

2. Section 328(b) is revised to read as follows:

§ 328.3 Definitions.

* * * * *

(b) The term *wetlands* means those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs and similar areas. Identifying characteristics or jurisdictional wetlands are described in § 328.6. Technical guidance on identifying and delineating wetlands is contained in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands (see appendix A of this part).[3]

* * * * *

3. Section 328.6 is added to read as follows:

§ 328.6 Identifying Characteristics of Jurisdictional Wetlands.

(a) Under natural, undisturbed conditions, wetlands generally posses three characteristics: Wetland hydrology, hydrophytic vegetation, and hydric soils. These three criteria, as described in paragraphs (b)–(d) of this section, must be present for an area to be identified as wetlands, unless otherwise specified in paragraphs (e)–(g) of this section.

(b) Wetlands hydrology is present if an area is inundated for 15 or more consecutive days, or saturated from surface or ground water to the surface for 21 or more consecutive days, during the growing season in most years. Wetland hydrology is also present if an area is periodically flooded by tidal water in most years. In the absence of direct measurement of inundation, soil saturation, or tidal flooding, an area meets the wetland hydrology criterion if one of the following indicators are documented:

(1) A minimum of 3 years of hydrologic records, collected during the years of normal rainfall, correlated with long-term hydrologic records for the specific geographic area, that demonstrate the area meets the wetland hydrology criterion; or

(2) Aerial photography for a minimum of 5 years that reveals evidence of inundation and/or saturation in most years, correlated with long-term hydrologic records for the specific geographic area, that demonstrates the area meets the wetland hydrology criterion; or

(3) The material presence of one or more primary hydrologic indicators below, which, when considered with evidence of frequency and duration of rainfall or other hydrologic conditions, that provides sufficient evidence to establish that the area meets the wetlands hydrology criterion:

(i) Surface water inundation; or

(ii) Observed free water at the surface in an unlined borehole; or

(iii) Water can be squeezed or shaken from a soil sample taken at the soil surface; or

(iv) Oxidized stains along the channels of living roots (oxidized rhizospheres); or

(v) Sulfidic material within 12 inches of the soil surface; or

(vi) Specific plant morphological adaptation/responses to prolonged inundation or saturation: pneumatophores, prop roots, hypertrophied lenticels, arenchymous tissues, and floating stems and leaves or floating-leaved plants growing in the area (may be observed lying flat on the soil), and buttressed trunks or stems.

(4) If none of the indicators in paragraphs (b)(1), (b)(2), or (b)(3) of this section is present, one of more of the following secondary hydrologic indicators, when used in conjunction with corroborative information (*e.g.*, maps), supports a wetland hydrology determination:

(i) Silt marks (waterborne silt deposits) that indicate inundation; or

(ii) Drift lines; or

(iii) Surface-scoured areas; or

(iv) Other common plant morphological adaptations/responses to hydrology: Shallow root systems and adventitious roots.

(c) Hydrophytic vegetation is present when, under normal circumstances, a frequency analysis of all species within the community yields a prevalence index of less than 3.0 (where obligate wetland=1.0, facultative wetland=2.0, facultative=3.0, facultative upland=4.0, and upland=5.0). Hydrophytic vegetation is described with more specificity in the U.S. Fish and Wildlife Service's publication, National List of Plant Species that Occur in Wetlands, which is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC, 20402 (Stock Number 024–010–00682–0).

(d) Hydric soils are present when, based on field verification, an area has:

(1) Soils listed by series in "Hydric Soils of the United States" (as amended), which is available from the Chairperson, National Technical Committee for Hydric Soils, U.S. Department of Agriculture, Soil Conservation Service, South Agriculture Building, room 0054, 14th and Independence Avenue, SW., Washington, DC 20250;

(2) Organic soils (histosols, except folists);

(3) Mineral soils classifying as sulfaquents, hydraquents, or histic subgroups of aquic suborders; or

(4) Other soils that meet the National Technical Committee for Hydric Soils' criteria for hydric soil, which is available from the Chairperson, National Technical Committee for Hydric Soils, U.S. Department of Agriculture, Soil Conservation Service, South Agriculture Building, room 0054, 14th and Independence Avenue, SW., Washington, DC 20250.

(e) Exceptions to the Criteria. Areas satisfying the conditions specified below are wetlands even though they may not meet one of the criteria specified in paragraphs (b)–(d) of this section.

(1) Wetland Hydrology. Pocosins, playas, prairie potholes, and vernal pools are types of wetlands that may not satisfy the hydrology criterion specified in paragraph (b) of this section, but are inundated and/or saturated at the surface for 7 or more consecutive days during the growing season. These wetland types are described with more specificity in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands which appears at appendix A of this part. Such areas are wetland provided they meet the hydrophytic vegetation and hydric soils criteria contained in paragraphs (c) and (d) of this section.

(2) Hydrophytic Vegetation. Eastern hemlock swamps, white pine bogs, and tamarack swamps are types of wetlands that may not satisfy the hydrophytic vegetation criterion specified in paragraph (c) of this section. These wetland types are described with more specificity in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands which appears at appendix A of this part. Such areas are wetlands provided they meet the wetland hydrology and hydric soils criteria contained in paragraphs (b) and (d) of this section.

(f) Problem Wetland Areas. Problem wetland areas are those areas which provide wetland functions and values but where evidence of one or more of the criteria contained in paragraphs (b)–(d) of this section may be absent during a limited or extended period of time due to particular characteristics of the soil, vegetation, and hydrology of these areas. Problem areas and the conditions under which they may be wetlands are specified in Appendix 6 of the Federal Manual for Identifying and Delineating Jurisdictional Wetlands which appears at appendix A of this part.

(g) Disturbed Areas (1) Disturbed areas are those areas that previously met the criteria contained under paragraphs (b)–(d) of this section, or previously qualified as a wetland under paragraphs (e)–(f) of this section, but have had vegetation, soils, and/or hydrology altered by recent human activity or natural events such that the required evidence of the affected criteria has been removed. These wetland types are described with more specificity in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands which appears at appendix A of this part. If a disturbed area is identified as a wetland, field personnel shall document the reasons for determining that the site would have been a wetland but for the disturbance. Such documentation shall include affirmative evidence reasonably supporting a conclusion that the site previously met the requisite criteria.

(2) Areas which have been disturbed by authorized or otherwise legal human activity are wetlands if the activity does not result in the relatively permanent removal of wetland hydrology, hydrophytic vegetation, or hydric soils. The removal of hydrology, vegetation or soils is not relatively permanent if the affected hydrology, vegetation, or soils reasonably could be expected to return after the cessation of the legal activity. Illegal or unauthorized activities may not eliminate Clean Water Act jurisdiction.

(3) With regard to areas disturbed as a result of natural events (*e.g.*, avalanches, mudslides, fire, volcanic depositions, and beaver dams), the agency shall consider the relative permanence of the change, and whether the area is still functioning as a wetland. If natural events have relatively permanently disturbed an area to the extent that wetland hydrology is no longer present, and therefore hydric soils and hydrophytic vegetation, even if still present, would not be expected to persist at the site, the area is no longer a wetland.

[3] See footnote 1 to 40 CFR part 230.3(t).

7 CFR Chapter VI—[Amended]

PART 12—HIGHLY ERODIBLE LAND AND WETLAND CONSERVATION

1. The authority citation for part 12 continues to read as follows:

Authority: 16 U.S.C. 3801 *et seq.*

2. Section 12.2(a)(29) is amended by adding at the end of the following two sentences:

§ 12.2 Definitions.

(a) * * *

(29) * * * Wetlands generally include swamps, marshes, bogs and similar areas. Identifying characteristics of jurisdictional wetlands are described in § 12.31(a). Technical guidance on identifying and delineating wetlands is contained in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands (see appendix A of 33 CFR part 328).[4]

* * * * *

3. Section 12.31 is amended by removing paragraphs (a) and (b); redesignating existing paragraphs (c) and (d) as (h) and (i), respectively; revising the reference to "(c)(1)" in newly redesignated paragraph (h)(2) to read "(h)(1)"; and adding the following new paragraphs (a) through (g) to read as follows:

§ 12.31 Wetland Identification Criteria

(a) *Criteria.* Under natural, undisturbed conditions, wetlands generally possess three characteristics: Wetland hydrology, hydrophytic vegetation, and hydric soils. These three criteria, as described in paragraphs (b)–(d) of this section, must be present for an area to be identified as wetlands, unless otherwise specified in paragraphs (e)–(g) of this section.

(b) *Wetlands Hydrology.* Wetlands hydrology is present if an area is:

(1) Inundated for 15 or more consecutive days, or saturated from surface or ground water to the surface for 21 or more consecutive days, during the growing season in most years; or

(2) Periodically flooded by tidal water in most years. In the absence of direct measurement of inundation, soil saturation, or tidal flooding, an area meets the wetland hydrology criterion if one of the following indicators are documented:

(i) A minimum of 3 years of hydrologic records, collected during the years of normal rainfall, correlated with long-term hydrologic records for the specific geographic area, that demonstrate the area meets the wetland hydrology criterion; or

(ii) Aerial photography for a minimum of 5 years that reveals evidence of inundation and/or saturation in most years, correlated with long-term hydrologic records for the specific geographic area, that demonstrates the area meets the wetland hydrology criterion; or

(iii) The material presence of one or more primary hydrologic indicators below, which, when considered with evidence of frequency and duration of rainfall or other hydrologic conditions, that provides sufficient evidence to establish that the area meets the wetlands hydrology criterion:

(A) Surface water inundation; or

(B) Observed free water at the surface in an unlined borehole; or

(C) Water can be squeezed or shaken from a soil sample taken at the soil surface; or

(D) Oxidized stains along the channels of living roots (oxidized rhizospheres); or

(E) Sulfidic material within 12 inches of the soil surface; or

(F) Specific plant morphological adaptation/responses to prolonged inundation or saturation: pneumatophores, prop roots, hypertrophied lenticels, arenchymous tissues, and floating stems and leaves of floating-leaved plants growing in the area (may be observed lying flat on the soil), and buttressed trunks or stems.

(3) If none of the indicators in paragraphs (b)(2)(i), (b)(2)(ii), or (b)(2)(iii) of this section is present, one or more of the following secondary hydrologic indicators, when used in conjunction with corroborative information (*e.g.*, maps), supports a wetland hydrology determination:

(i) Silt marks (waterborne silt deposits) that indicate inundation; or

(ii) Drift lines; or

(iii) Surface-scoured areas; or

(iv) Other common plant morphological adaptations/responses to hydrology: shallow root systems and adventitious roots.

(c) Hydrophytic vegetation is present when, under normal circumstances, a frequency analysis of all species within the community yields a prevalence index of less than 3.0 (where obligate wetlands=1.0, facultative wetland=2.0,

[4] See footnote 1 to 40 CFR part 230.3(t).

VOL
56

UMI

facultative=3.0, facultative upland=4.0, and upland=5.0). Hydrophytic vegetation is described with more specificity in the U.S. Fish and Wildlife Service's publication, National List of Plant Species that Occur in Wetlands, which is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC, 20402 (Stock Number 024-010-00652-0).

(d) *Hydric soils.* Hydric soils are present when, based on field verification, an area has:

(1) Soils listed by series in "Hydric Soils of the United States" (as amended), which is available from the Chairperson, National Technical Committee for Hydric Soils, U.S. Department of Agriculture, Soil Conservation Service, South Agriculture Building, room 0054, 14th and Independence Avenue, SW., Washington, DC 20250;

(2) Organic soils (histosols, except foists);

(3) Mineral soils classifying as sulfaquents, hydraquents, or histic subgroups of aquic suborders; or

(4) Other soils that meet the National Technical Committee for Hydric Soils' criteria for hydric soil, which is available from the Chairperson, National Technical Committee for Hydric Soils, U.S. Department of Agriculture, Soil Conservation Service, South Agriculture Building, room 0054, 14th and Independence Avenue, SW., Washington, DC 20250.

(e) *Exceptions to the Criteria.* Areas satisfying the conditions specified below are wetlands even though they may not meet one of the criteria specified in paragraphs (b) through (d) of this section.

(1) *Wetland Hydrology.* Pocosins, playas, prairie potholes, and vernal pools are types of wetlands that may not satisfy the hydrology criterion specified in paragraph (b) of this section, but are inundated and/or saturated at the surface for 7 or more consecutive days during the growing season. These wetland types are described with more specificity in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands which appears at appendix A of 33 CFR part 328. Such areas are wetland provided they meet the hydrophytic vegetation and hydric soils criteria contained in paragraphs (c) and (d) of this section.

(2) *Hydrophytic Vegetation.* Eastern hemlock swamps, white pine bogs, and tamarack swamps are types of wetlands that may not satisfy the hydrophytic vegetation criterion specified in paragraph (c) of this section. These wetland types are described with more specificity in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands which appears at appendix A of 33 CFR part 328. Such areas are wetlands provided they meet the wetland hydrology and hydric soils criteria contained in paragraphs (b) and (d) of this section.

(f) *Problem Wetland Areas.* Problem wetland areas are those areas which provide wetland functions and values but where evidence of one or more of the criteria contained in paragraphs (b)–(d) of this section may be absent during a limited or extended period of time due to particular characteristics of the soil, vegetation, and hydrology of these areas. Problem areas and the conditions under which they may be wetlands are specified in appendix B of the Federal Manual for Identifying and Delineating Jurisdictional Wetlands which appears at appendix A of 33 CFR part 328.

(g) *Disturbed Areas.* (1) Disturbed areas are those areas that previously met the criteria contained under paragraphs (b)–(d) of this section, or previously qualified as a wetland under paragraphs (e)–(f) of this section, but have had vegetation, soils, and/or hydrology altered by recent human activity or natural events such that the required evidence of the affected criteria has been removed. These wetland types are described with more specificity in the Federal Manual for Identifying and Delineating Jurisdictional Wetlands which appears at appendix A of 33 CFR part 328. If a disturbed area is identified as a wetland, field personnel shall document the reasons for determining that the site would have been a wetland but for the disturbance. Such documentation shall include affirmative evidence reasonably supporting a conclusion that the site previously met the requisite criteria.

(2) Areas which have been disturbed by authorized or otherwise legal human activity are wetlands if the activity does not result in the relatively permanent removal of wetland hydrology, hydrophytic vegetation, or hydric soils. The removal of hydrology, vegetation or soils is not relatively permanent if the affected hydrology, vegetation, or soils reasonably could be expected to return after the cessation of the legal activity.

(3) With regard to areas disturbed as a result of natural events (*e.g.*, avalanches, mudslides, fire, volcanic depositions, and beaver dams), the agency shall consider the relative permanence of the change, and whether the area is still functioning as a wetland. If natural events have relatively permanently disturbed an area to the extent that wetland hydrology is no longer present, and therefore hydric soils and hydrophytic vegetation, even is still present, would not be expected to persist at the site, the area is no longer a wetland.

Title 3—

The President

Proclamation 6395 of December 17, 1991

Basketball Centennial Day, 1991

By the President of the United States of America

A Proclamation

When Dr. James Naismith invented basketball a century ago, he could not have envisioned what would become of the simple game he had devised to entertain his students between the fall football and spring baseball seasons. Today the uniquely American game of basketball is one of the fastest paced and most widely popular team sports in the world.

Dr. Naismith's brainchild has changed dramatically since a janitor helped him hang peach baskets at each end of the gymnasium at the International Young Men's Christian Association Training School in Springfield, Massachusetts. Once played primarily at YMCA facilities, basketball now boasts players and fans around the globe. Breakaway rims and gravity-defying jump shots have replaced the one-handed set shot into wooden receptacles; three-point goals now reward players who can shoot accurately from long range; and more and more women are taking up the game at all levels of competition.

Each of these changes has made basketball more exciting to watch, expanding its appeal to people of all ages and all walks of life. Indeed, few sporting events generate more spirited rivalries than a high school state basketball championship, the NCAA 64-team tournament, or the NBA Finals. Since 1904, when it was introduced as a demonstration sport, basketball has also been a thrilling part of the Olympics. The United States is proud of the many Olympic titles that have been brought home by our American teams, including the 1984 Women's Gold Medal.

In every city and town across the United States, playgrounds and gymnasiums are filled with youngsters who dream of success on the hardwood. However, whether one aspires to play professional ball or simply hopes to win a friendly pickup game, anyone who spends time on the court knows the importance of mastering the fundamentals: dribbling, passing, shooting, and rebounding. Once these skills are developed, an athlete must then learn to coordinate his or her game with the other four players on a squad. This combination of individual achievement and teamwork is what makes the game of basketball both fascinating and rewarding. The great college coach, John Wooden, may have said it best when he explained:

> In basketball, we meet adversity head on. It's so much like life itself: the ups and downs, the obstacles—they make you strong. A coach is a teacher, and like any good teacher, I'm trying to build men.

Like all sports, basketball not only promotes physical health and fitness but also fosters virtues that serve players well on and off the court. On this occasion, we proudly celebrate the 100th anniversary of this uniquely American game.

The Congress, by Public Law 102–210, has designated December 21, 1991, as "Basketball Centennial Day" and has authorized and requested the President to issue a proclamation in observance of this day.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim December 21, 1991, as Basketball Centennial Day. I invite all Americans to observe this day with appropriate programs, ceremonies, and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this seventeenth day of December, in the year of our Lord nineteen hundred and ninety-one, and of the Independence of the United States of America the two hundred and sixteenth.

George Bush

Public Laws

102d Congress, 2nd Session, 1992

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 102d Congress, 2nd Session, 1992.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws and prices).

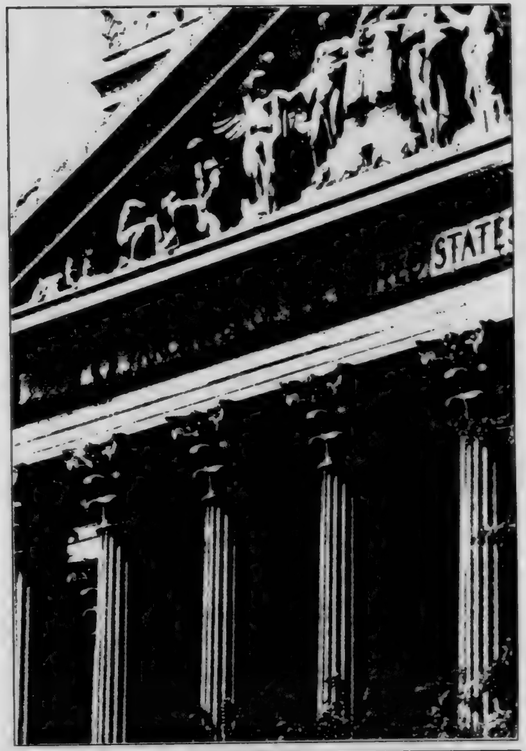
Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected



The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers:
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers.

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1989
SUPPLEMENT: Revised January 1, 1991

The GUIDE and the SUPPLEMENT should be used together. This useful reference tool, compiled from agency regulations, is designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Order from Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402-9325.

New edition .... Order now !

For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**

The **Federal Register,** published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the LSA (List of CFR Sections Affected) which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register;** and the cumulative **Federal Register Index.**

The **Code of Federal Regulations** (CFR) comprising approximately 196 volumes contains the annual codification of the final regulations printed in the **Federal Register.** Each of the 50 titles is updated annually.

Individual copies are separately priced. A price list of current **CFR** volumes appears both in the **Federal Register** each Monday and the monthly **LSA** (List of **CFR** Sections Affected). Price inquiries may be made to the Superintendent of Documents, or the Office of the Federal Register.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 56 FR 12345.

Rules and Regulations

Federal Register
Vol. 56, No. 245
Friday, December 20, 1991

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

Agricultural Marketing Service

7 CFR Part 1205

[CN-91-007]

Amendment to the Cotton Research and Promotion Regulations for Cotton Board Membership

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Agricultural Marketing Service (AMS) is amending the Cotton Research and Promotion regulations regarding Cotton Board membership. This amendment establishes procedures for determining the appropriate number of importer representatives to serve as members and alternate members on the Cotton Board. The initial number of importer representatives shall be four, as provided by the amendment to the Cotton Research and Promotion Order. This amendment also provides for the participation of importers in nominating importer members.

EFFECTIVE DATE: December 20, 1991.

FOR FURTHER INFORMATION CONTACT: Craig Shackelford, (202) 720-2259.

SUPPLEMENTARY INFORMATION: These amendments to the regulations regarding Cotton Board membership are issued pursuant to the Cotton Research and Promotion Act Amendments of 1990 and the Cotton Research and Promotion Order which has been amended in order to implement the 1990 amendments to the Act. A proposed rule amending the Order was issued by the Department of Agriculture and published in the **Federal Register**, April 10, 1991 (56 FR 14482). Written comments concerning the April 10 proposed rule were discussed in a proposed amendment to the Order published in the **Federal Register**, July 9, 1991 (56 FR 31289). The proposed amendment to the Order, published July 9, was approved by a majority of cotton importers and producers voting in a referendum conducted July 17–26.

This final rule has been reviewed in accordance with Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under the Executive Order 12291 since it does not meet the criteria for a major regulatory action contained in that Order.

The Administrator, Agricultural Marketing Service (AMS), has considered the economic impact of this action on small entities pursuant to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). There are an estimated 210,000 domestic cotton producers who are presently subject to the regulations regarding Cotton Board membership. In the proposed rule it was stated that there are 35,000 domestic cotton producers. This number was in error for reasons discussed in the proposed Order amendment dated July 9, 1991 (56 FR 31289). There are also an estimated 10,000 importers that will become subject to the regulations. The majority of these producers and importers would be classified as small businesses under the criteria established by the Small Business Administration. The economic impact of this final rule is not expected to be significant. Also, importers who are selected as members to the Cotton Board will serve without compensation but will be reimbursed for necessary expenses, as approved by the Board, incurred by them in performance of their duties under the Order. Accordingly, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

In compliance with Office of Management and Budget (OMB) regulations (5 CFR part 1320) which implement the Paperwork Reduction Act (PRA) of 1980 (44 U.S.C. 3501 *et seq.*), the information collection and recordkeeping requirements for domestic producers and importers contained in this subpart, have been approved and assigned OMB control number 0581–0093. Individual producers and importers nominated to the Cotton Board will also be required to submit a membership background information sheet previously approved by OMB and assigned OMB control number 0505–0001. The combined estimated number of producer and importer respondents is 32 per year. The estimated number of importer respondents is 8 per year. Each respondent will submit one response when nominated, with an estimated average reporting burden of 0.5 hours per response.

The agency received no comments regarding the proposed amendment to the Cotton Research and Promotion Regulations for Cotton Board Membership published in the **Federal Register** on June 27, 1991 (56 FR 29445). The proposal established procedures for determining how many importer representatives would serve on the Cotton Board and the procedures importers would follow in nominating potential Cotton Board members. The volume of Upland cotton imported and the cotton content of imported products in terms for 480-pound bales or the equivalent thereof was proposed to be used to determine how many additional persons above the minimum number of two, as provided by the proposed Order amendments, would represent importers on the Cotton Board. The proposed rule amending the Order published in the April 10, 1991, **Federal Register** (56 FR 14482) provided that importer membership on the Cotton Board would consist of one member for each one million bales or major fraction (more than one-half) thereof of imported cotton subject to assessment during the period specified in the regulations for determining Board membership. In addition, § 1205.322 of the proposed amendment to the Order provided that the number of cotton importers represented on the Cotton board would in no case be less than two and the percentage of importers represented on the Board would in no case be greater than 20 percent. All importer members appointed would serve out their three-year terms even if the volume of imported cotton should decrease.

Section 1205.322 of the proposed amendment to the Order was changed based on public comments. Five written comments received from importers concerning the proposed provisions for establishment and membership of the Cotton Board objected to the 20 percent cap on importer representation, stating that importers would not receive equitable representation under the proposal. Conversely, one commenter suggested that, initially, importers

VOL
56
ISS
245
DEC
20
1991
UMI

should be limited to two Board members.

The 1990 amendment to the Act provides that when importers are subject to an Order, the Board (in addition to producer representatives) shall be composed of "—an appropriate number of importer representatives on the Cotton Board, as determined by the Secretary, of importers of cotton on which assessments are paid—". In describing producer representation, the Act specifically requires that cotton producers have representation on the Board for each cotton-producing state proportionate to that state's share of total U.S. marketings of cotton. Each cotton-producing state is entitled to at least one representative. The Order provides that producers are entitled to one representative for each one million bales (or major fraction thereof) of cotton produced.

Upon consideration of the concern raised by importers, the agency decided to remove the 20 percent cap, and to establish importer representation on the Board in a manner that would more closely reflect the amount of imported cotton assessed.

For the purpose of the initial implementation of the Order, the agency has determined that importer representation would consist of four members. Upon consideration of the estimated volume of imported cotton that would be subject to assessment, the agency has determined this number to be appropriate. In no case, would importer representation consist of less than two members.

According to statistics prepared by USDA, the total quantity of imported cotton during 1990 was approximately 4.9 million bale equivalents. At this time, our figures indicate that the volume of imported cotton in bale equivalents will be less in 1991.

Total bale equivalents of imported cotton do not accurately reflect the amount of imported cotton on which assessments will be paid because a certain amount of imported cotton will not be subject to assessment. Imported cotton not subject to assessment will include de minimis amounts of cotton as defined in the rules and regulations implementing the Order, U.S. produced cotton reentering the U.S., cotton contained in industrial products, and other product categories which would not be included in the Harmonized Tariff Schedule classification numbers listed in rules and regulations that would implement the Order. It is the agency's view that the volume of cotton not subject to assessment would be one million bale equivalents or more. Therefore, four importer representatives on the Board will result in approximately one representative for each one million bales or bale equivalents of cotton imported and assessed. This closely parallels the formula used for producer representation.

The agency will have better information as to the volume of imported cotton assessed after assessments have been collected for at least one year. To make allowance for fluctuations in the volume of imported cotton subject to assessment, the Order provision enables the Secretary to reduce or expand importer representation on the Board after consultation with organizations representing importers in a manner provided by the rules and regulations implementing the Order.

This rule establishes that in no case, will importers be represented by less than two members. Additional importer members could be added to the Cotton Board after consultation by the Secretary with importer organizations, and after consideration of the average annual volume of imported cotton that would be subject to assessment for five preceding years. To conform with the provisions of the Order, the agency has revised § 1205.402 of the proposed rule which based importer representation on the average annual imports of cotton and cotton-containing products. Representation shall now be based on the average annual imports of cotton and cotton-containing products which are assessed.

Initially, the agency has determined to establish importer representation at four members on the Cotton Board.

Each year in approximately July, the Director of the Cotton Division will contact certified importer organizations, notifying each of the number of importer vacancies to be filled on the Cotton Board.

The Director will work with the certified importer organizations to determine a time and place for all such importer organizations to caucus for nominating importers to serve on the Cotton Board. Each organization will be entitled to have one representative attend the nomination caucus. The representatives of the importer organizations will jointly nominate two qualified persons for each vacant member and alternate member position. These procedures parallel procedures already established for cotton producer nominations. This rule also contains several non-substantive changes for the purpose of clarity and organization as well as additional language in § 1205.402(b) so that it conforms with Order provisions.

Pursuant to the provisions of 5 U.S.C. 553, it is found and determined that good cause exists for not postponing the effective date of this amendment until 30 days after publication in the **Federal Register** because: (1) Cotton producers and importers voting in a referendum have approved the amendment to the Cotton Research and Promotion Order which the provisions of this regulation, in part, implement; and (2) in accordance with the Act, the amendment should be published as soon as possible.

List of Subjects in 7 CFR Part 1205

Advertising, Agricultural research, Cotton, Marketing agreements, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 1205 is amended as follows:

PART 1205—COTTON RESEARCH AND PROMOTION

1. The authority citation for part 1205 continues to read as follows:

Authority: 7 U.S.C. 2101–2118.

2. Section 1205.402 is revised to read as follows:

§ 1205.402 Determination of Cotton Board membership.

(a) In determining whether any cotton-producing state is entitled to be represented by more than one member of the Cotton Board as provided in § 1205.322, average annual production of Upland cotton in terms of 480-pound net weight bales for the five most recent marketing years will be used as the criteria for determination of such additional members.

(b) In determining whether importers of cotton and cotton-containing products are entitled to be represented by more than a minimum of two members on the Cotton Board as provided in § 1205.322, the average annual volume of imported cotton and the cotton content of imported products on which assessments have been collected will be used as the criteria for determination of such additional members. This volume of cotton will be expressed in terms of 480-pound net weight bales for the five most recent calendar years. The initial importer representation on the Board shall consist of four importer representatives.

(c) All members appointed from a state will be entitled to serve a full three-year term even though it is determined in a subsequent year that a state should have fewer additional members by using the average production of the five most recent marketing years as specified in paragraph (a) of this section.

(d) All members appointed to represent importers will be entitled to serve a full three-year term even though it is determined in a subsequent year that importers should be represented by fewer additional members by using the average volume of imports of cotton and the cotton content of products on which assessments have been collected as specified in paragraph (b) of this section.

(e) Each year the Director shall:

(1) Based on the average annual production of Upland cotton in terms of 480-pound net weight bales for the five most recent marketing years, notify all certified cotton producer organizations in each cotton-producing state of the number of vacancies to be filled by cotton producers on the Cotton Board; and

(2) Based on the average annual volume of imports of cotton and the cotton content of cotton-containing products on which assessments as provided for in § 1205.335 have been collected in terms of 480-pound net weight bales for the five most recent calendar years, notify all certified cotton importer organizations of the number of vacancies to be filled by cotton importers on the Cotton Board.

3. Section 1205.403 is revised to read as follows:

§ 1205.403 Nomination procedure.

(a) The Director shall notify all certified producer organizations within each cotton-producing state and all certified importer organizations of the location, date, and time of the caucus for nominating producer and importer representatives for the Cotton Board as specified in § 1205.324. The Director will designate a representative from the Cotton Division to attend the caucus meeting of cotton producer organizations in each state, and of cotton importer organizations. Each eligible cotton producer organization within each cotton-producing state and each importer organization will be entitled to only one representative at the caucus for the purpose of nominating two qualified persons for each member and for each alternate member to be selected. The representative of a cotton producer organization shall be a cotton producer and resident of such state, an officer or member of the Board of Directors of such organization, and duly and unqualifiedly authorized in writing by such organization to make nominations on its behalf. The representative of an importer organization shall be an importer of cotton and/or products containing cotton, an officer or member of the Board of Directors of such organization, and duly and unqualifiedly authorized in writing by such organization to make nominations on its behalf. The representative of the Director designated to attend the caucus meeting of cotton producer organizations in each state and of cotton importer organizations will ascertain the qualifications and eligibility of each representative of a cotton producer organization or cotton importer organization to participate in said meeting and to make nominations.

(b) Each caucus will be conducted as follows:

(1) The representative from the Cotton Division will act as temporary chairperson and will explain the procedure for nominations and the duties of the Cotton Board;

(2) The representatives in attendance from the certified organizations will then select a chairperson and secretary;

(3) At each caucus there will be presented for nomination and there will be nominated not less than the number of nominees required under the provisions of §§ 1205.322, 1205.324, and 1205.402.

Dated: December 16, 1991.

Daniel Haley,

Administrator.

[FR Doc. 91–30445 Filed 12–19–91; 8:45 am]

BILLING CODE 3410–02–M

Farmers Home Administration

7 CFR Part 1944

Multi-Family Housing; Corrections

AGENCY: Farmers Home Administration, USDA.

ACTION: Final Rule; correction.

SUMMARY: The Farmers Home Administration (FmHA) is correcting errors in the final rule published on January 22, 1991 (56 FR 2198) concerning Multi-Family Housing.

EFFECTIVE DATE: October 31, 1991.

FOR FURTHER INFORMATION CONTACT: David J.Villano, Chief, Rural Rental Housing Branch, Multi-Family Housing Processing Division, Farmers Home Administration, USDA, room 5349—South Agriculture Building, Washington, DC 20250, telephone (202) 720–1608.

Accordingly, the final rule published on January 22, 1991, (56 FR 2198) is corrected as follows:

1. The amendatory language and amendatory text in Amendment No. 43 on pages 2236–2238 is corrected to read as follows:

43. Section 1944.215 is revised to read as follows:

§ 1944.215 Special conditions.

(a) *Cost containment.* To help assure low affordable rental and occupancy rates, projects must be economical in construction and not of elaborate design or materials. Cost containment is not to be interpreted as accepting poor design or cheap construction. Projects must provide the features and amenities necessary for the lifestyles of the tenants and members. Consideration must be given to the cost/benefit ratio when evaluating, recommending or requiring specific design features or construction techniques. The following guidelines should be followed when developing projects:

(1) Each State architect/engineer (A/E) should compile and maintain data or spreadsheets on cost/sq. ft., cost/unit, and cost/acre, A/E fees, etc., which are reasonable and customary for the State. Any proposal that exceeds these costs should be carefully evaluated for possible cost reductions. Final determinations must be realistic, interrelated to maintenance and operation costs, and based upon local conditions and common sense. The Building Cost Tracking System may prove helpful.

(2) The elimination or reduction of unnecessary delays in application processing can contribute to cost containment through lower interest and other business expenses on land, inventory, tests, design studies, etc. When reasonable processing timeframes are established, known and followed, appropriate time can be planned for preparing quality application and construction documents. This can result in better instructions to the builder, fewer errors and lower construction costs.

(3) Most materials and systems are available in a range of qualities and prices. The construction documents should be carefully reviewed for specifications that require qualities or grades higher than necessary. These specifications should be accepted only if fully justified and no reasonable alternatives are available.

(4) Designs which encourage standard building material dimensions and reduce waste will be used as much as possible.

(5) State Directors should encourage the use of sites that require a minimum amount of site development. State Directors should also encourage projects with a minimum of 14 units per acre unless the applicant provides documentation supporting a change.

VOL 56 ISS 245 DEC 20 1991 UMI

such as local zoning requirements requiring a different density.

(6) Items such as covered parking and garages can be included in the FmHA loan only when they are required by local codes or ordinances.

(7) Sound judgment and common sense must also be used in construction inspections and final acceptance of projects. Field staff involved in these activities must be careful not to impose additional or unreasonable requirements on the builder that will increase construction costs.

(8) When evaluating projects, life cycle costs will be considered. These costs include: Initial costs, future replacement costs and operation and maintenance costs. The economic lives of alternative designs and materials will be considered. Reductions in initial costs may result in higher life cycle costs.

(9) Management, maintenance and community rooms should not exceed the limitations described in the FmHA Manual of Acceptable Practices (available in any FmHA office). Laundry rooms should be no larger than necessary to accommodate equipment, circulation and areas for sorting and folding clothes.

(b) *Type of housing.* All housing should be designed to:

(1) Be economically constructed and not of elaborate design or materials. All new construction will conform with the applicable development standards of § 1924.5(d)(1) of subpart A of part 1924 of this chapter. As a general rule, the gross square foot living area of new units and related facilities to be constructed with loan funds will be within the ranges listed below. Living area does not include outdoor storage space when unfinished or space for heating and cooling equipment.

Type of unit	Minimum/maximum living area (square feet)
0-Bedroom	350–500.
1-Bedroom	500–650.
2-Bedroom	650–800.
3-Bedroom	800–950.
4-Bedroom	950–1100.

(i) An additional 100 to 120 square feet of living area may be added to the 4-bedroom unit guideline for each bedroom in excess of 4.

(ii) In townhouse units where living area is on two floor levels of the unit, the maximum gross square footage of living area may be exceeded by up to 70 square feet, but only to the extent necessary to accommodate interior stairways.

(iii) Room sizes must be in compliance with the applicable development standard. Minimum room sizes may be determined by the minimum areas in Guide 2 of subpart A of part 1924 of this chapter.

(iv) Additional area to accommodate energy conserving and solar heating elements such as vestibules, heat sinks, solar greenhouses, solar heat storage devices and the like may be allowed in excess of the stated maximum size guidelines. However, such devices, if included, must be justified on a cost effective basis.

(2) Consist of multi-unit type housing with two or more units and appropriate related facilities except for the conversion of section 502 inventory housing as covered in § 1944.212(o) of this subpart, manufactured homes and group homes. Single family structures may be considered for cooperative housing projects if economically feasible.

(3) Be residential in character and be designed to meet the needs of eligible tenants or members. Generally, structures should not be more than three stories high. However, low-rise structures with elevators can be considered when the following conditions exist:

(i) There is a serious shortage of suitable building sites, the number of units needed cannot be built due to lack of space on available suitable sites and other building sites are not available.

(ii) Land costs are such that one- to three-story construction would result in a unit cost and rental/occupancy rates in excess of what eligible tenants and members can afford.

(iii) The number of stories proposed for the structure is compatible with other rental structures in the community. If there are no other low-rise rental structures in the community, the proposed structure must be in character with surrounding structures.

(iv) The cost of the units should compare favorably with one- to three-story construction financed with RRH loans. If the costs are higher, the loan will not be approved until the FmHA State architect or engineer has reviewed the plans, specifications and cost data to assure that further cost savings cannot be achieved without sacrificing the quality and serviceability of the housing.

(v) Elevators will be provided in accordance with the applicable development standards. If elevators are included, the subsoil conditions of the site must be adequate for the installation of elevators and sufficient service personnel must be available in the area for service and repair work.

(4) Provide kitchen and bath facilities consistent with the size of the unit. For example, units with three or less bedrooms typically can be designed with one bath. However, townhouse units with three or more bedrooms where living area is on two floors may contain bath facilities on both levels. Kitchen facilities are required in all units; however, in congregate housing, some or all of the units may have limited facilities, such as a cooktop with a small oven and refrigerator.

(5) Give maximum consideration to energy conservation. To keep operating costs at a minimum, units should be individually metered for utilities unless adequate justification is provided to show that it would be infeasible.

(6) Meet the needs of handicapped tenants in rental projects. At least 5 percent of the units in the project or one unit, whichever is greater, must be accessible to or adaptable for physically handicapped persons. The percentage of the units provided may be modified if an applicant shows, through information obtained from a State, local or independent agency or organization serving handicapped people, that a different percentage of accessible or adaptable units is appropriate. However, at least one accessible unit will be provided. Adaptable units must be constructed in accordance with the Uniform Federal Accessibility Standards, sections 4.34.3 through 4.34.6.

(7) For covered dwellings, handicap accessibility requirements will be met as set forth in section 504 of the Rehabilitation Act of 1973 and the Fair Housing Amendments Act of 1988.

(c) *Deferred principal payments.* (1) When construction is funded by multiple advances from FmHA, principal payments on the loan will be deferred for the period of construction.

(2) When an interim financed loan is closed other than the first day of the month, principal payments will be deferred for the remaining period of the month in which the loan is closed.

(3) When construction is substantially complete and the project is ready for full operation, or the total of principal advances plus accrued interest reaches the MDL, interest on the advances will be accrued to the Amortization Effective Date (AED) and will be capitalized, establishing a new principal (loan) amount.

(4) At loan obligation, the MDL will be established according to § 1944.213(a) of this subpart. When the final advance on the loan is issued or the MDL is reached, the Finance Office will:

(i) Accrue interest on all advances through the last day of the month and capitalize the interest as of the AED. When there is a remaining obligation balance, it will be canceled by the Finance Office.

(ii) Establish the new loan amount and the borrower's monthly payments computed over the remaining term of the loan.

(5) The District Office will:

(i) Contact the applicant and complete Form FmHA 1944–52, "Multiple Family Housing Promissory Note."

(ii) Implement Form FmHA 1944–7, "Interest Credit and Rental Assistance Agreement," at AED or when the project is substantially complete and ready for full operation, whichever is later.

(d) *Refinancing Loans.* Each borrower, except those borrower(s) whose loans were made pursuant to contracts entered into on or after December 15, 1989, must agree to refinance the unpaid balance of the loan when requested by the Agency. The rates and terms of the refinanced loan must be considered reasonable by the Agency to enable the borrower to offer the units to eligible tenants and members at rates within their payment ability. The refinancing of a loan must comply with the restrictions indicated in § 1944.236(b)(5) of this subpart and subpart F of part 1951 of this chapter.

(e) *Loan resolution or loan agreement.* The loan resolution or loan agreement contains provisions of policy and procedure which should be carefully read and fully understood by the applicant. If any provisions are not appropriate to a particular case, proposed substitute language must be approved by FmHA and OGC. Subpart C of Part 1930 provides for the maintenance of certain accounts and the pledge of housing income as security. It contains regulatory provisions governing and giving FmHA power to impose requirements regarding the housing and related operations of the applicant. All sections and requirements determined applicable by OGC will form part of any other loan resolution or agreement that may be submitted by the applicant. These are:

(1) Form FmHA 1944–33, "Loan Agreement."

(2) Form FmHA 1944–34, "Loan Agreement."

(3) Form FmHA 1944–35, "Loan Resolution."

(f) *Cooperative management.* Consideration must be given to the special conditions of a cooperative housing structure concerning management. The following forms of management will be recognized for cooperative housing.

(1) Self-management. The primary management objective for small housing cooperatives. To achieve this, education and training efforts should be an on-going part of their early years of operation. Accordingly, modest educational costs will be permitted in the budget as a subheading under management expenses. It is understood that, in the beginning, it may be necessary to obtain some outside services, such as a bookkeeper. If so, then partial self-management can be considered. It will be necessary for a qualified nonmember (individual or organization) to advise the board during the formative years of the cooperative. Exhibits F and G to this subpart will be used as a guide for determining the qualifications of the adviser.

(2) Partial self-management. Certain management and/or supervisory services contracted from a technical service organization, housing authority, or management firm, etc. If this additional assistance does not enable the cooperative to manage itself, then the ultimate solution will have to be contract management.

(3) Contract management. Professional services contracted for the day-to-day supervision of cooperative operations. The board of directors would develop the policies which would then be administered by the management agent.

(g) *Cooperative membership fee.* Cooperative housing is a form of homeownership. In order to promote a commitment from prospective members, cooperatives will require a membership fee. The membership fee established by the board of directors will be equal to one month's occupancy charge. Once the fee has been established, that amount will be uniformly applied to all members. Members unable to pay a cash membership fee should be permitted to make monthly payments without interest, until the membership fee is paid; however, a cash payment of at least $25 should be required at occupancy. The period of payment on the membership fee should not exceed 12 months.

(h) *Cooperative limited equity.* (1) RCH loans will only be made to cooperatives which limit the accumulation of equity. The limitations are designed to maintain unit availability for low-income people. In addition, all prospective members must have received, prior to becoming an actual member, a statement of the objectives of the cooperative, debts and a declaration describing limited equity and what it will mean to them. Exhibit H of this subpart will be used for this purpose. Limited equity is further described in What is Cooperative Housing? Which is to be given to prospective members.

(2) Inflation equity which accrues on cooperative property is not considered part of members' limited equity and will not be taken from the project when a member vacates the project.

(i) *Interest credits and rental assistance (RA).* (1) Borrowers may receive interest credits if they meet the requirements outlined in exhibit B of subpart C to part 1930 of this chapter.

(2) RA may be provided to eligible tenants and members in eligible projects in accordance with exhibit E to subpart C of part 1930 of this chapter.

(3) At least 95 percent of RA units available for newly constructed projects must be used to assist very low-income tenants and members. Up to 5 percent can be used for low-income tenants and members.

(4) Cooperative members must have sufficient incomes to pay their management reserve charge. RA will not be used for this purpose. Management reserve charge is further described in exhibit A to this subpart.

(j) *Nondiscrimination in use and occupancy.* The borrower will not discriminate or permit discrimination by any agent, lessee or other operator in the use or occupancy of the housing or related facilities because of race, color, religion, age, sex, marital or familial status, handicap or national origin, in accordance with title VIII of the Civil Rights Act of 1968, as amended.

(k) *Eligibility for occupancy.* Loans will be made on the basis of the housing being occupied by eligible tenants and members as defined in § 1944.205 of this subpart. Eligible tenants and members must meet the requirements of exhibit B of subpart C of part 1930 of this chapter.

(l) *Tenant and member certification.* Initial certification and recertifications will be executed on Form FmHA 1944–8, "Tenant Certification," in accordance with exhibit B to subpart C of part 1930 of this chapter.

(m) *Supervision of borrowers.* Supervision will be provided borrowers under subpart C of part 1930 and subpart B of part 1965 of this chapter.

(n) *Establishing profit base on initial investment.* Applicants agreeing to operate on a limited profit basis will be permitted a return not to exceed 8 percent per annum on their initial investment determined at the time of loan approval. This amount will be reflected in the loan agreement or loan resolution and will not be changed once it is determined. The initial investment may exceed the required 3 percent in

VOL
56
ISS
245
DE

1991
UMI

§ 1944.213(b)(2) of this subpart and may include the following:

(1) Cash contributions made by the applicant which, when added to the FmHA loan amount, are not in excess of the security value of the project.

(2) The value of the building site or essential related facilities contributed by the applicant up to the amount which, when added to the FmHA loan amount, is not in excess of the security value of the project. An appraisal will be done by an FmHA employee authorized to make appraisals or an FmHA authorized representative in accordance with applicable FmHA regulations. Value of the applicant's contribution will be determined on an "as is" basis less any amount owed on the property.

(o) *Intergovernmental review.* FmHA will consider comments received in accordance with 7 CFR part 3015, "Intergovernmental Review of Department of Agriculture Programs and Activities," when making decisions on loan applications. (See FmHA Instruction 1940–J, available in any FmHA office.)

(p) *Guidelines for preparing environmental assessments and environmental impact statements.* All projects will comply with subpart G of part 1940 of this chapter.

(q) *National flood insurance.* The provisions of the National Flood Insurance Act of 1968, as amended by the Flood Disaster Protection Act of 1973 and Executive Order 11988, are applicable to FmHA authorities permitting financing of housing now located in, or to be located in, special flood or mudslide-prone areas as designated by the Federal Emergency Management Administration (FEMA). Subpart B of part 1806 of this chapter (FmHA Instruction 426.2) and subpart G of part 1940 of this chapter will apply.

(r) *Location of housing.* (1) The location of the project should expand the supply of decent, safe, and sanitary housing for very low-, low- and moderate-income elderly persons and families in a nondiscriminatory way. The location should promote a greater choice of housing opportunities in the housing market area.

(2) Project locations should promote an equal opportunity for the inclusion of all groups regardless of race, color, religion, sex, national origin, age, marital status or physical or mental handicap thereby opening up nonsegregated housing opportunities for minorities.

(3) Except as otherwise permitted by paragraph (s)(6) of this section, housing projects must be located in residential areas as part of established rural communities where essential public facilities (such as schools, hospitals and generally central water and sewer systems) and services (such as shopping, medical, and pharmaceutical) are readily available in close and convenient proximity to the site. Public facilities and services must be adequate to support the needs of the tenants and members and the housing project. (See FmHA Instruction 1922–B.)

(4) In order to provide housing at the lowest cost possible, preference will be given to loan requests in which specific tracts of land will be donated by States, units of local government, public bodies and nonprofit organizations. The land must be suitable for the proposed housing and meet all FmHA site criteria. In addition, affording such preference must be cost effective.

(5) Noncontiguous rental sites. (i) Noncontiguous sites within the same community may be considered if feasible. Each site must meet all FmHA site criteria and an appraisal must be made on each site in accordance with subpart B to part 1922 of this chapter (available in any FmHA office). The units must be managed under one management plan with one loan agreement/resolution.

(ii) If a small community cannot support a project containing enough units to make it cost effective or in cases involving conversion of 502 inventory units, FmHA will consider a project which includes more than one site in the same or different communities. The State Office and applicant must mutually agree that the location of the sites will not adversely effect the efficiency of management and servicing of the projects. The requirements of paragraph (r)(5)(i) of this section will also apply.

(6) FmHA will consider financing new construction or the purchase and rehabilitation of existing structures (in accordance with § 1944.212(b) of this subpart) located in the downtown business areas of rural communities that have established a comprehensive strategy for meeting their community development and housing needs. That strategy must include the redevelopment, rehabilitation, restoration or revitalization of the downtown business area. The proposed project site must be located within the downtown business redevelopment/revitalization area and the following conditions must be met:

(i) Essential public facilities (such as schools, hospitals and generally central water and sewer systems) and services (such as shopping, medical and pharmaceutical) must be readily available in close and convenient proximity to the site and must be adequate to support the needs of the tenants and members and the housing project.

(ii) The community must have an official short-term community development and housing plan which sets forth its comprehensive strategy for meeting identified community development and housing needs. The plan will include the need for eliminating and preventing economic decay, slums or blight; the need of benefiting the lower-income population; or other community development needs having a particular urgency. The strategy should include a community-wide component which describes the development strategy of the governing body, the major objectives the governing body seeks to accomplish, the priorities it has established, the factors taken into account in selecting areas for treatment and the anticipated public and private sources of funds necessary to conduct the treatment of each area selected. In addition, the plan should contain the following component strategies:

(A) *Neighborhood revitalization:* The strategy for alleviating physical deterioration, maintaining viable neighborhoods and stimulating investment to upgrade neighborhoods affected by blight and deterioration.

(B) *Housing:* The community-wide strategy to improve housing conditions and to meet the housing assistance needs that have been identified. Reference to any current Department of Housing and Urban Development approved housing assistance plan would be helpful as part of this component strategy.

(C) *Economic development:* The strategy for attracting private investment in the business community and for solving the critical problems which may be the result of a stagnating or declining tax base or from population outmigration.

(iii) Evidence must be presented from the local governing body verifying that the community has adopted, through resolution or other official act, the community development and housing plan referenced in paragraph (r)(6)(ii) of this section. A copy of the adopted plan should be made available to FmHA. While it is not necessary that the downtown redevelopment/revitalization area be formally designated as an urban renewal or other similar area, evidence supporting a local determination that the downtown business area meets the criteria established in the community development and housing plan must be maintained in the locality's records. Documentation received from the local governing body must also identify the site or structure involved in the applicant's proposal as part of or essential to the downtown redevelopment/revitalization area.

(iv) Evidence must be presented to FmHA verifying the intended commitment of public and private resources which will be available for completing any other integrally related redevelopment/revitalization activities being undertaken in the downtown business area along with the applicant's proposed project.

(v) Prior review and concurrence must be received from the National Office before the State Director or District Director authorizes the applicant to develop a complete application. All of the information required in paragraph (r)(6) of this section must be provided by the applicant before National Office review.

(7) The property for which a loan is made must be located in a rural area as defined in § 1944.10 of subpart A of part 1944 of this chapter. However, if the area where the site is located has changed from rural to nonrural in accordance with the most current official census figures, preapplications received before the date the area was determined nonrural will be processed as expeditiously as possible and loans closed if the applicants are otherwise eligible.

(s) *Clean Air Act and Water Pollution Control Act Requirements.* When the contract exceeds $100,000, the contractor will comply with all applicable standards, orders or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1657(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency (EPA) regulations 40 CFR part 15 which prohibit the awarding of nonexempt Federal contracts, grants or loans to facilities included on EPA's list of violating facilities. The contractor will report violations to the EPA.

(t) *Concurrence with construction contracts.* A construction contract between the borrower and contractor for development of a project will contain a provision that it is not in full force and effect until the State Director concurs in writing in the form, content and execution of the contract. Before loan closing or before the start of construction, whichever occurs first, the State Director or his/her delegate will concur with the contract form, content and execution by including the following paragraph at the end of the contract:

"The Farmers Home Administration, as a potential lender or insurer of funds to defray the costs of this contract, and without liability for any payments thereunder, hereby concurs with the form, content, and execution of this contract."

Date _____

Farmers Home Administration

By: _____

Title: _____

(u) *Historic preservation requirements.* The District Director must take the necessary action to assure that the applicant will comply with the provisions of subpart F of part 1901 of this chapter. This regulation concerns compliance with the National Historic Preservation Act of 1966, the Archeological and Historic Preservation Act of 1974 (Public Law 93–291), and Executive Order 11593 dated May 13, 1971.

(v) *Uniform Relocation Assistance and Real Property Acquisition Act of 1970.* Public bodies and agencies which have the power of eminent domain and/or condemnation must comply with the requirements of this Act. The applicant must provide assistance for relocation of displaced persons from a site on which a project will be located. FmHA loan funds may be increased over and above the appraised value of the property to cover costs incurred in the relocation of displaced persons. Until instructions are published by the National Office, the Department regulations found at part 21 of this title should be followed and the National Office should be consulted for guidance in developing an RRH or RCH loan for a project affected by this Act. Generally, if there are alternative sites of equal quality which meet the Agency's requirements, the site with the least relocation impact will be selected.

(w) *Rental assistance (RA) and market feasibility.* (1) As evidence of market feasibility, an applicant that proposes a project which is expected to use FmHA RA units will only be required to demonstrate that a market exists for tenants or members eligible for the RA.

(2) To evidence market feasibility for projects which are expected to use RA from sources other than FmHA, applicants will be required to demonstrate that:

(i) The assistance will be provided for at least 5 years.

(ii) A market exists for persons and families eligible for the assistance. The amount of the RA to be provided must be considered when determining the number of families that would be income eligible for the project.

(iii) For the term of the loan remaining after RA is no longer available, an adequate rental market exists for the project without the assistance.

(iv) During the term of the RA contract, the provider will make available the amounts required at least annually.

(x) *Accountability.* Applicants should be made aware of the accountability requirements of persons paid to influence the making of an FmHA housing loan and/or grant as described in subpart S of part 1940 of this chapter.

2. The amendatory language in Amendment No. 58 on page 2245 and the heading preceding it are corrected to read as follows:

Exhibits A–4—A–9 to Subpart E [Redesignated as Exhibits A–5—A–10 to Subpart E]

58. Exhibits A–4, A–5, A–6, A–7, A–8, and A–9 to Subpart E are redesignated as Exhibits A–5, A–6, A–7, A–8, A–9, and A–10, respectively.

Dated: December 12, 1991.

La Verne Ausman,

Administrator, Farmers Home Administration.

BILLING CODE 3410–07–M

Animal and Plant Health Inspection Service

9 CFR Part 82

[Docket No. 91–060]

Exotic Newcastle Disease

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Technical amendment.

SUMMARY: We are making a technical amendment to correct an error in the interstate transportation of animals and animal products regulations concerning areas quarantined because of exotic Newcastle disease.

EFFECTIVE DATE: December 20, 1991.

FOR FURTHER INFORMATION CONTACT: Dr. M. A. Mixson, Chief Staff Veterinarian, Emergency Programs Staff, VS, APHIS, USDA, room 746, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8073.

SUPPLEMENTARY INFORMATION:

Background

Exotic Newcastle disease is a contagious, infectious, and communicable disease of birds and poultry. Regulations to eradicate and to prevent the interstate spread of this and other diseases are contained in 9 CFR part 82.

Paragraph (c) of § 82.3 quarantines certain areas because the contagion or vectors of exotic Newcastle disease exist in these areas, or because animals

VOL 56 ISS 245 DEC 20 1991 UMI

and/or live poultry affected with or exposed to exotic Newcastle disease exist in these areas.

During the 1970's and 1980's, certain premises within New York and California were quarantined because of exotic Newcastle disease and added to the list of quarantined areas in § 82.3(c). (At no time were New York and California quarantined in their entirety due to exotic Newcastle disease; only premises within these States were quarantined.)

The last quarantined premises in New York was removed from the list of quarantined areas in § 82.3(c) in a final rule effective May 13, 1983, and published in the **Federal Register** on May 19, 1983 (48 FR 22501, Docket Number 83-062). The last quarantined premises in California was removed from the list of quarantined areas in § 82.3(c) in a final rule effective May 17, 1983, and published in the **Federal Register** on May 23, 1983 (48 FR 22897, Docket Number 83-067).

It has come to our attention that New York and California continue to appear on the list in § 82.3(c), even though no quarantined premises remain in either State. This oversight could create confusion concerning the quarantine status of these States. We are therefore removing paragraph (c) of § 82.3. No areas in the United States are quarantined because of exotic Newcastle disease.

List of Subjects in 9 CFR Part 82

Animal diseases, Chlamydiosis, Exotic Newcastle disease, Ornithosis, Poultry and poultry products, Psittacosis, Salmonella, Quarantine, Transportation.

PART 82—EXOTIC NEWCASTLE DISEASE IN ALL BIRDS AND POULTRY; PSITTACOSIS AND ORNITHOSIS IN POULTRY; POULTRY DISEASE CAUSED BY SALMONELLA ENTERITIDIS

Accordingly, 9 CFR part 82 is amended as follows:

1. The authority citation for part 82 continues to read as follows:

Authority: 21 U.S.C. 111–113, 115, 117, 120, 123–126, 134a, 134b, 135f; 7 CFR 2.17, 2.51, and 371.2(d).

§ 82.3 [Amended]

2. In § 82.3, paragraph (c) is removed.

Done in Washington, DC, this 16th day of December 1991.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 91-30475 Filed 12-19-91; 8:45 am]

BILLING CODE 3410-34-M

FARM CREDIT ADMINISTRATION

12 CFR Parts 613 and 618

RIN 3052-AB28

Eligibility and Scope of Financing; General Provisions; Financing of Basic Processing and Marketing Activities; Authorized Insurance Services

AGENCY: Farm Credit Administration.

ACTION: Final rule.

SUMMARY: The Farm Credit Administration (FCA), by the Farm Credit Administration Board (Board), adopts final regulations amending parts 613 and 618 of FCA regulations, that were published as proposed regulations on September 9, 1991, 56 FR 45902. These regulations reflect certain amendments to the Farm Credit Act of 1971 (1971 Act) by the Food, Agriculture, Conservation and Trade Act of 1990 [1] (1990 Farm Bill) pertaining to the throughput requirements for processing and marketing loans and insurance services offered by Farm Credit System (System) institutions. The amendment to part 613 deletes the 20-percent minimum throughput requirement for loans financing and processing and/or marketing operations of eligible farmers, ranchers, and producers or harvesters of aquatic products, and imposes a statutory limitation on the volume of such loans where the throughput provided by the borrower is less than 20 percent. The amendment to part 618 modifies the requirement that all Farm Credit System institutions must offer more than two insurance carriers.

EFFECTIVE DATE: The regulations shall become effective upon the expiration of 30 days after publication during which either or both houses of Congress are in session. Notice of the effective date will be published in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT:

Linda C. Sherman, Senior Credit Specialist, Policy and Risk Analysis Division, Office of Examination, Farm Credit Administration, McLean, VA 22102-5090, (703) 883-4498,

or

Richard A. Katz, Attorney, Regulatory and Legislative Law Branch, Office of General Counsel, Farm Credit Administration, McLean, VA 22102-5090, (703) 883-4020, TDD (703) 883-4444.

SUPPLEMENTARY INFORMATION:

I. General

Prior to the 1990 Farm Bill, sections 1.11(a) and 2.4(a)(1) of the 1971 Act authorized Farm Credit Banks (FCBs) and production credit associations (PCAs) respectively, to make processing and marketing loans to farmers, ranchers, and producers or harvesters of aquatic products if the borrower's agricultural or aquatic operations supplied at least 20 percent of the total processing or marketing (throughput) for which financing was extended. Section 1832 of the 1990 Farm Bill deleted the 20-percent throughput requirement from sections 1.11(a) and 2.4(a)(1) of the 1971 Act, and instead required the borrower's agricultural or aquatic operations to supply "some portion" of the throughput used in the borrower's processing and/or marketing operations. The 1990 Farm Bill also added the following provisions to the 1971 Act concerning processing and marketing loans to borrowers who provide less than 20 percent of the throughput: (1) Such loans by an FCB are limited to 15 percent of its total outstanding loans; and (2) such loans by any direct lender association in the district are restricted to 15 percent of all outstanding retail loans of all such direct lender associations in the district.

Section 1834 of the 1990 Farm Bill modified the requirement in section 4.29 of the 1971 Act that FCBs always approve more than two insurers for each type of insurance program offered to System borrowers throughout the district. Congress recognized "the possibility that System banks may be unable to satisfy the requirement that banks approve more than two insurers for each type of program." [2] As a result, Congress amended section 4.29 of the 1971 Act to require System banks to make a reasonable and good faith effort to attract and approve more than two qualified insurers for each insurance program offered in the district so that the bank or its related associations could offer borrowers at least two insurers.

In response to these statutory changes, the FCA proposed to amend § 613.3045 pertaining to processing and marketing loans, and § 618.8030 regarding insurance services. *See* 56 FR 45902 (September 9, 1991). Comments concerning the proposed amendments to the processing and marketing regulation were received from the Farm Credit Council (FCC), three FCBs, two agricultural credit associations (ACAs), and the American Bankers Association (ABA). The FCC also offered comments about the proposed amendments to § 618.8030 pertaining to insurance services, which were endorsed by all System commenters.

II. Processing and Marketing Loans

A. Minimum Throughput Requirement

1. Comments

The FCA proposed to amend § 613.3045(b)(2) to allow FCBs and direct lender associations to finance the processing and/or marketing operations of farmers, ranchers, and aquatic producers or harvesters whose agricultural or aquatic activities supply, on a sustained basis, some portion of the throughput. The FCA did not propose to otherwise amend § 613.3045(b)(2), which also imposes specific requirements on applicants whose agricultural or aquatic operations supply less than 50 percent of the throughput used in their processing and/or marketing operations. The proposed regulation would continue to require the applicant's processing and/or marketing activities to constitute a logical and actual extension of the borrower's agricultural or aquatic operations for financing vertical integration from the production stage through the processing and/or marketing stage, whenever the applicant's production supplies less than 50 percent of the throughput. Furthermore, FCA did not propose to amend existing § 613.3045(b)(2)(iii) which imposes specific requirements on applicants who supply less than 50 percent of the throughput whenever the ownership of the processing and/or marketing operation differs from the ownership of the basic agricultural or aquatic production operation.

The FCC commented (and the FCBs and ACAs concurred) that the additional requirements that § 613.3045(b)(2) imposes on loans to borrowers who supply less than 50 percent of the throughput, exceed the limits that Congress established by statute. The FCC argued that § 613.3020 imposes sufficient safeguards to prevent FCBs and associations from extending processing and marketing loans to parties who are not bona fide farmers, ranchers, or aquatic producers or harvesters.

The FCC also asserted that FCA would unnecessarily restrict the ability of FCBs and associations to make processing and marketing loans by requiring the borrower to supply some portion of the throughput "on a sustained basis." The FCC concedes, however, that the statute requires the processing and/or marketing operations to be a logical extension of an eligible borrower's agricultural or aquatic operations.

The FCC recommended that the final regulation add proposed §§ 613.3045(b)(2)(ii) and 613.305(c) to existing § 613.3045(a), and eliminate the remainder of the current regulation, including current § 613.3045(c) (redesignated as (e) in the final regulation), which requires all FCBs and associations to develop specific lending policies concerning processing and marketing loans.

2. FCA Response

The FCA disagrees with the FCC's contention that the proposed regulation violates the amended statute because it continues to distinguish between loans where the borrower's agricultural or aquatic activities supply more than 50 percent of the throughput, and loans where the borrower contributes a lesser amount of the throughput. Sections 1.11(a) and 2.4(a)(1) of the Act continue to require processing and marketing operations to be "directly related" to the agricultural or aquatic activities of eligible borrowers in order to be eligible for financing. The FCA interprets "directly related" to require that the processing and marketing operations be a "logical and actual extension" of the agricultural or aquatic activities of eligible borrowers.

When the borrower supplies 50 percent or more of the throughput, FCA's regulations presume that the processing and/or marketing operation is an actual and logical extension of the borrower's agricultural or aquatic production. Borrowers who supply 50 percent or more of the throughput are currently not required to demonstrate that their processing and/or marketing operations are an actual and logical extension of the agricultural or aquatic activities of eligible borrowers in order to qualify for credit from a Farm Credit System institution.

When the throughput declines to below 50 percent, the regulation does not presume that the borrower's marketing and processing operation is directly related to his or her agricultural or aquatic operation. Rather, the regulation requires additional evidence that the operation is directly related to the borrower's agricultural or aquatic production. The FCBs and associations are expected to screen carefully potential processing and marketing borrowers who supply less than 50 percent of the throughput so that the processing and marketing authorities are not used to finance enterprises that are only remotely connected with the financing of agricultural or aquatic production.

As noted above, the FCC requested that FCA delete existing § 613.3045(b)(2)(iii), which imposes certain requirements on borrowers who supply less than 50 percent of the throughput, whenever the ownership of the processing and/or marketing operation differs from the ownership of the basic agricultural or aquatic production operations.

This provision in the existing regulation is intended to qualify an applicant which is wholly owned by eligible borrowers, but may not produce throughput or meet the legal entity test of § 613.3020. Where the processing and/or marketing operation is separate from the basic production unit, the processing and marketing operation may not meet the eligibility requirements of § 613.3020 because it does not produce agricultural products or own agricultural land. However, where the basic processing and/or marketing entity is entirely owned by persons who would be eligible for such financing, individually or as joint borrowers, the existing and proposed regulations would consider the entity, together with its owners, as a "farmer, rancher, or aquatic producer or harvester" for the purposes of determining eligibility for a loan under processing and marketing authorities. The FCA intends to further clarify these issues when it undertakes a more comprehensive review of the eligibility requirements of part 613.

The FCA declines to delete the phrase "on a sustained basis" from the regulation, as eligible borrowers are expected to regularly supply some portion of the agricultural or aquatic produce used in the processing and/or marketing operation. Similarly, while the final regulation redesignates existing § 613.3045(c) as (e), no substantive change is made, as the need for each institution to appropriately monitor and control eligible marketing and processing loans continues to exist.

The FCA believes that the final regulation balances the objectives that Congress set forth in the 1990 Farm Bill. The successful and expanding processing and/or marketing operations of bona fide farmers, ranchers, and aquatic producers or harvesters will now qualify for continued System financing when the borrower's share of the throughput declines below 20 percent. At the same time, the regulation excludes borrowers whom Congress deemed ineligible for loans from FCBs and associations.

B. Restrictions on the Amount of Certain Processing and Marketing Loans

The FCA proposed to implement provisions in the 1990 Farm Bill limiting the amount of processing and marketing

VOL

1991
UMI

loans that FCBs and direct lender associations can make to borrowers who supply less than 20 percent of the throughput by redesignating existing § 613.3045 (c) as (e) and adding § 613.3045 (c) and (d) to the existing regulation. Under proposed § 613.3045(c), processing and marketing loans to borrowers who supply less than 20 percent of the throughput would be subject to the three separate limitations below:

(1) Section 613.3045(c)(1) would limit such loans to 15 percent of all outstanding loans made in the district by the FCB and all direct lender associations during the preceding fiscal year;

(2) Section 613.3045(c)(2) would restrict processing and marketing loans (where the throughput is less than 20 percent) by a FCB to 15 percent of all outstanding loans made by the Bank during the preceding fiscal year; and

(3) Section 613.3045(c)(3) would limit such loans by any direct lender association to 15 percent of all outstanding loans made by all direct lender associations in the district during the preceding fiscal year.

In addition, § 613.3045(d) would require each FCB, in conjunction with all associations chartered in the district to identify and monitor eligible marketing and processing loans with less than 20-percent throughput prior to final loan approval in order to ensure that the 15-percent districtwide limit is not exceeded.

The FCC offered no comments on proposed § 613.3045 (c) and (d) because it was unable to forge a consensus position among its members. Instead, two FCBs submitted separate comments on proposed § 613.3045(c)(1). One of the two FCBs and the ABA offered comments on proposed § 613.3045(d).

One FCB suggested that the FCA delete § 613.3045(c)(1), contending the districtwide limit was not authorized by statute. This FCB argued that the 1990 Farm Bill only imposed a districtwide limit on processing and marketing loans (with less than 20-percent throughput) at the association level. The FCB argued that sections 1.11(a)(2) and 2.4(a)(1) of the 1971 Act imposed separate and unrelated limits on such processing and marketing loans by FCBs and associations. The legislative history to the 1990 Farm Bill expressly states that Congress intended to "allow the FCS to lend to marketers and processors" who supplied less than 20 percent of the throughput, but limited such loans to "15 percent of the portfolio of the district bank." However, the FCB commented that this is "an unclear and inconclusive expression of Congressional intent * * * that is in direct conflict with the plain language of the [s]ections 1.11(a)(2) and 2.4(a)(1)." This commenter opined that Congress would have written the statute differently if it really intended to impose a districtwide limitation on these loans.

The FCA disagrees that a districtwide limit on these loans is contrary to the plain language of sections 1.11(a)(2) and 2.4(a)(1) of the 1971 Act. The FCA declines to omit § 613.3045(c)(1) from the regulation because the legislative history clearly indicates that Congress intended to limit processing and marketing loans to borrowers who supply less than 20 percent of the throughput in each district to 15 percent of the portfolio of the district bank. Section 613.3045(c)(1) demonstrates that sections 1.11(a)(2) and 2.4(a)(1) of the 1971 Act can be interpreted together in a manner that is compatible with the legislative history.

Section 1342 of the 1990 Farm Bill establishes limits in both sections 1.11(a) and 2.4(a)(1) of the 1971 Act on processing and marketing loans to borrowers who supply less than 20 percent of the throughput. The Joint Conference Report explains that section 1342 of the 1990 Farm Bill "allows the FCS" to extend credit to the processing and/or marketing operations of borrowers who supply less than 20 percent of the throughput, but "limits the new authority to 15 percent of the portfolio of the district bank." [3] Since the Joint Conference Report describes both provisions as enforcing a single limitation, it is difficult to understand how the commenter can argue that there is a districtwide limit for associations without acknowledging that the Bank is also subject to it.

Comments concerning proposed § 613.3045(c) indicate that System institutions may be confused about which loans comprise the base of "total outstanding loans," for the purposes of determining the districtwide limit. The FCA interprets "total outstanding loans" to refer to bank loans made to borrowers, not loans to associations. Sections 1.11(a) and 2.4(a)(1) of the 1971 Act grant FCBs and associations authority to make retail loans. The FCA believes that the limitation was intended to be related to the Bank volume used in determining the 15-percent districtwide limit. This is similar to the interpretation of limits on rural housing loans in sections 1.11(b) and 2.4(b) of the 1971 Act, which refer to "total outstanding loans" of the FCBs and associations. At the time these retail lending authorities were granted, only the Federal land banks (FLBs) and PCAs could make retail loans. The FCA has always interpreted these limits on rural housing loans as referring to the total of outstanding retail loans. The FCA adopts this interpretation for processing and marketing loans.

According, the FCA has revised proposed § 613.3045(c) in the final regulation to specify that the districtwide limit on this category of processing and marketing loans is based upon the total of all outstanding retail loans made in the district during the preceding fiscal year. More specifically, § 613.3045(c)(1) limits processing and marketing loans where the throughput is less than 20 percent to 15 percent of all outstanding retail loans made by both the FCB and all associations in the district. Furthermore, § 613.3045(c)(2) of the proposed regulation was revised to state more clearly that processing and marketing loans by FCBs to borrowers who supply less than 20 percent of the throughput are restricted to 15 percent of the FCB's total outstanding retail loans.

The final regulation clarifies that "loans" include participation interests, and specifically addresses how the participation of processing and marketing loans between the FCB and its affiliated associations affect the districtwide limitations. Such participation interests may be counted in the loan totals of the FCB or the direct lender association, but not in both places. This change is designed to allow maximum flexibility to the district to make processing and marketing loans to eligible borrowers, wherever they may be located.

Another FCB, in conjunction with the districtwide ACA, expressed concern about the impact of proposed § 613.3045(c) in situations where the direct lending authority in a district was transferred to an ACA or a Federal land credit association (FLCA), but certain long-term mortgages remained at the FCB. These institutions recommended that the FCA amend the proposed regulation so that the association could count the FCB's loans as its own, and thus, increase the amount of processing and marketing loans that the association could make. These commenters suggest that the failure of the FCA to make an exception for this situation would create a "discriminatory and anomalous result [that] cannot be sustained on any legal or policy grounds."

In response to the above concerns, the FCA has revised § 613.3045(c)(3) in the final regulation to allow associations to count, as a part of the association loan total, all performing retail loans on the Bank's books that were originated before the lending authority was transferred. The final regulation, however, excludes nonperforming loans that the FCB has either retained or purchased from an association as a form of financial assistance from the base of "total outstanding loans" that is used to determine the districtwide limit. This change is intended to avoid disadvantaging districts in which long-term lending authority has been transferred out of the Bank, but assets have not.

An FCB also expressed concern that § 613.3045(d) would enable one or two System institutions to monopolize processing and marketing loans (to borrowers who supply less than 20 percent of the throughput) in the district. This commenter felt a small association could become heavily concentrated in these loans without violating the 15-percent limit in § 613.3045(c), and suggested that the FCA amend § 613.3045(d) to require that each institution establish its own limit. Under the FCB's proposal, each FCB and association would base its individual limit on sound credit practices and risk diversification principles.

However, the 1990 Farm Bill clearly imposed districtwide limits on processing and marketing loans to borrowers who supply less than 20 percent of the throughput. The FCA proposed amending § 613.3045(d) to require each FCB and its affiliated associations to equitably allocate such processing and marketing loans among all institutions in the district. The final regulation enables, but does not require, the FCB and the associations in the district to establish specific percentage limits on the amount of processing and marketing loans that each institution can make to borrowers who supply less than 20 percent of the throughput. This equitable allocation of such loans among the direct lenders in the district is intended to prevent any association from concentrating its portfolio in processing and marketing loans or violating the districtwide limit in § 613.3045(c)(3).

The FCA has eliminated the requirement of § 613.3045(d) to develop policies and procedures for monitoring and implementing the limitations of § 613.3045(c). The final regulation merely requires FCBs and associations to identify and monitor loans to ensure that the 15-percent districtwide limit is not exceeded and that processing and marketing loans are equitably allocated among all lenders.

The ABA commented on ways to detect and punish "inadvertent" violations of the 15-percent limit on processing and marketing loans to borrowers who supply less than 20 percent of the throughput. The ABA suggested that the final regulation require all borrowers who obtain processing and marketing loans from Farm Credit System institutions to submit an annual affidavit stating the amount of throughput contributed during the year. The ABA proposed that every FCB, on a quarterly basis, calculate the amount of processing and marketing loans made to borrowers in the district with less than 20-percent throughput and submit a report to the FCA. The ABA recommended the regulations specify procedures for reporting, compiling, calculating, and reviewing information about these loans. The commenter suggested that the FCA add provisions to the regulation to impose personal liability on directors of Farm Credit System institutions that violate the 15-percent limit for processing and marketing loans to borrowers who supply less than 20 percent of the throughput. The ABA contends that loans which exceed the limit are null and void. The commenter further recommended that the contract should warn the borrower that any processing and marketing loan made in violation of the limit is void, and in such event, the borrower would be obligated to immediately refund the principal amount of the loan.

The FCA notes that current underwriting and reporting standards on processing and marketing loans are sufficient to detect any violation of limits on this category of loans. The FCA's enforcement powers are sufficient to remedy situations where System institutions exceed the 15-percent limit. The sanctions proposed by the ABA for inadvertent violations of the districtwide limit appear excessive and unnecessary. The FCA also has not adopted the ABA's suggestion that the regulation punish a borrower for the unintentional mistakes of the lender.

III. Insurance Services

The proposed amendments to § 618.8030 reflect changes to section 4.29 of the 1971 Act by no longer requiring that the banks always approve more than two insurers for each type of insurance program offered to Farm Credit System borrowers. The proposed regulation would require a bank to document its efforts to attract additional qualified insurers for each type of insurance offered whenever it had not approved more than two insurers for each insurance program offered in every State of its chartered territory.

The FCC approved of the proposed regulation and recommended two minor word changes. The FCC suggested the FCA change the word "offer" in the third sentence of § 618.8030(b)(2) to "approve," in order to reflect the requirement in section 4.29 of the 1971 Act that System banks approve, whenever possible, more than two insurers for each type of insurance offered to System borrowers. Similarly, the FCC suggested that the term "approved" in the final sentence of § 618.8030(b)(3)(v) be changed to "selected," because the direct lender "selects and offers" insurers that already have been "approved" by the bank. The FCA adopted these changes suggested by the FCC because they clarify the regulation.

List of Subjects in 12 CFR Parts 613 and 618

Aged, Agriculture, Banks, banking, Civil rights, Credit, Fair housing, Insurance, Marital status discrimination, Religious discrimination, Reporting and recordkeeping requirements, Rural areas, Sex discrimination, Signs and symbols, Technical assistance.

For the reasons stated in the preamble, parts 613 and 618 of chapter VI, title 12 of the Code of Federal Regulations is amended to read as follows:

PART 613—ELIGIBILITY AND SCOPE OF FINANCING

1. The authority citation for part 613 continues to read as follows:

Authority: Secs. 1.5, 1.7, 1.9, 1.10, 1.11, 2.2, 2.4, 2.12, 3.1, 3.7, 3.8, 3.22, 5.9, 5.17; 12 U.S.C. 2013, 2015, 2017, 2018, 2019, 2073, 2075, 2093, 2122, 2128, 2129, 2143, 2243, 2252.

Subpart B—Eligibility To Borrow From Farm Credit Banks, Agricultural Credit Banks, Production Credit Associations, Agricultural Credit Associations and Federal Land Credit Associations

2. Section 613.3045 is amended by revising the first sentence of paragraph (b)(2)(ii); redesignating paragraph (c) as new paragraph (e); and adding new paragraphs (c) and (d) to read as follows:

§ 613.3045 Financing of basic processing and marketing activities.

* * * * * *

(b) * * *

(2) * * *

(ii) The applicant, or as provided for in paragraph (b)(2)(iii) of this section, the applicant processing or marketing unit and its owners, shall produce on a

UMI

sustained basis some portion of the throughput of the basic processing and/or marketing operation sufficient to demonstrate that such operation constitutes a logical and actual extension of the applicant's agricultural or aquatic operation for financing vertical integration from the production stage through the basic processing and/or marketing stage. * * *

* * * * *

(c) Processing and marketing loans to eligible borrowers, who supply on a sustained basis less than 20 percent of the throughput, are subject to the following restrictions:

(1) The aggregate of such marketing and processing loans provided by the Farm Credit Bank and all direct lender associations in each district shall not exceed 15 percent of the total of all outstanding retail loans in the district at the end of the bank's preceding fiscal year;

(2) The aggregate of such marketing and processing loans provided by any Farm Credit Bank shall not exceed 15 percent of all outstanding retail loans made by such bank as a direct lender at the end of its preceding fiscal year. For the purposes of this paragraph, "outstanding loans" may include loan participations bought from or sold to associations in the district, to the extent such participations are not considered as a part of the "aggregate of outstanding loans of all associations" for the purposes of determining the limitation under paragraph (c)(3) of this section; and

(3) The aggregate of such marketing and processing loans provided by any association shall not exceed 15 percent of all outstanding loans of all associations in the district at the end of the preceding fiscal year. For the purposes of this paragraph, "outstanding loans of all associations" may include, to the extent not considered as a part of the retail loan volume of the bank for the purposes of determining the limitations under paragraph (c)(2) of this section:

(i) All performing loans originated by or through associations to which long-term lending authority has been transferred; and

(ii) All loan participations sold by associations to the district bank and all participations purchased by the association from the bank;

(d) Each Farm Credit Bank, in conjunction with all direct lending associations chartered in the district, shall:

(1) Identify and monitor loans subject to the limitations of paragraph (c) of this section sufficiently to ensure that the 15-percent districtwide limit is not exceeded;

(2) Ensure that processing and marketing loans subject to the limitations of paragraph (c) of this section are equitably allocated among all direct lenders in the district; and

(3) Ensure that no retail loan or loan participation is double-counted for the purposes of determining the limitations of paragraph (c) of this section.

* * * * *

PART 618—GENERAL PROVISIONS

3. The authority citation for part 618 continues to read as follows:

Authority: Secs. 1.5, 1.11, 1.12, 2.2, 2.4, 2.5, 2.12, 3.1, 3.7, 4.12, 4.13A, 4.25, 4.29, 5.9, 5.10, 5.17; 12 U.S.C. 2013, 2019, 2020, 2073, 2075, 2076, 2093, 2122, 2128, 2183, 2200, 2211, 2218, 2243, 2244, 2252.

Subpart B—Member Insurance

4. Section 618.8030 is amended by revising paragraphs (b)(2) and (b)(3)(v) to read as follows:

§ 618.8030 Authorized insurance services.

* * * * *

(b) * * *

(2) In making insurance available through private insurers, each bank shall approve the programs of more than two insurers for each type of insurance offered in the bank's chartered territory, provided that more than two insurers for each type of insurance have proposed programs to the bank that will, in all likelihood, have long-term viability, and meet the requirements of § 618.8030(b)(3)(i) of this section. The banks shall make a reasonable and good faith effort to attract more than two qualified insurers for each insurance program offered to borrowers in all States of the bank's chartered territory. Where the bank is unable to approve more than two insurers, the bank shall document its efforts to attract additional qualified insurers for the affected insurance program and State. The banks may provide comparative information relating to costs and quality of approved programs and the financial condition of approved companies.

(3) * * *

(v) In making insurance available through approved insurers, the board of directors of the bank or association shall make a reasonable and good faith effort to select and offer at least two approved insurers for each type of insurance made available to the members and borrowers. In the event that the bank or association has selected less than two insurers for any insurance program, such bank or association shall document the reasons why it is unable to offer members and borrowers additional insurers for the affected insurance program.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 2, 154, 157, 284, 375, and 380

[Docket No. RM90-1-003]

Revisions to Regulations Governing Authorizations for Construction of Natural Gas Pipeline Facilities

Issued: December 16, 1991.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule; notice of postponement of technical conference.

SUMMARY: By notice issued on November 26, 1991 (56 FR 63648, December 5, 1991), the Federal Energy Regulatory Commission (Commission) set January 7, 1992 as the date for a technical conference on the non-environmental aspects of the final rule issued on September 20, 1991 in Order No. 555. The Commission hereby is postponing the date of that conference until Friday, January 17, 1992. All interested persons are invited to attend and participate.

DATES: The conference will be held on Friday, January 17, 1992 beginning at 10 a.m.; notices of intent to participate should be filed by January 10, 1992 and should indicate the amount of time desired, if any, for a presentation.

ADDRESSES: The conference will be held at the Commission's offices at 810 First Street, NE., Washington, DC; notices of intent to participate should be filed with the Secretary of the Commission, 825 N. Capitol Street, NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Lois D. Cashell, Secretary of the Commission, (202) 208-0400.

Federal Energy Regulatory Commission

Revisions to Regulations Governing Authorizations for Construction of Natural Gas Pipeline Facilities

[Docket No. RM90-1-003]

Postponement of Technical Conference

December 16, 1991.

On November 26, 1991, the Commission issued a notice convening on January 7, 1992 a technical conference on the non-environmental aspects of Order No. 555.[1] Notice is hereby given that the Commission is postponing the date of that technical conference until January 17, 1992. The conference will commence on that date at 10 a.m., at 810 First Street, NE., Washington, DC.

All interested persons are invited to attend and participate. Those wishing to make a presentation must so advise the Secretary of the Commission on or before Friday, January 10, 1992, and indicate an amount of time desired for presentation. Participants will be restricted to lesser periods of time if necessary to afford each participant an opportunity to speak.

Lois D. Cashell,

Secretary

BILLING CODE 6717-01-M

UNITED STATES INFORMATION AGENCY

22 CFR Part 514

Exchange Visitor Camp Counselor and Training Programs

AGENCY: United States Information Agency.

ACTION: Statement of policy and notice to sponsors of exchange visitor camp counselor and training programs.

SUMMARY: In response to a report of the General Accounting Office entitled "Inappropriate Uses of Educational and Cultural Exchange Visas," dated February 16, 1990, the Agency on July 23, 1990 imposed a moratorium on the designation of new camp counselor programs and directed that currently designated camp counselor programs not expand in any way during the moratorium. 55 FR 29643. A similar moratorium was imposed on exchange visitor training programs on August 13, 1990, 55 FR 32907. This policy statement partially lifts the two moratoria with regard to currently-designated training and camp counselor programs and allows said sponsors to expand their camp counselor and training programs with respect to Soviet and other Eastern European exchange participants. The moratoria on designation of new training and camp counselor programs and on expansion of currently-designated flight training programs shall remain in effect until enactment of the final general provisions and training regulations. Following enactment, priority attention shall be given to applications for designation of new training programs.

EFFECTIVE DATE: This policy statement is effective December 20, 1991.

ADDRESSES: Questions or comments regarding this notice should be addressed to Task Force on Regulatory Reform, Office of the General Counsel, room 700, United States Information Agency, 301 Fourth Street, SW., Washington, DC 20547. Tel. (202) 401-1707.

FOR FURTHER INFORMATION CONTACT: Task Force on Regulatory Reform, Office of the General Counsel, room 700, United States Information Agency, 301 Fourth Street, SW., Washington, DC 20547, Tel. (202) 401-1707.

SUPPLEMENTARY INFORMATION: On February 16, 1990 the General Accounting Office issued a report entitled "Inappropriate Uses of Educational and Cultural Exchange Visas." That report questioned the appropriateness of certain exchange activities conducted under Agency-designated camp counselor and training programs. In response to the GAO report the Agency imposed a moratorium on the designation of new camp counselor programs, 55 FR 29,643 (1990), and on new training programs, 55 FR 32,907 (1990). The moratoria also directed that designated camp counselor and training programs not expand their programs in any way while the moratoria were in effect.

The moratoria were imposed in order to implement a complete reform of the Exchange Visitor Program regulations. In June 1990 the Agency created a Task Force on Regulatory Reform to carry out a review and revision of the regulations, a process which is well underway. On November 25, 1991, the Agency published proposed training regulations as well as proposed "General Provisions" which will affect all exchange visitor programs. 56 FR 59,822 (1991). At the conclusion of the 90-day comment period, the Agency will review all comments submitted by interested parties and will then publish final "General Provisions" and training regulations. Other proposed regulations, such as those dealing with professors, researchers, bio-medical and medical exchangees, will follow shortly. It is anticipated that the entire regulatory reform of the Exchange Visitor Program (22 CFR part 514) will be completed by May, 1992.

The moratoria on exchange visitor training and camp counselor programs have now been in effect for approximately 15 months. During this period vast political and economic changes have taken place in the Soviet Union and in the former Eastern Bloc countries, including the former East Germany. A number of new foreign policy initiatives, such as the Support For East European Democracies (SEED) program, the President's East European Initiative, as well as many private sector initiatives, have demonstrated the need for expanding exchange activities involving those regions.

At the same time, the Agency has been reluctant to designate new programs or allow the expansion of existing programs while it is in the midst of a total regulatory reform effort. It is entirely possible that, if new programs were designated at the present time, those same programs would not be able to comply with the final regulations eventually promulgated by the Agency and would therefore not be able to continue in operation.

Nevertheless, foreign policy considerations override this concern and the Agency has determined that it is in the foreign policy interests of the United States to lift the moratoria on the expansion of currently-designated exchange visitor training and camp counselor programs. Therefore, effective the date of publication of this Notice in the **Federal Register**, currently-designated training and camp counselor programs, with the exception of flight training programs, are permitted to expand the scope of their programs numerically and in terms of the types of exchange activities they offer.

Because the Agency expects to promulgate final "General Provisions" and final training regulations by the Spring of 1992, the moratoria on the designation of new camp counselor and training programs will continue in effect until these final regulations are promulgated. As noted above, the moratorium on expansion of currently-designated flight training programs continues in effect. When such final regulations are promulgated the remainder of the moratoria will be lifted. At such time, all designated programs must re-apply for designation and

1991
UMI

demonstrate that they are able to comply with the new regulations. Such programs will be permitted to continue their exchange activities pending review of their application for re-designation by the Agency. Those camp counselor and training programs which had applied for designation at the time the moratoria were imposed must also re-apply for designation. The Exchange Visitor Program Services office will give priority to the review of those applications which were pending at the time the moratoria were imposed.

List of Subjects in 22 CFR Part 514

Cultural exchange programs, Practical trainees, International camp counselors, Reporting and recordkeeping requirements.

Dated: December 16, 1991.

R. Wallace Stuart,

Acting General Counsel.

BILLING CODE 8230-01-M

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 500

Foreign Assets Control Regulations

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Final Rule, amendments.

SUMMARY: This rule authorizes travel service providers subject to U.S. jurisdiction to engage in certain transactions, for profit or otherwise, concerning the arrangement, promotion, or facilitation of group and individual tours and travel to Vietnam, and limits reimbursement by U.S. subsidiaries incorporated abroad to their foreign national employees for expenses incurred in Vietnam.

EFFECTIVE DATE: December 17, 1991.

FOR FURTHER INFORMATION CONTACT: William B. Hoffman, Chief Counsel (tel.: 202/535-6020), or Steven I. Pinter, Chief of Licensing (tel.: 202/535-9449), Office of Foreign Assets Control, Department of the Treasury, Washington, DC 20220.

SUPPLEMENTARY INFORMATION: On March 8, 1988, the Office of Foreign Assets Control ("FAC") amended the Foreign Assets Control Regulations ("FACR") in response to the heightened interest in travel to Vietnam. The amendments clarified the restrictions on the transactions in which travel service providers subject to U.S. jurisdiction ("TSP") may engage with respect to travel to and in Vietnam. Authorized transactions were limited to the booking of passage aboard a third-country carrier's flight to or from Vietnam. Sections 500.201 and 500.563 of the FACR prohibited other transactions, such as the arrangement, promotion, or facilitation of group or individual tours, hotel accommodations, ground transportation, local tours and similar travel activities in Vietnam, the entry into business arrangements with Vietnam or its nationals, and the acceptance of fees, commissions, or other compensation with respect to travel to Vietnam. These restrictions applied both to commercial and noncommercial TSP's.

This amendment lifts these restrictions with respect to TSP's both commercial and noncommercial, to permit the arrangement, promotion or facilitation of travel to, from, and within Vietnam by individuals, groups and organizations. TSP's must file monthly reports on certain financial transactions incident to such arrangements. Travel costs prepaid through a TSP must be taken into account in complying with the $200 per diem restriction on a traveler's travel-related expenses pursuant to § 500.563 of the FACR, as amended at 55 FR 31178, August 1, 1990, and 55 FR 49997, December 4, 1990.

This final rule does not authorize TSP's to open offices in Vietnam, nor does it permit TSP's to charter, or sell tickets for use of, American-owned or controlled aircraft to fly into Vietnam. In addition, no direct or single-plane through flights between the United States and Vietnam may be organized or offered for sale, i.e., a change of flight number and equipment in a third country is required. American-owned or controlled aircraft may be used by charter or otherwise, however, to provide transportation for all portions of travel to or from Vietnam except for that leg of the journey going into or out of Vietnam. This final also does not affect the specific licensing requirement for TSP's seeking to conduct tours and private exchange programs to Cambodia, as set forth in § 500.563 of the FACR, 53 FR 7354, March 6, 1988, or to North Korea, as set forth in § 500.569 of the FACR, 54 FR 21, January 3, 1989, as amended in 54 FR 11185, March 17, 1989.

Finally, this final rule amends § 500.564 of the Regulations to clarify that reimbursement by American-owned or controlled foreign firms for expenditures incidental to travel to and in Cambodia, North Korea and Vietnam by their foreign-national employees is limited by the per diem established in § 500.563(a)(2), currently set at $200. *See:* 55 FR 31178, August 1, 1990; 55 FR 49997, December 4, 1990.

Because the FACR involve a foreign affairs function, Executive order 12291 and the provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, does not apply.

List of Subjects in 31 CFR Part 500

Cambodia, North Korea, Reporting and recordkeeping requirements, Travel restrictions, Vietnam.

For the reasons set forth in the preamble, 31 CFR part 500 is amended as follows:

PART 500—FOREIGN ASSETS CONTROL REGULATIONS

1. The authority citation for part 500 continues to read as follows:

Authority: 50 U.S.C. App. 5, as amended; E.O. 9193, 7 FR 5205, 3 CFR 1938-1943 Cum. Supp., p. 1174; E.O. 9989, 13 FR 4891, 3 CFR 1943-1948 Comp., p. 748.

Subpart E—Licenses, Authorizations, and Statements of Licensing Policy

2. The section heading of § 500.563 is revised as follows: the first sentence of paragraph (c)(1) of § 500.563 is removed and the following two new sentences are added in its place; the first sentence of paragraph (c)(2) of § 500.563 is revised as follows; the second sentence of paragraph (c)(2) of § 500.563 is revised by replacing the words "any foreign country designated under § 500.201 of this part" and "a designated country" with the words "Cambodia and North Korea"; and a new paragraph (c)(3) is added to § 500.563, to read as follows:

§ 500.563 Certain transactions incident to travel to and within Cambodia, North Korea, and Vietnam.

* * * * *

(c) *Travel Service Providers.* (1) Except as provided in paragraph (c)(3) of this section, all transactions by travel service providers are authorized in connection with travel to Vietnam. With respect to Cambodia and North Korea, transactions by travel service providers are authorized only in connection with the booking of passage to and from these countries on behalf of individuals aboard a third-country carrier, i.e., a carrier that is neither owned, controlled, nor chartered by a person subject to the jurisdiction of the United States, an embargoed country, or a national of an embargoed country. * * *

(2) The provision of any service related to travel by individuals to Cambodia and North Korea is prohibited, other than that licensed by paragraph (c)(1) of this section. * * *

(3) Travel service providers are not authorized under this section to enter into transactions incident to opening or maintaining an office in Vietnam, nor may they charter or sell space aboard aircraft owned or controlled by persons subject to the jurisdiction of the United States for any flight to or from Vietnam. Such aircraft may be chartered for travel to points outside Vietnam, but entry into or exit from Vietnam, by charter or otherwise, must be aboard a third-country carrier. No direct or single-plane through flights between the United States and Vietnam may be organized or offered for sale, *i.e.*, a change of flight number and equipment in a third country is required. Travel service providers transferring funds directly or indirectly to Vietnam for purposes authorized in paragraph (c)(1) of this section must submit a monthly report, within 10 days of the end of each calendar month in which such transfers occur, to the Licensing Compliance Section, Office of Foreign Assets Control, U.S. Department of the Treasury, 1500 Pennsylvania Avenue NW., Annex, Washington, DC 20220, stating for each such transfer: The amount and nature or purpose of the transfer, the date of the transfer, the financial institution effecting the transfer, and the party to whom the funds were transferred.

* * * * *

§ 500.564 [Amended]

3. Section 500.564 is amended by adding the following words to the end of the paragraph: ", in accordance with the per diem limitation applicable to individuals subject to the jurisdiction of the United States that is set forth in § 500.563(a)(2)."

Dated: December 10, 1991.

R. Richard Newcomb,

Director, Office of Foreign Assets Control.

Approved: December 13, 1991.

Peter K. Nunez,

Assistant Secretary (Enforcement).

BILLING CODE 4810-25-M

31 CFR Part 550

Libyan Sanctions Regulations

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Final rule; Amendment to the list of specially designated nationals of the Government of Libya.

SUMMARY: The Libyan Sanctions Regulations, 31 CFR part 550 (the "Regulations"), are being amended to remove one name from appendix B, the list of Individuals Determined To Be Specially Designated Nationals of the Government of Libya. Appendix B contains the names of individuals whom the Director of the Office of Foreign Assets Control has determined to be acting or purporting to act directly or indirectly on behalf of the Government of Libya. This list may be expanded or amended at any time.

EFFECTIVE DATE: December 20, 1991.

ADDRESSES: Copies of this list are available upon request at the following location: Office of Foreign Assets Control, U.S. Department of the Treasury, Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: Richard J. Hollas, Chief, Enforcement Section, Office of Foreign Assets Control, Tel.: (202) 566-5021.

SUPPLEMENTARY INFORMATION: The Regulations were issued by the Treasury Department to implement Executive Orders No. 12543 (51 FR 875, Jan. 9, 1986) and 12544 (51 FR 1235, Jan. 10, 1986), in which the President declared a national emergency with respect to Libya, invoking the authority, *inter alia*, of the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*), and ordering specific measures against the Government of Libya. The Regulations were amended by a final rule published in the **Federal Register** (56 FR 20540, May 6, 1991) which added appendix A, the list of Organizations Determined To Be Within the Term "Government of Libya" (Specially Designated Nationals of Libya). The Regulations were amended further by a final rule published in the **Federal Register** (56 FR 37156, Aug. 5, 1991) which removed numerical designations and merged the separate categories in appendix A, added the names of twelve companies to appendix A, and added a new appendix B, "Individuals Determined To Be Specially Designated Nationals of the Government of Libya," to the end thereof.

This rule removes one name from appendix B to part 550. The list consists of individuals whom the Director of the Office of Foreign Assets Control has determined to be acting or purporting to act directly or indirectly on behalf of the Government of Libya, and who thus fall within the definition of the "Government of Libya" contained in § 550.304(a) of the Regulations. The persons included in appendix B are subject to all prohibitions applicable to other components of the Government of Libya. All unlicensed transactions with such persons, or in property in which they have an interest, are prohibited.

The list of specially designated nationals is a partial one since FAC may not be aware of all the persons that might be owned or controlled by the Government of Libya or acting as officers, agents or front organizations for Libya, and which thus qualify as specially designated nationals of the Government of Libya. Therefore, persons engaging in transactions may not rely on the fact that any particular person is not on the specially designated nationals list as evidence that it is not owned or controlled by, or acting or purporting to act directly or indirectly for, the Government of Libya. The Treasury Department regards it as incumbent upon all U.S. persons to take reasonable steps to ascertain for themselves whether persons they enter into transactions with are owned or controlled by the Government of Libya or are acting or purporting to act on its behalf, or on behalf of other countries subject to blocking or transportation-related restrictions (at present, Cambodia, Cuba, Haiti, Iraq, North Korea, and Vietnam).

Pursuant to the Regulations, Dr. Ralf Wojtek was included in appendix B to the Regulations, published in the **Federal Register** on August 5, 1991 (56 FR 37156), as a specially designated national of the Government of Libya. Following a review of additional information it has been determined that Dr. Ralf Wojtek is not within the scope of the definition of the "Government of Libya" as defined in § 550.304(a) of the Regulations; and, therefore, is removed from the list of specially designated nationals of the Government of Libya.

Because the Regulations involve a foreign affairs function, Executive Order 12291 and the provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, does not apply.

PART 550—LIBYAN SANCTIONS REGULATIONS

For the reasons set forth in the preamble, 31 CFR part 550 is amended as set forth below:

1. The "Authority" citation for part 550 continues to read as follows:

Authority: 50 U.S.C. 1701 *et seq.*; 22 U.S.C. 2349aa–8 & –9; 49 U.S.C. 1514; E.O. 12543, 51 FR 875 (Jan. 9, 1986); E.O. 12544, 51 FR 1235 (Jan. 10, 1986).

APPENDIX B [AMENDED]

2. Appendix B to part 550 is amended by removing the following name: Wojtek, Dr. Ralf, Germany.

Dated: November 14, 1991.

R. Richard Newcomb,

Director, Office of Foreign Assets Control.

Approved: November 20, 1991.

John P. Simpson,

Acting Assistant Secretary (Enforcement).

BILLING CODE 4810-25-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 60 and 61

[FRL-4085-3]

Standards of Performance for New Stationary Sources, National Emission Standards for Hazardous Air Pollutants; Supplemental Delegation of Authority to Nashville

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; delegation of authority.

SUMMARY: On April 18, 1991, Nashville/Davidson County Metropolitan Health Department requested delegation of authority for the implementation and enforcement of additional categories of Standards of Performance for New Stationary Sources (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS). EPA's Review of Nashville/Davidson County's laws, rules, and regulations showed them to be adequate for the implementation and enforcement of these federal standards, and the agency made the redelegation as requested.

EFFECTIVE DATE: The effective date of the delegation of authority is June 28, 1991.

ADDRESSES: Copies of the request for delegation of authority and EPA's letter of delegation are available for public inspection at EPA's Region IV Office, 345 Courtland Street, NE., Atlanta, Georgia 30365. All reports required pursuant to the newly delegated standards should not be submitted to the Region IV Office, but should instead be submitted to the following address: Mr. Paul J. Bontrager, P.E., Director, Air Pollution Control Division, Metropolitan Health Department, Nashville/Davidson County, 311 23rd Avenue, North, Nashville, Tennessee 37203.

FOR FURTHER INFORMATION CONTACT: Leslie Cox of the EPA Region IV Air Programs Branch, 345 Courtland Street, NE., Atlanta, Georgia 30365. Telephone (404) 347-2864, (FTS) 257-2864.

SUPPLEMENTARY INFORMATION: Section 301, in conjunction with sections 110, 111(c)(1), and 112(d)(1) of the Clean Air Act as amended authorizes the Administrator to delegate his authority to implement and enforce the National Standards of Performance for New Sources and the National Emission Standards for Hazardous Air Pollutants to any state which has submitted adequate implementation and enforcement procedures.

On March 25, 1977, EPA initially delegated to Nashville/Davidson County the authority to implement the NSPS and NESHAP. On April 18, 1991, Nashville/Davidson County requested a delegation of authority for implementation and enforcement of the following recently promulgated or revised (denoted by R) NSPS and NESHAP categories found in 40 CFR parts 60 and 61:

40 CFR Part 60

- Subpart D—Fossil-Fuel Fired Steam Generator (R)
- Subpart Da—Electric Utility Steam Generating Unit (R)
- Subpart Db—Industrial-Commercial-Institutional Steam Generating Units (R) except § 60.44b(f), § 60.44b(q), and § 60.49b(a)(4)
- Subpart Dc—Small Industrial-Commercial-Institutional Steam Generating Units except § 60.48c(a)(4)
- Subpart E—Incinerators (R)
- Subpart Ea—Municipal Waste Combustors
- Subpart F—Portland Cement Plants (R)
- Subpart G—Nitric Acid Plants (R)
- Subpart H—Sulfuric Acid Plants (R)
- Subpart I—Asphalt Cement Plants (R)
- Subpart J—Petroleum Refineries (R) except § 60.105(a)(13)(iii) and § 60.106(i)(12) (Revised in 10/2/90 FR, was § 60.106(g)(12))
- Subpart K—Storage Vessels For Petroleum Liquids (R)
- Subpart Ka—Storage Vessels For Petroleum Liquids (R) except § 60.114(a)
- Subpart L—Secondary Lead Smelters (R)
- Subpart M—Secondary Brass and Bronze Production Plants (R)
- Subpart N—Primary Emissions From Basic Oxygen Process Furnaces (R)
- Subpart Na—Secondary Emissions From Basic Oxygen Process Steelmaking Facilities (R)
- Subpart O—Sewage Treatment Plants (R) except § 60.153(e)
- Subpart P—Primary Copper Smelters (R)
- Subpart Q—Primary Zinc Smelters (R)
- Subpart R—Primary Lead Smelters (R)
- Subpart S—Primary Aluminum Reduction Plants (R)
- Subpart T—Phosphate Fertilizer Industry; Wet Process Phosphoric Acid Plants (R)
- Subpart U—Phosphate Fertilizer Industry: Superphosphoric Acid Plants (R)
- Subpart V—Phosphate Fertilizer Industry: Diammonium Phosphate Plants (R)
- Subpart W—Phosphate Fertilizer Industry: Triple Superphosphate Plants (R)
- Subpart X—Phosphate Fertilizer Industry: Granular Triple Superphosphate Storage Facilities (R)
- Subpart Y—Coal Preparation Plants (R)
- Subpart Z—Ferroalloy Production Facilities (R)
- Subpart AA—Steel Plants: Electric Arc Furnaces (R)
- Subpart AAa—Steel Plants: Electric Arc Furnaces and Argon-Oxygen Decarbonization Vessels (R)
- Subpart BB—Kraft Pulp Mills (R)
- Subpart CC—Glass Manufacturing Plants (R)
- Subpart DD—Grain Elevators (R)
- Subpart GG—Stationary Gas Turbines (R) except § 60.333(b)(2) and § 60.335(f)(1)
- Subpart HH—Lime Manufacturing Plants (R)
- Subpart KK—Lead Acid Battery Manufacturing Plants (R)
- Subpart LL—Metallic Mineral Processing Plants (R)
- Subpart NN—Phosphate Rock Plants (R)
- Subpart PP—Ammonium Sulfate Manufacturing (R)
- Subpart TT—Metal Coil Surface Coating (R) except § 60.466(d)
- Subpart UU—Asphalt Processing and Asphalt Roofing Manufacturing (R) except § 60.474(g)
- Subpart VV—Equipment Leaks of Volatile Organic Compounds (R) except § 60.482-1(c)(2) and § 60.484
- Subpart XX—Bulk Gasoline Terminals (R) except § 60.502(e)(6)
- Subpart BBB—Rubber Tire Manufacturing Industry (R) except § 60.543(C)(2)(iii)(B)
- Subpart DDD—Polypropylene, Polyethylene, Polystyrene and Poly(ethyleneterephthalate) Manufacturing Industries except § 60.562-2(c)
- Subpart III—Volatile Organic Compound Emissions from the Synthetic, Organic, Chemical Manufacturing Industries (SOCMI), Air Oxidation process except § 60.613(e)
- Subpart LLL—Onshore Natural Gas Processing
- Subpart NNN—Volatile Organic Compound Emissions from Synthetic, Organic, Chemical Manufacturing Industries (SOCMI), Distillation Operations except § 60.663(e)
- Subpart OOO—Nonmetallic Mineral Processing Plants (R)
- Subpart PPP—Wool Fiberglass Installation Manufacturing Plants (R)
- Subpart SSS—Magnetic Tape Coating Facilities except § 60.711(a)(16), § 60.713(b)(1)(i), § 60.713(b)(1)(ii), § 60.713(b)(5)(i), § 60.713(d), § 60.715(a), and § 60.716
- Subpart TTT—Industrial Surface Coating (R) except § 60.743(a)(3)(v)(A) and (B), § 60.745(e), § 60.743(a), and § 60.746
- Subpart VVV—Polymeric Coating of Supporting Substrates Facilities

40 CFR Part 61

- Subpart J—Benzene Equipment Leaks (R) except (a)(B)(iii) and § 60.106(i)(12)
- Subpart L—Coke Byproduct Recovery Plants
- Subpart Y—Benzene Storage Vessels

After a thorough review of the Request, the Regional Administrator determined that such a delegation was appropriate for these source categories with the conditions set forth in the original delegation letter of May 25, 1977, and subsequent letters on February 20, 1986; January 28, 1987; September 30, 1987; May 31, 1989; and June 18, 1990.

Nashville/Davidson County sources under the requirements of the subparts listed above will not be under the jurisdiction of the Nashville/Davidson County Metropolitan Health Department.

ACTION: Since review of the pertinent Nashville/Davidson County Laws, Rules, and Regulations showed them to be adequate for the implementation and enforcement of the aforementioned categories of NSPS and NESHAPS, I delegated to the Nashville/Davidson County Metropolitan Health Department my authority for the source categories listed above on June 28, 1991.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

This notice is issued under the authority of sections 101, 110, 111, 112, and 301 of the Clean Air Act, as amended (42 U.S.C. 7401, 7410, 74121, 7412, and 7601).

List of Subjects in 40 CFR Parts 60 and 61

Air pollution control, Intergovernmental relations, Reporting and recordkeeping requirements.

Authority: Sections 111 and 112 of the Clean Air Act, as amended (42 U.S.C. 7411 and 7412).

Dated: December 9, 1991.

Patrick M. Tobin,

Acting Regional Administrator.

RIN 0938-AF49

Medicare Program; Payment for Customized Wheelchairs

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Interim final rule with comment period.

SUMMARY: Section 4152(c)(4)(B) of the Omnibus Budget Reconciliation Act of 1990 (Pub. L. 101-508) amended section 1834(a)(4) of the Social Security Act to provide that a wheelchair furnished on or after January 1, 1992 is treated as a customized item for payment purposes under part B of Medicare if it meets the definition provided in that paragraph, unless the Secretary develops specific criteria before January, 1, 1992, in which case the Secretary's criteria go into effect. This interim final rule with comment period sets forth the Secretary's criteria that a wheelchair must meet to be considered a customized item.

DATES: *Effective Date:* This final rule is effective on January 1, 1992.

Comment Date: Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on February 18, 1992.

ADDRESSES: Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BPD-730-IFC, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, DC 20201.

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

Due to staffing and resource limitations, we cannot accept audio, visual, or facsimile (FAX) copies of comments.

If comments concern information collection or recordkeeping requirements, please address a copy of comments to: Office of Management and Budget, Office of Information and Regulatory Affairs, Room 3001, New Executive Office Building, Washington, DC 20503, Attention: Allison Herron Eydt.

In commenting, please refer to file code BPD-730-IFC. Comments received timely will be available for public inspection as they are received, generally beginning approximately three weeks after publication of a document, in Room 309-G of the Department's offices at 200 Independence Ave., SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: (202) 245-7890).

FOR FURTHER INFORMATION CONTACT: William Long, (301) 966-5655.

SUPPLEMENTARY INFORMATION:

I. Background

A. Current and Prior Methods of Payment for Durable Medical Equipment

Prior to January 1, 1989, payment for durable medical equipment (DME) was made on the basis of reasonable charges. The reasonable charge was defined as the lowest of: (1) The actual charge for the item; (2) the customary charge; (3) the prevailing charge for the item in the locality; or (4) the inflation-indexed charge (IIC). Medicare carriers were also authorized by regulations at § 405.502(a)(7) to take into account any other factors that may have been relevant in determining the reasonable charge. Further, the charges a carrier deemed reasonable for Medicare payment purposes were not to exceed the comparable charges that were applicable to policyholders and subscribers under that carrier's own private insurance plan. In the case of expensive equipment, carriers were also required to determine whether it would be more economical to rent or purchase the equipment. In the case of customized equipment, payment was not based on customary and prevailing charges, but

VOL
56
ISS
245
DEC
20
1991
UMI

rather, on reasonable charge determinations made by carriers on an item-by-item basis.

Section 4062(b) of the Omnibus Budget Reconciliation Act of 1987 (Pub. L. 100–203) added section 1834 to the Act. Section 1834(a)(1)(B) of the Act limits Medicare payment for durable medical equipment (DME) to the lower of the actual charge for the item or the fee schedule amount effective January 1, 1989. Under sections 1834 (a)(2) through (a)(7) of the Act, equipment is classified into one of six classes for payment purposes: inexpensive or other routinely purchased DME; items requiring frequent and substantial servicing; customized items; prosthetics and orthotics; other expensive items of DME (capped rental); and oxygen and oxygen equipment. Payment for a piece of equipment is determined by the fee schedule for the class into which the piece of equipment falls. The methodology for computing fee schedules and for classifying equipment as belonging to a particular class is also provided for in sections 1834(a) (2) through (10) of the Act.

Under Section 1834(a)(4) of the Act, a lump sum payment for customized equipment continues to be based "upon the carrier's individual consideration" for the customized equipment. Before revision by section 4152(c)(4)(B) of the Omnibus Budget Reconciliation Act of 1990 (Pub. L. 101–508), enacted on November 5, 1990, section 1834(a)(4) of the Act defined customized equipment as equipment "* * * that is uniquely constructed or substantially modified to meet the specific needs of an individual patient, and for that reason cannot be grouped with similar items for purposes of payment. * * *"

B. New Legislation

Section 4152(c)(4)(B) of Public Law 101–508 amended section 1834(a)(4) of the Act of provide that a wheelchair furnished on or after January 1, 1992 is treated as a customized item only if it meets the definition added at the end of section 1834(a)(4) of the Act, that is, "* * * if the wheelchair has been measured, fitted, or adapted in consideration of the patient's body size, disability, period of need, or intended use, and has been assembled by a supplier or ordered from a manufacturer who makes available customized features, modifications, or components for wheelchairs that are intended for an individual patient's use in accordance with instructions from the patient's physician." However, under section 4152(c)(4)(B)(ii) of Public Law 101–508, if the Secretary develops specific criteria before January 1, 1992, the Secretary's criteria apply instead.

II. Provisions of This Interim Final Rule

Carriers have historically used a definition of customized wheelchair in making payment under the reasonable charge system. In deciding whether to incorporate that definition for purposes of the fee schedule payment methodology or to use the definition in section 1834(a)(4) of the Act for wheelchairs furnished after January 1, 1992, we considered the advantages and disadvantages connected with use of each definition:

A. Previous Reasonable Charge and Current Fee Schedule Definition of Customized Equipment

Under the first sentence of section 1834(a)(4) of the Act, we make lump-sum payments for certain items (including wheelchairs) that are uniquely constructed or substantially modified to meet the specific needs of an individual patient. Because of the unique aspects of these items, they cannot be grouped with similar items for purposes of Medicare payment. Payments are based on the carrier's individual consideration of the item. We used this definition of customized equipment before January 1, 1989, and we have continued to use it since the fee schedule methodology became effective on January 1, 1989. Congress' decision in 1987 not to revise the definition or the payment methodology for customized equipment but to continue to use the reasonable charge definition and payment methodology is explained in the House Committee Report (H.R. Rep. No. 391, 100th Cong., 1st Sess. 392 (1987)):

> Some items, consisting primarily of orthotics and prosthetics, must be tailor-made on an individual basis for each patient. They cannot be used by other patients. Consequently, these items should be purchased. Moreover, they may occasionally require some maintenance or servicing, beyond that covered by the manufacturer's or supplier's warranty, and it is appropriate for Medicare to pay these costs as well. However, because each item is unique, these are not easily classified within the existing procedure coding system used by the carriers to process claims. Carriers typically use special codes for this purpose and have to determine the proper payment amount individually for each item. This approach had been working in a reasonably satisfactory manner and would be preserved under the Committee bill.

We note that the basis (both before and after January 1, 1989) for determining whether equipment should be classified as customized was not only that it was tailor-made on an individual basis for each patient but, in addition, that the costs and charges for construction or modification varied widely from one patient to another for the same item. Certain items, while individually constructed (for example, a plaster or foam orthosis molded for a particular patient), may have standard costs and charges. These items can be identified using the HCFA Common Procedure Coding System (HCPCS) or the carrier's local coding system and grouped together for purposes of determining uniform payment. (The HCPCS is a coding system used to describe physician and non-physician services and supplies and is used by carriers for processing claims.) Under the reasonable charge methodology in effect prior to January 1, 1989, carriers calculated customary and prevailing charges in the ordinary way to pay for these items, rather than considering these items customized and making a payment determination on an individual basis. Under the payment methodology in the first sentence of section 1834(a)(4) of the Act, if an item is contained in the HCPCS or is locally coded, and the carrier has established customary and prevailing charges for the item, it is not subject to a carrier's individual consideration since the carrier has demonstrated that it can establish a valid charge screen for the item (that is, the item can be grouped with similar items for payment purposes).

B. Definition of Customized Wheelchair in the Second Sentence of Section 1834(a)(4) of the Act

It appears to us that many standard wheelchairs could fit the definition of customized equipment if the definition in the second sentence of section 1834(a)(4) of the Act were adopted. The first requirement, that "* * * the wheelchair has been measured, fitted, or adapted in consideration of the patient's body size, disability, period of need, or intended use * * *", would appear to apply to all wheelchairs. Even a person of average weight and height would be fitted to a standard size wheelchair (HCPCS code E1130) rather than fitted to a wide, heavy duty wheelchair (HCPCS code E1092). Therefore, a standard size wheelchair meets the first requirement in the section 1834(a)(4) of the Act definition. Similarly, under that definition, a standard amputee wheelchair (HCPCS code E1170) fitted in consideration of the patient's disability as an amputee also would meet the first statutory condition. With regard to the second requirement, that the wheelchair "* * * has been assembled by a supplier or ordered from a manufacturer who makes available customized features, modifications, or components for wheelchairs that are intended for an individual patient's use in accordance with instructions from the patient's physician", the definition in section 1834(a)(4) of the Act only requires that the wheelchair be "ordered from a manufacturer" who makes available customized features for an individual patient. It does not require that a specific wheelchair be customized to an individual patient's particular needs. Virtually all manufacturers make special features or modifications for wheelchairs available for a patient's use. Additionally, we do not believe that "off the shelf" special features or modifications, or components such as a brake extensive, would make the wheelchair a customized product any more than ordering a car with a heavy duty suspension or a larger engine would make the car a customized vehicle. However, we are interested in receiving comments offering suggestions for elaborating and more fully defining the terms "uniquely constructed" and "substantially modified."

C. Administration of Medicare

Although we considered the probable effects of adopting the definition of customized equipment in the second sentence of section 1834(a)(4) of the Act, we see no reason to change the long standing definition of customized wheelchairs. It has worked well. The HCPCS contains 43 different codes to categorize wheelchairs. In addition, we have long recognized, through additional payments, modifications in wheelchairs, such as attachments to convert a wheelchair to a one-arm drive, brake extensions, wheelchair hand rims, anti-tipping devices, adjustable-height detachable arms, reinforced seat upholstery, and safety belts, among others. Should a supplier furnish a wheelchair that cannot be defined by one of the 43 various codes available under the current system or cannot be defined by one of the 43 codes plus the existing codes for modifications, the pricing will be individually considered. HCFA is, in fact, in the process of considering modifications to the wheelchair codes in the HCPCS system, as well as developing utilization guidelines and policies (to be effective no earlier than 1993) which could have the effect of reducing the number of customized wheelchair claims that require individual carrier review.

We estimate that any departure from using the HCPCS system, such as subjecting all claims to an individual consideration, would result in a substantial increased medical equipment cost of $75 million dollars over 5 years, in substantial and unwarranted processing delays, and in an increased carrier workload and administrative cost of approximately $3.37 million over the next 5 fiscal years, because an individual consideration requires both a manual review of each claim and an individual payment determination. Increased individual considerations by carriers would also result in increased variability in payment allowances among carriers.

For these reasons, we will continue using the definition of customized wheelchairs that carriers have always used under the fee schedule payment methodology. Under this definition, customized wheelchairs must be uniquely constructed or substantially modified for a specific patient and, most importantly, be so sufficiently different from one another that they cannot be grouped together for pricing purposes.

As a result of our decision not to use the optional definition of customized wheelchairs in section 1834(a)(4) of the Act, we are adding a new § 414.224 to provide in regulations text a definition for "customized items" (including wheelchairs), based on our discussion above. In addition, this same section allows for a payment for the purchase of certain customized items based on the carrier's case-by-case determination.

We expect that this individual consideration will be a process under which the carrier makes its best judgment concerning the reasonableness of the payment amount. At a minimum, we expect carriers to consider such factors as written documentation on the costs of the item including at least the cost of labor and types of materials used in customizing an item.

III. Regulatory Impact Statement

A. Executive Order 12291

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any final rule that meets one of the E.O. critieria for a "major rule"; that is, that will be likely to result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-base enterprises in domestic or export markets.

The impact on the Medicare program and on DME distributors and manufacturers is expected to be less than $100 million per year over the next five fiscal years. For this reason, we have determined that a regulatory impact analysis meeting the requirements of E.O. 12291 is not required. Therefore, we have no prepared one.

B. Regulatory Flexibility Act

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a final rule will not have a significant economic impact on a substantial number of small entities.

The overall impact of this final rule on the DME industry is expected to be less than $100 million annually; and, in light of the nearly $4.0 billion in annual industry sales of DME, we believe this final rule will not have a significant impact on a substantial number of small entities. Thus, we have determined, and the Secretary certifies, that this final rule does not meet the criteria in the RFA for requiring a regulatory flexiblity analysis. Therefore, we have not prepared one.

Section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a final rule may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 604 of the RFA. Since we have determined, and the Secretary certifies, that this final rule will not have a significant economic impact on the operations of a substantial number of small rural hospitals, we have not prepared a rural hospital impact statement.

IV. Other Required Information

A. Waiver of Prior Public Comment Period and 30-Day Delay in the Effective Date

Because the Secretary is exercising discretion in implementing section 1834(a)(4) of the Act, ordinarily we would publish a notice of proposed rulemaking and afford a period for public comment. However, section 4207(j) of Public Law 101–508 provides that we may issue regulations on an interim final or other basis as may be necessary to implement the provisions of Public Law 101–508. Therefore, in accordance with section 4207(j) of Public Law 101–508, we find good cause to waive the notice of proposed rulemaking and to issue this final rule on an interim basis. We are providing a 60-day period

VOL 56 ISS 245 DEC 20 1991 UMI

for public comment as indicated at the beginning of this rule.

Because of the large number of items of correspondence we normally receive concerning regulations, we cannot acknowledge or respond to the comments individually. However, we will respond to any comments that we receive in the preamble of the final rule.

We also normally provide a delay of 30 days in the effective date for documents such as this. However, we can waive the delay in the effective date for good cause. We find good cause to waive the usual 30-day delay in this instance. The statutory effective date for the provisions included in this rule is January 1, 1992. Moreover, as explained above, it is essential that these provisions have immediate effect so that the long standing definition of customized wheelchairs will remain in effect without interruption. A 30-day delay in the effective date for this rule would cause the optional definition of customized wheelchiars in section 1834(a)(4) of the Act to go into effect on January 1, 1992, resulting in increased cost to the program, as discussed above, as well as administrative difficulties and confusion for suppliers and beneficiaries. Thus, a 30-day delay in the effective date would be contrary to the public interest. Therefore, we find good cause to waive the usual 30-day delay in effective date.

B. Paperwork Reduction Act

Regulations at § 414.224(b) contain information collection requirements that are subject to review by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3511). The information collection requirements concern the written documentation on the costs of customized items based on the carrier's individual consideration and judgment of a reasonable payment amount for each item. The respondents who will provide the information include suppliers and manufacturers. This data may also be obtained from wholesale price lists and other such sources of information. Public reporting burden for this collection of information is estimated to be less than 3 minutes per response for photocopying of invoices if the carrier does not already have written documentation, and less than 3 minutes for an estimate of the amount of labor needed to assemble the customized equipment. A document will be published in the **Federal Register** after approval is obtained. Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the OMB official whose name appears in the "**ADDRESSES**" section of this preamble.

CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES

SUBCHAPTER B—MEDICARE PROGRAM

PART 414—PAYMENT FOR PART B MEDICAL AND OTHER HEALTH SERVICES

1. The heading for part 414 is revised to read as set forth above.

2. The authority citation for part 414 continues to read as follows:

Authority: Secs. 1102, 1833(a), 1834(a), 1871, and 1881 of the Social Security Act (42 U.S.C. 1302, 1395l(a), 1395m(a), 1395hh, and 1395rr).

3. A new § 414.224 is added to subpart D to read as follows:

§ 414.224 Customized items.

(a) *Criteria for a customized item.* To be considered a customized item for payment purposes under paragraph (b) of this section, a covered item (including a wheelchair) must be uniquely constructed or substantially modified for a specific beneficiary and be so different from another item used for the same purpose that the two items cannot be grouped together for pricing purposes.

(b) *Payment rule.* Payment is made on a lump sum basis for the purchase of a customized item based on the carrier's individual consideration and judgment of a reasonable payment amount for each customized item. The carrier's individual consideration takes into account written documentation on the costs of the item including at least the cost of labor and materials used in customizing an item.

BILLING CODE 4120–01–M

FEDERAL MARITIME COMMISSION

46 CFR Part 550

[Docket No. 91–42]

Tariff Filing Notice Requirements; Domestic Offshore Trades; Exemption Under Section 35 of the Shipping Act, 1916

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: The Federal Maritime Commission amends its regulations governing the publishing, filing and posting of tariffs in domestic offshore commerce pursuant to the Shipping Act, 1916, as amended by the Intercoastal Shipping Act, 1933. This amendment of part 550 partially exempts carriers providing port-to-port service in the domestic offshore trades from the thirty-day notice requirements of 46 U.S.C. app. 844, for any new or amendatory tariff matter that does not increase the shipper's cost of transportation. Carriers may now file such tariff matter on one day's notice. Provisions of the Shipping Act and the Commission's regulations that pertain to any "general decrease in rates" are not affected by this amendment and carriers must continue to comply with those provisions.

DATES: This action is effective December 20, 1991.

FOR FURTHER INFORMATION CONTACT:

Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573, (202) 523–5740.

Bryant L. VanBrakle, Director, Bureau of Tariffs, Certification and Licensing, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573, (202) 523–5796.

SUPPLEMENTARY INFORMATION: Section 2 of the Intercoastal Shipping Act, 1933, 46 U.S.C. app. 844, requires ocean carriers providing port-to-port service in the domestic offshore trades to file on thirty days' notice any new or amendatory tariff matter, even if it decreases the shipper's cost of transportation. Ocean carriers operating in the foreign commerce of the United States are not subject to this restriction. Section 8 (d) of the Shipping Act of 1984, *id.* 1707, provides that a change in an existing rate that results in a decreased cost to the shipper may become effective upon filing. Moreover, domestic offshore water carriers filing joint-through rates with the Interstate Commerce Commission may file new or reduced rates on one day's notice (49 CFR 112.39(h)(1)).

The Federal Maritime Commission ("FMC" or "Commission") has granted several exemptions to the thirty-day notice requirement to permit carriers serving between the contiguous United States and Puerto Rico, the U.S. Virgin Islands, Alaska and Hawaii to compete with carriers that are not subject to that requirement. *Matson Navigation Co., Inc.—Application for Section 35 Exemption,* —— F.M.C. ——, 24 S.R.R. 1518 (1989); *Tariff Filing Periods—Exemption,* —— F.M.C. ——, 24 S.R.R. 1604 (1989); *Application of Sea-Land Service Inc. For Exemption Under Section 35 of the Shipping Act, 1916,* —— F.M.C. ——, 25 S.R.R. 660 (1990) and *Tropical Shipping & Construction Co. Ltd.—Application for Section 35 Exemption,* —— F.M.C. ——, 25 S.R.R. 1471 (1991); *Application of Trailer Marine Transport Corporation Under Section 35 of the Shipping Act, 1916,* —— F.M.C. ——, 25 S.R.R. 1660 (1991); *Puget Sound Tug & Barge Co.—Application for Section 35 Exemption: Hawaii and Alaska Trades,* No. 91–55 (F.M.C. Nov. 25, 1991).

The Commission believes that the exemptions referred to above have benefitted both shippers and carriers. Shippers benefit because carriers can respond more rapidly to their needs and desires; carriers benefit because they are able to move quickly to meet changes filed by competitors.

It appeared therefore appropriate to grant a general exemption for all carriers in the domestic offshore trades that would supersede the above exemptions and extend their provisions to all domestic offshore trades. To that end, the Commission by notice of October 9, 1991, 56 FR 50,841, proposed to amend its regulations governing the publishing, filing and posting of tariffs in domestic offshore commerce pursuant to section 35 of the Shipping Act, 1916 ("1916 Act"), 46 U.S.C. app. 833a,[1] to partially exempt carriers from the thirty-day requirement. The exemption would permit carriers in the FMC-regulated domestic offshore trades to publish on one day's notice any new or amendatory tariff matter, including rates, charges, regulations, rules and notices, that does not result in an increased cost to the shipper.

Three brief comments on the proposed rule were filed by Crowley Maritime Corporation, Matson Navigation Company, Inc., and Tropical Shipping & Construction Co., Ltd. The comments all supported the proposed rule and suggested no changes. The Commission concludes that the proposed rule meets the standards of section 35 of the 1916 Act, in that it will not substantially impair effective regulation, be unjustly discriminatory, or be detrimental to commerce. Accordingly, subject to the limitation described below, the Commission will adopt the exemption as a final rule.

Although the exemption will permit a carrier to make a change to a tariff rule, regulation or note that could affect a large number of rate items, a carrier may not use the exemption to institute a general decrease in rates on one day's notice.[2] The exemption does not apply to any of the provisions of the 1933 Act and the Commission's regulations that pertain to a general rate decrease. The 1933 Act includes a requirement that any such decrease be filed on sixty days' notice. Rule 67 of the Commission's Rules of Practice and Procedure requires the carrier to accompany any general decrease in rates with testimony and exhibits of such composition, scope and format that they will serve as the carrier's entire direct case in the event the matter is set down for hearing. This exemption does not relieve carriers from complying with those provisions.

Although the Commission, as an independent regulatory agency, is not subject to Executive Order 12291, dated February 17, 1981, it has nonetheless reviewed the rule in terms of this Order and has determined that this rule is not a "major rule" as defined in Executive Order 12291 because it will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovations, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Federal Maritime Commission certifies, pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), that this rule will not have a significant economic impact on a substantial number of small entities, including small businesses, small organizational units and small government jurisdictions.

List of Subjects in 46 CFR Part 550

Maritime carriers, Reporting and recordkeeping requirements.

Therefore, pursuant to 5 U.S.C. 553, sections 18, 35 and 43 of the Shipping Act, 1916, 46 U.S.C. app. 817, 833a and 841a, and section 2 of the Intercoastal Shipping Act, 1933, 46 U.S.C. app. 844, part 550 of title 46, Code of Federal Regulations, is amended as follows:

1. The authority citation for part 550 continues to read as follows:

Authority: 5 U.S.C. 553, 46 U.S.C. app. 812, 814, 815, 817, 820, 833a, 841a, 843, 844, 845, 845a, 845b, and 847.

2. Section 550.1 paragraph (b) is revised to read as follows:

§ 550.1 Exemptions.

(a) * * *

(b) Carriers engaged in the transportation by water of passengers or property on the high seas or the Great Lakes on regular routes from port to port between Alaska, Hawaii, a Territory, District of possession of the United States and any other State, Territory, District or possession of the United States, or between places in the same Territory, District, or possession, may publish on one day's notice any new or amendatory tariff matter that does not result in an increased cost to the shipper. This exemption shall not apply to any decrease which is part of a "general decrease in rates" as defined by section 1 of the Intercoastal Shipping Act, 1933, 46 U.S.C. app. 843.

§ 550.1 [Amended]

3. Section 550.1, paragraphs (c), (d), (e) and (f) are removed.

By the Commission.

Joseph C. Polking,

Secretary.

[FR Doc. 91–30375 Filed 12–19–91; 8:45 am]

BILLING CODE 6730–01–M

[1] Section 35 provides in pertinent part: The Federal Maritime Commission, upon application or on its own motion, may by order or rule exempt for the future any class of agreements between persons subject to this Act or any specified activity of such persons from any requirement of the Shipping Act, 1916, or Intercoastal Shipping Act, 1933, where it finds that such exemption will not substantially impair effective regulation by the Federal Maritime Commission, be unjustly discriminatory, or be detrimental to commerce.

[2] Section 1 of the 1933 Act, 46 U.S.C. app. 843, defines a "general decrease in rates" as:

* * * any change in rates, fares, or charges which will (A) result in a decrease in not less than 50 per centum of the total rate, fare, or charge items in the tariffs per trade of any common carrier by water in intercoastal commerce; and (B) directly result in a decrease in gross revenue of such carrier for the particular trade of not less than 3 per centum.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR 25

[CC Docket No. 90-219; FCC No. 91-388]

Routine Licensing of Large Networks of Small Antenna Earth Stations Operating in the 12/14 GHz Frequency Bands

AGENCY: Federal Communications Commission (FCC).

ACTION: Final rule.

SUMMARY: This report and order adopts certain revisions and additions to part 25 of the FCC's rules governing the power limitations on very small aperture terminals (VSATs). The Commission initiated this proceeding in the VSAT Notice, 5 FCC Rcd 2778 (1990), 55 FR 18918, May 7, 1990 to consider whether increases beyond the established VSAT power limits could be accommodated. In considering the issue, the Commission surmised that the best method of allowing increases beyond our VSAT power limits was through a mechanism that would also safeguard operations not exceeding our VSAT power limits. We also believed that codifying a VSAT power limitation would help to eliminate any confusion regarding the licensing of non-compliant stations and would increase Commission staff efficiency in processing these applications.

EFFECTIVE DATE: February 3, 1992.

FOR FURTHER INFORMATION CONTACT: Wilbert E. Nixon, Jr. at (202) 634-1624.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order in the Matter of Routine Licensing of Large Networks of Small Antenna Earth Stations Operating in the 12/14 GHz Frequency Bands, Common Carrier Docket No. 90-219, FCC No. 91-388, adopted November 21, 1991 and released December 17, 1991. The full text of this document is available for inspection and copying during normal business hours at the Public Reference Room at its headquarters, room 239, 1919 M Street NW., Washington, DC 20554. The complete text of this decision may also be purchased from the FCC's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., suite 140, Washington, DC 20037.

Public reporting burden for the collections of information is estimated to average 120 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of the collections of information, including suggestions for reducing the burden, to the Federal Communications Commission, Office of Managing Director, Paperwork Reduction Project (3060-0447), Washington, DC 20554 and to the Office of Management and Budget, Paperwork Reduction Project (3060-0447), Washington, DC 20503.

Summary of Report and Order

1. This report and order adopts certain modifications to part 25 of the Commission's rules governing the power limitations on very small aperture terminals (VSATs). A VSAT network consists of a large number of technically identical small fixed-satellite earth stations that meet specified technical requirements and communicate only with other earth stations in that network through a satellite operating in the 12/14 GHz frequency band. The Commission has approved the operation of many VSAT networks in various network configurations. The most commonly used configuration is the star network configuration in which small remote earth stations communicate among themselves and their central headquarters through a large hub earth station.

2. To avoid interference, particularly to users of adjacent fixed-satellites, the VSAT Order, 51 FR 15067 (April 22, 1986), established an equivalent isotropically radiated power (e.i.r.p.) density limit for digital VSAT inbound transmissions of −14.0 dBW/4 KHz and outbound transmissions of +6.0 dBW/4 KHz per carrier. The Declaratory Order, 2 FCC Rcd 2149 (1987), established an inbound uplink analog transmitter power density limit of −8.0 dBW/4 KHz with a bandwidth of 200 KHz into a 1.2 meter earth station antenna and a maximum outbound transmitted satellite carrier power density of +13.0 dBW/4 KHz. Typically, inbound transmissions entail the use of small remote earth stations transmitting into a larger hub earth station through a satellite. Outbound transmissions typically entail the use of a larger hub earth station transmitting to a smaller remote earth station through a satellite. Several applicants proposed to exceed these limits.

3. In order to accommodate these applicants and protect all other operators, we proposed in the VSAT Notice, among other things, to classify all VSAT station authorization applications in two categories. The first category contained applications for VSATs which are compliant with our current policies as enunciated in the VSAT Order and the Declaratory Order. The second category contained all other VSAT applications. We proposed that Category 2 applicants would be required to conduct the Sharp, Adjacent Satellite Interference Analysis (ASIA) or its equivalent to determine whether and to what degree their non-compliant operation would affect compliant Category 1 operations. As a further safeguard, we proposed that Category 2 applicants be required to provide proof that all potentially affected parties consent to the use of the applicant's higher power density. Also, Category 2 licensees would bear the burden of obtaining operational agreements with future Category 1 potentially affected parties as those parties brought their compliant systems into operation. We adopt the rules proposed in the VSAT Notice with some minor modifications.

Conclusion and Ordering Clauses

4. We take this action today to further streamline our VSAT application processing procedures and to make these procedures more efficient while maintaining adequate safeguards for established compliant operations.

5. Accordingly, pursuant to sections 151, 303 and 403 of the Communications Act, *It is ordered* That part 25 of chapter I of title 47 of the Code of Federal Regulations is amended as set forth below effective February 3, 1992.

6. *It is further ordered* That the Secretary shall cause this Report and Order to be published in the **Federal Register**.

7. *It is further ordered* That the proceedings in CC Docket No. 90-219 are terminated.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

Rule Changes

Part 25 of the Commission's Rules and Regulations (chapter I of title 47 of the Code of Federal Regulations) is amended as follows:

PART 25—SATELLITE COMMUNICATIONS

1. The authority citation for part 25 continues to read as follows:

Authority: Sections 25.101-25.531 issued under sec. 4, 48 stat. 1066, as amended; 47 U.S.C. 154. Interpret or apply secs. 101-404, 76 stat. 419-427; 47 U.S.C. 701-744.

2. A new § 25.134 is added to read as follows:

§ 25.134 Licensing Provisions of Very Small Aperture Terminal (VSAT) Networks.

(a) All applications for digital VSAT networks with maximum outbound downlink power densities of +6.0 dBW/4 kHz per carrier and maximum antenna input power densities of −14 dbw/4 kHz will be processed routinely pursuant to Declaratory Order in the Matter of Routine Licensing of Large Networks of Small Antenna Earth Stations Operating in the 12/14 GHz Frequency Bands, 51 FR 15067 (April 22, 1986) (VSAT Order). All applications for analog VSAT networks with maximum outbound downlink power densities of +13.0 dBW/4 kHz per carrier and maximum antenna input power densities of −8.0 dBW/4 kHz shall be processed routinely in accordance with Declaratory Order in the Matter of Routine Licensing of Earth Stations in the 6 GHz and 14 GHz Bands Using Antennas Less than 9 Meters and 5 Meters in Diameter, Respectively, for Both Full Transponder and Narrowband Transmissions, 2 FCC Rcd 2149 (1987) (Declaratory Order).

(b) Each applicant for digital and/or analog VSAT network authorization proposing to use transmitted satellite carrier power densities in excess of +6.0 dBW/4 kHz per carrier and +13.0 dBW/4 kHz, respectively, and/or maximum antenna input power densities of −14.0 dBW/4 kHz and −8.0 dBW/4 kHz, respectively, shall conduct an engineering analysis using the Sharp, Adjacent Satellite Interference Analysis (ASIA) program. Applicants shall submit a complete description of those baseline parameters they use in conducting their analysis and tabular summaries of the ASIA program's output detailing potential interference shortfalls. Applicants shall also submit a narrative summary which must indicate whether there are margin shortfalls in any of the current baseline services as a result of the addition of the new applicant's high power service, and if so, how the applicant intends to resolve those margin shortfalls. Applicants shall submit link budget analyses of the operations proposed along with a detailed written explanation of how each uplink and each transmitted satellite carrier density figure is derived. Applicants shall provide proof by affidavit that all potentially affected parties acknowledge and do not object to the use of the applicant's higher power density.

(c) Licensees authorized pursuant to paragraph (b) of this section shall bear the burden of coordinating with any future applicants or licensees whose proposed compliant VSAT operations, as defined by paragraph (a) of this section, is potentially or actually adversely affected by the operation of the non-compliant licensee. If no good faith agreement can be reached, however, the non-compliant licensee shall reduce its power density levels to those compliant with the VSAT Order or the Declaratory Order, whichever is applicable.

47 CFR Part 94

[General Docket No. 82-243]

Service and Technical Rules for Government and Non-Government Fixed Service Usage of the Frequency Bands 932-935 and 941-944 MHz

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule, 56 FR 63662 (December 5, 1991), that establishes the licensing procedure for the 932-932.5/941-941.5 MHz point-to-multipoint channels.

EFFECTIVE DATE: December 20, 1991.

FOR FURTHER INFORMATION CONTACT: Tom Mooring, 202-653-8114.

SUPPLEMENTARY INFORMATION: In FR Doc. 91-29098, published at 56 FR 63662 (December 5, 1991), the following corrections are made:

1. On page 63662, column 1, sentence 2 of the Summary is corrected to read: "The objective of this action is to facilitate Commission processing of the 932-932.5/941-941.5 MHz applications."

2. On page 63663, column 1, in the Rule Changes, the introductory text of III is corrected to read: "III. Part 94 of title 47 of the Code of Federal Regulations is amended as follows:"

[Docket No. 910660-1270]

United States-Canada Fisheries Enforcement Agreement

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of effective date.

SUMMARY: NMFS published a final rule at 56 FR 58184 on November 18, 1991, to implement an agreement between the United States and Canada in which each nation agrees to take appropriate measures to ensure that its nationals do not violate the fisheries laws of the other nation that apply within the other nation's waters. The rule was not made effective at that time, but indicated it would become effective when the United States and Canada exchanged notes.

On December 16, 1991, the United States and Canada exchanged diplomatic notes to bring the United States-Canada Fisheries Enforcement Agreement into force. Therefore, the final rule implementing the United States-Canada Fisheries Enforcement Agreement is made effective at 12:01 a.m., G.m.t., December 17, 1991.

EFFECTIVE DATE: The final rule published November 18, 1991 (56 FR 58184) is effective at 12:01 a.m., G.m.t., December 17, 1991.

FOR FURTHER INFORMATION CONTACT: John D. Kelly, Office of Fisheries Conservation and Management, (301) 427-2337.

BILLING CODE 3510-22-M

50 CFR Part 642

[Docket No. 910650-1218]

Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

VOL
56
ISS
245
DE
20
1991
UMI

SUMMARY: NMFS closes the commercial fishery in the exclusive economic zone (EEZ) for Spanish mackerel from the Atlantic migratory group. NMFS has determined that the commercial allocation for Atlantic group Spanish mackerel was reached on December 16, 1991. This closure is necessary to protect the overfished Atlantic Spanish mackerel resource.

EFFECTIVE DATES: Closure is effective on December 17, 1991, through March 31, 1992.

FOR FURTHER INFORMATION CONTACT: Mark F. Godcharles, 813–893–3161.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for Coastal Migratory Pelagic Resources of the Gulf of Mexico and the South Atlantic (FMP), as amended, was developed by the South Atlantic and Gulf of Mexico Fishery Management Councils (Councils) under authority of the Magnuson Fishery Conservation and Management Act, and is implemented by regulations at 50 CFR part 642. Catch limits recommended by the Councils and implemented by NMFS for the Atlantic migratory group of Spanish mackerel for the current fishing year (April 1, 1991, through March 31, 1992) set the commercial allocation at 3.50 million pounds.

Under § 642.22(a), NMFS is required to close any segment of the Spanish mackerel commercial fishery when its allocation has been reached, or is projected to be reached, by publishing a notice in the **Federal Register**. NMFS has determined that the commercial allocation of 3.50 million pounds for the Atlantic migratory group of Spanish mackerel was reached on December 16, 1991. Hence, the commercial fishery for Atlantic group Spanish mackerel is closed effective December 17, 1991, through March 31, 1992, the end of the fishing year. The closure applies in the EEZ from the Connecticut/New York border southward to a line extending directly east from the Dade/Monroe County, Florida boundary (25°20.4'N. latitude).

Except for a person aboard a charter vessel, during the closure, no person aboard a vessel permitted to fish under a commercial allocation may fish for, retain, or have in possession in the EEZ Spanish mackerel from the Atlantic migratory group. A person aboard a charter vessel may continue to fish for Spanish mackerel from the Atlantic migratory group under the bag limits set forth in § 642.28(a)(1)(iv), provided the vessel is under charter and the vessel has an annual charter vessel permit issued under § 642.4(a)(3). A charter vessel with a permit to fish on a commercial allocation is under charter when it carries a passenger who fishes for a fee or when there are more than three persons aboard, including operator and crew.

During the closure, Spanish mackerel from the Atlantic migratory group taken in the EEZ, including those harvested under the bag limit, may not be purchased, bartered, traded, or sold. This prohibition does not apply to trade in Spanish mackerel from the Atlantic migratory group that were harvested, landed, and bartered, traded, or sold prior to the closure and held in cold storage by a dealer or processor.

Other Matters

This action is required by 50 CFR 642.22(a) and complies with E.O. 12291.

RIN 1029–AB49

Abandoned Mine Land Reclamation Fund Reauthorization Implementation

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; extension of public comment period.

SUMMARY: In response to requests for more time to submit public comments, the Office of Surface Mining Reclamation and Enforcement (OSM) of the U.S. Department of the Interior (DOI) extends until February 21, 1992, the public comment period scheduled to close on January 7, 1992, on the proposed rule published in the November 8, 1991, **Federal Register** (56 FR 57376). The proposed rule amends the abandoned mine land regulations, 30 CFR subchapter R in light of recently enacted changes to title IV of the Surface Mining Control and Reclamation Act of 1977 (SMCRA) of 1977, Public Law 95–87, as amended by Public Law 101–508 (November 5, 1990).

DATES: Written Comments: OSM will accept written comments on the proposed rules until 5 p.m. Eastern Time, February 21, 1992.

Public Hearings: OSM will hold a public hearing on the proposed rules in Washington, DC, St. Louis, Missouri, and Denver, Colorado on February 19, 1992 at 9 a.m. local time. These hearings will supersede both the hearing request process and the January 6, 1992 hearing date as specified in the proposed rule notice of November 8, 1991.

ADDRESSES: Written Comments: Hand deliver to the Office of Surface Mining, Administrative Record, room 5131, 1100 L Street, NW., Washington, DC. Or mail to the Office of Surface Mining, Administrative Record, room 5131L, 1951 Constitution Avenue, Washington, DC 20240.

Public Hearings: Department of the Interior Auditorium, 18th and C Streets, NW., Washington, DC; 1520 Market Street, St. Louis, Missouri; and Brooks Towers, 2nd Floor Conference Room, 1020 15th Street, Denver, Colorado.

FOR FURTHER INFORMATION CONTACT: D.M. Lytton, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, DC 20240; Telephone: 202–208–5365 (Commercial) or 268–5365 (FTS).

SUPPLEMENTARY INFORMATION:

Written Comments

Written comments submitted on the proposed rule should be specific, should be confined to issues pertinent to the proposed rule, and should explain the reason for any recommended change. Where practical, commenters should submit three copies of their comments (see **ADDRESSES**). Comments received after the closer of the comment period (see **DATES**) may not be considered or included in the Administrative Record for the final rule.

Public Hearings

OSM will hold public hearings on the proposed rule. The time, dates, and addresses scheduled for hearings at three locations are specified in this notice (see **DATES** and **ADDRESSES**).

Any person interested in participating at a hearing at a particular location should inform Mr. Lytton (see **FOR FURTHER INFORMATION CONTACT**) either orally or in writing of the desired hearing location by 5 p.m. Eastern Time on January 21, 1992. If no one has contacted Mr. Lytton to express an interest in participating in a hearing at a given location by that date, the hearing will not be held. If only one person expresses an interest, a public meeting rather than a hearing may be held and the results included in the Administrative Record.

If a hearing is held, it will continue until all persons wishing to testify have been heard. To assist the transcriber and ensure an accurate record, OSM requests that persons who testify at a hearing give the transcriber a written copy of their testimony.

Availability of Copies

Copies of these proposed regulations may be obtained from the U.S. Department of the Interior, Administrative Record Room, 1100 L Street, NW., room 5131, Washington, DC 20240, Telephone 202–343–5492 or any of OSM's Field Offices.

Dated: December 16, 1991.

Brent Wahlquist,

Assistant Director, Reclamation and Regulatory Policy.

BILLING CODE 4310–05–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[IL10–1–5123; FRL–4085–6]

Approval and Promulgation of Implementation Plans; Illinois

AGENCY: Environmental Protection Agency (USEPA).

ACTION: Proposed rule.

SUMMARY: USEPA is proposing to approve a request by the State of Illinois to revise its State Implementation Plan (SIP) for sulfur dioxide (SO_2). This proposed revision would correct several defects in the SO_2 compliance determination methodology. USEPA today is proposing to approve this SIP revision because the compliance methodology meets USEPA policy requirements. The approval of this rule would allow USEPA to reinstate the 1.8 pounds SO_2 per million British Thermal Units (lbs SO_2/MMBTU) emission limit for combustion sources in the Chicago and East St. Louis metropolitan areas of Illinois.

USEPA's action is based on a revision request submitted by the State on February 8, 1991, to satisfy the requirements of the Clean Air Act (CAA).

DATES: Comments on this revision and on the proposed USEPA action must be received by January 21, 1992.

ADDRESSES: Copies of the SIP revision request and USEPA's analysis are available for inspection at the following address: (It is recommended that you telephone Mary Onischak at (312) 353–5954 before visiting the Region V Office.)

U.S. Environmental Protection Agency, Region V, Regulation Development Branch, 230 South Dearborn Street, Chicago, Illinois 60604.

Written comments should be sent to: Jay Bortzer, Chief, Regulation Development Section, Regulation Development Branch (5AR-26), U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Mary Onischak, Regulation Development Section (5AR-26), U.S. Environmental Protection Agency, Region V, Chicago, Illinois 60604, (312) 353-5954.

SUPPLEMENTARY INFORMATION: Section 110(a) of the CAA requires each State to submit to USEPA to a plan to provide for attainment and maintenance of the national ambient air quality standards (NAAQS) within the State. These SIPs are to provide attainment of the primary NAAQS as expeditiously as practicable, but in no case later than three years from the date of plan approval. These requirements have been adopted in 40 CFR part 51, subpart F.

On February 8, 1991, the Illinois Environmental Protection Agency submitted amendments to 35 Illinois Administrative Code (IAC) 214 (sulfur limitations) to USEPA as a revision to the Illinois SIP §§ 214.101 and 214.104). The purpose of this revision is to correct several defects in the SO_2 compliance test methodology. These defects include the lack of a short-term test method, the lack of independent compliance measurements, and the inclusion of "director's discretion" in the SIP.

I. Background/History

USEPA approved the Illinois SO_2 plan on May 31, 1972, (37 FR 10862). The plan included a compliance test methodology which allows most sources to demonstrate compliance with their emission limits through either a stack test or a 2 month average of the sulfur content of their fuel supply. USEPA's policy guidance on compliance testing has gradually evolved since the time Illinois' SO_2 plan was approved. Illinois had not, however, been required by notice of SIP deficiency to update its compliance test methodology.

On September 28, 1978, the Illinois Appellate Court vacated most of the rules in the SO_2 SIP on procedural grounds (*Illinois Chemical Company* v. *PCB, No. 77382 Ill App 3d.*) The compliance test methodology was not among the vacated rules. USEPA issued Illinois a notice of SIP deficiency on July 12, 1979, (44 FR 40723), which ordered the State to submit SIP revisions to replace the vacated SO_2 rules. In 1985 and 1986, the State submitted several SIP revision packages. However, in reviewing these rule packages, USEPA found that the current compliance test methodology would not suffice to enforce the new rules or the NAAQs. USEPA cannot approve SIP revisions which rely on unsatisfactory compliance methods. USEPA then informed Illinois that their new SO_2 rule submittals could not be federally approved until the compliance methodology was updated to meet current policy guidance. In order to comply with the requirements of the July 12, 1979, notice of SIP deficiency, therefore, the State of Illinois had to replace the vacated SO_2 rules and amend the compliance test methodology. This SIP revision was submitted on February 8, 1991, to correct the deficiencies in the current compliance test methodology.

II. SIP Defects Corrected by this Submittal

Short-term Compliance Method Requirements

SIPs must prescribe methods of compliance which can ensure that the short-term NAAQS are not exceeded. The present Illinois SO_2 plan allows sources to demonstrate compliance with their emission limits through 2 month averaging of fuel samples, notwithstanding the existence of stack test results demonstrating noncompliance. Two month fuel averaging cannot ensure attainment and maintenance of the 3 hour and 24 hour SO_2 standards. A July 29, 1987, policy memorandum from the Director of the Office of Air Quality Planning and Standards (OAQPS) to the USEPA Regional Air Division Directors stated that in order to be approvable, SIPs must contain provisions for a stack gas compliance test, and USEPA accepts Method 6 (40 CFR 60, appendix A) stack gas testing as a compliance method for SO_2. Illinois' February 8, 1991, submittal, which specifies stack test Methods 6, 6A, 6B, 6C, and any method established by 40 CFR 60.8, for determining compliance, satisfies this requirement. Furthermore, under 35 IAC 201.282, Illinois can order any source to conduct such stack testing. Stack testing can demonstrate maintenance of the short-term SO_2 standards. Occasional stack testing does not ensure that a source will be in compliance with the NAAQS at all times. Through State rule correction efforts, USEPA is currently working to require all sources to show continuous compliance. In the interim, however, USEPA is proposing to approve Illinois' February 8, 1991, submittal.

Compliance Method Independence

The current SIP implies that results of 2 month fuel averaging which indicate compliance with emission limit requirements may refute a finding of noncompliance by stack gas testing. This is unacceptable, as it could allow a source to exceed its emission limits for short time periods without penalty. As already noted, 2 month fuel supply averaging cannot ensure the protection of the 3 hour primary or 24 hour secondary SO_2 standards. The 1991 submittal states that neither method may refute the other for the determination of noncompliance.

On October 27, 1987, USEPA testified before the IPCB regarding Illinois' compliance test methodology. USEPA recommended that IPCB adopt the proposed compliance test method, which was subsequently submitted to USEPA on February 8, 1991.

On January 19, 1988, USEPA approved a similar compliance test methodology submitted by the State of Indiana. (See 53 FR 1354.) An earlier SIP submittal by Indiana had been disapproved by USEPA because the submittal contained a 30-day fuel quality averaging compliance method which could be used to refute stack test evidence of noncompliance. The subsequently revised Indiana rule included stack testing as an independently enforceable compliance method. Illinois' February 8, 1991, submittal specifies a federally enforceable short-term method of determining compliance, and holds that findings of noncompliance with one compliance method may not be refuted by findings of compliance through the use of other compliance methods.

Director's Discretion

The current SIP allows the Director of the Illinois Environmental Protection Agency to determine other methods of stack gas testing without submitting these methods to USEPA as revisions to the SIP. SIPs which allow "director's discretion" are not approvable by USEPA today. The February 8, 1991, submittal does not allow director's discretion.

III. Relationship to Emission Limits of Rural Illinois SO_2 Sources

There are thirteen sources in rural Illinois that have approved plantwide pounds per hour (lb/hr) SO_2 emission limits, which are coupled with the compliance test methodology in the current SIP. Current USEPA guidance states that compliance test methods must show plantwide compliance with the SO_2 ambient standards, and sources with plantwide "bubbles" must be a better method of determining compliance than stack tests. However, the plantwide lb/hr SO_2 emission limits, rather than the compliance methods specified, are the underlying problem with the Illinois SIP, as it pertains to the thirteen rural SO_2 sources. Compliance with a lb/hr emission limit does not ensure compliance with the standards. A company with a lb/hr limit may use high-sulfur fuel to run plant processes at below-normal capacity. While the facility would be in compliance with its emission limit, the decrease in pollutant plume rise from the lowered operating volume could reduce dispersion and cause NAAQS violations near the plant. Thus, neither a simple stack test nor a continuous emission monitor would ensure protection of the standards at facilities with lb/hr emission limits. USEPA will soon request that Illinois revise the lb/hr limits by incorporating pounds SO_2 per million British Thermal Units (lb/MMBTU) emission limits as well, as discussed below.

IV. Proposed Rulemaking Action and Solicitation of Comments

USEPA proposes to approve the incorporation of 35 IAC §§ 214.101 and 214.104 into the Illinois SIP. This revision meets USEPA policy requirements and satisfactorily corrects several defects in Illinois' SIP, including the lack of a short-term compliance test method, the test methods' ability to refute other noncompliance findings, and the provision for director's discretion.

It is noted that in a May 31, 1991, memorandum entitled "SO_2 Nonattainment Area SIP Guidance: Final Staff Work Product," from John Calcagni, Director, Air Quality Management Division, OAQPS, to the Regional Air Directors, it is stated that all future SO_2 nonattainment area SIPs should specify continuous emission monitoring (CEM) for determining compliance. However, current USEPA policy holds that method involving stack gas tests are acceptable to USEPA. Therefore, USEPA is proposing to approve Illinois' SIP revision. This approval does not insulate Illinois from future compliance policy requirements. Titles I, IV, and V of the 1990 Clean Air Act Amendments will effect changes in the implementation of the SO_2 NAAQS program. In order for all three titles to be carried out as efficiently as possible, USEPA is requiring States nationwide to correct existing enforceability deficiencies in the SIPs. USEPA released the "Yellow Book" in June 1991, which discussed various types of enforcement deficiencies. There are "Yellow Book" deficiencies in the approval portions of the Illinois SO_2 rules; however, these deficiencies will be corrected as part of the upcoming national process to rectify these types of enforceability deficiencies. The State of Illinois was notified by USEPA on June 28, 1991, of the enforceability deficiencies in the SIP and was asked to submit a schedule for correcting them and submitting the corrections as a revision of the SIP.

Public comment is solicited on the proposed SIP revision and USEPA's proposed rulemaking action. Comments received by the date indicated above will be considered in the development of USEPA's final rulemaking action.

The Agency has reviewed this request for revision of the federally approved SIP for conformance with the provisions of the Clean Air Act Amendments enacted on November 15, 1990.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Acid Rain Program: Announcement of Open Meeting on Acid Rain Program Forms

AGENCY: U.S. Environmental Protection Agency (EPA), Office of Air and Radiation (OAR).

ACTION: Proposed rules; forms workshop.

SUMMARY: On December 3, 1991, the EPA published the proposed Acid Rain Program "core" rules pursuant to title IV of the Clean Air Act Amendments of 1990, announcing its intent to conduct public hearings in Washington, DC, San Francisco, CA, and Chicago, Ill. the week of January 6, 1992. (56 FR 63001-63351, Tuesday, December 3, 1991). EPA is adding one additional public meeting in Washington on January 8, 1992, for the sole purpose of reviewing and receiving public comments on the proposed Acid Rain Program standardized forms. The workshop will be a working session for input by the public at large, and in particular will give the regulated community an opportunity to discuss their comments and concerns in detail.

The forms to be discussed include the Acid Rain permit application and compliance plan forms, Acid Rain monitoring plan and emissions monitoring report formats, as well as Acid Rain allowance transfer and new account/new authorized account representative forms. Use of these standardized forms will be required in both Phase I and Phase II of the Acid Rain program in order to ensure national consistency in the program and streamlined processing. Meeting participants should focus their comments on form quality, including identification of inconsistencies between the forms and requirements in the proposed "core" rules, redundancies, and ambiguities in terminology or instructions. EPA urges members of the public to review the forms in advance of the meeting, and to submit completed forms (using real or hypothetical information), with their written comments to the appropriate EPA Air Dockets (*see* references below). These submissions will help EPA assess paperwork burdens, and provide EPA with concrete examples to use for further development of the forms and form completion instructions.

Public comments regarding the substantive provisions of the Acid Rain "core" rules are beyond the scope of the forms meeting, and should be made separately at the public hearings or submitted to the appropriate EPA Air Dockets announced in the Federal Register notice of the "core" rules package on December 3, 1991.

DATES: Notice is hereby given that the Environmental Protection Agency will hold an open meeting to discuss Acid Rain program standard forms, from 8:30 a.m. to 5 p.m. on January 8, 1992.

ADDRESSES: The Acid Rain forms public meeting will be held at the Sheraton Crystal City Hotel, 1800 Jefferson Davis Highway, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Brian McLean, Director, Acid Rain Division (ANR-445), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460 (617) 641-5377.

SUPPLEMENTARY INFORMATION:

Documents: The proposed Acid Rain forms are included in the proposed Acid Rain "core" rules package proposed on Tuesday, December 3, 1991 (56 FR 63001–63351). They are also publicly available for viewing in EPA Air Dockets Number "A–90–38" (Permits Rule), "A–91–43" (Allowance System rule), "A–90–51" (Continuous Emissions Monitoring rule), and "A–91–51" (Continuous Emissions Monitoring rule), and "A–91–68" (Excess Emission rule), in room 1500 of EPA headquarters, 401 M St. SW., Washington, DC. Hours for inspection of the Dockets are 8:30 a.m. to 12 noon and 1:30 p.m. to 3:30 p.m., Monday through Friday. Additional copies of the forms will be available in limited numbers at the public meeting along with a more detailed meeting agenda.

Registration Anyone wishing to present oral comments on the Acid Rain forms and participate in the forms meeting must register not later than January 3, 1991, by calling Gayle Kline at (703) 671–0400. Only limited seating will be available for persons who have not pre-registered, and seats will be provided on a first-come, first-served basis. Oral presentations will be limited to 10 minutes, and will be followed by a roundtable discussion.

Dated: December 13, 1991.

Eileen B. Clausen,

Director, Office of Atmospheric and Indoor Air Programs, Office of Air and Radiation.

FEDERAL MARITIME COMMISSION

46 CFR Part 514

[Docket No. 90–23]

Tariffs and Service Contracts

AGENCY: Federal Maritime Commission.

ACTION: Proposed rule; extension of time for comments.

SUMMARY: On September 9, 1991, the Federal Maritime Commission published (56 FR 46044) a Proposed Rule (new 46 CFR part 514) which solicited public comment omits proposal for implemention of the Automated Tariff Filing and Information System ("ATFI"). Time for filing comments to the proposed rule was extended to November 8, 1991, for that portion of the proposed rule concerning user charges, proposed § 514.21, and to December 16 with respect to the remainder of the proposed rule (56 FR 55860, October 30, 1991). On December 2, 1991, the Commission published (56 FR 61184) a final rule establishing certain user charges. Twelve conferences have now requested a 14 day extension of time for filing comments to the remainder of the proposed rule. The conferences cite the length and complexity of the proposed rule, a recent need to retain new consultants, and the timing of a meeting scheduled to make final decisions for the conferences. The Commission has determined to grant the conferences' request and extend the comment period to December 30, 1991.

DATES: Comments (original and fifteen copies) due on or before December 30, 1991.

ADDRESSES: Send comments to: Joseph C. Polking, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573–0001, (202) 523–5725.

FOR FURTHER INFORMATION CONTACT: John Robert Ewers, Deputy Managing Director, Federal Maritime Commission, 1100 L Street , NW., Washington DC 20573–0001, (202) 523–5800.

By the Commission.

Joseph C. Polking,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 91–348; FCC 91–385]

FM Table of Allotments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This Notice of Proposed Rulemaking was initiated to explore changes in the Commission's procedures governing conflicts between rulemaking petitions to amend the FM Table of Allotments and applications for new or modified FM facilities. Currently, there are policies and rules specifying "cut-off" dates with respect to mutually exclusive petitions for rulemaking and with respect to mutually exclusive applications, but none with respect to conflicts between petitions and applications. This approach has often permitted subsequently-filed rulemaking petitions to delay the processing of pending applications. The Commission seeks comment on whether it now imposes undue expense to applicants and costs to the public in delay of service.

DATES: Comments are due by January 22, 1992, and reply comments are due by February 6, 1992.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Beverly McKittrick, Mass Media Bureau, Policy and Rules Division, (202) 632–5414.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rulemaking in MM Docket No. 91–348, FCC 91–385, adopted November 21, 1991, and released December 16, 1991. The complete text of the Notice of Proposed Rulemaking is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC, and also may be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452–1422, 1114 21st Street, NW., Washington, DC.

Synopsis of Notice of Proposed Rulemaking

1. In this Notice of Proposed Rulemaking, the Commission seeks comment on a number of proposals regarding conflicts between rulemaking petitions to amend the FM Table of Allotments and applications for new or modified FM facilities. Currently, the Commission has policies and rules specifying "cut-off" dates with respect to mutually exclusive petitions for rulemaking and with respect to mutually exclusive applications, but none with respect to conflicts between petitions and applications.

2. The Commission proposes to use the deadline for filing petitions to deny against new and major change FM applications as the cut-off point for rulemaking petitions that conflict with those applications. The Commission seeks comment on this proposal and on whether an earlier cut-off point, such as the close of the filing window or the end of the amendment as of right period, would be preferable. The Commission also proposes to retain cut-off protection for applications that are dismissed until the dismissal is no longer subject to Commission review.

3. For minor change applications, the Commission also proposes to use as the cut-off point for the filing of conflicting petitions a date 30 days after acceptance of the application, unless the application is earlier granted. Finally, the Commission seeks comment on whether the criteria developed in Revision of FM Assignment Policies and Procedures should be applicable in determining whether an application

receives cut-off protection. For example, should the Commission decline to extend cut-off protection to an application for an upgrade against a petition that would provide a first local aural transmission service for a community? The Commission's initial conclusion is that no distinction should be made among various types of applications or petitions. The equities appear to be the same on the applicant's side, *i.e.* investment of time and money in pursuing the application, whether the applicant is seeking a new allotment or an upgrade. The Commission also tentatively concludes that adjudication of whether a particular petition falls within any exception the Commission might adopt would so complicate the administration of a cut-off rule as to obviate the benefits of adopting any such rule. Commenters who disagree should indicate what distinctions the Commission should make and the justifications therefor.

4. Finally, the Commission proposes to make any procedural change effective 30 days after publication in the **Federal Register.** Rulemaking petitions already filed, or filed within 30 days after publication in the **Federal Register** of any rule changes in this proceeding, would be handled under the current procedure. The Commission believes that this 30-day period would provide adequate notice to potential petitioners for new allotments or upgrades while expediting the benefits to the public of any new procedure. The Commission seeks comment on this tentative conclusion.

Initial Regulatory Flexibility Statement

I. Reason for the Action

5. This review is initiated to consider whether it is advisable to adopt new procedures governing conflicts between rulemaking petitions to amend the FM Table of Allotments and applications for new or changed FM facilities.

II. Objectives of the Action

6. The objective of this proceeding is to ensure that such conflicts are settled with minimal expense for applicants and minimal delay in new or improved service to the public.

III. Legal Basis

7. Authority for this action may be found in 47 U.S.C. 154 and 303.

IV. Reporting, Recordkeeping and Other Compliance Requirements

8. Such requirements will vary according to the actions that are adopted as a result of the record established in response to this Notice of Proposed Rulemaking.

V. Federal Rules Which Overlap, Duplicate or Conflict With These Rules

9. There are no rules which would overlap, duplicate or conflict with these rules.

IV. Description, Potential Impact and Number of Small Entities Involved

10. There are a number of radio licensees and potential applicants who would be affected by this proceeding.

VII. Any Significant Alternatives Minimizing the Impact on Small Entities Consistent With Stated Objectives

11. In initiating this review of our procedures for settling FM application/petitions for rulemaking disputes, it is intended to reduce the expense and delay that FM applicants now face when conflicting petitions for rulemaking are filed. We seek to minimize the possibility for such conflicts through our proposal to adopt a cut-off point for later-filed conflicting petitions and to retain cut-off protection for applications that are dismissed until the dismissal is final. Although the Commission tentatively finds that the current procedures are no longer the best procedures, the Notice of Proposed Rulemaking invites comments on the validity of this conclusion and on alternative methods for resolving such disputes.

12. The Secretary shall send a copy of this Notice of Proposed Rulemaking, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act (Pub. L. No. 96–354, 94 Stat. 1164, 5 U.S.C. 601 *et seq.* (1981).

Ex Parte Consideration

13. This is a non-restricted notice and comment rulemaking proceeding. *Ex parte* presentations are permitted, except during the Sunshine Agenda period, provided they are disclosed as provided in Commission rules. *See generally* 47 CFR 1.1202, 1.1203, and 1.1206(a).

Comment Information

14. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before January 22, 1992, and reply comments on or before February 6, 1992. To file formally in this proceeding, you must file an original and five copies of all comments, replay comments, and supporting comments. If you want each Commissioner to receive a personal copy of your comment, you must file an original plus nine copies. You should send comments and reply comments to Office of the Secretary, Federal Communications Commission, Washington, DC 20554. Comments and reply comments will be available for public inspection during regular business hours in the Dockets Reference Room of the Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

15. Authority for this action is contained in sections 4(i) and 303 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Amendatory Text

It is proposed to amend part 73 of title 47 of the Code of Federal Regulations as follows:

1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154 and 303.

2. Section 73.208 is amended by revising paragraph (a)(1) and adding a new paragraph (a)(3) to read as follows:

§ 73.208 Reference points and distance computations.

(a)(1) The following reference points must be used to determine distance separation requirements when petitions to amend the Table of Allotments (§ 73.202(b)) are considered:

(i) First, transmitter sites if authorized, or if proposed in applications with cut-off protection pursuant to paragraph (a)(3) of this section;

(ii) Second, reference coordinates designated by the FCC;

(iii) Third, coordinates listed in the United States Department of Interior publication entitled Index to the National Atlas of the United States of America; or

(iv) Last, coordinates of the main post office.

(The community's reference points for which the petition is submitted will normally be the coordinates listed in the above publication.)

* * * * *

(3) Petitions to amend the Table of Allotments that do not meet minimum distance separation requirements to transmitter sites specified in applications will not be considered unless they are filed before:

(i) The deadline for filing Petitions to Deny the application, if the application is for a new facility or major change; or

VOL 56 ISS 245 DEC 20 1991 UMI

(ii) 30 days after acceptance or grant of the application, whichever occurs earlier, if the application is for a minor modification.

* * * * *

Federal Communications Commission.
Donna R. Searcy,
Secretary.

BILLING CODE 6712-01-M

DEPARTMENT OF DEFENSE

Defense Logistics Agency

48 CFR Parts 5446 and 5452

DLA Acquisition Regulation; Statistical Process Control

AGENCY: Defense Logistics Agency, DOD.

ACTION: Proposed rule and request for comments.

SUMMARY: The Defense Logistics Agency (DLA) proposes to establish a new 48 CFR chapter 54 to contain Defense Logistics Agency acquisition regulations. New parts 5446 and 5452 provide regulatory coverage on the use of Statistical Process Control (SPC) in select contracts. Comments are hereby requested on the proposed coverage which supplements the contract quality requirements of the Federal Acquisition Regulation (FAR) and the Defense FAR Supplement (DFARS) by adding prescriptive language and a contract clause to satisfy the specific needs of DLA. It is required in order to standardize the use of SPC as a quality control tool by the various supply centers in DLA. The primary objective of the coverage, when required, is to encourage the use of SPC as an integral part of a total quality production initiative at contractor facilities aimed at controlling the manufacturing process to assure consistent production of conforming material. The proposed coverage is being published in the **Federal Register** because it is expected to have an effect beyond the internal operating procedures of DLA and, in some cases, a significant cost and administrative impact on contractors, when required.

DATES: Comments should be submitted to the address shown below on or before January 21, 1992, to be considered in the formulation of a final rule.

ADDRESSES: Interested parties should submit written comments to: Defense Logistics Agency, Directorate of Contracting, Policy Branch (DLA-PPR), ATTN: Ms. Ynette Shelkin, Cameron Station, Alexandria, VA 22304-6100.

FOR FURTHER INFORMATION CONTACT: Ms. Ynette Shelkin, Defense Logistics Agency, DLA-PPR (703) 274-6431.

SUPPLEMENTARY INFORMATION:

A. Background

DLA is committed to achieving productivity and quality improvements in the materials it purchases to equip and support its military customers. In the past, DLA relied on end-item inspection to assess the quality of the products it purchased. Now, however, emphasis is being placed on controlling quality in the early stages of product manufacture. SPC is a widely recognized technique that provides for continuous quality assessment and improvement by focusing on the manufacturing process rather than the end-product. Under SPC, contractors periodically monitor their processes by selectively measuring characteristics to determine which processes, if any, should be adjusted so that corrective action can be taken before defects in end-products are produced. This represents a shift away from reliance on detecting defects during end-item inspection to an effective process control that prevents defects during the manufacturing process—part of a continuous quality improvement concept; however, neither the FAR nor the DFARS currently contains regulatory coverage on SPC. The proposed coverage will be included in DLAR 4105.1, which implements and supplements the FAR, the DFARS, and other DOD publications and, pursuant to FAR 1.304, establishes DLA procedures relating to the acquisition of supplies and services under the authority of 10 U.S.C. 137. The supplementary coverage, which includes a new clause, is designed to give contracting officers an effective tool to improve quality when there is a need to control manufacturing operations, processes, characteristics and/or parameters using statistical techniques. The proposed rule will be submitted to the Director of Defense Procurement (DDP) for approval following receipt of public comments in accordance with the Deputy Assistant Secretary of Defense (Procurement) (now DDP) memorandum of 15 September 1989 which states, in part, that "* * * Military Departments and Defense Agencies must submit regulations developed on or after July 22, 1989 directly [to DDP] for approval prior to their becoming effective. This requirement applies to all procurement policies, regulations, procedures, clauses, or forms that have any effect beyond the internal operating procedures of the agency or have a significant impact on contractors or offerors * * *."

B. Regulatory Flexibility Act

The proposed addition of 48 CFR parts 5446 and 5452 may have a significant economic impact on a substantial number of small businesses within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, because of the additional time and cost involved initially for a contractor to implement an acceptable SPC plan. An Initial Regulatory Flexibility Act (IRFA) Statement has been prepared and is on file at the Defense Logistics Agency, Directorate of Contracting, Policy Branch (DLA-PPR), Cameron Station, Alexandria, VA 22304-6100. In summary, the proposed coverage is required in order to standardize the use of SPC by the various supply centers in DLA. The proposed rule is expected to impact on those small businesses that receive awards for which there is a need to require control of manufacturing operations and processes using statistical techniques, and that are implementing such techniques for the first time. A copy of the IRFA has been submitted to the DLA Defense Acquisition Regulatory (DAR) Council Legal Member. Copies may also be obtained by contacting Ms. Ynette Shelkin at (703) 274-6431. Comments are invited. Comments from small businesses concerning the proposed DLAR coverage will be considered in accordance with section 610 of the Act. Such comments must be submitted separately and cite DLAR Parts 5446 and 5452—Statistical Process Control (SPC) in correspondence.

C. Paperwork Reduction Act

The proposed rule does not impose any reporting or recordkeeping requirements which require the approval of OMB under 44 U.S.C. 3501 *et seq.* and, as such, the Paperwork Reduction Act does not apply.

List of Subjects in 48 CFR Parts 5446 and 5452

Government procurement.

Therefore, it is proposed that 48 CFR chapter 54, consisting of parts 5446 and 5452, be added to read as follows:

Chapter 54—Defense Logistics Agency, Department of Defense

PART 5446—QUALITY ASSURANCE

PART 5452—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

PART 5446—QUALITY ASSURANCE

Authority: 10 U.S.C. 137, FAR subpart 1.3 and DFARS subpart 201.3.

5446.202-90 Statistical process control.

Use the clause at 5452.246-9002, or a similar version, in solicitations and contracts when there is a need to control manufacturing operations, processes, characteristics and/or parameters using statistical techniques.

PART 5452—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Authority: 10 U.S.C. 137, FAR subpart 1.3 and DFARS subpart 201.3

Subpart 5452.2—Texts of Provisions and Clauses

5452.246-9002 Statistical Process Control (SPC).

As prescribed in 5446.202-90, insert the following clause:

Statistical Process Control (SPC) (XXX 1991)

In addition to the quality requirements cited in this contract, the contractor shall manage and improve process performance through the evaluation of the quality of the product at the prime contractor and/or subcontractor/vendor facilities, using Statistical Process Control (SPC) techniques. Minimum criteria are established in the American National Standards Institute (ANSI) Z1.1, Z1.2 and Z1.3 or American Society of Quality Control (ASQC) B.1, B.2, and B.3 documents. The use of alternate SPC techniques will be allowed only after information substantiating their adequacy for the particular product/process involved has been forwarded to, and determined to be acceptable by the cognizant Contract Administration Office (CAO). This review and determination of acceptability must be completed prior to implementation of the proposed alternative SPC techniques.

The contractor shall identify the characteristics that it has selected to be controlled through the application of SPC control techniques to the CAO Government Representative for a determination of acceptability prior to the initiation of First Article or normal production. The characteristics requiring control will be those providing the greatest assurance of product conformance to contract requirements. These will be determined through the review of previous production/inspection records and analysis of the processes involved. In addition to the characteristics identified by the contractor, the following Contracting Office designated characteristics will be subjected to SPC control techniques:

_____

_____

_____

Any changes to the initial group of characteristics being controlled through SPC (either contractor or Government designated) will be identified to the CAO Government Representative in writing for review and a determination of acceptability. Proposed changes to Contracting Office designated characteristics will not be implemented until written approval has been received from the Contracting Officer.

A documented plan implementing SPC techniques shall be prepared by the contractor. This plan must be available for review by the Government prior to initiation of First Article or normal production and shall identify as a minimum: Operations where SPC will be implemented; SPC methods to be applied; process capability studies to be completed; methods for control of vendor quality; the sample size and frequency of measurements; the criteria to be used for modifying sample size and frequency of measurements; the audit procedures used to validate the accuracy, adequacy, and interpretation of control charts; training and qualification requirements for personnel involved in SPC; criteria for determining an out-of-control condition; identification of the responsibility for performing measurements and corrective actions; general policy for applying SPC along with goals and commitments regarding SPC; documents and records utilized in the SPC program; and the corrective action procedures to be used and actions to be taken upon statistical signal or an out-of-tolerance condition. This plan is subject to disapproval by the Government following a determination that it lacks the capability to provide control of contract requirements.

All documents/records required by the SPC plan shall be maintained current and be made available for Government review at any time throughout the life of the contract and for five years after final delivery on the contract.

When processes reach a state of statistical control and the product conforms completely to contract requirements, the contractor may request to the Procuring Contracting Officer (PCO), through the CAO, that the contract/specification acceptance sampling requirements be reduced. Previous contractual acceptance sampling criteria will not be changed until the PCO provides written approval. The Government reserves the right to return to original acceptance sampling requirements at any indication of a loss of process control or a degradation in product conformance to contract requirements.

[End of clause]

By Order of the Director.
Gary C. Tucker,
Colonel, USA Staff Director, Administration.

[Docket No. 911215-1315]

RIN 0648-AD50

Foreign Fishing; Groundfish of the Gulf of Alaska; Groundfish Fishery of the Bering Sea and Aleutian Islands

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS publishes a proposed rule that would implement proposed Amendment 8 to the Fishery Management Plan (FMP) for the Groundfish Fishery of the Bering Sea and Aleutian Islands (BSAI) and proposed Amendment 23 to the FMP for Groundfish of the Gulf of Alaska (GOA), if the amendments are approved by the Secretary of Commerce (Secretary) after review and consideration of public comments. Amendments 18 and 23 to the respective FMPs were prepared by the North Pacific Fishery Management Council (Council) and have been submitted to the Secretary for review under provisions of the Magnuson Fishery Conservation and Management Act (Magnuson Act).

These regulations are proposed to allocate Pacific cod and pollock between inshore and offshore components in the GOA and pollock between inshore and offshore components in the BSAI, as defined in the proposed amendments. Also, these regulations propose to establish a catcher vessel operation area in the BSAI within which pollock harvest by the offshore component during the first part of the fishing year is limited and, during the remainder of the year, prohibited. In addition, a Western Alaska Community Development Quota program is proposed to help develop commercial fisheries in communities on the Bering Sea coast by allowing them exclusive access to up to half of the pollock apportioned to nonspecific

1991
UMI

reserve at the beginning of the fishing year (i.e., 7.5 percent of the total allowable catch (TAC) of pollock in the BSAI area). These actions are intended by the Council to promote management and conservation of groundfish and other fish resources and to further the goals and objectives contained in the FMPs that govern these fisheries.

DATES: Comments are invited on or before February 3, 1992.

ADDRESSES: Comments may be sent to Steven Pennoyer, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 21668, Juneau, AK 99802. Commenters are encouraged to submit copies of their comments on the amendments, proposed rule, and supporting analyses to Richard Schaefer, Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service, 1335 East-West Highway, SSMC1 Room 8472, Silver Spring, MD 20910. Individual copies of proposed Amendments 18 and 23 and the draft supplemental environmental impact statement/regulatory impact review/initial regulatory flexibility analysis (DSEIS/RIR/IRFA) may be obtained from the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99520.

FOR FURTHER INFORMATION CONTACT: Jay J.C. Ginter, Fishery Management Biologist at 907–586–7228.

SUPPLEMENTARY INFORMATION:

Background

Domestic and foreign groundfish fisheries in the exclusive economic zone (EEZ) off Alaska are managed in accordance with the GOA and BSAI FMPs. Both FMPs were prepared by the Council under authority of the Magnuson Act. The GOA FMP is implemented by regulations appearing at 50 CFR 611.92 for the foreign fishery and at 50 CFR part 672 for the U.S. fishery. The BSAI FMP is implemented by regulations appearing at 50 CFR 611.93 for the foreign fishery and 50 CFR part 675 for the U.S. fishery. General regulations that also pertain to U.S. fisheries appear at 50 CFR part 620.

Substantial processing of pollock by several catcher/processor vessels contributed to an early closure of the pollock fishery in the Shelikof Strait District on March 21, 1989 (54 FR 12204; March 24, 1989), effectively preventing inshore components from realizing their anticipated economic benefit from pollock alter in the fishing year. At the April 1989 Council meeting, fishermen and processors from Kodiak Island requested the Council to consider inshore/offshore allocations to prevent future preemption of resources by one industry sector over another.

The Council considered the issues of coastal community development and shoreside preference at its June 1989 meeting and conducted at 45-day scoping process between October 13 and December 8, 1989, to obtain additional proposals from the public (54 FR 46100; November 1, 1989). In December of 1989, the Council adopted the Fishery Planning Committee's suggested management alternatives and added another alternative concerning establishment of an immediate moratorium.

The problem statement adopted by the Council at its April 1990 meeting stated in part, "The Council defines the problem as a resource allocation problem where one industry sector faces the risk of preemption by another." The view was expressed that specified allocations (proportions of TAC for a given target species established by regulation) for inshore and offshore components at the beginning of a fishing year would resolve the preemption problem and better enable operators within those components to plan harvesting and/or processing activity during the fishing year.

Between January 1990 and April 1991, the Council decided to include in its analysis only pollock in the BSAI and Pacific cod and pollock in the GOA. This allowed for more detailed analyses of an inshore/offshore allocation scheme for groundfish species believed to require immediate attention.

In April 1991, the Council rejected a motion to table the inshore/offshore amendment package until the moratorium issue was resolved, an individual fishing quota system based on historical participation in the fisheries was in effect, and an exclusive registration area for pollock was established for the central Gulf of Alaska. The Council reasoned that such a limited access program could not be implemented until 1994, and that the preemption problem needed to be addressed as early as 1992. Additionally, the Council believed that there was no evidence that a limited access program would be effective in resolving the preemption problem.

The first DSEIS/RIR/IRFA for Amendments 18 and 23 was reviewed initially by the Council and its advisory bodies at their April 22–26, 1991, meetings and approved for public distribution and comment. The public comment period began May 10, 1991, and ended June 24, 1991 (56 FR 21675; May 10, 1991). After receiving advice from its advisory bodies and hearing public testimony at its meeting of June 24–29, 1991, the Council constructed and adopted its preferred alternative. At that meeting, the Council also received verbal advice from the Director, Alaska Region, NMFS (Regional Director), and the NOAA Regional Attorney recommending further analyses to supplement the record. The Regional Director and Regional Attorney provided written advice to the Council on supplementing the record by letter dated July 25, 1991. At its August and September 1991 meetings, the Council rejected a motion to rescind its earlier adoption of the preferred alternative, as described below.

The Council has submitted Amendments 18 and 23 to the Secretary for review, approval, and implementation under section 304(a) of the Magnuson Act. A notice of availability for the FMP amendments that requested public comment on these amendments was published on December 12, 1991 (56 FR 64738). A notice of availability of the revised DSEIS was published in the **Federal Register** on November 22, 1991 (56 FR 58905).

A major concern identified during the preliminary review by the Secretary of Amendments 18 and 23 is that the economic analysis submitted by the Council may be fatally flawed. The economic analysis does not appear to contain a full qualitative analysis of costs and benefits expected, should these two amendments be approved by the Secretary. NMFS will conduct a separate economic analysis on the proposed management measures prior to final action to approve, disapprove, or partially disapprove the amendments.

Completion of the preliminary review with publication of the proposed rule for Amendments 18 and 23 does not mean that either of these two amendments will be approved by the Secretary. NMFS invites comment on the consistency of the amendments and the proposed regulations with the Magnuson Act's national standards and other applicable laws. Comments are specifically requested on the adequacy of the economic analysis to support findings of compliance with national standards 2 (best scientific evidence), 4 (fair and equitable allocations), 5 (justification for economic allocations), and 7 (net benefits to the Nation). Information and analysis that bolster or contradict the conclusions in any of the supporting documents are also welcome. Commenters may also address alternatives the Council did not consider but that may have resolved the concerns that prompted these two amendments.

Description of Proposed Management Measures

1. Application of Inshore and Offshore Definitions

The inshore component would be defined as that part of the U.S. groundfish fishery that includes: (a) All shoreside processing facilities; (b) all mothership operators who submit a check-in report under § 672.5(c)(1) during a fishing year that exhibits an intent to process, or actual processing of, Pacific cod or pollock in waters adjacent to the State of Alaska that are shoreward of the EEZ; and (c) all catcher/processors that process less than 18 metric tons of groundfish, round weight, per day and are less than 125 feet (38.1 m) in length overall. The offshore component would be defined as all processor vessels not included under the inshore definition.

Motherships operating under the inshore definition would be required to remain in the geographic location that they report on their first check-in report of the fishing year while they are processing pollock harvested from either the GOA or the BSAI, or Pacific cod harvested from the GOA. This restriction applies on a fishing-year basis and only to the processing of pollock and Pacific cod. A mothership could leave that location to process other species of groundfish not included under Amendments 18 and 23 or other species of fish. However, the mothership must return to the location reported on the first check-in report for processing EEZ pollock or GOA Pacific cod if it processes those species again during the same fishing year.

Processor vessels would not be allowed to catch or process pollock or Pacific cod as both an inshore and offshore operation during the same year. For purposes of this measure, it is the Council's intent that the BSAI area and the GOA are viewed as one area. For example, a mothership would not be allowed to process pollock in the GOA under the inshore definition and in the BSAI area under the offshore definition in the same fishing year. It could operate under the inshore definition to process GOA pollock and then move offshore in the BSAI area in the same fishing year to process Pacific cod caught in the BSAI area or flatfish, since these species are not included in the inshore definition for the BSAI area. However, it would have to return to its original location to process pollock caught in either the BSAI area or the GOA, or Pacific cod caught in the GOA.

2. Inshore/Offshore Allocation of Pollock and Pacific Cod in the GOA

For the GOA, 90 percent of the Pacific cod TAC and 100 percent of the pollock TAC for each fishing year, as specified in the annual notice of specifications for groundfish, is proposed to be allocated to the inshore component of the groundfish fishery. Ten percent of the Pacific cod TAC, and an appropriate percentage of the pollock TAC for bycatch purposes, is proposed to be allocated to the offshore component.

Only the inshore component would be allowed to conduct directed fishing for pollock in the GOA. Nevertheless, under current §§ 672.20 (g) and (h), catcher/processors from the offshore component would be able to retain bycatch amounts of GOA pollock. For a given fishing trip, pollock retention for a vessel in the offshore component must be less than 20 percent by weight (round weight equivalent) of other species retained under current management policies. This provision would allow for the retention and processing of pollock bycatch by the offshore component, until the pollock TAC is reached, and is intended to alleviate unnecessary discard and waste of the resource. Once the quarterly allowance of the GOA pollock TAC is reached for a given regulatory area and district, pollock would be treated as a prohibited species under current § 672.20(c)(3).

The offshore component would be allocated up to 10 percent of the Pacific cod TAC for each regulatory area in the GOA. The Regional Director would determine what proportion of this amount would be necessary as bycatch for directed fishing for other species by the offshore component. After this expected bycatch amount is subtracted from the offshore allocation, the remaining amount may be available to the offshore component for directed fishing purposes. For TAC monitoring purposes in the GOA, the retained bycatch of Pacific cod taken by the offshore component would differ from the retained bycatch of pollock. Retained bycatch of pollock taken by the offshore component in the GOA would be credited to the inshore component, but retained bycatch of Pacific cod by the offshore component would be credited to its 10 percent allocation.

If the Regional Director determines that the inshore component will not be able to process the entire amount of its allocation of pollock or Pacific cod during a fishing year, then NMFS will publish a notice in the **Federal Register** that reallocates the projected unused amount of pollock or Pacific cod to the offshore component.

3. Inshore/Offshore Allocation of Pollock in the BSAI Area

Under Amendment 18, the allocation of BSAI pollock between the inshore and offshore components would be phased in over a 3-year period. In the first year of implementation, the inshore component would receive 35 percent of the pollock TAC and the offshore component would receive the remaining 65 percent. In the second year, BSAI pollock would be allocated between the inshore and offshore components 40 and 60 percent, respectively. In the third and subsequent years, BSAI pollock would be allocated between inshore and offshore components 45 and 55 percent, respectively. The inshore and offshore allocations would be specified for each subarea and each pollock season defined at § 675.20(a)(2)(ii).

According to NMFS records, the inshore component has harvested approximately 16 to 36 percent of the BSAI pollock for domestic annual processing since 1986. Based on the 1990 pre-season domestic processing survey, the 3-year phased allocation scheme would result in a graduated increase in the pollock allocation to the inshore segment up to its late 1989 processing potential. If, during a fishing year, the Regional Director determines that either the inshore or offshore component will not be able to harvest and process the entire amount of pollock allocated to it, then the amount that the Regional Director projects will be unused by one component will be reallocated to the other fishery by notice in the **Federal Register**.

4. Bering Sea Catcher Vessel Operational Area (CVOA)

Amendment 18 proposes to establish a CVOA that would limit access to pollock within the area to catcher vessels delivering to the inshore component. This area is between 163° and 168° W. longitude, south of 56° N. latitude, and north of the Aleutian Islands. During the pollock roe season (January 1–April 15, commonly known as the "A" season), the offshore component would be allowed to take up to 65 percent of its seasonal allowance of pollock from the CVOA. After the offshore component attains 65 percent of its "A" season allowance of pollock from the CVOA, pollock caught within this area may be processed by the offshore component only if the pollock occurs as bycatch in directed fishing for other species. Except for the "A" season allowance of pollock to the offshore

VOL
56
ISS
245
DE
20
1991
UMI

component, only the inshore component would be permitted to conduct directed fishing for pollock in the CVOA. Pollock harvested outside the CVOA could be delivered to processors in either the inshore or offshore components.

Establishment of the CVOA is intended to address the dependence of the BSAI inshore component on nearby waters for pollock resources, but provides an allowance for some access to this area by the offshore component during the "A" season in recognition of the high economic value of pollock roe obtained by the at-sea processors from this area. The 65-percent allowable take is based on 1989–1990 reported harvests by the offshore sector in this operational area during the first quarter.

If the CVOA is implemented, several current statistical areas would be subdivided, creating new Statistical Areas 551, 557, 558, and 519. These new statistical areas would comprise the CVOA and would provide separate data for monitoring the catch of pollock and other species by inshore and offshore components during the "A" season for pollock in the BSAI.

5. Western Alaska Community Development Quota (CDQ)

If implemented, Amendment 18 would withhold half the amount of BSAI pollock assigned to the nonspecific reserve for allocation to qualifying community development projects in western Alaska. As a result, 7.5 percent of the BSAI pollock TAC would be set aside for purposes of this program at the beginning of the fishing year, and that amount would be reduced as allocations are made to community development projects. Following the end of the third quarter, any portion that is unallocated for western Alaska community development projects would be reapportioned to the nonspecific reserve. During the year, any apportionments from the reserve to pollock, but not for the CDQ program, would be allocated to the inshore and offshore components according to the allocation formula for BSAI pollock for that given fishing year as described under proposed § 675.20(a)(2)(iii).

To be eligible, a community must meet specified criteria and have an approved fisheries development plan. During the first year of implementation, criteria for community eligibility and fishery development plans would be established by the Governor of Alaska, in consultation with the Council, and would be announced in the **Federal Register** following approval by the Secretary.

Actual allocations of pollock to Bering Sea communities under the CDQ program would be announced annually in the **Federal Register** by the Secretary, beginning with the second year of implementation of Amendment 18.

To some extent, the rationale for this community development program is expressed in the Council's Comprehensive Fishery Management Goals that were adopted in 1984. A copy of these goals may be obtained from the Council (see ADDRESSES). Goal 3 calls for promotion of economic stability, growth and self-sufficiency in maritime communities, including the consideration of regional and national benefits derived from improving the opportunities for maritime communities to enhance their self-sufficiency. In addition, the Council concluded during adoption of the CDQ program that these communities would be unlikely to attract the capital investment necessary to develop processing facilities as long as the threat of preemption from offshore catcher/processors exists.

6. Linkage of Amendments 18 and 23 to a Comprehensive Limited Access System

The Council recognizes that Amendments 18 and 23 offer only an interim remedy to the preemption problem confronting the inshore component, including small coastal communities, that is highly dependent on fishing to maintain economic stability. Amendments 18 and 23 do not directly address the problem of overcapitalization in the groundfish fishery. Hence, preemption problems could occur within the inshore sector or even between communities. However, the motion approval by the Council in selecting its preferred alternative reiterates the intent of the Council to develop and implement immediately a moratorium on entry into the fisheries.

The Council made a first step towards limiting access in the groundfish, crab, and halibut fisheries by announcing its intent to develop measures to limit access to those fisheries (55 FR 36302, September 5, 1990; corrected at 55 FR 37729, September 13, 1990). If Amendments 18 and 23 are approved, the amendments and implementing regulations will expire on December 31, 1995. In the motion approving these amendments for Secretarial review, the Council also initiated a research plan for an additional, long-range analysis of problems in the fishery. The Council intends to link the proposed measures that address a preemption problem to a more comprehensive management regime that would address overcapitalization.

Classification

This proposed rule is published under section 304(a)(1)(D) of the Magnuson Act, as amended by Public Law 99–659, which requires the Secretary to publish regulations proposed by the Council within 15 days of receipt of a fishery management plan amendment and regulations. At this time, the Secretary has not determined that the amendments these regulations would implement are consistent with the national standards, other provisions of the Magnuson Act, and other applicable law. The Secretary, in making these determinations, will take into account the data and comments received during the comment period.

The Council prepared a DSEIS for the amendments which currently is under separate review under the requirements of the National Environmental Policy Act. A copy of the DSEIS may be obtained from the Council (see ADDRESSES).

This proposed rule is exempt from the procedures of E.O. 12291 under section 8(a)(2) of that order. Deadlines imposed under the Magnuson Act, as amended, by Public Law 99–659, require the Secretary to publish this proposed rule 15 days after its receipt. The proposed rule is being reported to the Director, Office of Management and Budget, with an explanation of why it is not possible to follow procedures of the order.

The Assistant Administrator for Fisheries, NOAA (Assistant Administrator), has initially determined that this proposed rule is not a "major rule" requiring a regulatory impact analysis under E.O. 12291. This determination is based on the DSEIS/RIR/IRFA prepared by the Council. The DSEIS/RIR/IRFA concludes that (1) the projected net change in direct income under the preferred alternative ranges from $5 to 15 million between the first and third year of the phased-in allocation, (2) the proposed amendment does not directly affect the technical efficiency of processing operations, (3) consumer prices are unlikely to experience major changes, and (4) the proposed allocation of resource shares in not expected to lead to significant changes in the overall competitiveness or innovative capabilities of the industry, in either the domestic or international market. However, NMFS/NOAA has serious concerns about whether the analyses submitted by the Council in support of the FMP amendments contain a sufficient description of the economic effects of the proposed allocation. Therefore, NMFS will conduct a separate economic analysis of the effects of the proposed management measures on the fishing industry. A copy of the DSEIS/RIR/IRFA may be obtained from the Council see ADDRESSES).

The Assistant Administrator concludes that this proposed rule, if adopted, would have a significant economic impact on a substantial number of small entities. This determination is based on the DSEIS/RIR/IRFA prepared by the Council. The offshore harvesting sector of this industry has expanded under an open access policy, to a point where capacity far exceeds what is necessary to take the allotted quota. Costs are high, and for many vessels, returns are marginal. For some vessels in the offshore component, it is likely that revenue losses would induce business failure. The analysis in the RIR indicates that these revenue losses could be in excess of $20 million, in the aggregate. A copy of this document may be obtained from the Council (see ADDRESSES).

The proposed rule involves a collection-of-information requirement approved by the Office of Management and Budget under the Paperwork Reduction Act (control number 0648–0213).

The Council determined that this rule, if adopted, will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal management program of the State of Alaska. This determination has been submitted for review by the responsible State agencies under section 307 of the Coastal Zone Management Act.

This proposed rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under E.O. 12612.

The Regional Director has determined that Amendment 18 and its proposed implementing regulations are likely to adversely affect Steller sea lions, a species listed as threatened under the Endangered Species Act. A section 7 consultation has been initiated under the requirements of section 7. A biological opinion is being prepared that will address the effects of Amendment 18 and its proposed implementing regulations. The Regional Director has determined that Amendment 23 and its proposed implementing regulations will not effect endangered or threatened species.

List of Subjects in 50 CFR Parts 672 and 675

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: December 16, 1991.

Michael F. Tillman,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR parts 672 and 675 are proposed to be amended as follows:

PART 672—GROUNDFISH OF THE GULF OF ALASKA

1. The authority citation for 50 CFR part 672 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 672.2, new definitions of "catcher/processor", "catcher vessel", "inshore", "mothership", "offshore", and "shoreside processing facility", are added in alphabetical order, and the existing definition of "processor vessel" is revised to read as follows:

§ 672.2 Definitions.

* * * * *

Catcher/processor (applicable through December 31, 1995) means any vessel that catches, takes or harvests groundfish and processes groundfish at any time during the fishing year, regardless of whether the vessel engages in either activity jointly or separately.

Catcher vessel (applicable through December 31, 1995) means any vessel that catches, takes or harvests groundfish, but does not process groundfish at any time during any fishing year.

* * * * *

Inshore (applicable through December 31, 1995) means that part of the U.S. groundfish fishery off Alaska that includes:

(1) All shoreside processing facilities;

(2) All motherships that submit a check-in report under § 672.5(c)(1) during a fishing year that exhibits an intent to process pollock that were harvested in the EEZ adjacent to Alaska or Pacific cod that were harvested in the Gulf of Alaska, or actual processing of such pollock or Pacific cod, in waters adjacent to the State of Alaska that are shoreward of the EEZ; and

(3) All catcher/processors that process less than 18 metric tons of groundfish, round weight, per day, and are less than 125 feet (38.1 m) in length overall.

* * * * *

Mothership (applicable through December 31, 1995) means any vessel that processes groundfish, but does not catch, take or harvest groundfish at any time during any fishing year.

* * * * *

Offshore (applicable through December 31, 1995) means all processor vessels in the U.S. groundfish fisheries off Alaska not included in the definition of "inshore."

* * * * *

Processor vessel: (1) (Applicable through December 31, 1995) means, unless otherwise restricted, any vessel that is used for processing groundfish, including catcher/processors and mothership processors.

(2) (Applicable after December 31, 1995), unless otherwise restricted, includes any vessel that is used for, equipped to be used for, or of a type that is normally used for processing, including specifically catcher/processor vessels and mothership processor vessels.

* * * * *

Shoreside processing facility (applicable through December 31, 1995) means any building on land used for processing groundfish or any vessel that is substantially a land structure, taken out of navigation, and has no U.S. groundfish fishing permit, that is used for processing groundfish.

* * * * *

3. In § 672.7, a new paragraph (g) is added to read as follows:

§ 672.7 Prohibitions.

* * * * *

(g) *Applicable through December 31, 1995:* (1) Process pollock that were harvested in the EEZ adjacent to Alaska or Pacific cod that were harvested in the Gulf of Alaska on a mothership operating under the "inshore" definition at § 672.2 in a location other than the first location reported in any fishing year in a check-in notice.

(2) Operate any processor vessel to process pollock or GOA Pacific cod under the "inshore" and "offshore" definitions at §§ 672.2 and 675.2 during the same fishing year.

4. In § 672.20, existing paragraphs (c)(1)(i) and (c)(1)(ii) are redesignated as paragraphs (c)(1)(i)(A) and (c)(1)(i)(B), respectively; new paragraphs (a)(2)(v), (c)(1)(i) introductory text, and (c)(1)(ii) are added; and existing paragraph (c)(2) is revised to read as follows:

§ 672.20 General limitations.

(a) * * *

(b) * * *

(v) *Applicable through December 31, 1995:* (A) The DAP apportionment for pollock in all regulatory areas and for each quarterly reporting period described in paragraph (a)(2)(iv) of this section will be divided into inshore and offshore components. The inshore component will be equal to 100 percent of the pollock DAP in each regulatory area after subtraction of an amount,

VOL
56
ISS
245
DEC
20
1991
UMI

determined by the Regional Director, projected to be caught by the offshore component incidental to directed fishing for other groundfish species. If the Regional Director determines that the inshore component will not be able to process the entire amount of its allocation of pollock during a fishing year, then NMFS will publish a notice in the **Federal Register** that reallocates the projected unused amount of pollock to the offshore component.

(B) The DAP apportionment of Pacific cod in all regulatory areas will be divided into inshore and offshore components. The inshore component will be equal to 90 percent of the Pacific cod DAP in each regulatory area. If the Regional Director determines that the inshore component will not be able to process the entire amount of its allocation of Pacific cod during a fishing year, then NMFS will publish a notice in the **Federal Register** that reallocates the projected unused amount of Pacific cod to the offshore component.

(C) All motherships that operate under the "inshore" definition in § 672.2 and process pollock or Pacific cod that were harvested in the EEZ adjacent to Alaska must remain at the first location reported in any fishing year in the check-in notice required at § 672.5(c)(1)(ii)(C) during the remainder of the fishing year when either pollock or Pacific code are being processed.

* * * * *

(c) * * *

(1) * * *

(i) *Applicable after December 31, 1995:*

* * * * *

(ii) *Applicable through December 31, 1995:* (A) As soon as practicable after consultation with the Council, NMFS will publish a notice in the **Federal Register** specifying for the succeeding fishing year proposed annual TAC amounts of each target species and the "other species" category and apportionments thereof among DAP, JVP, TALFF, and reserves; halibut prohibited species catch amounts; quarterly allowances of pollock; and allocations of Pacific cod TAC to inshore and offshore components for each regulatory area. This notice will also include the dates that directed fishing may commence for each quarterly allowance for pollock. The preliminary specifications will reflect as accurately as possible the projected changes in U.S. harvesting and processing will occur in the coming year. Public comment on these amounts will be accepted by the Secretary for 30 days after the notice is filed for public inspection with the Office of the Federal Register. One-fourth of the preliminary specifications (not including the reserves and the first quarterly allowance of pollock), one-fourth of the inshore and offshore allocations of Pacific cod in each regulatory area, and one-fourth of the habibut prohibited species catch amounts will be in effect on January 1 on an interim basis and will remain in effect until superseded by a notice of final specifications in the **Federal Register**.

(B) *Notice of final specifications.* NMFS will consider comments received on the proposed specifications during the comment period and, after consultation with the Council, will publish a notice in the **Federal Register** specifying the final annual TAC for each target species and the "other species" category and apportionments thereof, final halibut prohibited species catch amounts, final quarterly allowances for pollock, and inshore and offshore allocations of Pacific cod.

(2) *Notices prohibiting directed fishing*—(i) *Applicable after December 31, 1995:* If the Regional Director determines that the amount of a target species or "other species" category apportioned to a fishery or, with respect to pollock, to a quarterly allowance, is likely to be reached, the Regional Director may establish a directed fishing allowance for that species or species group. The amount of a species or species group apportioned to a fishery or, with respect to pollock, to a quarterly allowance, is the amount in Table 1 or, if applicable, Table 2, as these amounts are revised by inseason adjustments, for that species or species group, as identified by regulatory area or district and as further identified according to any allocation of TALFF, the apportionment for JVP, the apportionment for DAP, the quarterly allowance of pollock and, if applicable, as further identified by gear type. In establishing a directed fishing allowance, the Regional Director shall consider the amount of that species or species group or quarterly allowance of pollock that will be taken as incidental catch in directed fishing for other species in the same regulatory area or district. If the Regional Director establishes a directed fishing allowance and that allowance is or will be reached before the end of the fishing year or, with respect to pollock, before the end of the quarter, he will prohibit directed fishing for that species or species group in the specified regulatory area or district. No person may engage in directed fishing in violation of an applicable notice. If directed fishing is prohibited, the amount of any catch of that species or species group equal to or greater than the amount that constitutes directed fishing may not be retained and must be treated as a prohibited species under paragraph (e) of this section.

(ii) *Applicable through December 31, 1995: Notices prohibiting directed fishing.* If the Regional Director determines that the amount of a target species or "other species" category apportioned to a fishery; or with respect to pollock, to a quarterly allowance; or with respect to Pacific cod, to an allocation to the inshore or offshore component; is likely to be reached, the Regional Director may establish a directed fishing allowance for that species or species group. The amount of a species or species group apportioned to a fishery, or with respect to pollock, a quarterly allowance; or with respect to Pacific cod, to an allocation to the inshore or offshore component; is the amount in table 1 or, if applicable, in table 2. These amounts are revised by inseason adjustments, for a given species or species group, as identified by regulatory area or district and as further identified according to any allocation of TALFF, the apportionment of JVP, the apportionment of DAP, the quarterly allowance for pollock, or with respect to Pacific cod, to an allocation to the inshore or offshore component, and, if applicable, as further identified by gear type. In establishing a directed fishing allowance, the Regional Director should consider the amount of that species group, quarterly allowance of pollock, or allocation of Pacific cod to the inshore or offshore component that will be taken as incidental catch in directed fishing for other species in the same regulatory area or district. If the Regional Director establishes a directed fishing allowance and that allowance is or will be reached before the end of the fishing year or, with respect to pollock, before the end of the quarter, he will prohibit directed fishing for the species or species group in the specified regulatory area or district. No person may engage in directed fishing in violation of an applicable notice. If directed fishing is prohibited, the amount of any catch of that species or species group equal to or greater than the amount that constitutes directed fishing may not be retained and must be treated as a prohibited species under paragraph (e) of this section.

* * * * *

PART 675—GROUNDFISH OF THE BERING SEA AND ALEUTIAN ISLANDS

5. The authority citation for 50 CFR part 675 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

6. In § 675.2, the definitions of "catcher/processor", "catcher vessel", "inshore", "mothership", "offshore", and "shoreside processing facility" are added in alphabetical order; a new paragraph (l) is added to the definition of "statistical area"; and the introductory text of the definition of "statistical area" and the existing definition for "processor vessel" are revised to read as follows:

§ 675.2 Definitions.

* * * * *

Catcher/processor (applicable through December 31, 1995) means any vessel that catches, takes or harvests groundfish and processes groundfish at any time during any fishing year, regardless of whether the vessel engages in either activity jointly or separately.

Catcher vessel (applicable through December 31, 1995) means any vessel that catches, takes or harvests groundfish, but does not process groundfish at any time during any fishing year.

* * * * *

Inshore (applicable through December 31, 1995) means that part of the U.S. groundfish fishery off Alaska that includes:

(a) All shoreside processing facilities:

(b) All motherships that submit a check-in report under § 672.5(c)(1) during a fishing year that exhibits an intent to process pollock that were harvested in the EEZ adjacent to Alaska or Pacific cod that were harvested in the Gulf of Alaska, or actual processing of such pollock or Pacific cod, in waters adjacent to the State of Alaska that are shoreward of the EEZ; and

(c) All catcher/processors that process less than 18 metric tons of groundfish, round weight, per day and are less than 125 feet (38.1 m) in length overall.

* * * * *

Mothership (applicable through December 31, 1995) means any vessel that processes groundfish, but does not catch, take or harvest groundfish at any time during any fishing year.

Offshore (applicable through December 31, 1995) means all processor vessels in the U.S. groundfish fisheries off Alaska not included in the definition of "inshore."

* * * * *

Processor vessel: (a) (Applicable through December 31, 1995) means, unless otherwise restricted, any vessel that is used for processing groundfish, including catcher/processors and mothership processors.

(b) (Applicable after December 31, 1995), unless otherwise restricted, includes any vessel that is used for, or of a type that is normally used for processing, including specifically catcher/processor vessels and mothership processor vessels.

* * * * *

Shoreside processing facility (applicable through December 31, 1995) means any building on land used for processing groundfish or any vessel that is substantially a land structure, taken out of navigation, and has no U.S. groundfish fishing permit, that is used for processing groundfish.

* * * * *

Statistical area means any one of the statistical areas of the Bering Sea and Aleutian Islands management area defined as follows (Figure 2):

* * * * *

(l) *Applicable through December 31, 1995:* (1) Statistical Area 551—that part of Statistical Area 511 that is south of 56°00' N. latitude, east of 165° W. longitude, west of 163° W. longitude and north of the Aleutian Islands.

(2) Statistical Area 557—that part of Statistical Area 517 bounded by straight lines connecting the following coordinates in the order listed: 56° N. latitude, 170° W. longitude; 56° N. latitude, 165° W. longitude; 54°30' N. latitude, 165° W. longitude; 54°30' N. latitude, 167° W. longitude; and 56° N. latitude, 170° W. longitude

(3) Statistical Area 559—that part of Statistical Area 515 that is east of 167°00' W. longitude.

(4) Statistical Area 558—that part of Statistical Area 515 that is east of 168°00' W. longitude and west of 167°00' W. longitude.

* * * * *

7. In § 675.7, a new paragraph (h) is added to read as follows:

§ 675.7 Prohibitions.

* * * * *

(h) *Applicable through December 31, 1995:* (1) Process pollock that were harvested in the EEZ adjacent to Alaska or Pacific cod that were harvested in the Gulf of Alaska on a mothership operating under the "inshore" definition at § 675.2 in a location other than the first location reported in any fishing year in a check-in notice.

(2) Operate any processor vessel to process pollock or GOA Pacific cod under the "inshore" and "offshore" definitions at §§ 672.2 and 675.2 during the same fishing year.

8. In § 675.20, existing paragraphs (a)(7)(i) and (a)(7)(ii) are redesignated as paragraphs (a)(7)(i)(A) and (a)(7)(i)(B), respectively; new paragraphs (a)(2)(iii), (a)(3)(i), (a)(3)(ii), (a)(7)(i) introductory text, and (a)(7)(ii) are added; and paragraph (a)(8) is revised to read as follows:

§ 675.20 General limitations.

(a) * * *

(2) * * *

(iii) *Applicable through December 31, 1995,* the DAP apportionment of pollock in each subarea and each allowance specified according to paragraph (a)(2)(ii) of this section will be divided between inshore and offshore components of the pollock fishery according to the following schedule:

	Inshore (percent)	Offshore (percent)
1992	35	65
1993	40	60
1994	45	55
1995	45	55

(A) If, during a fishing year, the Regional Director determines that either the inshore or offshore component will not be able to harvest and process the entire amount of pollock allocated to it, then the amount that the Regional Director projects will be unused by one component will be reallocated to the other fishery by notice in the **Federal Register.**

(B) The maximum harvest of pollock by the offshore component within the catcher vessel operational area described at § 675.22, during the period January 1, until noon ALT, April 15, will not exceed 65 percent of the pollock allocation to the offshore component for that period.

(C) All motherships that operate under the "inshore" definition in § 675.2 and process pollock or Pacific cod that were harvested in the EEZ adjacent to Alaska must remain at the first location reported in any fishing year in the check-in notice required at § 675.5(c)(1)(ii)(C) during the remainder of the fishing year when either pollock or Pacific cod are being processed.

(3) * * *

(i) *Applicable through December 31, 1995:* One half of the amount of the pollock DAP placed in the reserve for each subarea will be assigned to a Western Alaskan Community Development Quota (CDQ) for each subarea. Portions of the CDQ for each area may be allocated for use by specific western Alaska communities in accordance with community fishery development plans developed by the State of Alaska and approved by the Secretary in consultation with the Council. Amounts of the CDQ that are unallocated on September 30 will

VOL 56 ISS 245 DE 20 1991 UMI

automatically be added back to the nonspecific reserve.

(ii) *Applicable through December 31, 1995:* Any amounts of the nonspecific reserve that are reapportioned to pollock as provided by paragraph (b) of this section must be divided between the inshore and offshore pollock fisheries in accordance with the allocation schedule described in paragraph (a)(2)(iii) of this section.

* * * * *

(7) *Notices.* (i) *Applicable after December 31, 1995:*

* * * * *

(iii) *Applicable through December 31, 1995:* (A) *Notice of proposed specifications and interim harvest amounts.* As soon as practicable after consultation with the Council, the Secretary will publish a notice in the **Federal Register** specifying, for the succeeding fishing year, proposed annual TAC and initial TAC amounts for each target species and "other species" category and apportionments thereof among DAP, JVP, and TALFF; prohibited species catch allowances established under § 675.21(b); and seasonal allowances of pollock with allocations of those seasonal allowances to inshore and offshore components. The initial TAC for each target species and the "other species" category will be 85 percent of the TAC as provided under paragraph (a)(3) of this section. The proposed specifications will reflect as accurately as possible the projected changes in U.S. harvesting and processing capacity and the extent to which U.S. harvesting and processing will occur during the coming year. The Secretary will accept public comment on the proposed specifications for 30 days after the notice is filed for public inspection with the Office of the Federal Register. One-fourth of each proposed initial TAC and apportionment thereof, one-fourth of each prohibited species catch allowance established under § 675.21(b), and one-fourth of the first seasonal allowance and inshore/offshore allocations of that allowance established under §§ 675.20(a)(2)(i) and (iii), respectively, will be in effect on January 1 on an interim basis and will remain in effect until superseded by a **Federal Register** notice of final specifications.

(B) *Notice of final specifications.* NMFS will consider comments on the proposed specifications received during the comment period and, after consultation with the Council, will publish a notice in the **Federal Register** specifying the final annual TAC for each target species and the "other species" category and apportionments thereof, final prohibited species catch allowances established under § 675.21(b), and final seasonal allowances of pollock DAP and allocations of those seasonal allowances to inshore and offshore components. These final specifications will supersede the interim specifications.

(8)(i) *Applicable after December 31, 1995:* If the Regional Director determines that the amount of a target species or "other species" category apportioned to a fishery, or a seasonal allowance of pollock, is likely to be reached, the Regional Director may establish a directed fishing allowance for that species or species group. The amount of a species or species group apportioned to a fishery is the amount annually specified under paragraph (a)(7) of this section, as revised by inseason adjustments, for that species or species group, or seasonal allowance of pollock as identified by subarea and as further identified according to any allocation of TALFF, the apportionment for JVP, the apportionment for DAP, the quarterly allowance of pollock and, if applicable, as further identified by gear type. In establishing a directed fishing allowance, the Regional Director shall consider the amount of that species or species group or seasonal allowance of pollock that will be taken as incidental catch in directed fishing for other species as the same subarea. If the Regional Director establishes a directed fishing allowance and that allowance is or will be reached before the end of the fishing year or, with respect to pollock, before the end of the fishing season, he will prohibit directed fishing for the species or species group in the specified subarea. No person may engage in directed fishing in violation of an applicable notice. If directed fishing is prohibited, the amount of any catch of that species or species group equal to or greater than the amount that constitutes directed fishing may not be retained and must be treated as a prohibited species under paragraph (c) of this section.

(ii) *Applicable through December 31, 1995:* If the Regional Director determines that the amount of a target species or "other species" category apportioned to a fishery, or a seasonal allowance of pollock, or an allocation of a seasonal allowance of pollock to the inshore or offshore component is likely to be reached, the Regional Director may establish a directed fishing allowance for that species or species group. The amount of a species or species group apportioned to a fishery is the amount specified under paragraph (a)(7) of this section, as revised by inseason adjustments, for that species or species group, or seasonal allowance for pollock as identified by subarea and allocation to inshore and offshore components, and as further identified according to any allocation of TALFF, the apportionment for JVP, the apportionment for DAP, and if applicable, as further identified by gear type. In establishing a directed fishing allowance, the Regional Director shall consider the amount of that species or species group or seasonal allowance for pollock to inshore and offshore components, that will be taken as incidental catch in directed fishing for other species in the same subarea. If the Regional Director establishes a directed fishing allowance, and that allowance is or will be reached before the end of the fishing year, or if the inshore or offshore pollock allocation will be reached before the end of the fishing season, the Regional Director will prohibit directed fishing for that species or species group in the specified subarea. No person may engage in directed fishing in violation of an applicable notice. If directed fishing is prohibited, the amount of any catch of that species or species group equal to or greater than the amount that constitutes directed fishing may not be retained and must be treated as a prohibited species under paragraph (c) of this section.

* * * * *

9. In § 675.22, a new paragraph (g) is added to read as follows:

§ 675.22 Time and area closures.

* * * * *

(g) *Catcher vessel operational area (applicable through December 31, 1995).* The offshore component of the groundfish fishery may not conduct directed fishing for pollock at any time in the Bering Sea subarea south of 56° N. latitude, and between 163° and 168° W. longitude, except that during the period January 1 through April 15, the offshore component may conduct directed fishing for pollock for up to 65 percent of the offshore allocation of the Bering Sea subarea for that season.

BILLING CODE 3510-22-M

Notices

Federal Register
Vol. 56, No. 245
Friday, December 20, 1991

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

COMMISSION ON CIVIL RIGHTS

Connecticut Advisory Committee; Agenda and Public Meeting

Notice is hereby given, pursuant to the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Connecticut Advisory Committee to the Commission will be convened at 1:30 p.m. on Monday, January 20, 1992, in the Nathan Hale Room of the Sheraton Hotel, 315 Trumbull Street, Hartford, Connecticut.

The purpose of the meeting is to orient the new members of the recently appointed Committee, discuss their civil rights issues, decide on final details for a mid-April forum on campus tensions, and commemorate the achievements of Dr. Martin Luther King, Jr. The meeting will begin at 1:30 p.m. and adjourn at 4:30 p.m.

Persons desiring additional information or wishing to address the Committee during the meeting should contact Committee Chairperson Ivor J. Echols (203/232-7274) or John I. Binkley, Director of the Eastern Regional Division (202/523-5264; TDD 202/376-8117). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Eastern Regional Division at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, DC, December 16, 1991.

Carol-Lee Hurley,

Chief, Regional Programs Coordination Unit.

[FR Doc. 91-30443 Filed 12-19-91; 8:45 am]

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Gulf of Mexico Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Gulf of Mexico Fishery Management Council (Council) and its Committees and Shrimp Advisory Panel (AP) will meet on January 13–16, 1992, at the Westin Galleria Hotel, 5060 West Alabama, Houston, TX.

Council

On January 15, 1992, the Council will convene at 8:30 a.m. and recess at 5:30 p.m. Council agenda items and the times allocated for discussion are as follows:

From 8:45 a.m. to 10:45 a.m.: Hear public testimony on Amendment #6 to the Shrimp Fishery Management Plan (FMP) and the Texas closure;

From 10:45 a.m. to noon: Discuss Amendment #6 to the Mackerel FMP;

From 1:30 p.m. to 3 p.m.: Discuss Amendment #6 to the Shrimp FMP;

From 3 p.m. to 3:30 p.m.: Discuss the Texas closure; and

From 3:30 p.m. to 5:30 p.m.: Discuss Amendment #6 to the Mackerel FMP.

The Council will reconvene at 8:30 a.m. on January 16 to continue the following agenda items and adjourn for the day at noon:

From 8:30 a.m. to 9:30 a.m.: Discuss Amendment #6 to the Mackerel FMP;

From 9:30 a.m. to 10 a.m.: Hear a report from the Spiny Lobster Management Committee;

From 10 a.m. to 10:20 a.m.: Hear a report from the Data Collection Committee;

From 10:20 a.m. to 10:30 a.m.: Hear a report from the Red Drum Management Committee;

From 10:30 a.m. to 10:45 a.m.: Hear a report from the Butterfish Management Committee;

From 10:45 a.m. to 11 a.m.: Hear a report from the Habitat Protection Committee;

From 11 a.m. to 12 noon: Hear a report from the Migratory Species Management Committee; the Enforcement and the Director's reports will follow. The Council's meeting will then adjourn.

Committees

On January 13 the Data Collection, Red Drum Management, Spiny Lobster Management, Law Enforcement, Habitat Protection, and the Butterfish Management Committees each will convene at 10 a.m. and adjourn at 5 p.m.

On January 14 the Migratory Species Management, Shrimp, and Mackerel Management Committees will convene at 8 a.m. and adjourn at 5 p.m.

Shrimp AP

On January 13 the Shrimp AP will meet from 8:30 a.m. to 3:30 p.m., to review the 1991 Texas closure analyses, discuss procedures for collecting effort data, and review public hearing comments on Amendment #6 to the Shrimp FMP.

For more information contact Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, 5401 West Kennedy Boulevard, suite 331, Tampa, FL; telephone: (813) 228-2815.

Dated: December 13, 1991.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Endangered Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Modification No. 2 to Permit No. 560 (P135B).

Notice is hereby given that pursuant to the provisions of Sections 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), and Section 222.25 of the Regulations Governing Endangered Species (50 CFR Part 217-222), Scientific Research Permit No. 560 was issued to James H.W. Hain, Ph.D., Associated Scientists at Woods Hole, Inc., P.O. Box 721, Woods Hole, Massachusetts 02548 on June 27, 1986. The Permit was modified on November 23, 1990, and is further modified as follows:

Delete Special Condition B.8. and replace with the following:

8. This Permit is valid with respect to the taking authorized herein until March 31, 1992.

All conditions currently contained in the Permit remain in effect.

This modification is effective on January 1, 1992.

Documents submitted in connection with Permit No. 518 and Modifications are available for review in the following offices:

VOL 56 ISS 245 DEC 20 1991 UMI

Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Highway, room 7330, Silver Spring, Maryland 20910; and
Director, Northeast Region, National Marine Fisheries Service, NOAA, One Blackburn Drive, Gloucester, Massachusetts 01930;
Director, Southeast Region, National Marine Fisheries Service, NOAA, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

Dated: December 13, 1991.

Nancy Foster,

Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 91-30379 Filed 12-19-91; 8:45 am]

BILLING CODE 3510-22-M

Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Issuance of a Scientific Research Permit (P479D).

On September 27, 1991, notice was published in the **Federal Register** (56 FR 49175) that an application has been filed by Dr. Marsha Green, Professor of Psychology, Albright College, P.O. Box 15234, Reading, Pennsylvania 19612-5234, for a Permit to harass up to 65 humpback whales (*Megaptera novaeangliae*) during research activities to assess the impact of vessel traffic on these animals.

Notice is hereby given that on December 13, 1991, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407) and the Endangered Species Act of 1973 (16 U.S.C. 1531-1543), the National Marine Fisheries Service issued a Permit to the above applicant to harass up to 1200 humpback whales subject to certain conditions set forth therein. The number originally requested was determined insufficient inasmuch as it did not provide for the standard, quantifiable measure of approach effort required under the Permit (i.e., approaches <100 yards and those animals showing signs of being disturbed no matter what the distance are considered "taken" by harassment and counted against the number of animals authorized in the Permit). Consequently, the requested level of 65 takes was insufficient for the authorized studies.

Issuance of this Permit, as required by the Endangered Species Act of 1973, is based on the finding that the Permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which is the subject of the Permit; and (3) is consistent with the purposes and policies set forth in section 2 of the Act. This Permit was also issued in accordance with and is subject to Parts 220-222 of Title 50 CFR, the National Marine Fisheries Service regulations governing endangered species permits.

The Permit and associated documents are available for review in the following offices:

By appointment: Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Hwy., Silver Spring, Maryland 20910 (301/427-2289);
Coordinator, Pacific Area Office, Southwest Region, National Marine Fisheries Service, 2570 Dole Street, Honolulu, Hawaii 96822-2396 (808/955-8831); and
Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731-7415 (213/514-6196).

Dated: December 13, 1991.

Nancy Foster,

Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 91-30380 Filed 12-19-91; 8:45 am]

BILLING CODE 3510-22-M

Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Modified Permit No. 677 (P442) (Modification No. 1).

Notice is hereby given that pursuant to the provisions of § 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), Scientific Research Permit No. 677 was issued to Audrey Dianne Kopec, Romberg Tiburon Center for Environmental Studies, San Francisco State University, on July 27, 1989 (54 FR 31869). The Permit has been modified to authorize: Harassment of up to 300 additional harbor seals annually during collection of scats; collection of blood samples from an additional 30 of the 100 seals originally authorized to be taken annually; collection of 60cc rather than 30cc of blood from adult seals only; collection of bacterial swabs from 60 of the 100 seals originally authorized, and administration of a small dose of tetracycline to all seals captured. Special Condition B.3 is modified to include the requirement to notify the Southwest Regional Office prior to conducting modified research in order to coordinate activities between all other agencies.

All other conditions currently contained in the Permit remain in effect.

This Modification is effective upon publication in the **Federal Register**.

Documents submitted in connection with the above modification are available for review, by appointment, by interested persons in the following offices:

Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Highway, SSMC1, Room 7324, Silver Spring, Maryland 20910 (301/427-2289); and
Southwest Region, National Marine Fisheries Service, NOAA, 300 South Ferry Street, Terminal Island, California 90731-7415 (213/514-6196).

Dated: December 13, 1991.

Nancy Foster,

Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Modification No. 5 to Permit No. 629 (P10D).

Notice is hereby given that pursuant to the provisions of § 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216, Public Display Permit No. 629 issued to Sea Life Park, Makapuu Point, Waimanalo, Hawaii 96795 and subsequent Modifications 1-4 is further modified as follows:

Add to Section B.3:

"The authority to import up to four (4) killer whales (*Pseudorca crassidens*), presently being held at Kamogawa Sea World, shall

extend from date of issuance through April 30, 1992."

All other conditions of the original Permit and subsequent modifications shall remain in force.

This modification is effective upon publication in the **Federal Register**.

Documents pertaining to the Permit and its modifications are available for review, by appointment, in the following offices:

Permits Division, Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Highway, SSMC#1, Room 7324, Silver Spring, Maryland 29010, (301/427-2289);
Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731-7415, (213/514-6196); and
Pacific Area Office, 2570 Dole Street, Room 106, Honolulu, Hawaii 96822-2396 (808/955-8831).

Dated: December 16, 1991.

BILLING CODE 3510-22-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List, Additions and Deletion

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to and Deletion from Procurement List.

SUMMARY: This action adds to the Procurement List commodities and services to be furnished by nonprofit agencies employing persons who are blind or have severe disabilities, and deletes from the Procurement List a commodity previously furnished by such agencies.

EFFECTIVE DATE: January 21, 1992.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: On September 13, October 25, November 1, and December 2, 1991, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (56 FR 46602, 55288, 56199 and 61234) of proposed addition to and deletion from the Procurement List:

Additions

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to produce the commodities and provide the services at a fair market price and impact of the additions on the current or most recent contractors, the Committee has determined that the commodities and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.4.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

a. The actions will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The actions will not have a serious economic impact on any contractors for the commodities and services listed.

c. The actions will result in authorizing small entities to produce the commodities and provide the services procured by the Government.

Accordingly, the following commodities and services are hereby added to the Procurement List:

Commodities

Robe, Dressing
6532-01-098-8344
6532-01-098-8345

Services

Janitorial/Custodial
Maintenance, Line & Operations Buildings
Springfield, Missouri

Janitorial/Custodial
IRS Philadelphia Service Center
South and North Buildings
11501 and 11601 Roosevelt Boulevard
Philadelphia, Pennsylvania

Laundry Services
Naval Station
Long Beach, California

This action does not affect contracts awarded prior to the effective date of this addition or options exercised under those contracts.

Deletion

After consideration of the relevant matter presented, the Committee has determined that the commodity listed below is no longer suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.4.

Accordingly, the following commodity is hereby deleted from the Procurement List:

Ash Receiver, Tobacco
9920-00-682-6757

E.R. Alley, Jr.,
Deputy Executive Director.

BILLING CODE 6820-33-M

Procurement List, Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received proposals to add to the Procurement List a commodity and a service to be furnished by nonprofit agencies employing persons who are blind or have severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: January 21, 1992.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodity and service listed below from nonprofit agencies employing persons who are blind or have severe disabilities.

It is proposed to add the following commodity and service to the Procurement List:

Commodity

Preventive Dentistry Kit, Patient
6520-00-985-8554

Service

Janitorial/Custodial
#3 U.S. Army Reserve Center
400 Dry Hill Road
Beckley, West Virginia

E. R. Alley, Jr.,
Deputy Executive Director.

COMMODITY FUTURES TRADING COMMISSION

Chicago Mercantile Exchange Proposed Rule Amendments Relating to Deposit of Stock as Performance Bond

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of Proposed Contract Market Rule Amendments.

SUMMARY: The Chicago Mercantile Exchange ("CME" or "Exchange") has submitted proposed rule amendments to the Commodity Futures Trading Commission ("Commission") for its review. The purpose of the amendments is to add stock to the list of allowable performance bond assets that may be deposited with the CME's Clearing House.

Acting pursuant to the authority delegated by Commission Regulation 140.96, the Director of the Division of Trading and Markets ("Division"), with the concurrence of the General Counsel, has determined, on behalf of the Commission, that publication of the proposed rule amendments is in the public interest and will assist the Commission in considering the views of interested persons. Accordingly, the Division, on behalf of the Commission, is publishing the proposed rule amendments for public comment.

DATES: Comments must be received on or before January 21, 1992.

FOR FURTHER INFORMATION CONTACT: John C. Lawton, Associate Director, or Elizabeth A. Patterson, Special Counsel, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION: By letters dated January 7, 1991 and August 30, 1991, the CME submitted proposed amendments to Exchange Rules 821 and 825 for Commission approval pursuant to section 5a(12) of the Commodity Exchange Act. The proposed amendments to Rules 821 and 825 would add equity securities to the list of margin assets that clearing members are permitted to deposit with the Clearing House as margin. The amendments to Rule 825 also would provide that the posting of stock as margin would be subject to terms and conditions prescribed by the Exchange's Clearing House Committee.

The Exchange has stated that the proposed amendments would enable clearing firms that hold portfolios of equity securities to use the securities to meet their performance bond requirements at the CME Clearing House in either the house or customer origin. The proposal would allow clearing firms to meet margin requirements in the customer origin by passing through to the Clearing House securities deposited as margin by their customers.[1]

Under the CME proposal, the Clearing House would accept equity securities only to meet a clearing member's "reserve" performance bond requirement. The Exchange states that this "reserve" requirement would be an amount the CME Margin Committee and Board of Governors determined was advisable for the Clearing House to hold in excess of the "core" margin requirement.

Acting pursuant to the authority delegated pursuant to Commission Regulation 140.96, the Director of the Division, with the concurrence of the General Counsel, has determined, on behalf of the Commission, that publication of these proposed amendments is in the public interest and will assist the Commission in considering the views of interested persons. Accordingly, the Division, on behalf of the Commission, is publishing the proposed rule amendments for public comment. The Commission requests comments on any aspects of the proposed rule amendments that members of the public believe may raise issues under the Act or Commission regulations.

Copies of the CME's submissions are available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Copies may also be obtained through the Office of the Secretariat at the above address or by telephoning (202) 254–6314.

Any person interested in submitting written data, views or comments on the proposed rule amendments should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, Dc 20581 by the specified date.

Issued in Washington, DC on December 16, 1991.

Andrea M. Corcoran,

Director, Division of Trading and Markets.

[FR Doc. 91–30481 Filed 12–19–91; 8:45 am]

BILLING CODE 6351–01–M

[1] Existing CME Rule 827.B. permits clearing members to accept equity securities as margin assets from their customers.

Chicago Mercantile Exchange Proposed Rule Amendments Relating to Deposit of Shares of a Mutual Fund as Performance Bond

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of Proposed Contract Market Rule Amendments.

SUMMARY: The Chicago Mercantile Exchange ("CME" or "Exchange") has submitted proposed rule amendments to the Commodity Futures Trading Commission ("Commission") for its review. The purpose of the amendments is to add shares of mutual funds to the list of allowable performance bond assets that may be deposited with the CME's Clearing House and clearing members.

Acting pursuant to the authority delegated by Commission Regulation 140.96, the Director of the Division of Trading and Markets ("Division"), with the concurrence of the General Counsel, has determined, on behalf of the Commission, that publication of the proposed rule amendments is in the public interest and will assist the Commission in considering the views of interested persons. Accordingly, the Division, on behalf of the Commission, is publishing the proposed rule amendments for public comment.

DATES: Comments must be received on or before January 21, 1992.

FOR FURTHER INFORMATION CONTACT: John C. Lawton, Associate Director, or Christopher K. Bowen, Attorney, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION: By a letter dated April 29, 1991, the CME submitted proposed amendments to Exchange Rules 821, 825 and 827 under section 5a(12) of the Commodity Exchange Act. Currently, Rules 821 and 827 relate to margin requirements and specify the forms of margin that may be accepted by the Clearing House and clearing members. Current rule 825 enumerates the types of "Treasury securities" which may be deposited with the CME Clearing House as margin.

The proposed amendments to Rules 821, 825 and 827 would permit shares of mutual funds to be deposited with the Clearing House and with clearing members as margin. The amendments to Rule 825 and 827 also would require that acceptance of such shares would be subject to terms and conditions prescribed by the Exchange's Clearing House Committee.

The Exchange has stated that the usage of mutual fund shares as margin would offer clearing members and their customers an "income-producing alternative for use as a performance bond asset which will permit deposits and withdrawals (*i.e.*, transfers of shares) with complete finality between clearing members and their customers and between clearing members and the Clearing House at any time during the operating hours of the fund."

Acting pursuant to the authority delegated pursuant to Commission Regulation 140.96, the Director of the Division, with the concurrence of the General Counsel, has determined, on behalf of the Commission, that publication of these proposed amendments is in the public interest and will assist the Commission in considering the views of interested persons. Accordingly, the Division, on behalf of the Commission, is publishing the proposed rule amendments for public comment. The Commission requests comments on any aspects of the proposed rule amendments that members of the public believe may raise issues under the Act or Commission regulations.

Copies of the CME submission are available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Copies may also be obtained through the Office of the Secretariat at the above address or by telephoning (202) 254–6314.

Any person interested in submitting written data, views or comments on the proposed rule amendments should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581 by the specified date.

Issued in Washington, DC, on December 16, 1991.

Andrea M. Corcoran,

Director, Division of Trading and Markets.

[FR Doc. 91–30482 Filed 12–19–91; 8:45 am]

BILLING CODE 6351–01–M

DEPARTMENT OF DEFENSE

Office of the Secretary

Determinations; Excess Landing Craft Utility (LCUs)

Pursuant to the reporting requirements of section 517 of the Foreign Assistance Act of 1961 (FAA) this document provides notification that during Fiscal Year 1992 the United States Government will transfer to the Government of Colombia four excess Landing Craft Utility (LCU). The total value of the ships is estimated to be $571,000. The original acquisition value of the ships was $1,424,000.

This action is required to ensure that Colombia is afforded the opportunity of obtaining these ships at no cost. These ships are needed to enable the military forces in Colombia to participate in a comprehensive national anti-narcotics enforcement program, by conducting activities within Colombia to prevent the production, processing, trafficking, transportation, and consumption of illicit drugs or other controlled substances.

In accordance with section 517(c) FAA the recipient country will agree in the associated Letter of Offer and Acceptance that it will ensure that these ships will be used primarily in support of anti-narcotics activities.

The Acting Director, Defense Security Assistance Agency, Glenn A. Rudd, certifies that the LCUs are needed by Colombia and determines that there will be no adverse impact on U.S. military readiness as a result of these transfers.

Dated: December 16, 1991.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810–01–M

Determinations; Excess Meals Ready to Eat (MREs)

Pursuant to the reporting requirements of section 517 of the Foreign Assistance Act of 1961 (FAA) this document provides notification that during Fiscal Year 1992 the United States Government will transfer to the Government of Colombia 209,000 excess meals ready to eat (MREs).

These items are required to enable the military forces in Colombia to participate in a comprehensive national antinarcotics enforcement program, by conducting activities within Colombia to prevent the production, processing, trafficking, transportation, and consumption of illicit drugs or other controlled substances. They will be provided at no cost with the exception of transportation charges.

In accordance with section 517(c) FAA the recipient country will agree in the associated Letter of Offer and Acceptance that it will ensure that these items will be used primarily in support of anti-narcotics activities.

The Acting Director, Defense Security Assistance Agency, Glenn A. Rudd, determines that there will be no adverse impact on U.S. military readiness as a result of these transfers.

Dated: December 16, 1991.

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. ER92-118-000, et al.]

Florida Power Corporation, et al.; Electric rate, Small Power Production, and Interlocking Directorate Filings

December 13, 1991.

Take notice that the following filings have been made with the Commission:

1. Florida Power Corporation

[Docket No. ER92-118-000]

Take notice that on December 2, 1991, Florida Power Corporation ("Florida Power") made a filing to clarify information provided in the filing in the above docket made on October 11, 1991.

The filing clarifies the following points: (1) Present versus proposed fuel charges; (2) the difference between the fuel charge for Seminole Electric Cooperative, Inc. ("SECI") versus the fuel charge for the cities of Kissimmee/St. Cloud; (3) SECI's kW allocation; (4) actual versus projected billing comparisons.

Please permit the filing as amended above to become effective on January 1, 1991 as requested in Florida Power's original transmittal letter.

Comment date: December 27, 1991, in accordance with standard Paragraph E end of this notice.

2. PacifiCorp Electric Operations

[Docket No. ER91-553-000]

Take notice that PacifiCorp Electric Operations ("PacifiCorp"), on December 10, 1991, tendered for filing, in accordance with the Commission staff's request, an amended filing of the Electric Supply Agreement ("Agreement") between PacifiCorp and Brigham City Corporation ("Brigham").

The Amendment provides additional information relating to the initial charges for capacity and energy and the escalator used to establish future energy prices.

PacifiCorp respectfully re-news its request for a waiver of prior notice and that an effective date of October 1, 1989 be assigned by the Commission.

Copies of this filing have been supplied to Brigham and the Utah Public Service Commission.

Comment date: December 27., 1991, in accordance with Standard Paragraph E at the end of this notice.

3. Iowa Public Service Company

[Docket No. ER91-686-000]

Take notice that on December 10, 1991, Iowa Public Service Company (IPS) tendered for filing an amendment to the filing an executed Transmission Service Agreement whereby Iowa Public Service Company (IPS) will provide Cedar Falls Utilities (CPU) with transmission service, commencing January 1, 1985, for CFU's share of power and energy from George Neal Generating Station Unit No. 4. This amendment is in the form of a check for $13,080 for Class III rate filing.

IPS respectfully requests a waiver of the Commission's rules so that the Transmission Service Agreement may be approved retroactive to January 1, 1985.

IPS states that copies of this filing were served on Cedar Falls Utilities and the Iowa Utilities Board.

Comment date: December 27, 1991, in accordance with Standard Paragraph E at the end of this notice.

4. Montaup Electric Company

[Docket No. ER92-148-000]

Take notice that on November 20, 1991, as supplemented by letter of December 4, 1991, Montaup Electric Company ("Montaup") amended its filing in this docket (1) to clarify the relationship between the two alternative sets of rate schedules included with its filing and (2) to make clear that Montaup will true up its PCAC charges to the extent necessary to reflect the final charges to Montaup resulting from the Ocean State Power No. II proceeding in Docket No. ER91-576-000. Montaup continues to request that its filing be allowed to become effective on January 1, 1992.

Comment date: December 27, 1991, in accordance with Standard Paragraph E at the end of this notice.

5. Mississippi Power Company

[Docket No. ER92-218-000]

Take notice that Mississippi Power Company on the 11th day of December, 1991, tendered for filing a revision of the rates included in its FERC Electric Service Tariff, First Revised Volume No. 1. The revised rates would increase revenues from jurisdictional sales by $3,260,497 based on the 12-month period ending December 31, 1992. The charge per delivery point and the kW charge have been increased and the kWh charge has been reduced.

The Company estimates the rate of return on its properties devoted to serving its wholesale all requirements customers to be 7.9971% from revenues which it would receive under the existing rates during the 12-month period ending December 31, 1992. The Company states that such return would be increased to 10.3918% with the increased revenue under the tendered rates.

Posting of the filing has been accomplished with the public utility's jurisdictional customers and the Mississippi Public Service Commission.

Comment date: December 27, 1991, in accordance with Standard Paragraph E at the end of this notice.

6. PacifiCorp Electric Operations

[Docket No. ER92-185-000]

Take notice that PacifiCorp Electric Operations ("PacifiCorp"), on December 11, 1991, tendered for filing an amendment to its November 14, 1991 filing of the Operation and Maintenance Agreement ("Agreement") in this Docket.

The amended filing is being submitted to provide a revised determination of the Transmission Administrative and General Expense Factor utilized to determine the Annual Charge for operation and maintenance service under the Agreement.

PacifiCorp renews its request for waiver of the Commission's regulations in order to allow an effective date of October 1, 1991 to be assigned to the Agreement.

Copies of this amended filing were supplied to Utah Associated Municipal Power Systems, the Utah Public Service Commission and the Public Utility Commission of Oregon.

Comment date: December 27, 1991, in accordance with Standard Paragraph E at the end of this notice.

7. Iowa Power Company

[Docket No. ER92-8-000]

Take notice that on December 11, 1991, Iowa Power Co. (Iowa Power) tendered for filing the second amendment to the original filing for this docket dated October 1, 1991.

Iowa Power states that the second amendment to the Interchange Agreement filing provides revised service schedules for Service Schedule B—Participation Power and Energy, Service Schedule C—Peaking Power and Energy, and Service Schedule H—Scheduled Outage and Energy. The amended filing also includes requested cost support for Service Schedule E—Short Term Power and Energy and Service Schedule G—Equalization Power and Energy.

Iowa Power requests an effective date of May 1, 1991, and therefore requests a waiver of the Commission's notice request requirements.

Comment date: December 27, 1991, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 91-30404 Filed 12-19-91; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 2727-024 Maine]

Bangor Hydro-Electric Co.; Availability of Environmental Assessment

December 13, 1991.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47910), the Office of Hydropower Licensing (OHL) has reviewed the application for amendment of license for the Ellsworth Hydroelectric Project. The amendment includes extension of the existing dam by constructing a concrete flood control structure along the downstream toe of the existing embankment and west of the existing gate structure. The proposed structure would function as an emergency spillway to back-up the existing unstable western embankment if overtopped by flood waters in Graham Lake. The project is located on the Deep River in Hancock County, Maine. The staff of OHL's Division of Project Compliance and Administration has prepared an Environmental Assessment (EA) for the proposed action. In the EA, staff concludes that approval of the amendment of license would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Reference and Information Center, room 3308, of the Commission's Offices at 941 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. JD92-01180T]

Arkansas Oil and Gas Commission; NGPA Determination by Jurisdictional Agency Designating Tight Formation

December 16, 1991.

Take notice that on November 12, 1991, the Arkansas Oil and Gas Commission (Arkansas) submitted the above referenced notice of determination to the Commission, pursuant to § 271.703(c)(3) of the Commission's regulations, that the Mansfield Sand within the Mansfield Field, in Sebastian and Scott Counties, Arkansas, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). Arkansas defines the Mansfield Sand as those sources of supply which are stratigraphically equivalent to the interval between the subsurface depths of 1,500 feet and 2,058 feet as measured from the electric log on the Diamond Shamrock Corporation No. 1 Chumley well, located 2,040 feet from the south line and 2,695 feet from the east line of Section 2, T4N, R31W, in Sebastian County, Arkansas. The designated area consist of the following portions of land:

Sections (inclusive)	Township & Range
Section 6	T4N, R29W
Sections 1-12	T4N, R30W
Sections 1-5	T4N, R31W
Sections 8-12	T4N, R31W
Sections 31 and 32	T5N, R29W
Sections 31-36	T5N, R30W
Sections 33-36	T5N, R31W

The notice of determination also contains Arkansas' findings that the Mansfield Sand within the subject area meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 7 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

[FR Doc. 91-30398 Filed 12-19-91; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP92-220-000, et al.]

Carnegie Natural Gas Company, et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Carnegie Natural Gas Company

[Docket No. CP92-220-000]

December 11, 1991.

Take notice that on December 6, 1991, Carnegie Natural Gas Company (Carnegie), 800 Regis Avenue, Pittsburgh, Pennsylvania 15236, filed in Docket No. CP92-220-000 an application pursuant to sections 7(b) and 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sell of natural gas, and for permission and approval to abandon such sales upon termination of the underlying service agreement, and permission and approval to abandon service under existing Rate Schedule LVIS, all as more fully set forth in the application which is on file with the

VOL 56 ISS 245 DEC 20 1991 UMI

Commission and open to public inspection.

Carnegie requests a blanket certificate with pre-granted abandonment authority to offer a new interruptible sales service under Rate Schedule SEGSS on a non-discriminatory basis to all existing and prospective jurisdictional customers, both on-system and off-system. Carnegie states that service under Rate Schedule SEGSS would be subject to the availability of capacity and gas supplies in excess of its firm sales obligations.

Carnegie proposes to charge a negotiated rate for the interruptible sales service which would fall between a stated maximum and minimum rate. Carnegie explains that the maximum rate would equal Carnegie's 100 percent load factor rate for firm sales service plus adjustments made pursuant to section 23, 24, and 26 of the General Terms and Conditions of Carnegie's FERC Gas Tariff. Carnegie states that the minimum rate would equal Carnegie's average gas costs as shown on Sheet No. 9 of Carnegie's FERC Gas Tariff, plus variable costs, plus adjustments under sections 24 and 26 of the General Terms and Conditions of Carnegie's FERC Gas Tariff.

Carnegie states that a "no-bump" rule would apply to service under Rate Schedule SEGSS for sales occurring during the summer period April 1 through October 31 of each year. Carnegie explains that, under the "no-bump" rule, SEGSS customers contracting for interruptible gas purchases at the beginning of each summer month would not be displaced during such month by another customer willing to pay a higher rate. Carnegie also explains that during the winter period, November 1 through March 31, an existing SEGSS customer may be displaced by another customer willing to pay a higher rate, subject to the existing customer's right to retain service by agreeing to match or exceed the "bumper's" price.

Carnegie also requests authorization to abandon service under existing Rate Schedule LVIS upon the receipt of authorization to provide interruptible sales service under Rate Schedule SEGSS. Carnegie states that service under Rate Schedule LVIS will no longer be needed as it offers an interruptible sales service inferior to that being offered under Rate Schedule SEGSS.

Carnegie states that this certificate filing is an integral part of the Settlement Agreement filed concurrently with the Commission in Docket Nos. RP88–131–000, *et al.* Carnegie urges the Commission to act expeditiously and grant Carnegie's application to permit service under Rate Schedule SEGSS to commence as soon as possible but, in no event, later than April 1, 1992.

Comment date: December 23, 1991, in accordance with Standard Paragraph F at the end of this notice.

2. Florida Gas Transmission Company

[Docket No. CP92–182–000]

December 12, 1991.

Take notice that on November 15, 1991, Florida Gas Transmission Company (FGT), P.O. Box 1188, Houston, Texas 77251–1188, filed in Docket No. CP92–182–000 an application pursuant to sections 7(b) and (c) of the Natural Gas Act for authorization to construct and operate natural gas pipeline facilities which would enable FGT to deliver an average of approximately 825,000 Mcf of additional natural gas per day (Mcfd) to its Florida customers, to provide firm transportation service under new Rate Schedule FTS–2, approval of initial incremental rates and to abandon certain previously certificated facilities, all as more fully set forth in the application, which is on file with the Commission and open to public inspection.

Specifically, FGT requests authorization to:

(a) Construct facilities necessary to provide incremental market area transportation service averaging 825 MMcfd into Florida. The facilities to be constructed and added to the system include approximately 141,400 horsepower of compression; mainline looping totaling 464.9 miles of 36-inch pipeline, 27.1 miles of 30-inch pipeline, and 80.7 miles of 26-inch pipeline; a west leg pipeline totaling approximately 161 miles of 30-inch pipeline; the St. Petersburg loop, totaling approximately 15.3 miles of 20-inch pipeline; the Sarasota loop, totaling approximately 10.5 miles of 16-inch pipeline and; 5.7 miles of 20-inch pipeline in Brevard County, Florida.

(b) Abandon certificated facilities by removal of 66.8 miles of 24-inch mainline loop, and authorization to replace it with 66.8 miles of 36-inch mainline loop; abandon by removal of 5.7 miles of 20-inch pipeline in Brevard County, Florida, and replacing it with 5.7 miles of 20-inch pipeline; and abandon facilities certificated at Compressor Station No. 5, because such facilities have previously been removed from plant in-service in 1984 and place in-service additional horsepower for compression at Compressor Station No. 5;

(c) Institute a new Rate Schedule FTS–2 under FGT's existing part 284 blanket certificate providing for service on the Phase III expansion facilities, institute a form of Service Agreement for service under Rate Schedule FTS–2 and institute revisions to the General Terms and Conditions applicable to Rate Schedule FTS–2 and service thereunder;

(d) Establish initial incremental rates applicable to firm service under Rate Schedule FTS–2, which would be predicated upon a 20-year levelized cost of service, with a two-part rate structure consisting of a reservation charge and a commodity charge;

(e) Enter into firm transportation service with Southern Natural Gas Company with volumes contracted for at 200 MMcfd in the winter season (November-April) and 300 MMcfd in the summer season (May-October), with the costs of the transportation service to be included in FGT's Phase III rates and the capacity to be treated as an extension of FGT's system; and

(f) Enter into a firm lease agreement with Transcontinental Gas Pipe Line Corporation for service on its Mobile Bay Pipeline, with capacity to be contracted for at 250 MMcfd, with the costs of such lease to be included in FGT's Phase III rates, and with the capacity to be treated as an extension of FGT's system.

In addition, concurrently with the issuance of this Notice Of Application, the Director, Office of Pipeline and Producer Regulation is issuing a data request in order to allow FGT to bring its application in compliance with applicable Commission Regulations. Further, take notice that within 15 days of satisfactory compliance with the data request, a technical conference will be held.

Comment date: January 2, 1992, in accordance with Standard Paragraph F at the end of the notice.

3. Energy Development Corporation, Complainant, v. CNG Transmission Corporation, Respondent.

[Docket No. CP92–213–000]

December 12, 1991.

Take notice that on November 26, 1991, Energy Development Corporation (EDC) filed a Formal Complaint against CNG Transmission Corporation (CNG) pursuant to rule 206 of the Commission's Rules of Practice and Procedure, 18 CFR 385.206.

In its complaint, EDC alleges that CNG is engaging in discriminatory actions against EDC by refusing EDC equal access to one of CNG's interstate pipelines located in Southern West Virginia.

Specifically, the complaint alleges that CNG has permitted large shippers of natural gas on CNG's pipeline to install and use artificial compression facilities while denying EDC the same right to install compression facilities.

The complaint further alleges that, as a result of the discriminatory actions referred to above, EDC is being financially harmed and is unable to compete on an equal basis with those producers who have been permitted to use compression.

EDC states that copies of its filing were served on CNG and its counsel of record.

Comment date: December 31, 1991, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

4. El Paso Natural Gas Company

[Docket No. CP92–225–000]

December 13, 1991.

Take notice that on December 9, 1991, El Paso Natural Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP92–225–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to operate as jurisdictional facilities certain delivery points that were installed pursuant to section 311 of the Natural Gas Policy Act (NGPA), under the blanket certificate issued in Docket No. CP82–435–000, pursuant to section 7 of the Natural Gas Act (NGA), all as more fully set forth in the request that is on file with the Commission and open to public inspection.

El Paso proposes to convert the authorization for the 28 delivery points listed below from NGPA section 311 to NGA section 7 in order to use the taps for transportation services rendered under El Paso's blanket certificate or case-specific 7(c) certificates. El Paso states that the change in authorization is requested in order to increase flexibility for the use of its facilities in light of changes in the regulations regarding facilities installed under Section 311 authorization.

5. Tennessee Gas Pipeline Company

[Docket No. CP92–228–000]

December 13, 1991.

Take notice that on December 11, 1991, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP92–228–000 a request pursuant to § 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212) for authorization to construct and operate delivery point facilities to accommodate deliveries of natural gas to Kentucky Ohio Gas Acquisition Group (Kentucky-Ohio), a local distribution company, under Tennessee's blanket certificate issued in Docket No. CP82–413–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Tennessee proposes to construct and operate delivery point facilities, consisting of a 4-inch hot tap assembly and interconnecting pipe and measurement facilities, in Greenup County, Kentucky. Tennessee further states that the new delivery point is included under the provisions of a gas transportation agreement dated November 15, 1991, with Kentucky-Ohio, and that all costs, projected to be $103,000, associated with the construction of the new delivery point would be borne by Kentucky-Ohio. Tennessee advises that the agreement provides for deliveries of 1,500 Dekatherms per day on an interruptible basis under Tennessee's Rate Schedule IT.

Comment date: January 27, 1992, in accordance with Standard Paragraph G at the end of this notice.

6. Blue Dolphin Pipe Line Company

[Docket No. CP92–232–000]

December 13, 1991.

Take notice that on December 11, 1991, Blue Dolphin Pipe Line Company (Blue Dolphin), 11 Greenway Plaza, suite 1606, Houston, Texas 77046, filed in Docket No. CP92–232–000 a petition under Rule 207 of the Commission's Rules of Practice and Procedure (18 CFR 385.207) for a declaratory order declaring that its facilities are in fact gathering facilities that are not subject to Commission jurisdiction consistent with section 1(b) of the Natural Gas Act, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Blue Dolphin states that it is a wholly-owned subsidiary of Blue Dolphin Energy Company, a Delaware Corporation, whose primary business is transporting natural gas for the account of several producer/shippers. Blue Dolphin states that it owns and operates a short, low pressure, dual-phase, natural gas and oil pipeline extending from a platform located offshore of Texas in the Gulf of Mexico, to an onshore point located on the 105 acre Buccaneer Plant site in Freeport, Texas and then continuing a very short distance to its terminus at the facilities of Dow Chemical Company (Dow) in Freeport. Blue Dolphin states that it holds a certificate of public convenience and necessity issued under section 7 of the Natural Gas Act in Docket No. CP65–323. Blue Dolphin further states that it is an open access, transportation only, non-major interstate pipeline.

It is explained that Blue Dolphin was constructed in the mid-1960s by Shell Oil Company for the sole purpose of delivering crude oil and gas production from the Buccaneer Field to the plants and intrastate operations of Dow, an industrial enduser in Freeport. Blue

VOL 56 ISS 245 DEC 20 1991 UMI

Dolphin indicates that it is regulated by the Commission only because 21 miles of its pipeline is located in the federal offshore waters. Blue Dolphin notes that it makes no sales, has no system supply, has no LDC customers, has no active marketing affiliate, has no take or pay issues, and connects only with a large industrial company. It is asserted that Blue Dolphin's parent is a small producer primarily focused on oil and gas exploration, production, and development activities which has no ownership or other ties to any other regulated or unregulated natural gas pipeline.

Blue Dolphin states that recent Commission decisions have clarified gathering and set forth, on a case by case basis, the relevant criteria to be considered in making determinations as to whether facilities qualify as gathering. Blue Dolphin states that these considerations include: (1) Diameter and/or length of the pipeline, (2) the location of any processing plant or compression, (3) the location of wells along all or part of the pipeline, (4) geographic configuration of the facilities, and (5) operating pressures. Blue Dolphin adds that in an offshore situation, the orientation of the pipeline owner as a small producer and the competitive nature of pipeline's services are relevant.

Blue Dolphin asserts that it meets the recently clarified "primary function" test set forth in *Amerada Hess. et al.*[1] and, in addition, meets all of the physical criteria tests. Blue Dolphin notes that in *Amerada Hess*, the FERC stated that since it is "applying a sliding scale to the length criteria for offshore pipeline situations and even for onshore facilities, the size and length of the line is no longer the major determining factor where other factors lead us to the conclusion that the primary function is gathering." According, Blue Dolphin argues that its physical size should be considered in conjunction with its overall production/gathering history and orientation, its current small business status, as well as the highly competitive nature of its business environment. In addition, Blue Dolphin avers that the public interest would be served if Blue Dolphin were allowed to compete vigorously as a gathering system with the flexibility available to non-jurisdictional enterprises. Based on these considerations, Blue Dolphin requests an expedited order declaring that its facilities are gathering facilities that are not subject to the Commission's jurisdiction consistent with section 1(b) of the Natural Gas Act.

Comment date: January 3, 1991, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

[1] 52 FERC ¶ 61,268 (1990).

7. Tennessee Gas Pipeline Company

[Docket No. CP92-219-000]

December 13, 1991.

On December 4, 1991, Tennessee Gas Pipeline Company (Tennessee), filed in Docket No. CP92-219-000 an application pursuant to section 7(b) of the Natural Gas Act for approval to abandon the transportation service it currently renders to ANR Pipeline Company (ANR) under Rate Schedule T-47, to convert the service to transportation service rendered under Tennessee's blanket certificate, and to allow Tennessee to waive the provisions of its tariff to permit ANR to retain the same priority of service as it had under Rate Schedule T-47, all as more fully set forth in the application, which is on file with the Commission and open to public inspection.

Tennessee notes that the agreement it has with ANR is outdated and results in an inefficient and unfair allocation of the costs and capacity associated with the related service, thus bearing unduly low cost responsibility vis-a-vis other customers receiving comparable services. Tennessee also states that the rates charged ANR are inconsistent with the method used to design rates for its other similar transportation services. As a result, Tennessee's other customers are subsidizing ANR's service. Tennessee, believing that the rate methodology employed for ANR is neither equitable nor a fair assignment of the pipeline's costs responsibility, filed to abandon the initial transportation service rendered under T-47 and to replace it with a comparable service which Tennessee's other customers enjoy.

Comment date: January 3, 1992, in accordance with Standard Paragraph F at the end of this notice.

8. Trunkline Gas Company

[Docket No. CP2-221-000]

December 13, 1991.

Take notice that on December 6, 1991, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston Texas 77251-1642, filed in Docket No. CP92-221-000 an application pursuant to section 7(b) of the Natural Gas Act for an order granting permission and approval to abandon a transportation and exchange service provided to Columbia Gas Transmission Corporation (Columbia Gas) and Columbia Gulf Transmission Company (Columbia Gulf), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Trunkline states that by order issued August 6, 1982, in Docket No. CP2-141-000, *et al.* (20 FERC ¶ 62,216), Trunkline was authorized to provide an interruptible transportation and exchange service for Columbia Gas and Columbia Gulf under a transportation and exchange agreement (Agreement) dated December 29, 1981, as amended, and filed with the Commission as Rate Schedule TE-10 of Trunkline's FERC Gas Tariff, Original Volume No. 2. Trunkline further states that under this Agreement, Trunkline agreed to transport on behalf of Columbia Gulf up to 20,000 Mcf of natural gas per day from Eugene Island Block 392, offshore Louisiana, and Columbia Gas agreed to transport on behalf of Trunkline up to 20,000 Mcf of natural gas from West Cameron Block 624, offshore Louisiana. It is indicated that the balancing point is the interconnection between the facilities of Trunkline and Columbia Gulf located near Centerville, St. Mary Parish, Louisiana.

Trunkline states that pursuant to the Agreement, on December 19, 1990, Columbia Gas and Columbia Gulf gave written notice of their election to terminate the Agreement at the end of its primary term, December 31, 1991. Trunkline further states that it requests authority to abandon Rate Schedule TE-10 effective December 31, 1991.

Comment date: January 3, 1992, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to

jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. JD92-01851T Texas-15 Addition 2]

State of Texas; NGPA Determination by Jurisdictional Agency Designating Tight Formation

December 16, 1991.

Take notice that on December 6, 1991, the Railroad Commission of Texas (Texas) submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that the L Sand member of the Vicksburg Formation underlying a portion of Hildago County, Texas, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The notice covers the following acreage:

(A) L. Flores A-576, Porcion 76, Homeville Association Subdivision "D": Block 27—Lots 1 and 6, Blocks 28 thru 31, Block 32—Lots 1, 2 and 3, Block 13—Lots 1, 2 and 3, and Blocks 14 thru 20.

(B) P. Flores A-577, Porcion 77, Homeville Association Subdivision "A": Lots 1 thru 35, 39 thru 42, 49 and 50.

(C) P. Flores A-577, Porcion 77, Homeville Association Subdivision "B": Lots 105 thru 128.

(D) Dionisio Ramirez A-563, Porcion 78, Texan Gardens Subdivision, the most westerly 1/5 of Block 12—Lots 14 thru 17, and the most westerly 1/5 of Block 13—Lots 1 thru 17.

(E) 172.8 acres of land out of Porcion 77, Abstract 75, being the same land described in Deed from F. Davenport to F.V.W. Heard dated May 24, 1931, recorded in Volume 405, Page 68 of the Deed Records of Hidalgo County, Texas.

(F) 78.07 acres of land, more or less, being tract 12 out of the East part of Porcion 77, Pedro Flores Survey Abstract 577, Hidalgo County, Texas; and being more particularly described in Deed dated July 12, 1965, from Augustin Zamora to the Public, recorded in Volume 1126 Page 429 Hidalgo County, Texas.

(G) An additional tract composed of approximately 78 acres lying adjacent to and north of the tract described in (E) above.

The notice of determination also contains Texas' findings that the referenced portion of the L Sand member of the Vicksburg Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

BILLING CODE 6717-01-M

[Docket No. JD92-01850T Texas-22 Addition 6]

State of Texas; Determination by Jurisdictional Agency Designating Tight Formations

December 16, 1991.

Take notice that on December 6, 1991, the Railroad Commission of Texas (Texas) submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that certain portions of the Strawn Formation underlying Crockett County, Texas, qualify as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The designated area, containing approximately 19,250 acres, includes all of the Hunt-Baggett, W. (Strawn) and portions of Hunt-Baggett (Strawn North), Ozona SW (Strawn), and Thomason (Strawn) fields. The designated area consists of all sections of Block AAA, T.C.R.R. Survey; all sections in Block I, G.C. & S.F. Survey; the west 411 acres of section 3, all of sections 4, 5 and 6, the west 225 acres of section 7, and the north half and southwest quarter of section 8 of Block J, G.C. & S.F. Survey; sections 22, 26, 31 and 32, the east halves of sections 23 and 25, and the west half of section 27 of Block M, G.C. & S.F. Survey; section 7 of Block NG, G.C. & S.F. Survey; section 20 of Block NG, H. B. Montgomery Survey; sections 21, 22, 29 and 30 of Block QR; the west 324 acres of section 2 Block QR2, Wm. Powell Survey; and section 25 Block ST, H.E. & W.T. Survey, all in Crockett County.

The notice of determination also contains Texas' findings that the referenced portions of the Strawn Formation meet the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. JD92-01752T Texas-2 Addition 3]

State of Texas; NGPA Determination by Jurisdictional Agency Designating Tight Formation

December 16, 1991.

Take notice that on November 20, 1991, as supplemented on December 13, 1991, the Railroad Commission of Texas (Texas) submitted the above-referenced notice of determination pursuant

VOL 56 ISS 245 DEC 20 1991 UMI

§ 271.703(c)(3) of the Commission's regulations, that the Canyon Formation underlying certain portions of Tom Green County, Texas, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The notice covers certain lands in the area of the Hercules (Canyon) Field and includes the following surveys:

Survey Name	Section	Abstract
H. Fay	277	187
L. Poock	278	1788
F. A. Gottwald	279	233

The notice of determination also contains Texas' findings that the referenced portion of the Canyon Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP92-53-000]

Kern River Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

December 13, 1991.

Take notice that on November 29, 1991, Kern River Gas Transmission Company (Kern River) tendered for filing a revised Original Volume No. 1 to its FERC Gas Tariff, in compliance with the Commission's orders of January 24, 1990 and November 2, 1990 in Docket Nos. CP89-2047 and CP89-2048. Kern River proposes a January 31, 1992 effective date.

Kern River states that it revised its tariff provisions concerning renegotiation of the reservation charge, capacity assignment, requests for service and the statement of rates. Kern River further states that it is reflecting in its tariff the terms of the service agreements negotiated between Kern River and Chevron U.S.A. Inc., Shell Western E&P, Inc., Mobil Natural Gas, Inc. and Union Pacific Fuels Company.

Kern River states that service on its pipeline will commence on or about January 31, 1992.

Kern River states that copies of the filing have been served upon all of the jurisdictional transportation customers and on the parties to the prior proceedings.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 20, 1991. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

[Project No. 2212-001—Wisconsin]

Weyerhaeuser Paper Co.; Establishing Procedures for Relicensing and a Deadline for Submission of Final Amendments

December 13, 1991.

Th license for the Rothschild Dam Hydro Project No. 2212, located on the Wisconsin River in Marathon County, Wisconsin expires on July 31, 1993. The statutory deadline for filing an application for new license was July 31, 1991. An application for new license has been filed as follows:

Project No.	Applicant	Contact
P-2212-001	Weyerhaeuser Paper Co., 200 Grand Avenue, Rothschild, WI 54475.	William V. Dohr, Weyerhaeuser Paper Co., 200 Grand Avenue, Rothschild, WI 54475, (715) 359-3101.

The following is an approximate schedule and procedures that will be followed in processing the application:

Date	Action
October 10, 1991..	Commission notified applicant that its application has been accepted.
October 18, 1991..	Commission issued public notice of the accepted application establishing dates for filing motions to intervene and protests.
December 30, 1991..	Commission's deadline for applicant for filing a final amendment, if any, to its application.
February 15, 1992..	Commission notifies all parties and agencies that the application is ready for environmental analysis.

Upon receipt of all additional information and the information filed in response to the public notice of the acceptance of the application, the Commission will evaluate the application in accordance with applicable statutory requirements and take appropriate action on the application.

Any questions concerning this notice should be directed to Ed Lee at (202) 219-2809.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Office of Fossil Energy

[FE Docket No. 91-95-NG]

Niagara Mohawk Power Corp.; Application To Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of application for blanket authorization to import natural gas from Canada.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on November 1, 1991, of an application filed by Niagara Mohawk Power Corporation (Niagara Mohawk), requesting blanket authorization to import up to 77 Bcf of natural gas from Canada over a two-year period commencing with the date of first delivery. Niagara Mohawk intends to use existing pipeline facilities within the United States and plans to submit quarterly reports detailing each transaction.

The application is filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204-111 and 0204-127. Protests, motions to intervene, notices of intervention and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed in Washington, DC, at the address listed below no later than 4:30 p.m., Eastern time, January 21, 1992.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-056, FE-50, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478.

FOR FURTHER INFORMATION CONTACT:

Thomas Dukes, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-070, FE-53, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9590.

Diane Stubbs, Office of Assistant General Counsel for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E-042, GC-14, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6667.

SUPPLEMENTARY INFORMATION: Niagara Mohawk, a corporation organized under the laws of the State of New York with its principal place of business in Syracuse, New York, provides natural gas service to nearly 500,000 New York customers and supplies its gas-fired electric generating plants within its system. According to its application, Niagara Mohawk would import gas from a variety of Canadian producers, under both firm and interruptible arrangements and at market responsive prices, for sale to customers in its New York service area. Gas supplied under these arrangements would be transported by TransCanada PipeLines Limited (TransCanada) to the international border near Iroquois, Ontario, where TransCanada's facilities interconnect with the Iroquois Gas Transmission System (Iroquois). Iroquois would transport the imported volumes to CNG Transmission Corporation at Canajoharie, New York, for redelivery to Niagara Mohawk. Niagara Mohawk states the short-term, blanket authority is needed pending an amendment to the utility's application for long-term authority granted conditionally by DOE/FE Opinion and Order No. 351 (Order 351), 1 FE ¶70,260. The arrangement underlying Order 351 was based upon planned purchases from TransCanada and construction by TransCanada of an extension from its mainline to Gananoque, Ontario, to deliver gas to Niagara Mohawk's planned new Trans York Pipeline at the U.S.-Canadian border. The National Energy Board of Canada denied the pipeline extension proposed by TransCanada thus requiring Niagara Mohawk to negotiate amended purchase and transportation arrangements.

The decision on Niagara Mohawk's application for import authority will be made consistent with DOE's natural gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. Niagara Mohawk asserts that gas supplied under the proposed import arrangement would be competitive, needed, and secure. Parties opposing the import arrangement bear the burden of overcoming this assertion.

NEPA Compliance. The National Environmental Policy Act (NEPA), 42 U.S.C. 4321, *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures. In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the above address.

If is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Niagara Mohawk's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056 at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, December 16, 1991.

Anthony J. Como,

Director, Office of Coal and Electricity, Office of Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450-01-M

[Docket No. FE C&E 91-24; Certification Notice—92]

Filing Certification of Compliance: Coal Capability of New Electric Powerplant Pursuant to Provisions of the Powerplant and Industrial Fuel Use Act, as Amended

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of filing.

SUMMARY: Title II of the Powerplant and Industrial Fuel Use Act of 1978 (FUA), as amended (42 U.S.C. 8301 *et seq.*), provides that no new electric powerplant may be constructed or operated as a base load powerplant without the capability to use coal or another alternate fuel as a primary energy source (FUA section 201(a), 42 U.S.C. 8311 (a), Supp. V. 1987). In order to meet the requirement of coal capability, the owner or operator of any new electric powerplant to be operated as a base load powerplant proposing to use natural gas or petroleum as its primary energy source may certify, pursuant to FUA section 201(d), to the

VOL 56 ISS 245 DEC 20 1991 UMI

Secretary of Energy prior to construction, or prior to operation as a base load powerplant, that such powerplant has the capability to use coal or another alternate fuel. Such certification establishes compliance with section 201(a) as of the date it is filed with the Secretary. The Secretary is required to publish in the **Federal Register** a notice reciting that the certification has been filed. One owner and operator of proposed new electric base load powerplant has filed self/certification in accordance with section 201(d).

Further information is provided in the **SUPPLEMENTARY INFORMATION** section below.

SUPPLEMENTARY INFORMATION: The following company has filed self-certification:

Name	Date received	Type of facility	Megawatt capacity	Location
Boston Thermal Cogeneration Corporation, Boston, MA	12-09-91	Topping cycle	25	Boston, MA.

Amendments to the FUA on May 21, 1987 (Pub. L. 100-42), altered the general prohibitions to include only new electric base load powerplants and to provide for the self-certification procedure.

Copies of this self-certification may be reviewed in the Office of Fuels Programs, Fossil Energy, room 3F-056, FE-52, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, or for further information call Myra Couch at (202) 586-6769.

Issued in Washington, DC on December 13, 1991.

Anthony J. Como,

Director, Office of Coal & Electricity, Office of Fuels Programs, Fossil Energy.

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Cases Filed During the Week of November 8 through November 15, 1991

During the Week of November 8 through November 15, 1991, the appeals and applications for exception or other relief listed in the Appendix of this Notice were filed with the Office of Hearings and Appeals of the Department of Energy. Submissions inadvertently omitted from earlier lists have also been included.

Under DOE procedural regulations, 10 CFR part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

Dated: December 12, 1991.

George B. Breznay,

Director, Office of Hearings and Appeals.

List of Cases Received by the Office of Hearings and Appeals

[Week of November 8 through November 15, 1991]

Date	Name and location of applicant	Case No.	Type of submission
11/12/91	EDG/Rocky Home Dairy, Inc. Hardin, KY	RR311-1	Request for Modification/Rescission in the EDG refund proceeding. If Granted: The August 30, 1991 Decision and Order (Case No. RF311-1) issued to Rocky Home Dairy, Inc., regarding the firm's Application for Refund submitted in the EDG refund proceeding would be modified.
Do	INEL Research Bureau Moscow, ID	LFA-0164	Appeal of an Information Request Denial. If Granted: Inel Research Bureau would receive a waiver of all fees incurred in the processing of the DOE information requested pursuant to the Freedom of Information Act.
11/13/91	Anne S. Kelley Kennewick, WA	LFA-0165	Appeal of an Information Request Denial. If Granted: Anne S. Kelley would receive security records information concerning her Application for a permanent position with Westinghouse Hanford Company.
Do	ARCO/Advance Petroleum Distributing Co., Inc. Washington, DC.	RR304-13	Request for Modification/Rescission in the ARCO refund proceeding. If Granted: The July 22, 1991 Decision and Order (Case No. RF304-2942) issued to Advance Petroleum Dist. Co., Inc., regarding the firm's Application for Refund submitted in the ARCO refund proceeding would be modified.
Do	ARCO/C & C Oil Company, Inc. Washington, DC	RR304-14	Request for Modification/Rescission in the ARCO refund proceeding. If Granted: The July 16, 1990 Decision and Order (Case No. RF304-2373) issued to C & C Oil Company, Inc., regarding the firm's Application for Refund submitted in the ARCO refund proceeding would be modified.
Do	ARCO/Delmarva Oil, Inc. Washington, DC	RR304-18	Request for Modification/Rescission in the ARCO refund proceeding. If Granted: The May 9, 1989 Decision and Order (Case No. RF304-2583) issued to Delmarva Oil, Inc., regarding the firm's Application for Refund submitted in the ARCO refund proceeding would be modified.
Do	ARCO/J.E. Elledge Oil Company, Inc. Washington, DC	RR304-17	Request for Modification/Rescission in the ARCO refund proceeding. If Granted: The July 22, 1991 Decision and Order (Case No. RF304-2941) issued to J.E. Elledge Oil Company, Inc., regarding the firm's Application for Refund submitted in the ARCO refund proceeding would be modified.

List of Cases Received by the Office of Hearings and Appeals—Continued

[Week of November 8 through November 15, 1991]

Date	Name and location of applicant	Case No.	Type of submission
Do	ARCO/Kellam Energy, Inc. Washington, DC	RR304-15	Request for Modification/Rescission in the ARCO refund proceeding. If Granted: The October 30, 1989 Decision and Order (Case No. RF304-7567) issued to Kellam Energy, Inc., regarding the firm's Application for Refund submitted in the ARCO refund proceeding would be modified.
Do	ARCO/ Smith Oil Corporation Washington, DC	RR304-16	Request for Modification/Rescission in the ARCO refund proceeding. If Granted: The June 29, 1989 Decision and Order (Case No. RF304-2371) issued to Smith-Shafer Oil Company regarding the firm's Application for Refund submitted in the ARCO refund proceeding would be modified.
Do	ARCO/Smith-Shafer Oil Company Washington, DC	RF304-19	Request for Modification/Rescission in the ARCO refund proceeding. If Granted: The October 19, 1990 Decision and Order (Case No. RF304-2370) issued to Smith-Shafer Oil Company regarding the firm's Application for Refund submitted in the ARCO refund proceeding would be modified.
Do	Texaco/Lenny's Texaco Service Memphis, TN	RR321-85	Request for Modification/Rescission in the Texaco refund proceeding. If Granted: The September 20, 1991 Decision and Order (Case Nos. RF321-14910 and RF321-16752) issued to Lenny's Texaco regarding the firm's Application for Refund submitted in the Texaco refund proceeding would be modified.
Do	Texaco Oliver Brothers' Texaco West Haven, CT	RR321-84	Request for Modification/Rescission in the Texaco refund proceeding. If Granted: The March 22, 1991 Decision and Order (Case Nos. RF321-12536 and RF321-13874) issued to Oliver Brother's Texaco regarding the firm's Application for Refund submitted in the Texaco refund proceeding would be modified.

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATES: Comments must be submitted on or before January 21, 1992.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 260-2740.

SUPPLEMENTARY INFORMATION:

Office of Water

Title: National Operations and Maintenance Excellence Awards Program Questionnaire (ICR #1287.03.)

Abstract: ICR 1287.03 describes the information requirements associated with the National Operations and Maintenance Excellence Award Program. Under this program, to encourage compliance with wastewater treatment regulations, EPA presents awards to communities with outstanding wastewater plant operations and maintenance.

Municipal officials seeking consideration of their facilities for an award must complete an application questionnaire and may also complete an optional effluent data reporting form. The questionnaire covers facility identification information as well as descriptions of the facilities operations and maintenance. State officials screen the applications and submit them to the EPA Regional Offices. Each Regional Office may then select one facility for each of nine Regional award categories. The Regional Offices may also nominate recipients for National awards. At EPA Headquarters, the nominees' completed questionnaires are reviewed by a selection committee, which selects National award recipients and distributes awards.

Burden Statement: The average burden associated with the National Operations and Maintenance Excellence Award Program Questionnaire is two hours per response. This total includes time for searching existing data sources, and completing and reviewing the collection of information.

Respondents: Publicly-owned treatment works, States.

Estimated No. Of Respondents: 320.

Estimated Total Annual Burden on Respondents: 640 hours.

Frequency of Collection: Annually.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to: Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223Y), 401 M Street, SW., Washington, DC 20460.

and

Matt Mitchell, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th St., NW., Washington, DC 20503.

Dated: December 13, 1991.

Paul Lapsley,

Director, Regulatory Management Division.

Ambient Air Monitoring Reference and Equivalent Methods; Receipt of Application for a Reference Method Determination

Notice is hereby given that on November 19, 1991, the Environmental Protection Agency received an application from Dasibi Environmental Corporation, 8310 Capital of Texas Highway, Austin, Texas 78731, to determine if their Model 2108 Chemiluminescent Nitrogen Oxides Analyzer should be designated by the Administrator of the EPA as a reference method under 40 CFR part 53. If, after appropriate technical study, the Administrator determines that this method should be so designated, notice thereof will be given in a subsequent issue of the Federal Register.

Erich W. Bretthauer,

Assistant Administrator for Research and Development.

Public Water Supply Supervision Program; Program Revision for the State of Oregon

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: Notice is hereby given that the State of Oregon is revising its approved State Public Water Supply Supervision Primacy Program. Oregon has adopted drinking water regulations for total coliforms and the treatment of surface water. EPA has determined that these sets of State program revisions are no less stringent than the corresponding federal regulations. Therefore, EPA has tentatively decided to approve these State program revisions.

All interested parties may request a public hearing. A request for public hearing must be submitted by January 21, 1992 to the Regional Administrator at the address shown below. Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made by January 21, 1992, a public hearing will be held. If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on her own motion, this determination shall become final and effective January 21, 1992.

Any request for a public hearing shall include the following: (1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing; (2) a brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such hearing; and (3) the signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

ADDRESSES: All documents relating to this determination are available for inspection between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

Drinking Water Section, Oregon Health Division, 1400 SW 5th Avenue, Portland, Oregon 97201; and

Environmental Protection Agency, Region 10 Library, 1200 Sixth Avenue, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT: Wendy Marshall, EPA, Region 10, Drinking Water Programs Branch, at the Seattle address given above, telephone (206) 553-1890.

Dated: December 11, 1991.

Dana A. Rasmussen,

Regional Administrator.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared December 2, 1991 Through December 6, 1991 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260-5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 5, 1991 (56 FR 14096).

Draft EISs

ERP No. D-UAF-L11015-ID Rating LO, Air Force in Idaho Proposal, Mountain Home AFB Composite Wing Establishment, Modification of Airspace to Accommodate Air Force and Air National Guard Flying Activities and Air-to-Ground Training Range Establishment, Elmore County, ID.

Summary: EPA has reviewed the draft EIS and has no objection to the project.

ERP No. DS-AFS-L65137-AK Rating EC2, Tongass Land Management Plan Revision, New Information, Tongass National Forest, AK.

Summary: EPA expressed concerns regarding potential impacts to water quality from timber harvest, road construction, log transfer facilities and mining proposed in the management plan.

Final EISs

ERP No. F-AFS-K61113-CA, Stanislaus National Forest, Land and Resource Management Plan, Implementation, Alpine, Calaveras, Mariposa and Tuolumne Counties, CA.

Summary: Review of the Final EIS was not deemed necessary. No formal letter was sent to the agency.

ERP No. FS-AFS-K83000-CA, Plumas National Forest Prototype Project, Augmenting Snow Pack by Cloud Seeding Using Ground Based Dispensers, Additional Information, Implementation, Upper Feather River Basin, Plumas and Sierra Counties, CA.

Summary: Review of the Final EIS was not deemed necessary. No formal letter was sent to the agency.

Dated: December 17, 1991.

Underground Injection Control Program; Hazardous Waste Disposal Injection Restrictions; Petition for Exemption—Class I Hazardous Waste Injection; Hoechst Celanese Chemical Group, Incorporated

AGENCY: Environmental Protection Agency.

VOL
56
ISS
245
DE
20
1991
UMI

ACTION: Notice of final decision petition reissuance.

SUMMARY: Notice is hereby given that a reissuance to an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to Hoechst Celanese Chemical Group, Incorporated, for the Class I injection wells located at Bay City, Texas. As required by 40 CFR part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the underground injection by Hoechst Celanese Chemical Group, Incorporated, of the specific restricted hazardous waste identified in the petition reissuance, into the Class I hazardous waste injection wells at the Bay City, Texas facility specifically identified in the reissued petition, for as long as the basis for granting an approval of this petition remains valid, under provisions of 40 CFR 148.24. As required by 40 CFR 124.10, a public notice was issued October 3, 1991. The public comment period ended on November 18, 1991. All comments have been addressed and have been considered in the final Agency action and there is no Administrative appeal.

DATES: This action is effective as of December 11, 1991.

ADDRESSES: Copies of the reissued petition and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region 6, Water Management Division, Water Supply Branch (6W-SU), 1445 Ross Avenue, Dallas, Texas 75202-2733.

FOR FURTHER INFORMATION CONTACT: Oscar Cabra, Jr., Chief Municipal Facilities Branch, EPA—Region 6, telephone (214) 655-7110, (FTS) 255-7110.

Expert Panel on the Role of Science at EPA; Notice of Open Meeting

Under Public Law 92-463, notice is hereby given that the Expert Panel on the Role of Science at EPA will hold a public meeting on January 6, 1992, at the Loew's L'Enfant Plaza Hotel, 480 L'Enfant Plaza SW., Washington, DC. The meeting will begin at 1:30 p.m. and will end at 2:30 p.m.

The purpose of the meeting will be to discuss the findings and recommendations which the Panel plans to include in its report to the Administrator on the role of science at EPA, and to receive comments from members of the public. Any member of the public wishing to attend the meeting, present an oral statement, or submit a written statement should contact Gail Robarge, Office of Research and development (H-8105), U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, (202) 260-7669. For further information concerning the Panel or its activities, please contact Ms. Wendy Cleland-Hamnett, Designated Federal Official to the Panel, Office of the Administrator (A-101), U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, (202) 260-4724. Seating is limited due to the size of the room and will be on a first come basis.

Dated: December 16, 1991.

Wendy Cleland-Hamnett,

Special Assistant to the Administrator.

Policy Dialogue Committee on Mining Wastes; Notice of Open Meeting

AGENCY: Environmental Protection Agency.

ACTION: FACA Committee Meeting—Policy Dialogue Committee on Mining Wastes.

SUMMARY: As required by Section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), we are giving notice of the date and location of the January meeting of the Policy Dialogue Committee on Mining Waste. The purpose of the meeting is to further discuss the key elements of a mine waste program. The meetings are open to the public without advance registration. An opportunity for public comment will be offered at the end of each day of meeting.

DATES: The January meeting will be held on January 23, 1991 from 9 a.m. to 6 p.m. and on January 24, 1991 from 9 a.m. to 3 p.m.

ADDRESSES: The January meeting will be held at the Radisson Inn Maingate, 7501 U.S. 192 West, Kissimmee, Florida.

FOR FURTHER INFORMATION CONTACT: Persons needing further information on substantive aspects of the mining waste program should call Steve Hoffman, Office of Solid Waste, U.S. EPA, (703) 308-8413. Summaries of previous meetings will be made available upon written request to Patricia Whiting, Office of Solid Waste, (OS-323W), Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Persons needing further information on administrative matters such as committee arrangement or procedures should contact Deborah Dalton, EPA Consensus and Dispute Resolution Program, (202) 382-5495 or the Committee's facilitator, John Ehrman, The Keystone Center, (303) 468-5822.

Dated: December 17, 1991.

Deborah Dalton,

Designated Federal Official, Deputy Director, Consensus and Dispute Resolution Program, Office of Policy, Planning and Evaluation.

Notice of Proposed Administrative Settlement Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act, as Amended by the Superfund Amendments and Reauthorization Act

AGENCY: Environmental Protection Agency.

ACTION: Notice; Request for Public Comment.

SUMMARY: In accordance with section 122(i) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended by the Superfund Amendments and Reauthorization Act ("CERCLA"), notice is hereby given that a proposed administrative cost recovery settlement concerning the Southern Pacific Transportation Company Roseville, California rail yard site was issued by the Agency on November 15, 1991. The settlement resolves an EPA claim under Section 107 of CERCLA against the Southern Pacific Transportation Company ("Southern Pacific"). The settlement requires Southern Pacific to pay at least $530,574.30 to the Hazardous Substances Superfund. Although the response costs incurred by EPA for this site exceed $500,000, EPA may settle this matter without the prior written approval of the Attorney General because EPA is not compromising its claim.

For thirty (30) days following the date of publication of this notice, the Agency will receive written comments relating to the settlement. The Agency's response to any comments received will be available for public inspection at EPA Region 9 offices located at 75 Hawthorne Street, San Francisco, California.

DATES: Comments must be submitted on or before January 21, 1992.

ADDRESSES: The proposed settlement and additional background information relating to the settlement are available for public inspection at EPA Region 9 offices located at 75 Hawthorne Street, San Francisco, California 94105. A copy of the proposed settlement may be obtained at the same address from Elaine Yee (Mail Code: H-7-4), telephone (415) 744-2415. Comments should reference the Southern Pacific Transportation Company Roseville, California facility and EPA Docket No. 92-03 and should be addressed to Elaine Yee (Mail Code: H-7-4) at the above address.

FOR FURTHER INFORMATION CONTACT: Betsy Curnow (415) 744-2378.

Dated: December 2, 1991.

Jeff Zelikson,

Director, Hazardous Waste Management Division, EPA Region 9.

BILLING CODE 6560-50-M

[OPTS-140168; FRL 4009-2]

Science Applications International Corporation; Access to Trade Secret Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized Science Applications International Corporation, of Falls Church, VA, for access to information submitted to EPA pursuant to sections 303, 311, 312, 313, and 322 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA), also known as Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). Some of the information may be claimed or determined to be trade secret information.

DATES: Access to the trade secret information submitted to EPA will occur no sooner than December 31, 1991.

FOR FURTHER INFORMATION CONTACT: Steven D. Newburg-Rinn, Chief, Public Data Branch, Information Management Division, Office of Toxic Substances, Environmental Protection Agency, Rm. NE-G008, Mail Stop TS-793, 401 M St., SW., Washington DC 20460, Telephone: 202-260-3757.

SUPPLEMENTARY INFORMATION: Under EPCRA, industry must report information on the presence, use, production, and manufacture of certain chemicals to EPA. Under section 322 of EPCRA, facilities must send trade secrecy claims regarding their section 303, 311, 312, and 313 submittals to EPA. Under contract number 68-D1-0156, Science Applications International Corporation (SAIC), 7600-A Leesburg Pike, Falls Church, VA 22043, will assist the Office of Toxic Substances in processing the information submitted by industry in response to the requirements of sections 303, 311, 312, 313, and 322 of EPCRA. SAIC staff will conduct reviews of EPCRA submissions at the EPCRA Reporting Center where submissions are received and processed. SAIC will review selected submissions for technical accuracy and contact submitters regarding potential discrepancies.

EPA has determined that SAIC will require access to trade secret information under EPCRA to perform their contractual duties, and in doing so, SAIC personnel will sign nondisclosure agreements and follow all required security procedures.

EPA is issuing this notice to inform all submitters of trade secret information under the aforementioned EPCRA sections that EPA will provide SAIC personnel access to trade secret information on a need-to-know basis. All access to EPCRA trade secret information will take place at the EPCRA Reporting Center. Upon termination of their contract or prior to termination of their contract at EPA's request, SAIC will return all material to EPA.

Clearance to access to EPCRA trade secret information under this contract is scheduled to expire on September 30, 1994.

Dated: December 13, 1991.

Linda A. Travers,

Director, Information Management Division, Office of Toxic Substances.

[FR Doc. 91-30473 Filed 12-19-1991; 8:45 am]

BILLING CODE 6560-50-F

[OPTS-140167; FRL 4008-1]

Planning Research Corporation; Access to Trade Secret Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized Planning Research Corporation, and their subcontractor, Sycom, incorporated of Chantilly, VA, for access to information submitted to EPA pursuant to sections 303, 311, 312, 313, and 322 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA), also known as Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). Some of the information may be claimed or determined to be trade secret information.

DATES: Access to the trade secret information submitted to EPA will occur no sooner than December 31, 1991.

FOR FURTHER INFORMATION CONTACT: Steven D. Newburg-Rinn, Chief, Public Data Branch, Information Management Division, Office of Toxic Substances, Environmental Protection Agency, Rm. NE-G008, Mail Stop TS-793, 401 M St., SW., Washington DC 20460, Telephone: 202-260-3757.

SUPPLEMENTARY INFORMATION: Under EPCRA, industry must report information on the presence, use, production, and manufacture of certain chemicals to EPA. Under section 322 of EPCRA, facilities must send trade secrecy claims regarding their section 303, 311, 312, and 313 submittals to EPA. Under contract number 68-01-7361, Sycom, Incorporated (Sycom), 14523 Lee Road, Chantilly, VA 22021, as subcontractor to Planning Research Corporation, assists the Office of Toxic Substances, Information Management Division in design, development, implementation, and maintenance of the Toxic Chemical Release Inventory data base in response to the requirements of sections 303, 311, 312, and 313 of EPCRA. Specifically, Sycom maintains a data base, called the Toxic Chemical Release Inventory, and an associated document tracking system for the purpose of electronically storing data collected by the EPA in accordance with requirements of EPCRA section 313.

EPA has determined that Sycom requires access to trade secret information under EPCRA to carry out their contractual duties, and in doing so, Sycom personnel will sign nondisclosure agreements and follow all required security procedures.

EPA is issuing this notice to inform all submitters of trade secret information under the aforementioned EPCRA sections that EPA will provide Sycom personnel access to trade secret information on a need-to-know basis. All access to EPCRA trade secret information will take place at the EPCRA Reporting Center. Upon termination of their contract, or prior to

VOL 56 ISS 245 DEC 20 1991 UMI

termination of their contract at EPA's request, Sycom will return all material to EPA.

EPA announced clearance to access to EPCRA trade secret information by Planning Research Corporation and Sycom in notices published in the **Federal Register** of June 10, 1988 (53 FR 21916), and September 23, 1991 (56 FR 47959). The latter notice indicated that clearance to access under this contract was expected to expire December 31, 1991. Pursuant to this notice, access to clearance to EPCRA trade secret information under this contract is extended and expected to expire on March 31, 1992. Clearance to access under this notice will be extended for so long as Sycom continues to perform the duties described above pursuant to any contract renewal or other existing contract.

Dated: December 13, 1991.

Linda A. Travers,

Director, Information Management Division, Office of Toxic Substances.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

December 13, 1991.

The Federal Communications Commission has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of this submission may be purchased from the Commission's copy contractor, Downtown Copy Center, 1114 21st Street, NW., Washington, DC 20036, (202) 452-1422. For further information on this submission contact Judy Boley, Federal Communications Commission, (202) 632-7513. Persons wishing to comment on this information collection should contact Jonas Neihardt, Office of Management and Budget, room 3235 NEOB, Washington, DC 20503, (202) 395-4814.

OMB Number: 3060-0050.

Title: Application for Ship Radio Inspection or Survey.

Form Number: FCC Form 801.

Action: Revision.

Respondents: Businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting.

Estimated Annual Burden: 4,000 responses; .25 hours average burden per response; 1,000 hours total annual burden.

Needs and Uses: The FCC Form 801 is used by licensees to request an inspection of their shipboard radio service and to provide the inspecting office with necessary data to perform the inspection. The revision to this information collection is to incorporate fee processing data into the form. The information is used by FCC personnel to determine if radio stations on-board ships meet required specifications to guarantee public safety, when it is determined that all required specifications are met, a safety certificate is issued.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Statement of Policy on EDP Examination, Scheduling, and Report Distribution; Rescission of Statement of Policy

AGENCY: Federal Deposit Insurance Corporation ("FDIC").

ACTION: Notice of Rescission of Statement of Policy.

SUMMARY: This notice rescinds the policy statement concerning EDP examination, scheduling, and report distribution adopted by the FDIC Board of Directors on June 9, 1978 (43 FR 25739, June 14, 1978), as amended on April 23, 1979 (44 FR 26794, May 7, 1979).

EFFECTIVE DATE: December 20, 1991.

FOR FURTHER INFORMATION CONTACT: Stephen A. White, Review Examiner (EDP), Compliance and Special Review Section, Division of Supervision, FDIC, 550 17th Street, NW., Washington, DC 20429, telephone (202) 898-6923.

SUPPLEMENTARY INFORMATION: On September 12, 1991, the Task Force on Supervision of the Federal Financial Institutions Examination Council ("FFIEC") approved, under delegated authority, an EDP Interagency Examination, Scheduling and Distribution Policy. The Division of Supervision of the FDIC has determined that it is in its interest to adopt the FFIEC policy. The FDIC policy statement is no longer necessary and, therefore, is rescinded by the FDIC Board of Directors.

By order of the Board of Directors.

Dated at Washington, DC this 2nd day of December, 1991.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL MARITIME COMMISSION

Items Submitted for OMB Review

The Federal Maritime Commission hereby gives notice that the following items have been submitted to OMB for review pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3601, et. seq.). Requests for information, including copies of the collection of information and supporting documentation, may be obtained from Norman W. Littlejohn, Director, Bureau of Administration, Federal Maritime Commission, 1100 L Street, NW., room 12211, Washington, DC 20573, telephone number (202) 523-5866. Comments may be submitted to the agency and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: Desk Officer for the Federal Maritime Commission, within 15 days after the date of the **Federal Register** in which this notice appears.

Summary of Items Submitted for OMB Review

46 CFR Part 550—Publishing, Filing and Posting of Tariffs in Domestic Offshore Commerce

FMC requests an extension of clearance for 46 CFR 550 which provides tariff filing rules for common carriers in the domestic offshore commerce, pursuant to the Shipping Act, 1916, and the Intercoastal Act, 1933. The rule requires that carriers file and keep open for public inspection a schedule of their rates and charges for the transport of cargo. The Commission estimates an annual respondent universe of 168, with a total estimated annual 3,375 manhour burden. Total cost to the Federal Government is estimated at $192,300; total cost to respondents is estimated at $50,200.

46 CFR Part 552—Financial Reports of Vessel Operating Common Carriers by Water in the Domestic Offshore Trades and Related Forms FMC-377 and FMC-378

FMC requests an extension of clearance for regulations which establish methodologies to be used in evaluating rates filed by vessel operating common carriers in the domestic offshore trades who are subject to the Intercoastal Shipping Act, 1933. Total estimated annual burden for 13 tug and barge operators and 20 self-propelled operators is 2559.6 manhours. Total estimated annual cost to the Federal Government is approximately $19,100; total estimated annual cost to respondents is approximately $50,400.

46 CFR Part 553—Financial Exhibits and Schedules of Non-Vessel-Operating Common Carriers in the Domestic Offshore Trades and Related Form FMC-379

FMC requests extension of clearance for regulations which will facilitate the orderly acquisition of data required in those instances where the Commission institutes an investigation and hearing with respect to proposed rate changes by non-vessel operating common carriers in the domestic offshore trades subject to the Shipping Act, 1933. No reports have been received in the past eleven years, therefore, the Commission is estimating a potential estimated

VOL 56 ISS 245 DEC 20 1991 UMI

respondent universe of 10 NVOCCs with an estimated 150 manhours per year. The annual cost to the Federal Government and respondents is nominal because there is no reason to believe that a significant number of reports will be received during the renewal period.

Joseph C. Polking,

Secretary.

Organization and Functions of the Federal Maritime Commission; C.O. 1, Amdt. No. 17

The following delegation of authority is made to the Director, Bureau of Tariffs, Certification and Licensing, by amending Commission Order 1, section 9, as revised, Specific Authorities Delegated to the Director, Bureau of Tariffs, Certification and Licensing by adding subsection 9.15 to read as follows:

9.15 Authority contained in 46 CFR part 581 to approve requests for permission to correct clerical or administrative errors in the essential terms of filed service contracts. Any proposed denial of such a request shall be forwarded to the Commission for its review and action.

Dated: December 16, 1991.

Christopher L. Koch,

Chairman.

BILLING CODE 6730-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 91N-0501]

Drug Export: HibTITER® Haemophilus B Conjugate Vaccine

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Praxis Biologics, Inc., has filed an application requesting approval for the export of the biological product HibTITER® Haemophilus B Conjugate Vaccine (Diphtheria CRM_{197} Protein Conjugate) indicated for the immunization of children 2 months to 59 months of age against invasive disease caused by *Haemophilus influenzae* Type B to Canada.

ADDRESSES: Relevant information on this application may be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human biological products under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

FOR FURTHER INFORMATION CONTACT: Boyd Fogle, Jr., Center for Biologics Evaluation and Research (HFB-120), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8191.

SUPPLEMENTARY INFORMATION: The drug export provisions in section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provide that FDA may approve applications for the export of biological products that are not currently approved in the United States. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Praxis Biologics, Inc., 30 Corporate Woods, Suite 300, Rochester, NY 14623, has filed an application requesting approval for the export of HibTITER® Haemophilus B Conjugate Vaccine (Diphtheria CRM_{197}) Protein Conjugate) indicated for the immunization of children 2 months to 59 months of age against invasive disease caused by *Haemophilus influenzae* Type B to Canada. The HibTITER® Haemophilus B Conjugate Vaccine (Diphtheria CRM_{197} Protein Conjugate) is a sterile solution of a conjugate of oligosaccharides of the capsular antigen of *Haemophilus influenzae* Type B (haemophilus B) and diphtheria CRM_{197} protein (CRM_{197}) dissolved in 0.9 percent sodium chloride.

The application was received and filed in the Center for Biologics Evaluation and Research on November 13, 1991, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by December 30, 1991, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Biologics Evaluation and Research (21 CFR 5.44).

Dated: December 6, 1991.

Thomas S. Bozzo,

Director, Office of Compliance, Center for Biologics Evaluation and Research.

[FR Doc. 91-30423 Filed 12-19-91; 8:45 am]

BILLING CODE 4160-01-M

Advisory Committees; Notice of Meetings

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

MEETINGS: The following committee meetings are announced:

Biological Response Modifiers Advisory Committee

Date, time, and place. January 16, 1992, 10 a.m., and January 17, 1992, 8:30 a.m., Bethesda Holiday Inn, Versailles Ballrooms II, III, and IV, 8120 Wisconsin Ave., Bethesda, MD.

Type of meeting and contact person. Open public hearing, January 16, 1992, 10 a.m. to 10:30 a.m., unless public participation does not last that long; open committee discussion, 10:30 a.m. to 4:30 p.m.; closed committee deliberations, January 17, 1992, 8:30 a.m. to 9:30 a.m.; open public hearing, 9:30 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 4:30 p.m.; Anna J. Baldwin, Center for Biologics Evaluation and Research (HFB-5), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4695.

General function of the committee. The committee reviews and evaluates data relating to the safety, effectiveness, and appropriate use of biological response modifiers which are intended for use in the prevention and treatment of a broad spectrum of human diseases.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before January 9, 1992, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. On January 16, 1992, the committee will discuss the use of Oncoscint® (Cytogen Corp.) for the diagnosis of primary and recurrent ovarian carcinoma. On January 17, 1992, the committee will discuss the use of interleukin-2 (Cetus Corp.) for the treatment of metastatic renal cell carcinoma.

Closed committee deliberations. On January 17, 1992, the committee will discuss trade secret or confidential commercial information relevant to pending product license applications in the Center for Biologics Evaluation and Research. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Arthritis Advisory Committee

Date, time, and place. January 23, 1992, 9 a.m., and January 24, 1992, 8:30 a.m., Conference Rms. G, H, and I, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD 20857.

Type of meeting and contact person. Open public hearing, January 23, 1992, 9 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 5 p.m.; closed committee deliberations, January 24, 1992, 8:30 a.m. to 4 p.m.; Khairy W. Malek, Center for Drug Evaluation and Research, HFD-9, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3741.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in arthritic conditions.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before January 9, 1992, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. On January 23, 1992, the committee will discuss investigational new drug application (IND) IND 31-135/new drug application (NDA) NDA 20-202 for 8-methoxypsoralen/photopheresis for scleroderma (sponsors are Therakos and ICN/Viratek).

Closed committee deliberations. On January 24, 1992, the committee will review and discuss trade secrets and/or confidential information relevant to IND's 30-150 and 22-545. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Ophtalmic Devices Panel of the Medical Devices Advisory Committee

Date, time, and place. January 23 and 24, 1992, 9 a.m., Auditorium, first floor, Hubert H. Humphrey Bldg., 200 Independence Ave. SW., Washington, DC.

Type of meeting and contact person. Open public hearing, January 23, 1992, 9 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 3 p.m.; closed committee deliberations, 3 p.m. to 4 p.m.; open committee discussion 4 p.m. to 5 p.m.; open public hearing, January 24, 1992, 9 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion; 10 a.m. to 3 p.m.; closed committee deliberations, 3 p.m. to 4 p.m.; open committee discussion, 4 p.m. to 5 p.m.; Daniel W.C. Brown, Center for Devices and Radiological Health (HFZ-460), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301-427-1080.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of marketed and investigational devices and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before January 9, 1992, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. On January 23, 1992, the committee will discuss general issues relating to approvals of premarket approval applications (PMA's) for intraocular lenses. If discussion of all intraocular lenses and other pertinent issues is not completed on January 23, 1992, discussion will be continued on January 24, 1992. On January 24, 1992, the committee will discuss issues relating to approvals of PMA's for class III surgical and diagnostic devices. Also, there will be a generic discussion and contact lens issues.

Closed committee deliberations. The committee may discuss trade secret and/or confidential commercial information relevant to PMA's for contact lenses, surgical and diagnostic devices, or other ophthalmic devices. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Vaccines and Related Biological Products Advisory Committee

Date, time, and place. January 30, 1992, 8:30 a.m., National Institutes of Health, Bldg. 1, Wilson Hall, 9000 Rockville Pike, Bethesda, MD.

Type of meeting and contact person. Open public hearing, 8:30 a.m. to 9:30 a.m., unless public participation does not last that long; open committee discussion, 9:30 a.m. to 1:30 p.m.; closed committee deliberations, 1:30 p.m. to 5 p.m.; Jack Gertzog, Center for Biologics Evaluation and Research (HFB-5), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20850, 301-443-5455.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of vaccines intended for use in the diagnosis, prevention, or treatment of human diseases.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before January 16, 1992 and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss influenza vaccine formulation for the 1992 and 1993 flu season.

Closed committee deliberations. The committee will review trade secret and/or confidential commercial information relevant to a pending IND. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Obstetrics and Gynecology Devices Panel of the Medical Devices Advisory Committee

Date, time, and place. January 31, 1992, 8 a.m., Holiday Inn Crown Plaza, Plaza Ballroom, 1750 Rockville Pike, Rockville, MD. If room reservations are made at the Holiday Inn Crown Plaza, please reference group number 8618 to obtain a special group rate.

Type of meeting and contact person. Open public hearing, 8 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 4:30 p.m.; closed presentation of data, 4:30 p.m. to 5 p.m.; Colin M. Pollard, Center for Devices and Radiological Health (HFZ-470), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301-427-1194.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of marketed and investigational devices and makes recommendations for their regulations.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before January 17, 1992 and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss a PMA for a barrier contraceptive device worn by women that also is intended to prevent the transmission of sexually transmitted diseases. The committee may or may not also discuss a PMA for a home uterine activity monitor.

Closed presentation of data. The committee may discuss trade secret and/or confidential commercial information regarding these devices. This portion of the meeting will be

VOL 56 ISS 245 DEC 20 1991 UMI

closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (subpart C of 21 CFR part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this Federal Register notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

The agenda, the questions to be addressed by the committee, and a current list of committee members will be available at the meeting location on the day of the meeting.

Transcripts of the open portion of the meeting will be available from the Freedom of Information Office (HFI-35), Food and Drug Administration, Rm. 12A-16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857, approximately 15 working days after the meeting, between the hours of 9 a.m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting will be available from the Freedom of Information Office (address above) beginning approximately 90 days after the meeting.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA) (5 U.S.C. App. 2, 10(d)), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instance not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; and review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably deliberative session to formulate advice and recommendations to the agency on matters that do not independently justify closing.

This notice is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (5 U.S.C. App. 2), and FDA's regulations (21 CFR part 14) on advisory committees.

Dated: December 17, 1991.

David A. Kessler,

Commissioner of Food and Drugs.

BILLING CODE 4160-01-M

National Institutes of Health

Meeting Correction

On November 15, 1991 (56 FR 58069), the National Institutes of Health (NIH) published a notice of meeting in the Federal Register announcing a public hearing on December 11, 1991, conducted by a subcommittee of the Advisory Committee of the Director, NIH, to receive input about the working document titled "Management of Research Costs: Indirect Costs." The previous notice is hereby corrected to state that the public hearing scheduled on December 11 will be conducted by a panel of Federal employees representing the NIH and the Department of Health and Human Services.

Dated: December 9, 1991.

Bernadine Healy,

Director, NIH.

BILLING CODE 4160-01-M

Public Health Service

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Public Health Service (PHS) publishes a list of information collection requests it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). The following requests have been submitted to OMB since the list was last published on November 22, 1991.

(Call PHS Reports Clearance Officer on 202-245-2100 for copies of request.)

1. Survey of Physicians Receiving Training From Regional Aids Education and Training Centers—New—A national survey of physicians trained at Regional Aids Education and Training Centers will be conducted to determine residual barriers and impediments to physician involvement in care of patients with Human Immunodeficiency Viral (HIV) disease. This information will be used to plan and develop future medical education strategies and programs. Respondents: Individuals or households; Number of Respondents: 800; Number of Responses per Respondent: 1; Average Burden per Response: .25 hours; Estimated Annual Burden: 200 hours.

2. AIDS Cost and Services Utilization Survey—0937-0190—This survey will obtain health care resources utilization, cost and insurance information from patients with AIDS and other HIV-related illnesses across the country and from their providers. Data will be used to estimate total resources used by patients and variations in patterns of use in order to guide policymakers in decisions regarding allocations of resources. Respondents: Individuals or households, businesses or other for-profit, non-profit institutions, small businesses or organizations.

	Number of respondents	Number of responses per respondent	Number of hours per response
Patient survey	2,094	4	.45
Providers	2,523	1	.59

Estimated annual burden: 5,257 hours.

OMB Desk Officer: Shannah Koss-McCallum.

Written comments and recommendations for the proposed information collections should be sent within 30 days of this notice directly to the OMB Desk Officer designated above at the following address: Human Resources and Housing Branch, New Executive Office Building, room 3002, Washington, DC 20503.

Date: December 13, 1991.

Sandra K. Mahkorn,

Deputy Assistant Secretary for Public Health Policy.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N-91-1917; FR-2934-N-57]

Federal Property Suitable as Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

ADDRESSES: For further information, contact James N. Forsberg, room 7262, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410; telephone (202) 708-4300; TDD number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), or call the toll-free title V information line at 1-800-927-7588.

SUPPLEMENTARY INFORMATION: In accordance with 24 CFR 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administration*, No. 88-2503-OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Judy Breitman, Division of Health Facilities Planning, U.S. Public Health Service, HHS, room 17A-10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443-2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 56 FR 23789 (May 24, 1991).

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1-800-927-7588 for detailed instructions or write a letter to James N. Forsberg at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the Federal Register, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: U.S. Army: Robert Conte, Dept. of Army, Military Facilities, DAEN-ZCI-P; rm. 1E671, Pentagon, Washington, DC 20310-2600; (202) 693-4583; (This is not a toll-free number.)

Correction: Property Number 549120003 published in the Notice on December 6, 1991, is now leased.

Dated: December 12, 1991.

Paul Roitman Bardack,

Deputy Assistant Secretary for Economic Development.

TITLE V, FEDERAL SURPLUS PROPERTY PROGRAM; FEDERAL REGISTER REPORT FOR 12/20/91

Suitable/Available Properties

Buildings (by State)

Alabama
